A concurrent issue before EPA was what level of emission control could or should be required under section 112. Section 112 provides that the Administrator shall set an emission standard "at the level which in his judgment provides an ample margin of safety to protect the public health from such hazardous air pollutants." The problem presented was how this provision should be interpreted when dealing with an apparent non-threshold pollutant that is hazardous at some level. The term "non-threshold pollutant" refers to a substance which creates a risk of adverse health effects at all ambient levels (other than zero). An "apparent non-threshold pollutant" is, quite simply, a substance which, on the basis of available information, appears to be a non-threshold pollutant. An apparent non-threshold pollutant may be known to be "hazardous" within the definition of section 112 at some levels, and create a risk to public health at all levels. Vinyl chloride is such a pollutant. It clearly causes angiosarcoma, other cancers, and noncarcinogenic disorders in animals, which have been experimentally exposed to vinyl chloride, and in people with occupational exposure. However, an emission standard for vinyl chloride cannot be established below a threshold level of effects because no dose-response data are available for the concentrations of vinyl chloride found in the ambient air. Further, it is EPA's position that for a carcinogen it should be assumed, in the absence of strong evidence to the contrary, that there is no atmospheric concentration that poses absolutely no public health risk. The issue was how far the level of such pollutants should be reduced to provide "an ample margin of safety."

EPA considered that section 112 might be interpreted to require a complete prohibition of emissions of any apparent non-threshold pollutant. This zero emission limitation would be the only emission standard which would offer absolute safety from ambient exposure. This interpretation was rejected, however, and EPA has determined that, in some cases, prohibition of all emissions of apparent non-threshold pollutants is not required under section 112. This determination is based on the following considerations.

Complete prohibition of all emissions could require closure of an entire industry. This would occur in a case such as vinyl chloride where there is no technology to achieve a zero emission limitation and development of such technology is not foreseen. Closure would result in extensive economic costs in some cases, such as when the affected industry is of large size or there are no available substitutes for the products produced. The costs of a prohibition in some cases would be extremely high for elimination of a risk to health that is of unknown dimensions. Banning production of vinyl chloride and polyvinyl chloride would have a negative impact on the producing companies, especially on the three or four companies which, according to EPA's evaluation, are highly dependent on sales of vinyl chloride and polyvinyl chloride and might therefore be expected to fail if vinyl chloride and polyvinyl chloride production were banned. There would be an even greater impact on unemployment at the approximately 8,000 fabrication plants which depend at least partially on polyvinyl chloride as a raw material. This impact would persist unless and until these plants could adapt their equipment to manufacturing substitutes. With regard to the consumer, there are substitutes for about 85 percent by weight of the uses of polyvinyl chloride, but these substitutes would generally not be available for at least two years, would generally be more expensive than polyvinyl chloride products, and would not necessarily have some of the desirable characteristics, such as nonflammability, of polyvinyl chloride. In view of the beneficial uses of vinyl chloride products for which desirable substitutes are not readily available, the potentially adverse health and environmental impacts from substitutes which have not been thoroughly studied, the number of employees, particularly in fabrication industries, who would become at least temporarily unemployed, and the availability of control technology which is capable of substantially reducing emissions of vinyl chloride into the atmosphere, EPA concluded that setting zero emission limits would be neither desirable nor necessary.

An alternative interpretation of section 112 is that it authorizes setting emission standards that require emission reduction to the lowest level achievable by use of the best available control technology in cases involving apparent non-threshold pollutants, where complete emission prohibition would result in widespread industry closure and EPA has determined that the cost of such closure would be grossly disproportionate to the benefits of removing the risk that would remain after imposition of the best available control technology. EPA recognizes that consideration of technology in standard setting is not explicitly provided for under section 112. Congress never discussed the particular problem associated with apparent non-threshold pollutants. EPA, however, believes that Congress did not intend to impose the costs associated with complete emission prohibition in every case involving such a pollutant. The best available control technology approach will produce the most stringent regulation of hazardous air pollutants short of requiring a complete prohibition in all cases. This interpretation of section 112 is the one which has been adopted for vinyl chloride. This approach was used in the case of asbestos, but has never been judicially tested. The purpose of the proposed standard is thus to minimize risk to public health by establishing an emission standard which will reduce emissions to the level attainable with best available control systems. An emission standard based on best available control technology will result in different total emission levels and different ambient air concentrations at different plants due to variations in plant sizes and configurations. However, it will further the protection of public health by minimizing the health risks to the people living in the vicinity of these plants and to any additional people who are exposed as a result of new construction.

Selection of Source Categories

There are two major source categories of vinyl chloride emissions: polyvinyl chloride plants (41 existing plants) which are responsible for approximately 85 percent of the total nationwide emissions and ethylene dichloride-vinyl chloride plants (17 existing plants) which are responsible for about 11 percent of the total emissions. Both of these source categories are covered by the proposed standard. (For the purpose of clarification, ethylene dichloride and vinyl chloride are typically produced at one plant, but this is not necessarily the case. The proposed standard would apply to plants which produce either ethylene dichloride or vinyl chloride as well as to plants which produce both.)

The remaining emissions are from about 8,000 polyvinyl chloride fabricating plants and several other miscellaneous sources. A monitoring program conducted by EPA at five fabricating plants indicated that ambient concentrations around the perimeter of these plants are almost negligible. At three of the plants, no vinyl chloride was detected, and where it was found, the highest concentration was 6 parts per billion (ppb). As far as can be determined, all vinyl chloride emissions from the fabricating plants are due to residual vinyl chloride

in the raw materials coming from the polyvinyl chloride plants. Consequently, vinyl chloride emissions from fabricating plants will be minimized indirectly as polyvinyl chloride plants, in response to the proposed standard and the OSHA standard, reduce vinyl chloride in these raw materials from as high as 1000 ppm to less than 10 ppm. For the foregoing reasons, EPA has concluded that no standard for fabricating plants is necessary at the present time.

Studies under contract to EPA have been conducted to identify miscellaneous sources, their emissions and possible control technology. For purposes of EPA action, sources of vinyl chloride emissions other than ethylene dichloride-vinyl chloride plants, polyvinyl chloride plants, and fabricating plants are classified as miscellaneous sources. In general, these sources either use vinyl chloride for purposes other than polyvinyl chloride production or processing, or produce vinyl chloride as a by-product. Preliminary reports indicate that there are 8 such plants and that they accounted for about 3 percent of the total estimated 1974 emissions from all sources. EPA is continuing its research on vinyl chloride emissions from miscellaneous sources. Although the proposed standard does not cover these sources, there is a possibility that EPA will conclude that regulations for them should be proposed at a later date. For the present, therefore, the proposed standard is applicable only to ethylene dichloride-vinyl chloride and polyvinyl chloride plants, which are the largest sources.

The proposed standard for polyvinyl chloride plants covers any plant where vinyl chloride alone or in combination with other materials is polymerized. Thus, the proposed standard includes plants which produce homopolymers in which vinyl chloride is the only polymerized constituent and/or copolymers, terpolymers, or any other polymers in which other raw materials in addition to vinyl chloride are polymerized. EPA considered exempting from the proposed standard plants (six of the approximately 41 existing plants) which produce a polymer in which vinyl chloride is less than 50 percent of the raw material polymerized. EPA decided not to exempt these plants from the proposed standard, because the total vinyl chloride emissions from a plant are more a function of the total quantity of vinyl chloride processed in the plant than the percent vinyl chloride contained in the resin. Furthermore, available data indicate that the processing equipment in these six plants is the same as in the plants producing resins with higher percentages of vinyl chloride, so that the same control technology can be applied and separate standards are not required. Since the available data on production of polyvinyl chloride resins containing less than 50 percent vinyl chloride are more limited than the data on the production of resins containing higher percentages of vinyl chloride, EPA urges all interested persons to submit factual data on the production of these resins during the comment period.

The proposed standard covers the production of ethylene dichloride only by oxychlorination of ethylene. Available data indicate that there are no vinyl chloride emissions from direct chlorination of ethylene.

As proposed the standard would apply to any ethylene dichloride-vinyl chloride or polyvinyl chloride facility, regardless of size. EPA recognizes that some small research and development facilities may exist where the emissions of vinyl chloride are insignificant and covering these facilities under the standard would be unnecessary and inappropriate; however, EPA does not have sufficient information available to clearly define which facilities should be excluded from the standard. EPA urges all interested persons to submit factual information during the comment period describing the size and operation of research and development facilities for ethylene dichloride-vinyl chloride and polyvinyl chloride, the emissions of vinyl chloride from these facilities, the amount of product produced and the disposition of the products.

Selection of Emission Points for Regulation

The sources of vinyl chloride emissions within typical ethylene dichloride-vinyl chloride and polyvinyl chloride plants and their relative contributions to total uncontrolled emissions are shown in Table 1.

Table I

Emission source:	Percent of total uncontrolled emissions at the average plant
(A) Ethylene dichloride-vinyl chloride plants:	
(1) Fugitive emission sources	27
(2) Ethylene dichloride purification	11
(3) Vinyl chloride formation and purification	54
(4) Oxychlorination reactor	8
	100
(B) Polyvinyl chloride plants:	
(1) Fugitive emission sources	39
(2) Reactor opening	3
(3) Relief valve discharge	5
(4) Stripper	8
(5) Monomer recovery system	13
(6) Sources following the stripper (slurry blend tanks, centrifuges, dryers, bulk storage, etc.)	32
	100

The proposed standard applies to all of the sources in ethylene dichloride-vinyl chloride and polyvinyl chloride plants. There are control technologies which have been used for each of the emission sources, and regulation of only some of the sources was determined to be less than best available control technology. Emissions from both normal operation and from relief discharges are to be regulated. Relief discharges are included because they cause short-term high level emissions which can be prevented in almost all cases.

Two sources of vinyl chloride need explanation. First, the reactor may, in some polyvinyl chloride plants, serve also as the stripper. When this is the case, the regulation controlling reactors is applicable. Second, the definition of stripper for all resins except bulk resins includes "in the slurry form" so that other vessels, e.g. silos, following this stage of the process will not be considered strippers. Likewise, the definition of stripper for bulk resins does not include silos.

The proposed standard also applies to all known fugitive emission sources, including equipment used for loading (or unloading) vinyl chloride monomer into transfer equipment from storage vessels, slip gauges, leakage from seals on pumps, compressors, and agitators, leakage from relief valves, manual venting of gases, opening of equipment such as for maintenance and inspection, flasks used in obtaining samples of vinyl chloride monomer, leakage from equipment, and in-process wastewater. Although the emissions from each of these sources when considered individually may appear relatively small, they are included in the proposed standard because when combined they represent a significant portion of the total plant emissions. Based on data reported to EPA by individual companies in the spring of 1974, fugitive emissions represented approximately 40 percent of the total emissions from polyvinyl chloride plants and approximately 25 percent of the total emissions from ethylene dichloride-vinyl chloride plants. In-process wastewater is included in the list of fugitive emission sources subject to the proposed standard because available data indicate that vinyl chloride contained in water exposed to the atmosphere is lost rather rapidly. Precise measurements have not been made to prove that this vinyl chloride is emitted to the air. However, data on the solubility of vinyl chloride in water indicate that this is likely to be the case.

For several of the fugitive emission sources, the proposed standard applies only to those pieces of equipment "in vinyl chloride service." This term is defined to exclude pieces of equipment such as pumps and storage containers which are used to handle materials other than vinyl chloride and which contain essentially no vinyl chloride.

Two fugitive emission sources which were considered for specific regulation but which are not included in the proposed standard as such are vacuum pumps and steam jets. It was concluded that a separate regulation is unnecessary because more general regulations are included which already cover vacuum pumps and steam jets. For example, steam jets used to displace vinyl chloride or other contaminants from equipment are covered by general regulations controlling the removal of vinyl chloride from equipment by any means.

Rationale for the Emission Limits

The purpose of the proposed standard is to minimize the risk to the public health by setting emission limits which will reduce emissions to the level attainable with the best available control technolcgy for each emission source in

V 4012475 DEC 24 75 XUM

ethylene dichloride-vinyl chloride and polyvinyl chloride plants. There are many technical decisions involved in developing a standard on the basis of "best available control technology." Therefore, EPA established two criteria for making these technical decisions as follows:

(a) First, the control technology must be in use in one or more plants in the chemical industry and be generally adaptable for use at the plants subject to the standard within the time allowed for compliance under section 112, and

(b) Second, costs were considered only when they were grossly disproportionate to the emission reduction achieved.

In this interpretation of best available control technology the degree of consideration of costs was limited. The proposed standard was adjusted for cost reasons only to avoid the large economic impact of industry closure and control costs that are grossly disproportionate to the emission reduction achieved. For example, the types of conceivable control measures which were rejected because they did not meet the established criteria for best available control technology included installing control technologies for which research is currently being conducted or is planned, but which have not been used commercially; placing a bubble around an industrial complex and venting all the air from the complex through an enormous control device; and installing double control measures, such as two incinerators in series, which could achieve a small increment in emission reduction at a disproportionately high cost. A fine balancing of costs against benefits was not undertaken.

A further comment on this interpretation is in order to reveal one other consideration that went into the decision on this matter. EPA recognizes that some sources may still have economic difficulties in meeting a standard based on best available control technology. EPA does not intend to guarantee that no facility will have to close in order to meet such a standard. It is intended only that EPA have an alternative to setting an emission prohibition standard which would force widespread closures.

In order to develop an emission standard for each of the sources in ethylene dichloride-vinyl chloride and polyvinyl chloride plants based on the guidelines which had been established for "best available control technology," data on control systems were obtained through requests for information under the authority of section 114 of the Clean Air Act, on-site observation of plant processes, consultation with industry representatives and control equipment vendors, one emission test, and two studies completed under contract to EPA.

Stack Emissions

The proposed standard limits emissions from all equipment used in the ethylene dichloride purification process and the vinyl chloride formation and purification processes in ethylene dichloride-vinyl chloride plants and from all reactors; strippers; containers for mixing, weighing and holding which precede the stripper; and monomer recovery systems in polyvinyl chloride plants to a concentration of 10 ppm vinyl chloride. The proposed standard also requires venting of captured fugitive emissions through a control system from which the concentration of vinyl chloride does not exceed 10ppm. In EPA's judgment, an outlet concentration of 10 ppm represents best available control technology for these sources and can be achieved by incineration, carbon adsorption, or solvent absorption. None of these control systems has been used by ethylene dichloride-vinyl chloride or polyvinyl chloride plants until recently, and then by only a few plants. Therefore, even though EPA has made a concentrated effort to obtain data on application of these control systems for reduction in vinyl chloride emissions, there are few data available demonstrating the effectiveness of these control systems when installed at ethylene dichloride-vinyl chloride or polyvinyl chloride plants. EPA did conduct a source test on one incinerator installed at an ethylene dichloride-vinyl chloride plant. The test demonstrated control to a level below the proposed limit of 10 ppm. One polyvinyl chloride producer has recently installed a carbon adsorption unit to control vinyl chloride emissions from the monomer recovery system and the blend tanks. During the time in which the unit has been operated, it has gone through more than 700 regenerating cycles, and the vinyl chloride content in the exit gas stream has been reported to be below 10 ppm. In addition, one vendor of activated carbon has submitted data from laboratory studies on the control of vinyl chloride by carbon adsorption. The vendor's conclusions from the studies, based on 15 cycles of operation, were that activated carbon readily adsorbs vinyl chloride in concentrations ranging from 50 ppm to over 300,000 ppm; 100 percent removal of vinyl chloride is technically feasible using dual beds of activated carbon; activated carbon saturated with vinyl chloride can be regenerated in-place using either steam or hot nitrogen to desorb the vinylchloride; and no polymerization of vinyl chloride occurs on the bed. Data are available for a solvent absorption unit which controls emissions from the monomer recovery system in a polyvinyl chloride plant to a concentration of 15 ppm; in EPA's judgment, however, this particular system, which is relatively old and was not designed specifically for vinyl chloride control, does not represent the full capability of solvent absorption in reducing vinyl chloride emissions. EPA believes, however, that an updated solvent adsorption unit, as well as an incinerator or a carbon adsorption unit, will be capable of meeting the proposed standard.

The proposed standard limits vinyl chloride emissions from the oxychlorination reactor in ethylene dichloride-vinyl chloride plants ot 0.02 kg/100 kg ethylene dichloride product. Based on individual plants' measurements of vinyl chloride reported to EPA under section 114 of the Clean Air Act, this emission level represents the best available control technology through control of process variables and can be met at most plants by maintaining operations so that the emission rate (kg/100 kg) does not increase. Incinerators or equivalent add-on control technology may have to be used to attain the proposed standard at a maximum of one existing plant which has relatively large emissions (in addition to a few companies which have already installed, or are already planning to install, incinerators).

EPA considered proposing an emission limit for the oxychlorination reactor representing best available control technology by incineration or equivalent control at all plants. This, in conjunction with the proposed emission limits for the other sources in ethylene dichloride-vinyl chloride plants, would reduce the total emissions from the average plant by 97 percent. Incineration has been demonstrated as a method of control for the three major emission sources in ethylene dichloride-vinyl chloride plants. The oxychlorination reactor, however, has a large volume, low hydrocarbon concentration effluent gas stream, and large quantities of supplemental fuel would be required for combustion of its emissions (296,000 million cu. ft. of gas/yr at an average plant). In comparison, combustion of emissions from the other two major emission points would require negligible supplemental fuel. One company has reduced the gas volume from the oxychlorination reactor and the associated energy costs by recycling the process gas stream using oxygen instead of air to feed into the process. A second company is also planning to install this technology. Although the recycling and oxygen feed methodology can be used for two types of oxychlorination reactors, further research would be needed to determine whether this technology can be used for each of the types of processes at all of the plants. A third company is conducting a pilot study on controlling the oxychlorination reactor emissions with catalytic oxidation, another method for reducing the high energy costs. This system has not been used commercially for the oxychlorination reactor, and it is not known at this time whether it will be technically feasible for the plants to use. The oxychlorination reactor represents a relatively small emission source (8 percent of the uncontrolled emissions) at an average plant. EPA concluded that the energy costs of incinerating the large volume, low concentration effluent gas stream from the oxychlorination reactor at the average plant would be grossly disproportionate to the emission reduction achieved, and the measures which are being used or studied for reducing the energy costs are not available for all of the types of oxychlorination processes. Thus, the alternative requiring incineration or equivalent control at all plants was rejected.

Since the oxychlorination reactor does contribute only a small percentage of the total emissions at an average plant, EPA also considered proposing no standard

for it at all. The proposed emission limits for the other two emission points and the fugitive emission sources would still reduce emissions by 90 percent at an average plant. Due to process variables, however, there is a wide range in the reported emissions from the oxychlorination reactor at the various plants from 0.0024 kg/100 kg to 0.106 kg/100 kg ethylene dichloride product (0.0024 lb/100 lb to 0.06 lb/100 lb). In terms of mass emissions per unit time, the emission rates vary between 0.5 to 46.3 kg/hr (1.2 to 103 lb/hr). In EPA's judgment, the energy costs associated with incineration of the emissions from the oxychlorination reactor would not be grossly disproportionate to the emission reduction achieved at those plants with the emission rates at the upper end of this range.

Thus, the proposed emission limit is essentially a cut-off point which requires the plants at the upper end of the range to reduce emissions preferably by instituting process changes, and if this is not possible, by installing incinerators or equivalent add-on control. Based on available data, emissions from the oxychlorination reactor at the majority of the existing plants meeting the proposed standard would be below 4.5 kg/hr (10 lb/hr) and the emissions from no plant would exceed 9.0 kg/hr (20 lb/hr). Although establishing the standard in this way does not result in as great an emission reduction as installation of incinerators or equivalent control for the oxychlorination reactor at all of the plants, the proposed standard is based on a consideration of costs only where the energy costs would be grossly disproportionate to the emission reduction achieved. Furthermore, as technologies using less energy for controlling the oxychlorination reactor are developed, EPA will evaluate the desirability of proposing standards which would require a higher degree of control at all plants.

The proposed standard limits, for polyvinyl chloride plants, the emissions from process equipment following the stripping operation in the manufacture of dispersion resins (except latex resins) to 0.2 kg/100 kg product and in the manufacture of all other resins (including latex resins) to 0.04 kg/100 kg product. One way in which these emission levels can be attained is by reducing the residual vinyl chloride monomer in dispersion resins to 2000 ppm or less and in all other resins to 400 ppm or less during the stripping operation. This reduction must be completed before the resins continue through the processing equipment following the stripper. This type of control is referred to as improved stripping technology. The proposed standard permits averaging of emissions to the extent that the vinyl chloride content in all grades of any one resin type completing the stripping operation at a plant site in one calendar day can be averaged over the 24 hour period. ["Resin type" refers to the broad classification of a resin according to the process by which it is manufactured (e.g. dispersion, suspension, bulk, latex, and solution). "Resin grade" is the subcategory of "resin type" which describes a resin as a unique resin, i.e. the most exact description of a resin with no further subdivision.] These emission levels can also be met by add-on control devices, such as incinerators. EPA discourages use of the add-on control devices, however, because unlike improved stripping they do not result in a lower vinyl chloride content in the polyvinyl chloride resin going to fabricating plants. Furthermore, these devices are far more energy consuming for these particular emission sources than improved stripping technology and achieve no more emission control. In fact, these devices have not been used commercially to control the emissions from most of this particular process equipment, because they are much more expensive for the plants to use than improved stripping technology. In EPA's judgment, however, there is no technical reason why they could not be applied.

In developing the proposed standard for process equipment following the stripper, it was necessary for EPA to make decisions concerning the levels of control which should be required for the various resin types and the desirability of allowing averaging among resin grades. Stripping technology has been used commercially at polyvinyl chloride plants in the past, but the technology has been designed to perform only to the extent necessary to recover raw materials for economic purposes rather than for emission reduction. More recently, as a result of the October 4, 1974, OSHA standard polyvinyl chloride resin producers have been motivated to develop stripping technology to reduce further the vinyl chloride content in resins during the stripping operation. By improving stripping technology producers will not only reduce in-plant exposure levels as required but will also satisfy fabricator demand for resins which have low concentrations of vinyl chloride and thus do not cause the fabricators to be in violation of the OSHA standard. Some companies have devoted more time and resources to improve the effectiveness of stripping as an emission control measure than have other companies. Optimum stripping consists of a set of operating conditions which must be developed experimentally on an individual basis for the many resins. Based on information supplied to EPA by individual companies which have devoted time and resources to develop improved stripping, EPA concluded that technology is currently available to strip the majority of resins, except dispersion resins, to 400 ppm or lower. This same degree of control is achievable through add-on devices.

Some resins are more difficult to strip than other resins due to differences in characteristics such as porosity and heat sensitivity. Whereas current stripping technology can reduce the residual vinyl chloride content in the majority of the resins other than dispersion resins to below 400 ppm (and in some cases far below 400 ppm), it can reduce the vinyl chloride content in a few resins only to levels as high as 4000 ppm. EPA considered proposing a separate standard based on best available control technology for each of the different grades of resin. This could have conceivably been done based on theoretical factors. However, EPA concluded that it would be difficult, if not impossible, to do this, because the reductions that can be achieved depend on a given system and must be determined by actual measurements on a particular resin for a particular set of conditions. The large number of resin grades makes it impractical for EPA to conduct individual testing for each one. Available data indicate that most of the companies produce several grades of resin simultaneously and that when the grades are averaged on a daily basis, the number of resins which can be stripped to lower than 400 ppm is sufficient to offset the few resins which cannot be. The proposed standard allows an averaging time of 24 hours because, if a plant were processing several grades simultaneously and one grade could not be stripped to 400 ppm, the total emissions from stripping all grades to an average of 400 ppm would be no greater than stripping each grade to 400 ppm. The alternative of increasing the averaging time to a week or month was rejected because this would permit higher peak emission levels than averaging on a 24-hour basis.

Since stripping technology is currently in the development stage, it is possible that lower levels of emissions will be achievable before promulgation of the proposed standard. Interested parties are invited to submit, during the comment period, factual data on the status of stripping technology. If data become available which warrant a substantial change in the level of the emission limitation, EPA will announce a revision to the proposed standard in the FEDERAL REGISTER and invite the public to comment on it. Interested persons are also invited to comment on the averaging concept included in the proposal, because EPA recognizes that permitting averaging across resin grades on a daily basis may give an advantage to the larger companies producing a number of resin grades each day.

A separate standard is being proposed for dispersion resins. EPA considered the alternative of proposing the standard so that dispersion resins would have to be stripped to the same level as other resins. For several reasons, however, technology to strip residual vinyl chloride monomer from dispersion resins has not been developed to the same degree as it has for other resins. First, information submitted to EPA under section 114 of the Act indicates that dispersion resins are more difficult to strip with conventional techniques than are other resins, because the higher temperatures which can be applied to other resins destroy the stability of dispersion resins and thus the quality of the product. Second, polyvinyl chloride producers have devoted more research and development time to improving conventional stripping for other resins than to developing new technology for dispersion resins, because dispersion resins represent only about 13 percent of the total production. Furthermore, the incentive to improve stripping to satisfy fabricator demands for low-monomer content product does not exist for dis-

V 401248 DEC 24 75 XUM

persion resins, because the product has always been low in monomer content as a result of loss of almost all of the residual monomer to the atmosphere during the drying operation which occurs after stripping. In general, the loss in drying dispersion resins is proportionately higher than in drying other resins. For these reasons, technology has not been demonstrated for stripping dispersion resins to the degree that the proposed standard requires other resins to be stripped to (400 ppm). Based on information received under section 114 of the Clean Air Act from individual companies on research and development of stripping technology for dispersion resins, it appears that the most optimistic company will not be able to achieve stripping to levels of 400 ppm for at least four years. Thus, EPA concluded that the time required for research and development of such technology far exceeds the maximum time allowed by section 112 for compliance (two years from the date of promulgation or two and a half years from the date of proposal). Furthermore, this level of control cannot be achieved in the manufacture of dispersion resins by add-on controls, and therefore no options to undeveloped stripping technology would be available for use by the plants. Therefore, this alternative could necessitate closure of dispersion resin plants until the controls could be developed. As already stated, EPA concluded that best available control technology rather than closure of plants would be the approach adopted for the proposed standard.

EPA also considered the alternative of proposing the standard to require a level of stripping which has been demonstrated for all dispersion resin grades at all plants; i.e., essentially no control of emissions from sources following the stripper. This alternative was rejected because, as has already been explained, the polyvinyl chloride companies have just recently begun to improve stripping technology for dispersion resins, and EPA determined that currently used techniques do not represent best control technology. Based on available data, it is judged that by the time the proposed standard must be implemented, improved stripping technology could be available for plants to use. If this alternative were selected as the basis for the proposed standard, it would provide no incentive to further develop existing stripping techniques to control emissions. Furthermore, although they are more costly in terms of energy, environmental, and economic impacts, add-on controls (e.g. incinerators) are available which could be used to reduce emissions to a much lower level than that represented by this alternative.

EPA, therefore, attempted to determine the degree of stripping which could be accomplished for dispersion resins by best control technology. Section 112 requires existing plants to comply with a standard within 90 days of promulgation, but it provides for waivers up to two years (two and a half years from proposal) for control if "steps will be taken during the period of waiver to assure that the health of persons will be protected from imminent endangerment." EPA therefore endeavored to determine the degree of control technology development that is likely over the next two and a half years. Under the authority of section 114 of the Act, EPA contacted the ten companies that manufacture dispersion resins and requested information regarding the degree to which these resins can be stripped with technology developed in the next two and a half years. Two of the companies do not plan to make dispersion resins in the future. Two of the companies responded that they could not reach levels below 6,000 ppm. However, some companies have devoted more time and resources to improve the effectiveness of stripping as an emission control measure than other companies. Three of the companies, which appeared to have devoted more time to research and development of stripping technology for dispersion resins, reported they would be able to strip all resin grades to levels of 2,000 ppm or lower. One of these companies is already stripping each of its resin grades to this level and another of the companies is stripping some of its resin grades to this level. A fourth company, which did not make any predictions, is also stripping some of its resin grades to a level of 2,000 ppm. The predictions of the other two companies ranged between 4,000 and 6,000 ppm depending on the resin grade. Based on information received from all companies that are known to make dispersion resins, it is EPA's judgment that, for dispersion resins, best available control technology through stripping can achieve levels of 2,000 ppm averaged, as for the other resins, on a 24-hour basis. Add-on control devices are capable of reducing emissions to a level equivalent to stripping to 2,000 ppm. Add-on control devices cannot reduce total mass emissions from the equipment following the stripper in dispersion plants as low as they can in the manufacture of other resins, due to the type of dryer which is used at these plants.

EPA considered proposing the standard to allow averaging of residual vinyl chloride concentrations in dispersion resins with those in other resins, so that a plant could compensate for higher levels in dispersion resins by stripping other resins to a lower level. This concept is judged to be inequitable because for some plants dispersion resins compose less than 5 percent of the total resin production and at other plants they compose 60 or more percent. EPA concluded that it would be more reasonable to recognize the significant differences between dispersion resins and other resins and require application of best available control technology to the processing of each.

EPA considered proposing a standard which would require the emissions from slurry blend tanks and inprocess wastewater from equipment following the stripping operation to be controlled by add-on devices as well as by improved stripping technology. One relatively new plant decreased the gas volume of the exit stream from slurry blend tanks by replacing air with nitrogen and enclosing the tanks. A carbon adsorption unit was then installed to control emissions in the reduced gas volume. Although it has not been done by any plant in the industry, there is no technical reason why the inprocess wastewater from centrifuges which follow the stripper cannot be controlled by a water stripper. Such control systems were included in the economic analysis conducted by EPA. The analysis showed that, if plants used improved resin stripping (as opposed to add-on controls) to meet the proposed standard, the costs of these additional systems for slurry blend tanks and inprocess wastewater would be grossly disproportionate to the emission reduction achieved. Based on available information on the emissions from slurry blend tanks after stripping has been used to reduce to 400 ppm the residual vinyl chloride content in the resin produced by an average plant, the addition of an add-on control device would further reduce emissions by approximately 0.5 kg/hr (1 lb/hr), i.e. the device would remove an additional 0.1 percent of the original uncontrolled emissions. Collecting the 0.5 kg/hr would increase the capital costs of control to an average plant by about 19 percent and the annual costs by about 13 percent. Similarly, the installation of an add-on control device in addition to improved stripping for the vinyl chloride in centrifuge water would reduce emissions by no more than the add-on control device for slurry blend tanks, and would increase the capital costs of control to an average plant by about 13 percent and the annual costs by 46 percent. The large increase in annual costs would be due to the large quantity of steam which would be required to remove the vinyl chloride from a large volume, low concentration water stream. Furthermore, if these additional controls were required, plants using add-on control technology would not be able to attain the same level of control as plants using improved stripping technology. The reason for this is that these plants would already be using add-on controls and installing additional add-on controls would have little, if any, effect.

The proposed standard limits the emissions of vinyl chloride from opening of reactors, reactor entry purge, venting inert gases from the reactor, and any other contact of the reactor contents with the abient air, to 0.001 kg/100 kg product. One way the standard may be attained is by a combination of (1) reducing the number of reactor openings by using high pressure water jets, solvent cleaning, or other means to prevent the need to hand-clean reactors and (2) displacing the vinyl chloride with water to a gasholder or recovery system before a reactor is opened. The level of the proposed standard is based on best available control technology as demonstrated by one plant, and there is no apparent reason why the same technology cannot be employed at other plants, except plants which produce bulk resins. This technology cannot be used for postpolymerization reactors in plants producing bulk resins for two reasons. First, the production of bulk resin is a dry process and water used to displace the vinyl chloride from the reactor before opening it would cause a contamination problem. Second, since the resin product is air conveyed from the postpolymerization reactor, the reactor is opened to the atmosphere after each batch. Manufacturers of bulk resins can achieve the level of the proposed standard by evacuating the reactor several times and breaking the vacuum with nitrogen. The number of evacuations would depend on the volume of gas in the reactor and the vacuum involved.

A zero emission limit is being proposed for relief discharges which can be prevented. In most cases, such discharges from reactors can be prevented by measures including, but not limited to, properly instrumenting the reactors to detect upset conditions, injecting chemicals to stop the polymerization reaction during upset conditions, venting the reactor contents to a gasholder during upset conditions and ultimately to a recovery system, providing employees with improved training on preventing and handling upset conditions, and utilizing a stand-by source of power. For other pieces of equipment, increasing pressure due to inert gases in the system can be relieved by manual venting to a gasholder or recovery system. The conditions which lead to discharges can also be prevented in most cases by proper handling and transfer of vinyl chloride or materials containing vinyl chloride. Discharges which cannot be avoided by taking such preventive measures, such as those caused by natural disasters, will not be in violation of the proposed standard if the owner or operator notifies EPA within 10 days concerning the nature and cause of the discharge. This notification provision is necessary to permit EPA to investigate the surrounding conditions and determine whether the discharge could have been prevented. For the purposes of the proposed standard, operator error is considered to be preventable.

Fugitive Emissions

The proposed standard includes emission limits for all known sources of fugitive emissions and is intended to minimize these emissions to the maximum extent possible with available control technology. Some of the emission limits are numerically defined. Where it is infeasible to state numerical limits, the standard specifies equipment and procedural requirements.

All of the equipment and procedures specified for reducing fugitive emissions, such as removal of vinyl chloride from loading and unloading lines and process equipment before exposure to the atmosphere, displacement of the contents of a sampling flask back to the process during sampling, and capture and control of the emissions, have been used by one or more ethylene dichloride-vinyl chloride or polyvinyl chloride plants and are described in plant responses to inquiries from EPA under the authority of section 114 of the Act.

For fugitive emissions, the proposed standard requires that the vinyl chloride concentration in process equipment greater than or equal to 5500 1 (1250 gal) in volume (other than reactors) be reduced to 2 percent by volume at standard pressure and temperature before the equipment is opened to the atmosphere. This can be accomplished by vacuum pump or by displacement with water or inert gases. For process equipment that is smaller than 5500 1 (1250 gal) in volume, the proposed standard requires that the amount of vinyl chloride in the equipment be reduced to 110 1 (25 gal) at standard pressure and temperature before opening the equipment to the atmosphere. Any vinyl chloride removed from the equipment would have to be ducted through a control system.

A cut-off point which requires that the vinyl chloride be reduced by a greater percentage in the larger pieces of equipment than in the smaller ones was established because: (1) the emissions from opening large equipment are much greater than from opening small equipment, even with the standard in effect, (2) the smaller equipment is not designed to use a vacuum or purge system to remove the vinyl chloride, and in some cases it is not designed to withstand pressure, and (3) at some point the vinyl chloride emissions from disconnecting the extensive equipment needed to remove vinyl chloride from every section of pipe or other piece of small equipment and transfer it to a control system would be greater than the emissions from opening the section of pipe or other small equipment.

The proposed standard includes a more stringent limitation for emissions from opening of reactors than it does for opening of other equipment. The emission limit for opening of reactors (0.001 kg/100 kg product) has already been discussed. The reason for the more stringent limitation for reactors is that, unlike other equipment, the reactors are typically opened on a frequent and routine basis.

The same reasoning explains why the proposed standard includes a separate emission limit for emissions to the atmosphere from disconnecting equipment (hoses, couplings, valves, etc.) used in the transfer of vinyl chloride from storage to transport vessels at ethylene dichloride-vinyl plants and from transport to storage vessels at polyvinyl chloride plants. Although the loading and unloading lines are relatively small in volume compared with some of the other equipment which can be opened to the atmosphere, they are used and disconnected on a frequent and routine basis; i.e., several times per day. The proposed emission limit for each loading and unloading line requires that after each loading or unloading operation before opening any part of the line to the atmosphere, the quantity of vinyl chloride in all parts of the line that are to be opened is to be reduced to 4.4 1 (1 gal), at standard temperature and pressure. Four and four tenths liters of vinyl chloride at standard temperature and pressure is equal to about 0.0098 kg (0.022 lb) of vinyl chloride.

The method for attaining the standard would depend on the volume of the equipment to be opened to the atmosphere. If an entire hose is to be disconnected and opened to the atmosphere, the hose could be evacuated. However, more commonly there would be a couple of valves between the hose and the storage (or transport) vessel with a coupling between the valves. In this case, if only the coupling were to be disconnected and opened to the atmosphere, the percent reduction in vinyl chloride required would depend on the volume of the coupling. If it were 4.4 1 (1 gal) in volume, it would have to be reduced to 760 mm Hg and if it were 8.8 1 (2 gal) in volume, it would have to be reduced to 380 mm Hg.

Also, during loading and unloading operations, the proposed standard would require that the emissions from the discharge end of slip gauges used to measure the vinyl chloride liquid level in transport and storage vessels be captured and ducted to a control system. Essentially, there would be no emissions from slip gauges.

Leaks from seals on rotary pumps can essentially be eliminated by using double mechanical seals or pumps with no seals, such as the type with magnet to magnet drive or a canned pump in which the eddy current passes through the pump fluid. Leaks from seals on reciprocating pumps can be minimized by double outboard seals. Double mechanical seals can be used on agitators and compressors to minimize leaks. The proposed standard includes equipment specifications requiring that these methods, or equivalent, be used to minimize leaks from seals on pumps, compressors, and agitators.

The proposed standard also includes equipment specifications requiring that leaks from relief valves be minimized by installing a rupture disk between each relief valve and the equipment served by the relief valve, or equivalent. An equivalent method of control would be to connect the discharge line from a relief valve to process equipment or to a recovery system. If a rupture disk were used as the method of control, there would be a potential problem if a leak should occur from the rupture disk and cause a build-up of pressure between the rupture disk and the relief valve. This is expected to occur infrequently because the reason for requiring the rupture disk is that it is less likely to leak than a relief valve. Although the proposed standard does not require any specific equipment or procedures to prevent the potential pressure build-up, there are several methods available for the plants to use to avoid this potential problem. These include (1) installing a pressure gauge between the disk and valve and routinely checking the pressure, and (2) installing a ball check excess flow value between the disk and the relief valve and routinely checking for any flow from the ball check excess flow valve.

The proposed standard would require capture and control of emissions of vinyl chloride bearing gases during manual venting from processing equipment. For

V401248 DEC 24 75 XUM

example, it would permit no manual venting of vinyl chloride to the atmosphere to reduce the pressure in reactors during upset conditions or to remove inert gases from vessels used to store vinyl chloride. The gases would instead have to be transferred to a gasholder, a recovery system, another piece of equipment (such as another empty reactor), or to a control system. With regard to reducing pressure in reactors during upset conditions, the issue has been raised as to whether permitting manual venting to the atmosphere could result in overall lower emissions than not permitting manual venting to the atmosphere. EPA urges all interested persons to submit factual data bearing on this issue during the comment period.

The proposed standard minimizes vinyl chloride losses from sample flasks during sample acquisition by requiring that the sample be collected in a closed system. Vinyl chloride which could be lost to the atmosphere is instead flushed back to the process using this system.

The proposed standard requires development of and adherence to a formalized program for detection of leaks from equipment in vinyl chloride service and elimination of these leaks. The formalized program must include a multipoint vinyl chloride detector and a portable hydrocarbon detector. Rather than specifying the number of points to be monitored, the sensitivities of the multipoint detector, the vinyl chloride concentration that indicates a leak, and the actions to be taken to repair leaks, the proposed standard requires each plant owner or operator to prepare a program plan containing these specifications and to submit the plan to the Administrator for approval. The plant owner or operator is at the same time required to submit data on background concentrations of vinyl chloride in different areas of the plant to use in determining the vinyl chloride concentration that should be designated as indicating a leak. Since the background concentrations vary among different areas of the plant, the definition of leak may also vary among different areas of the plant. EPA's decision on whether a program is adequate will be based on (1) the date the program will be implemented, (2) the characteristics of the multipoint detor and portable hydrocarbon detector (including the sensitivities of the instruments), (3) the number and location of points to be monitored in comparison with the number of pieces of equipment in vinyl chloride service and the size and physical lay-out of the plant, (4) the proposed frequency of monitoring, (5) the vinyl chloride concentration(s) designated as indicating a leak compared with the background concentrations of vinyl chloride in the plant, and (6) any other information contained in the program plan. This approach has been taken because the number of points which need to be monitored and the background concentrations of vinyl chloride vary depending on the size, configuration and age of a plant and, in the case of a polyvinyl chloride plant, on the number of reactors. Plans, therefore, must be tailored to the design of each individual plant. This approach gives each source the flexibility to develop a plan that it believes to be the most efficient.

The proposed standard includes an emission limit for inprocess wastewater which contains at least 10 ppm by weight vinyl chloride, measured directly as the wastewater stream leaves the process equipment and before it is mixed with wastewater from any other source. This cut-off point was selected because, based on data which are available from polyvinyl chloride plants, it distinguishes between the low volume wastewater streams with high concentrations of vinyl chloride and the large volume wastewater streams with low concentrations of vinyl chloride. In effect, the proposed standard would require control of wastewater streams from pumps used in the monomer recovery system and from monomer recycle tanks where wastewater, which has been entrained with recovered monomer is separated and removed. It would also require control of wastewater which had been used, in accordance with other requirements of the proposed standard, to displace vinyl chloride in equipment before the equipment is opened. It would not require control of wastewater which had been used in the polymerization of vinyl chloride, if improved stripping technology were used to attain the proposed emission limit for the process equipment following the stripper. This wastewater stream was excluded because improved stripping technology indirectly reduces the vinyl chloride content of the wastewater as well as the resin before the wastewater is separated from the resin. However, if an add-on control device is used instead of improved stripping, the combination of all sources of vinyl chloride emissions following the stripping operation in the polyvinyl chloride plant, including inprocess wastewater, is required to meet the total mass emission limit. Thus, in this case, the concentration of vinyl chloride in the inprocess wastewater would not have to be equal to or greater than the 10 ppm cut-off point to be required to be controlled.

The proposed standard for 10 ppm vinyl chloride in the wastewater can be attained by a stripper, which uses heat and/or vacuum to remove vinyl chloride from the water. The proposed standard in effect would require the vinyl chloride which is removed to be recovered by condensing it into a liquid or to be ducted through a control device. Theoretically, by using this method, the vinyl chloride concentration could be reduced to essentially zero. However, as the applied vacuum and heat are increased, the ratio of water to vinyl chloride that vaporizes increases. During the vinyl chloride recovery process, the water as well as the vinyl chloride condenses. Since the water still contains some dissolved vinyl chloride, it would have to be recirculated through the stripper. At some point, as the amount of water which is vaporized is increased, the separation of vinyl chloride from water would be less efficient. For these reasons, the proposed standard is 10 ppm. Although the standard permits some vinyl chloride to remain in the water, it is estimated that the vinyl chloride emissions from the low volume, high concentration water streams at the average plant would not exceed 0.5 kg/hr (1 lb/hr). At ethylene dichloridevinyl chloride plants, strippers are already used as an inherent part of the process to recover ethylene dichloride from wastewater. Vinyl chloride is also removed from the wastewater. The purpose of the proposed standard is to ensure that the practice continues and that any vinyl chloride removed from the wastewater is recovered or controlled.

Format of the Standard

With the exception of emissions following the stripper in dispersion resin manufactures, separate standards have not been established for individual processes or companies. The applicability of carbon adsorption, incineration, or solvent absorption is not dependent on plant age, configuration or type of process.

The proposed standard specifies emission limitations for individual emission points. An alternative would have been to specify a total plant mass emission limit in terms of kg/hr. This is not possible, however, when using the best available control technology approach due to the different sizes and configurations of plants. Implementing best available control technology at different sizes of plants obviously results in different emissions per unit time. EPA also considered specifying the limits in terms of total plant emissions in kg vinyl chloride per kg product to be measured by material balance. This approach was rejected for several reasons. Due to the variations in configurations among plants, an emission factor, which would necessarily result in the application of best available control technology at each plant at all times, could not be developed. Furthermore, either long-term or short-term material balances would have to be used to measure compliance with such a standard. Long-term material balances have the disadvantage of a long averaging time so that short-term peak emissions are not detected. Short-term material balances, on the other hand, are impractical and imprecise due to the large volumes of material which are handled and must be measured, the multiple pieces of equipment in which residual materials would have to be measured, and the large number of points where loss to the atmosphere, inprocess wastewater, and solid waste would have to be measured.

Numerical emission limits are used for each emission point where possible; however, equipment and operating procedures are specified for some of the fugitive emission sources from which emissions cannot be measured or calculated or for which it would be grossly impractical to do so. Generally, the reason that these emissions cannot be measured is that they are released into an unconfined area and often from many small sources, and there is no practical testing procedure for obtaining a reliable reading of emission levels. Where equipment or operating procedures are specified, plant owners or operators are generally permitted to use other equipment or procedures, demonstrated to be of equivalent effectiveness. Primarily because fugitive emissions compose such a large proportion of the total emissions at ethylene dichloride-vinyl chloride and polyvinyl chloride plants, EPA has determined that control of such emissions by specification of equipment and operating procedures is preferable to the alternative of leaving such emissions unregulated.

For example, there are procedural requirements for the reduction of vinyl chloride to a specified concentration in equipment equal to or greater than 5500 1 (1250 gal) in volume before opening it to the atmosphere. Conceptually, EPA could have proposed the standard in terms of a mass emission rate. This could be done by converting the concentration of vinyl chloride to its mass emission equivalents for all sizes of equipment. Mass emissions, however, could not be measured once the pieces of equipment were opened to the atmosphere because the emissions would not be confined. Consequently, if EPA had stated the standard in terms of a mass emission rate, it would have been necessary, in order to be meaningful, to state the method for determining compliance in terms of concentration of vinyl chloride, i.e., in the same terms as the procedural requirement is now stated. Stating the standard itself in terms of concentration is a much more direct approach and the only practical one. For equipment that is less than 5,500 1 (1250 gal) in volume and for loading and unloading equipment, a mass emission limit in terms of liters is proposed. However, this cannot be measured, but must be calculated based on the volume of the equipment and the pressure in the equipment.

The proposed standard includes equipment specifications for leaks from seals on pumps, compressors, and agitators and from relief valves. A numerical standard for emissions from these sources would be impractical to enforce since there is no way to test emissions released into an unconfined area. Even if a testing procedure were available, frequent routine testing of all pump, compressor, and agitator seals and relief valves to determine compliance would be burdensome.

The proposed standard requires that samples of vinyl chloride be collected in a closed system so that any vinyl chloride remaining in the sample flask from previous sampling flows back into the process. Any vinyl chloride flushed through the apparatus in an attempt to collect a representative sample also flows back into the process. Again, numerical emission limits cannot be specified because emissions are released into an unconfined space and cannot be measured. For slip gauges and manual venting, the proposed standard requires that the emissions be captured and ducted through a control system. There is a numerical emission limit specified for the control system.

Another problem requiring special treatment is valve leakage. It would be impossible to avoid all valve leakage. However, valve leakage can be held close to zero if a system of regular valve monitoring is used to detect and repair leaks. If EPA were to specify a numerical limitation of zero, it would be impossible to meet at all times. If EPA were to specify a higher numerical limitation, it would permit more leakage than is necessary. This would be inconsistent with requiring control of vinyl chloride emissions to the level attainable by use of the best available control technology. Therefore, EPA is requiring use of a regular program for leak detection and repair.

In order to reduce the total emissions from reactors by limiting the frequency of openings, the proposed standard for reactor opening loss is specified in terms of a mass emission rate, i.e. kilograms of vinyl chloride per 100 kilograms of polyvinyl chloride produced. If a concentration standard were used, it would provide no incentive for reducing the frequency of reactor openings. Furthermore, the amount of dilution air which could be used to weaken the effect of a concentration standard is difficult to regulate. For these two reasons, EPA concluded that a mass emission rate would be the only effective way to specify the standard.

Due to the intermittent nature of the sources of the emissions, the proposed standard for control systems to which the captured emissions are required to be ducted is in terms of concentration. A major part of the polyvinyl chloride plant is a batch operation which causes intermittent emissions of vinyl chloride. In addition, the fugitive emissions which are required to be captured and ducted to a control system in both ethylene dichloride-vinyl chloride and polyvinyl chloride plants occur only on an intermittent basis. Because of the fluctuating air volumes and mass emission rates, it would be difficult, if not impossible, on the basis of available information, to determine the allowable mass emission rates from these control systems.

The emission limit for the sources following the stripper in polyvinyl chloride plants is stated in two ways which are essentially equivalent in terms of the quanity of emissions they allow. The reason the emission limit is stated in two different ways is that there are two distinctively different ways to control these sources. Different methods of measurement and enforcement are applicable to the two different control methods. If add-on control devices are selected as the method of control, stack testing must be used to measure the emissions from all the multiple sources simultaneously for a minimum of an hour. If improved stripping is selected, the emissions could be measured in the same way. It is difficult, however, to use conventional source testing procedures to establish compliance bcause of the large number of sources that have to be tested. A typical polyvinyl chloride plant has several slurry blend tanks, centrifuges, dryers, and storage silos. Even if the emissions from each of these sources were determined, the resultant value would not necessarily establish the total emissions since monomer would still be escaping from the resin in bagging operations, warehouses, and railroad tank cars.

Where improved stripping is used, there is a much more practical way for determining compliance. Improved stripping technology controls emissions by removing vinyl chloride from polyvinyl chloride resin before the resin moves through the remaining equipment in the process where the vinyl chloride would otherwise be emitted to the atmosphere. Therefore, the simplest way to determine total emissions is to measure the vinyl chloride in the resin as it leaves the stripper and before it is released to the atmosphere. Thus, if add-on control devices are used, the proposed standard is stated in terms of mass emissions to the atmosphere; if improved stripping is used, the proposed standard is stated in terms of the quantity of vinyl chloride in the polyvinyl chloride resin leaving the stripper. In both cases, the standard is stated in terms of a cumulative emission limit for all sources following the stripper to be consistent with the primary technology on which the standard is based (i.e. stripping).

Another reason the emission limit for sources following the stripper is stated in two ways is the necessity for two different averaging times. For reasons already explained, a 24-hour averaging time is desirable if improved stripping technology is selected as the means of control. Determination of emissions by measuring the vinyl chloride in stripped resin is amenable to this averaging time. If add-on controls are used, however, the 24-hour averaging time does not have the same value. If only one emission limit were given, and it were stated in terms of allowable mass emissions with a 24-hour averaging time, any plants using add-on control devices to meet the proposed standard would have to test emissions from each stack for 24 hours instead of a minimum of one hour, as is required under the proposed standard. This would be unduly burdensome for these plants.

Stating the emission limits in two different ways potentially allows plants using add-on control devices to emit slightly more emissions than plants using improved stripping technology. The two emission limits are equivalent if it is assumed that all residual vinyl chloride in the resin leaving a stripper is emitted into the atmosphere at the polyvinyl chloride plant. In fact, however, a small proportion of the vinyl chloride might be left in the resin when it leaves the plant. The discrepancy between emissions allowed by the two emission limits could be avoided by proposing one standard based on emissions into the atmosphere. For plants using improved stripping, the method for determining compliance would be to measure the vinyl chloride in the resin leaving the stripping operation and in the same resin as it leaves the plant; the difference between these

V 40 248 DEC 24 75 D
XUM

measurements would be emissions to the atmosphere between these two points. This method, however, creates enforcement problems, because the resin which is stripped in one batch is typically blended with stripped resin from other batches, and it would be difficult, if not impossible, to trace a batch all the way through the process. Complicating this problem would be the fact that the resin may be stored at the plant for some time before it is shipped. For these two reasons, it would be difficult, if not impossible, to correlate measurements of resin leaving the stripper with those from resin leaving the plant, and EPA would therefore not be able to determine the emissions from any one batch. In addition to that, the concentrations of vinyl chloride in the resin, both in the stripper and in the product leaving the plant, would have to be averaged over a long time (more than the proposed 24 hours). The long averaging time would not be desirable because it would permit more emission peaks and it would be more cumbersome to enforce. EPA concluded, therefore, that the most practical and direct approach is to limit the concentration of vinyl chloride in the resin from the stripping operation. It should be pointed out that EPA has determined that this is an emission limitation; since residual vinyl chloride monomer left in the resin after stripping would be emitted into the atmosphere at some point, the limitation on residual vinyl chloride monomer in the resin limits emissions and is, therefore, an emission limitation; it is simply specified in a form which is compatible with the only practical method for determining compliance.

To simplify enforcement, the proposed standard for the inprocess wastewater is specified in terms of concentration of vinyl chloride rather than in mass emission limits. If it were specified in terms of mass emission limits, not only the vinyl chloride concentration but also the water flowrates from each of the pieces of process equipment would have to be measured. Due to the large number of pieces of equipment involved, this would not be practical.

Testing, Reporting, Recordkeeping

Provisions which specify the requirements for testing, reporting, and recordkeeping are included in the proposed standard. The purpose of these requirements is to determine compliance with the proposed standard.

Emission Tests

Test Method 106 is proposed as a reference method primarily for measuring vinyl chloride emissions from stacks. Portable hydrocarbon detectors or Method 106 can be used, except for postpolymerization reactors in the manufacture of bulk resins, to determine the degree to which vinyl chloride has been removed from equipment prior to opening the equipment to the atmosphere. For postpolymerization reactors in the manufacture of bulk resins, these test methods are not appropriate because the reactor would be partially filled with polyvinyl chloride resin at the time the vinyl chloride concentration within it would have to be tested. Therefore, the proposed standard includes provisions for calculating emissions due to opening of the postpolymerization reactors. Test Method 107 is proposed as a reference method for measuring the vinyl chloride content of polyvinyl chloride resin and inprocess wastewater. Multipoint vinyl chloride detectors and portable hydrocarbon detectors are proposed as methods for detecting leaks from process equipment. The proposed standard also includes a requirement that stack emissions be measured on a continuing basis with a vinyl chloride detector. This vinyl chloride detector may be the multipoint vinyl chloride detector required for leak detection, but does not have to be. Vinyl chloride in the samples collected by the detector can be measured by gas chromatography, or if it is assumed that all hydrocarbons measured are vinyl chloride, by infrared spectrophotometry or flame ion detection. The proposed standard allows, upon approval by EPA, the use of equivalent or alternative test methods.

Reporting

There are reporting requirements in the general provisions of Part 61 of the Code of Federal Regulations which would apply to the sources subject to the vinyl chloride standard. In addition, there are several different kinds of reports required by the proposed standard.

First, an owner or operator must submit to EPA an initial written report containing a record of emissions from the sources from which emissions can be measured using Test Method 106. These sources include ethylene dichloride purification, vinyl chloride formation and purification, and the oxychlorination reactor in ethylene dichloride-vinyl chloride plants and reactors; strippers; monomer recovery systems; and mixing, weighing, and holding containers in polyvinyl chloride plants. Compliance with the emission limitations for reactor opening loss and the sources following the stripper in polyvinyl chloride plants must be demonstrated using appropriate test methods. Measurements of the vinyl chloride concentrations in the inprocess wastewater at both ethylene dichloride-vinyl chloride and polyvinyl chloride plants are also required as part of the initial emission testing.

For those sources which have emissions which cannot be measured (fugitive emission sources), an initial report is required containing a written statement to the effect that certain pieces of equipment have been installed and are operating. These include equipment for minimizing leaks from seals on pumps, compressors, and agitators and from relief valves and equipment used for monitoring leaks. Also required is a written statement to the effect that certain procedures have been incorporated into a standard operating procedure and are being implemented. These include such procedures as removing vinyl chloride from equipment and from loading and unloading lines before opening them to the atmosphere and venting the vinyl chloride removed from the equipment or lines to a control system, venting vinyl chloride from slip gauges during loading or unloaoding operations to a control system, ducting vinyl chloride emissions from manual venting to a control system, purging the vinyl chloride in each sample flask back to the process during vinyl chloride sampling, and detecting and repairing leaks.

A semi-annual report is required which is to contain a record of any emissions in excess of the proposed standard for the formation and purification processes in ethylene dichloride-vinyl chloride plants and the reactor; stripper; monomer recovery system; and containers used for mixing, weighing or holding preceding the stripper in polyvinyl chloride plants. These emissions must be measured by a vinyl chloride detector. The vinyl chloride detector reports measurements of vinyl chloride in terms of concentration. Except for the emission limit for the oxychlorination reactor, the emission limits for all the sources for which continuing measurements of vinyl chloride with a detector are required are stated in terms of concentration. The emission limit for the oxychlorination reactor is stated in terms of mass per unit product. For the oxychlorination reactor, the vinyl chloride detector can be used to measure emissions at the same time that the initial stack test is being conducted using Test Method 106. The results of that test can then be used as a guideline in the future to determine whether the emissions measured on a continuing basis with the vinyl chloride detector are in excess of the standard.

For polyvinyl chloride plants, the semi-annual report is also required to contain measurements of emissions from reactor opening and, if improved stripping is selected as the control technology to attain the standard, from the sources following the stripper. Measurements of emissions from these two sources are required on a continuing basis because the control technologies required for these two sources are primarily procedures rather than control devices. Attainment of the standard for reactor opening would require a reduction in the number of reactor openings in addition to displacing the vinyl chloride from the reactor before opening. One emission test, made within 90 days of promulgation of the standard, would give no assurance that the standard was being met on a continuing basis. With regard to stripping, the primary limitations on the degree of stripping being carried out are product degradation and processing time as its affects production rate. The degree of stripping is more a function of operating parameters than of the specific equipment being used. For this reason, even if all the equipment for stripping is installed and operated, routine measurements must be made to ensure that the degree of stripping required by the emission limitation

is being carried out on a continuing basis.

For both reactor opening and improved stripping, it is possible that the relationship between the emissions measured and the corresponding operating procedures used to attain the emissions measured can be established. For improved stripping, for example, it may be established that for a given resin grade, a given set of operating conditions (temperature, residence time, and pressure) will result in a certain concentration of vinyl chloride in the resin which is far below the standard. Likewise, for reactor opening, it may be established that a given procedure such as water displacement coupled with a given frequency of reactor opening will result in an emission level below the standard. The general provisions and the proposed standard provide for waiver of emission tests and use of alternative or equivalent test methods. Under the authority of these provisions, EPA could, on an individual basis, permit a plant to record certain parameters (such as temperature, residence time, and pressure for improved stripping) rather than emission measurements.

Any relief discharge must be reported within ten days of its occurrence. These reports will be used to determine compliance and will permit EPA to study the circumstances surrounding the discharge to determine whether the discharge could have been prevented.

Recordkeeping

Each owner or operator is also required to keep records of certain information. It is EPA's intention to require little recordkeeping in addition to that which would normally be kept by the plants.

For example, the proposed standard would require keeping records of the concentrations of vinyl chloride measured by the vinyl chloride detector(s). Printouts from the vinyl chloride detector(s) are adequate to meet this requirement. Information on detection and repair of leaks is required to be kept in log books. The purpose of this recordkeeping is to document that the procedures detailed in the program for leak detection and elimination are being carried out. There is also a requirement for keeping records of the temperatures and pressures during reactor operation. Printouts from sensor instruments are adequate to meet this requirement. These records can be used by EPA to determine occurrence of a discharge from relief valves.

Other Methods for Determining Compliance

In addition to the requirements for tests, reports and recordkeeping, EPA has at anytime the authority under section 114 of the Clean Air Act to require emission tests; inspect equipment, operation procedures, or records; or obtain other information as necessary to determine compliance with the standard. For example, an authorized representative of the Administrator of EPA may inspect the seals on pumps, inspect or observe the implementation of a Standard Operating Procedure for removing vinyl chloride from a piece of equipment before opening it, etc.

Polyvinyl Chloride Particulate

EPA considered establishing an emission limit for polyvinyl chloride particulate. Polyvinyl particulate is essentially the product resin which is lost from process equipment, such as dryers, storage bins and silos, bulk loading operations and baggers, and from resin transfer equipment at polyvinyl chloride plants. There are two potential health problems related to exposure to polyvinyl chloride particulate. First, polyvinyl chloride particulate can be a source of vinyl chloride emissions. Second, studies of people occupationally exposed to polyvinyl chloride particulate and animals exposed experimentally to polyvinyl chloride particulate have indicated that the particulate may possibly cause pneumoconiosis.

Vinyl chloride emissions due to polyvinyl chloride particulate would be due to the fact that it contains residual vinyl chloride monomer. The amount of residual vinyl chloride in the particulate is dependent on the physical properties (size and porosity) of the product being manufactured and the degree to which residual vinyl chloride has been stripped from the product before it reaches the dryer and as it goes through the dryer. The amount of residual vinyl chloride released from the particulate once it is in the environment has not been quantified.

The proposed standard would indirectly reduce the potential problem which may be associated with emissions of residual vinyl chloride from the particulate through the control techniques (improved stripping or add-on controls) which would be used to attain the proposed emission limit for the sources following the stripper. EPA evaluated the degree to which existing control equipment and the proposed standard would reduce this particulate problem. This was done by calculating the maximum quantity of vinyl chloride which could be emitted by the particulate. For the purposes of this calculation, it was assumed that an atypically large plant, equipped with the lowest efficiency particulate control reported by the plants to EPA, emitted particulate containing the maximum quantity of vinyl chloride possible if improved stripping were used to meet the proposed standard. Based on this calculation, it was estimated that the maximum vinyl chloride emissions from the polyvinyl chloride particulate would be less than a tenth of a kilogram per hour or a fraction of a percent of the estimated total vinyl chloride emission rate from the same plant in compliance with the proposed standard. (If the plant used add-on controls instead of improved stripping to comply with this standard, the vinyl chloride emission rate from the particulate would be even lower, because the add-on control equipment would indirectly result in better particulate control). Therefore, with regard to the potential problem of polyvinyl chloride particulate as a source of vinyl chloride emissions, EPA has determined that the indirect impact of the proposed standard on vinyl chloride emissions from the particulate makes direct regulation of the particulate unnecessary.

With regard to the potential problem of polyvinyl chloride particulate as a possible cause of pneumoconiosis, NIOSH is currently involved in experimental studies on the effects of the particulate on animals. The extent of public exposure (as opposed to occupational exposure) to ambient concentrations of the particulate is unknown at this time. Ambient measurements of polyvinyl chloride particulate have not been made by EPA in the vicinity of industrial sources because no technology is currently available for separating polyvinyl chloride particulate from total suspended particulate. Most polyvinyl chloride plants are already equipped with relatively high efficiency particulate control devices. As data become available from NIOSH and other sources on the health effects of polyvinyl chloride particulate, however, EPA may find that it is necessary to reevaluate the need to propose regulations for polyvinyl chloride particulate.

Impacts

The Energy Supply and Environmental Coordination Act of 1974 exempted proposed actions under the Clean Air Act from the requirements of the National Environmental Policy Act (NEPA) of 1969 that Federal agencies prepare environmental impact statements on major Federal actions significantly affecting the quality of the human environment. EPA has concluded, however, that voluntary preparation of environmental impact statements would be beneficial for some regulatory actions and has, therefore, prepared such a statement for the proposed vinyl chloride standard. However, this voluntary preparation of environmental impact statements in no way legally subjects EPA to NEPA requirements

The beneficial, or primary, environmental impacts of the proposed standard would be reductions in vinyl chloride emissions from ethylene dichloride-vinyl chloride and polyvinyl chloride plants, and consequently, corresponding reductions in ambient air concentrations of vinyl chloride and risks to health in the vicinity of these sources. Although the proposed standard would not eliminate all vinyl chloride emissions, it would further the protection of public health by minimizing emissions. For a typical average-sized ethylene dichloride-vinyl chloride plant, the proposed standard would reduce hourly vinyl chloride emissions from 176 kg to 10kg. This is approximately a 94 percent reduction. For a typical average-sized polyvinyl chloride plant, the hourly vinyl chloride emissions would be reduced from 330 kg to 16 kg, or by approximately 95 percent. Percentage numbers for both source categories are based on an estimated 90 percent reduction in fugitive emissions.

There are several potential adverse, or secondary, environmental impacts of the proposed standard. These include in-

V 401248 DEC 24 75 XUM

creased atmospheric emissions of hydrogen chloride, lowered pH of inprocess wastewater due to hydrogen chloride, increased water consumption, small increases in the quantity of vinyl chloride released into inprocess wastewater, increased solid waste disposal due to carbon used for adsorption and increased energy consumption. The types and degree of the secondary impacts resulting from the proposed standard would vary from plant to plant depending on the type of control selected to meet the standard.

The potential secondary or adverse environmental impacts of the proposed standard are either insignificant or will be minimized without additional action, except for two. First, EPA is currently investigating the impact of the proposed standard and its effects of increasing water consumption and lowering the pH of plant effluent on the current effluent regulations, and will make adjustments to the effluent regulations as deemed necessary by the study. Second, hydrogen chloride is already emitted by process equipment at ethylene dichloride-vinyl chloride plants and by other petrochemical plants in the complexes where ethylene dichloride-vinyl chloride plants are typically located. An incinerator used to attain the proposed standard at an ethylene dichloride-vinyl chloride plant could increase its hydrogen chloride emission by several fold. Typically, however, due to the corrosion problems which would otherwise occur both on plant property and in the community, plants use scrubbers to control already existing hydrogen chloride emissions. Hydrogen chloride emissions resulting from control of vinyl chloride emissions are expected to also be controlled for the same reason. If even a moderately efficient scrubber (98 percent control) were used to control the hydrogen chloride emissions resulting from incineration of vinyl chloride emissions, the increase in hydrogen chloride emissions from a typical ethylene dichloride-vinyl chloride plant due to the proposed standard would be reduced to 35 percent. However, since diffusion model results indicate that under "worst-case" meteorological conditions, the hydrogen chloride emissions from the process equipment and the incinerator combined would cause maximum ambient concentrations of hydrogen chloride in the vicinity of ethylene dichloride-vinyl chloride plants to be in the same range or somewhat higher than existing foreign standards and National Academy of Sciences (NAS) guidelines for public exposure. EPA plans to further evaluate the need to control hydrogen chloride emissions. NAS is currently preparing a report on the health effects of hydrogen chloride for EPA. A final draft of that report is scheduled for completion by the end of 1975. At that time, EPA will assess the hydrogen chloride problem.

In accordance with Executive Order 11821 and OMB Circular A-107, EPA has carefully evaluated the economic and inflationary impacts of the proposed standard. The economic analysis is contained in the "Standard Support and Environmental Impact Statement" and includes the costs of control systems which can be used to attain the proposed standard and alternative control levels and the impact of these costs on the vinyl chloride industries and the public consumer. The total capital cost for existing plants to meet the proposed standard is $198 million and the total annualized cost is $70 million.

Also, included in the economic analysis were the costs of the EPA water effluent guideline limitations which the plants will be subject to in 1983 and the OSHA standard for vinyl chloride. The total capital cost for existing plants to meet the EPA water effluent guideline limitations is $83 million and the total annualized cost is $17 million. The costs to the industry of meeting the OSHA standard cannot be quantified at this time, but they are expected to overlap to some degree with the costs to meet the fugitive emission regulations. The capital cost of meeting the fugitive emission regulations is $37 million and the annualized cost is $25 million.

The proposed standard would not deter construction of new ethylene dichloride-vinyl chloride plants or most types of new polyvinyl chloride plants. For one type of polyvinyl chloride plant (dispersion process) that represents 13 percent of the industry production, the proposed standard would significantly deter the construction of new plants that have capacities of less than 45 million kg/yr (100 million lb/yr) but would not deter construction of plants larger than 45 million kg/yr. Total costs for attainment of the proposed standard and the effluent limitations are estimated to result in the closing of no ethylene dichloride-vinyl chloride plants and four small polyvinyl chloride plants. These four plants are estimated to employ 30 people and account for approximately 0.5 percent of existing industry capacity. It is estimated that the four plant closures resulting from imposition of the proposed standard would have occurred if only the costs of fugitive emission controls were imposed.

It is estimated that the price of polyvinyl chloride resins would rise by approximately 7.3 percent in order to maintain precontrol profitability and also to recover the total annualized control costs necessitated by the proposed standard at ethylene dichloride-vinyl chloride plants and polyvinyl chloride plants. This increase is estimated to translate into a maximum consumer price increase in goods fabricated from polyvinyl chloride resins of approximately 3.5 percent. Recovery of effluent annualized costs plus maintenance of precontrol profitability is estimated to add approximately 2 percent to polyvinyl chloride resin prices and result in an additional maximum consumer price increase of 1 percent.

The notice of proposed rulemaking is issued under the authority of sections 112 and 114 of the Clean Air Act, as amended Pub. L. 91-604 (42 U.S.C. 1857c-7, 1857c-9).

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular A-107.

Dated: December 16, 1975.

RUSSELL E. TRAIN,
Administrator.

Subpart F—National Emission Standard for Vinyl Chloride

§ 61.60 Applicability.

This subpart applies to plants which produce:

(a) ethylene dichloride by reaction of oxygen and hydrogen chloride with ethylene.

(b) vinyl chloride by any process, and/or

(c) one or more polymers containing any fraction of polymerized vinyl chloride.

§ 61.61 Definitions.

Terms used in this subpart are defined in the Act, in subpart A of this part, or in this section as follows:

(a) "Ethylene dichloride plant" includes any plant which produces ethylene dichloride by reaction of oxygen and hydrogen chloride with ethylene.

(b) "Vinyl chloride plant" includes any plant which produces vinyl chloride by any process.

(c) "Polyvinyl chloride plant" includes any plant where vinyl chloride alone or in combination with other materials is polymerized.

(d) "Slip gauge" means a gauge which has a probe that moves through the gas/liquid interface in a storage or transfer vessel and indicates the level of vinyl chloride in the vessel by the physical state of the material the gauge discharges.

(e) "Type of resin" means the broad classification of resin referring to the basic manufacturing process for producing that resin, including, but not limited to, the suspension, dispersion, latex, bulk, and solution processes.

(f) "Grade of resin" means the subdivision of resin classification which describes it as a unique resin, i.e., the most exact description of a resin with no further subdivision.

(g) "Dispersion resin" means a resin manufactured in such a way as to form fluid dispersions when dispersed in a plasticizer or plasticizer/diluent mixtures.

(h) "Latex resin" means a resin which is produced by a polymerization process which initiates from free radical catalyst sites and is sold undried.

(i) "Bulk resin" means a resin which is produced by a polymerization process in which no water is used.

(j) "Inprocess wastewater" means any water which, during manufacturing or processing, comes into direct contact with vinyl chloride or polyvinyl chloride or results from the production or use of any raw material, intermediate product, finished product, by-product, or waste product containing vinyl chloride or polyvinyl chloride but which has not been discharged to a wastewater treatment process or discharged untreated as wastewater.

(k) "Wastewater treatment process" includes any process which modifies characteristics such as BOD, COD, TSS, and pH, usually for the purpose of meeting effluent guidelines and standards; it does not include any process the purpose of which is to remove vinyl chloride from water to meet requirements of this subpart.

(l) "In vinyl chloride service" means that a piece of equipment contains either a liquid that is at least 10 percent by weight vinyl chloride or a gas that is at least 10 percent by volume vinyl chloride.

(m) "Vinyl chloride detector" means a device which obtains air samples from one or more points on a continuous sequential basis and analyzes the samples with gas chromatography or, if the owner or operator assumes that all hydrocarbons measured are vinyl chloride, with infrared spectrophotometry, flame ion detection, or an equivalent or alternative method.

(n) "Portable hydrocarbon detector" means a device which measures hydrocarbons with a sensitivity of at least 5 ppm and is of such design and size that it can be used to measure emissions from localized points.

(o) "Standard operating procedure" means a formal written procedure officially adopted by the plant owner or operator and available on a routine basis to those persons responsible for carrying out the procedure.

(p) "Run" means the net period of time during which an emission sample is collected.

(q) "Ethylene dichloride purification" includes any part of the process of ethylene dichloride production which follows ethylene dichloride formation and in which finished ethylene dichloride is produced.

(r) "Vinyl chloride purification" includes any part of the process of vinyl chloride production which follows vinyl chloride formation and in which finished vinyl chloride is produced.

(s) "Reactor" includes any vessel in which vinyl chloride is partially or totally polymerized into polyvinyl chloride.

(t) "Reactor opening loss" means the emissions of vinyl chloride occurring when a reactor is vented to the atmosphere for any purpose other than an emergency relief discharge as defined in § 61.65(a).

(u) "Stripper" includes any vessel in which residual vinyl chloride is removed from polyvinyl chloride resin, except bulk resin, in the slurry form by the use of heat and/or vacuum. In the case of bulk resin, stripper includes any vessel which is used to remove residual vinyl chloride from polyvinyl chloride resin immediately following the polymerization step in the plant process flow.

§ 61.62 Emission standard for ethylene dichloride plants.

An owner or operator of an ethylene dichloride plant shall comply with the requirements of this section and § 61.65.

(a) Ethylene dichloride purification: The concentration of vinyl chloride in all exhaust gases discharged to the atmosphere from any equipment used in ethylene dichloride purification is not to exceed 10 ppm, except as provided in § 61.65(a). This requirement does not apply to equipment that is open and meets the requirement in § 61.65(b)(6)(i).

(b) Oxychlorination reactor: Except as provided in § 61.65(a), emissions of vinyl chloride to the atmosphere from each oxychlorination reactor are not to exceed 0.02 kg/100 kg (0.02 lb/100 lb) of the 100 percent ethylene dichloride product from the oxychlorination process.

§ 61.63 Emission standard for vinyl chloride plants.

An owner or operator of a vinyl chloride plant shall comply with the requirements of this section and § 61.65.

(a) Vinyl chloride formation and purification: The concentration of vinyl chloride in all exhaust gases discharged to the atmosphere from any equipment used in vinyl chloride formation and/or purification is not to exceed 10 ppm, except as provided in § 61.65(a). This requirement does not apply to equipment that is open and meets the requirement in § 61.65(b)(6)(i).

(c) Mixing, weighing, and holding containers: The concentration of vinyl chloride in all exhaust gases discharged to the atmosphere from each mixing, weighing, or holding container in vinyl chloride service which precedes the stripper (or the reactor if the plant has no stripper) in the plant process flow is not to exceed 10 ppm, except as provided in § 61.65(a). This requirement does not apply to equipment that is open and meets the requirement in § 61.65(b)(6)(i).

(d) Monomer recovery system. The concentration of vinyl chloride in all exhaust gases discharged to the atmosphere from each monomer recovery system is not to exceed 10 ppm, except as provided in § 61.65(a). This requirement does not apply to equipment that is open and meets the requirement in § 61.65(b)(6)(i).

(e) Sources following the stripper(s): The following requirements apply to emissions of vinyl chloride to the atmosphere from the combination of all sources following the stripper(s) [or the reactor(s) if the plant has no stripper(s)] in the plant process flow, including but not limited to, centrifuges, concentrators, blend tanks, filters, dryers, conveyor air discharges, baggers, storage containers, and inprocess wastewater:

(1) In polyvinyl chloride plants using stripping technology to control vinyl chloride emissions, the weighted average residual vinyl chloride concentration in all grades of polyvinyl chloride resin processed through the stripping operation on each calendar day, measured as the resin leaves the stripper, may not exceed:

(i) 2000 ppm for polyvinyl dispersion resins, excluding latex resins;

(ii) 400 ppm for all other polyvinyl chloride resins, including latex resins, averaged separately for each type of resin; or

(2) In polyvinyl chloride plants controlling vinyl chloride emissions with technology other than stripping or in addition to stripping, emissions of vinyl chloride to the atmosphere may not exceed:

(i) 0.20 kg/100 kg (0.20 lb/100 lb) product from the stripper(s) [or reactor(s) if the plant has no stripper(s)] for dispersion polyvinyl chloride resins, excluding latex resins, with the product determined on a dry solids basis;

(ii) 0.04 kg/100 kg (0.04 lb/100 lb) product from the strippers [or reactor(s) if the plant has no stripper(s)] for all other polyvinyl chloride resins, including latex resins, with the product determined on a dry solids basis.

§ 61.65 Emission standard for ethylene dichloride, vinyl chloride and polyvinyl chloride plants.

An owner or operator of an ethylene dichloride, vinyl chloride, and/or polyvinyl chloride plant shall comply with the requirements of this section.

(a) Relief valve discharge: Except for an emergency relief discharge, there is to be no discharge to the atmosphere from any relief valve on any equipment in vinyl chloride service. An emergency relief discharge means a discharge which could not have been avoided by taking all available measures to prevent the discharge. Within 10 days of any relief valve discharge, the owner or operator of the source from which the relief valve discharge occurs shall submit to the Administrator a report in writing containing information on the source, nature and cause of the discharge, the date and time of the discharge, the approximate total vinyl chloride loss during the discharge, the method used for determining the vinyl chloride loss, the action that

XUM V40248 DEC 24 75 XUM

was taken to prevent the discharge, and measures adopted to prevent future discharges.

(b) Fugitive emission sources:

(1) Loading and unloading lines: Vinyl chloride emissions from loading and unloading lines are to be minimized as follows:

(i) After each loading or unloading operation and before opening a loading or unloading line to the atmosphere, the quantity of vinyl chloride in all parts of each loading or unloading line that are to be opened to the atmosphere is to be reduced so that the parts combined contain no greater than 4.1 l (1 gal) of vinyl chloride, as standard temperature and pressure; and

(ii) Any vinyl chloride removed from a loading or unloading line in accordance with paragraph (b)(1)(i) of this section is to be ducted through a control system from which the concentration of vinyl chloride in the exhaust gases does not exceed 10 ppm, or equivalent as provided in § 61.66.

(2) Slip gauges: During loading or unloading operations, the vinyl chloride emissions from each slip gauge in vinyl chloride service are to be minimized by ducting any vinyl chloride discharged from the slip gauge through a control system from which the concentration of vinyl chloride in the exhaust gases does not exceed 10 ppm, or equivalent as provided in § 61.66.

(3) Leakage from pump, compressor, and agitator seals:

(i) Rotating pumps: Vinyl chloride emissions from seals on all rotating pumps in vinyl chloride service are to be minimized by installing sealless pumps, pumps with double mechanical seals, or equivalent as provided in § 61.66. If double mechanical seals are used, vinyl chloride emissions from the seals are to be minimized by maintaining the pressure between the two seals so that any leak that occurs is into the pump; by ducting any vinyl chloride between the two seals through a control system from which the concentration of vinyl chloride in the exhaust gases does not exceed 10 ppm; or equivalent as provided in § 61.66.

(ii) Reciprocating pumps: Vinyl chloride emissions from seals on all reciprocating pumps in vinyl chloride service are to be minimized by installing double outboard seals, or equivalent as provided in § 61.66. If double outboard seals are used, vinyl chloride emissions from the seals are to be minimized by maintaining the pressure between the two seals so that any leak that occurs is into the pump; by ducting any vinyl chloride between the two seals through a control system from which the concentration of vinyl chloride in the exhaust gases does not exceed 10 ppm; or equivalent as provided in § 61.66.

(iii) Compressor: Vinyl chloride emissions from seals on all compressors in vinyl chloride service are to be minimized by installing compressors with double mechanical seals, or equivalent as provided in § 61.66. If double mechanical seals are used, vinyl chloride emissions from the seals are to be minimized by maintaining the pressure between the two seals so that any leak that occurs is into the pump; by ducting any vinyl chloride between the two seals through a control system from which the concentration of vinyl chloride in the exhaust gases does not exceed 10 ppm; or equivalent as provided in § 61.66. If a waiver of compliance is granted, the program is to be submitted on a date scheduled by the Administrator. Approval of a program will be granted by the Administrator provided he finds:

(i) It includes a reliable and accurate vinyl chloride detector for detection of major leaks and identification of the general area of the plant where a leak is located,

(ii) It includes a reliable and accurate portable hydrocarbon detector to be used routinely to find small leaks and to pinpoint the major leaks indicated by the vinyl chloride detector,

(iii) It provides for an acceptable calibration and maintenance schedule for the vinyl chloride detector and portable hydrocarbon detector,

(iv) The location and number of points to be monitored and the frequency of monitoring provided for in the program are acceptable when they are compared with the number of pieces of equipment in vinyl chloride service and the size and physical layout of the plant,

(v) It contains an acceptable plan of action to be taken when a leak is detected, and

(vi) It contains a definition of leak which is acceptable when compared with the background concentrations of vinyl chloride in the areas of the plant to be monitored by the vinyl chloride detector. Measurements of background concentrations of vinyl chloride in the areas of the plant to be monitored by the vinyl chloride detector are to be included with the description of the program. The definition of leak for a given plant may vary among the different areas within the plant and is also to change over time as background concentrations in the plant are reduced.

(4) Leakage from relief valves: Vinyl chloride emissions due to leakage from each relief valve on equipment in vinyl chloride service are to be minimized by installing a rupture disk between the equipment and the relief valve, or equivalent as provided in § 61.66.

(5) Manual venting of gases: All gases which are manually vented from equipment in vinyl chloride service are to be ducted through a control system from which the concentration of vinyl chloride in the exhaust gases does not exceed 10 ppm, or equivalent as provided in § 61.66.

(6) Opening of equipment: Vinyl chloride emissions from opening of equipment are to be minimized as follows:

(i) Before opening any equipment for any reason, the quantity of vinyl chloride is to be reduced so that the equipment contains no more than 2.0 percent by volume vinyl chloride or 110 l (25 gal) of vinyl chloride, whichever is larger, at standard temperature and pressure; and

(ii) Any vinyl chloride removed from the equipment in accordance with paragraph (b)(6)(i) of this section is to be ducted through a control system from which the concentration of vinyl chloride in the exhaust gases does not exceed 10 ppm, or equivalent as provided in § 61.66.

(7) Sample flask: There are to be no vinyl chloride emissions to the atmosphere due to the vinyl chloride left in any sample flask after an analysis is made or due to the vinyl chloride passed through any flask during sampling in order to obtain a representative sample.

(8) Leak detection and elimination: Vinyl chloride emissions due to leaks from equipment in vinyl chloride service are to be minimized by instituting and implementing a formal leak detection and elimination program. The owner or operator shall submit a description of the program to the Administrator for approval. The program is to be submitted within 45 days of the effective date of these regulations, unless a waiver of compliance is granted under § 61.11.

(9) Inprocess wastewater: Vinyl chloride emissions to the atmosphere from inprocess wastewater are to be reduced as follows:

(i) The concentration of vinyl chloride in each inprocess wastewater stream immediately as it leaves a piece of equipment and before being mixed with any other inprocess wastewater stream is to be reduced by 10 ppm by weight before being exposed to the atmosphere, or before being discharged to a wastewater treatment process or discharged untreated as a wastewater. This paragraph does apply to water which is used to displace vinyl chloride from equipment before it is opened to the atmosphere in accordance with § 61.64(a)(2) or paragraph (b)(6) of this section, but does not apply to water which is used to wash out equipment after the equipment has already been opened to the atmosphere in accordance with § 61.64(a)(2) or paragraph (b)(6) of this section.

(ii) Any vinyl chloride removed from the inprocess wastewater in accordance with paragraph (b)(9)(i) of this section is to be ducted through a control system from which the concentration of vinyl chloride in the exhaust gases does not exceed 10 ppm, or equivalent as provided in § 61.66.

(c) The requirements in paragraphs (b)(1), (b)(2), (b)(5), (b)(6), (b)(7) and (b)(8) of this section are to be incorporated into a standard operating procedure, and made available upon request for inspection by the Administrator. The standard operating procedure is to include provisions for measuring the vinyl chloride in equipment ≥ 550 l (1250 gal) in volume for which an emission limit is prescribed in § 61.65(b)(6)(i) prior to opening the equipment and using Test Method 106, a portable hydrocarbon detector, or an equivalent or alternative method. The method of measurement is to meet the requirements in § 61.67(g)(5)(i)(A) or (g)(5)(i)(B).

§ 61.66 Equivalent equipment and procedures.

Upon written application from an owner or operator, the Administrator may approve use of equipment or procedures which have been demonstrated to his satisfaction to be equivalent in terms of reducing vinyl chloride emissions to the atmosphere to those prescribed for compliance with a specific paragraph of this subpart.

§ 61.67 Emission tests.

(a) Unless a waiver of emission testing is obtained under § 61.13, the owner or operator of a source to which this subpart applies shall test emissions from the source,

(1) Within 90 days of the effective date in the case of an existing source or a new source which has an initial startup date preceding the effective date, or

(2) Within 90 days of startup in the case of a new source, initial startup of which occurs after the effective date.

(b) The owner or operator shall provide the Administrator at least 30 days prior notice of an emission test to afford the Administrator the opportunity to have an observer present during the test.

(c) Any emission test is to be conducted while the equipment being tested is operating at the maximum production rate at which the equipment will be operated and under other relevant conditions as may be specified by the Administrator based on representative performance of the source.

(d) Each emission test is to consist of three runs. For the purpose of determining emissions, the average of results of all runs is to apply.

(e) All samples are to be analyzed, and vinyl chloride emissions are to be determined within 30 days after the emission test. The owner or operator shall report the determinations to the Administrator by a registered letter dispatched before the close of the next business day following the determination.

(f) The owner or operator shall retain at the plant and make available, upon request, for inspection by the Administrator, for a minimum of 2 years records of emission test results and other data needed to determine emissions.

(g) Unless otherwise specified, the owner or operator shall use test Test Methods in Appendix B to this part for each test as required by paragraphs (g)(1), (g)(2), (g)(3), (g)(4), and (g)(5) of this section, unless an equivalent method or an alternative method has been approved by the Administrator. If the Administrator finds reasonable grounds to dispute the results obtained by an equivalent or alternative method, he may require the use of a reference method. If the results of the reference and equivalent or alternative methods do not agree, the results obtained by the reference method prevail, and the Administrator may notify the owner or operator that approval of the method previously considered to be equivalent or alternative is withdrawn.

(1) Test Method 106 is to be used to determine the vinyl chloride emissions from any source for which an emission limit is prescribed in §§ 61.62(a) or (b) § 61.63(a), or §§ 61.64(a)(1), (b), (c), or (d), or from any control system to which reactor emissions are required to be ducted in § 61.64(a)(2) or to which fugitive emissions are required to be ducted in §§ 61.65(b)(1)(ii), (b)(2), (b)(5), (b)(6)(ii), or (b)(9)(ii).

(i) For each run, one sample is to be collected. The sampling site is to be at least two stack or duct diameters downstream and one half diameter upstream from any flow disturbance such as a bend, expansion, contraction, or visible flame. For a rectangular cross section an equivalent diameter is to be determined from the following equation:

$$\text{equivalent diameter} = 2\,\frac{(\text{length})\,(\text{width})}{\text{length}+\text{width}}$$

The sampling point in the duct is to be at the centroid of the cross section. The sample is to be extracted at a rate proportional to the gas velocity at the sampling point. The sample is to be taken over a minimum of one hour, and is to contain a minimum volume of 50 liters corrected to standard conditions.

(ii) For those emission sources where combustion is used to reduce vinyl chloride emissions, the concentration of vinyl chloride as determined by Test Method 106 is to be corrected to 10 percent oxygen (wet basis) for determination of emissions by using the following equation:

$$C_{b\,(\text{corrected})} = C_b\,\frac{10.9}{20.9-\text{percent O}_2}$$

where:

$C_{b\,(\text{corrected})}$ = The concentration of vinyl chloride in the exhaust gases, corrected to 10 percent oxygen.

C_b = The concentration of vinyl chloride as measured by Test Method 106.

20.9 = Percent oxygen in the ambient air at standard conditions.

10.9 = Percent oxygen in the ambient air at standard conditions, minus the 10 percent oxygen to which the correction is being made.

Percent O_2 = Percent oxygen in the exhaust gas as measured by Reference Method 3 in Appendix A of Part 60 of this chapter.

(iii) For those emission sources where the emission limit is prescribed in terms of mass rather than concentration, mass emissions in kg/100 kg product are to be determined by using the following equation:

$$C_{BX} = \frac{[C_b\,(2.60)\;Q\;10^{-6}]\;[100]}{Z}$$

where:

C_{BX} = kg vinyl chloride/100 kg product.

C_b = The concentration of vinyl chloride as measured by Test Method 106.

2.60 = Density of vinyl chloride at one atmosphere and 20°C in kg/m³.

Q = Volumetric flow rate in m³/hr as determined by Reference Method 2 of Appendix A to Part 60 of this chapter.

10^{-6} = Conversion factor for ppm.

Z = Production rate (kg/hr).

(2) Test Method 107 is to be used to determine the concentration of vinyl chloride in each inprocess wastewater stream for which an emission limit is prescribed in § 61.65(b)(9)(i).

(3) Where a stripping operation is used to attain the emission limit in § 61.64(e), emissions are to be determined using Test Method 107 as follows:

(i) The number of strippers and samples and the types and grades of resin to be sampled are to be determined by the Administrator for each individual plant at the time of the test based on the plant's operation.

(ii) Each sample is to be taken immediately following the stripping operation as the resin is transferred out of the stripper.

(iii) The corresponding quantity of material processed by each stripper is to be determined on a dry solids basis and by a method submitted to and approved by the Administrator.

(iv) At the prior request of the Administrator, the owner or operator shall provide duplicates of the samples required in paragraph (g)(3)(i) of this section.

(4) Where control technology other than or in addition to a stripping operation is used to attain the emission limit in § 61.64(e), emissions are to be determined as follows:

(i) Test Method 106 is to be used to determine atmospheric emissions from all of the process equipment simultaneously. The requirements of paragraph (g)(1) of this section are to be met.

(ii) Test Method 107 is to be used to determine the concentration of vinyl chloride in each inprocess wastewater stream subject to the emission limit prescribed in § 61.64(e). The mass of vinyl chloride in kg/100 kg product in each in process wastewater stream is to be determined by using the following equation:

$$C_{BX} = \frac{[C_d\;R\;10^{-6}]\;[100]}{Z}$$

where:

C_{BX} = kg vinyl chloride/100 kg product.

C_d = the concentration of vinyl chloride as measured by Test Method 107.

R = water flow rate in l/hr, determined in accordance with a method which has been submitted to and approved by the Administrator.

10^{-6} = Conversion factor for ppm.

Z = Production rate (kg/hr), determined in accordance with a method which has been submitted and approved by the Administrator.

(5) The reactor opening loss for which an emission limit is prescribed in § 61.64(a)(2) is to be determined. The number of reactors for which the determination is to be made is to be specified by the

V 40 248 DEC 24 75 XUM

Administrator for each individual plant at the time of the determination based on the plant's operation.

(i) Except as provided in paragraph (g)(5)(ii) of this section, the reactor opening loss is to be determined using the following equation:

$$C = \frac{W\ (2.60)\ (10^{-6})\ (Cb)}{YZ}$$

where:

C = kg vinyl chloride emissions/kg product.
W = Capacity of the reactor in m³.
2.60 = Density of vinyl chloride at one atmosphere and 20° C in kg/m³.
10^{-6} = Conversion factor for ppm.
Cb = ppm by volume vinyl chloride as determined by Test Method 106 or a portable hydrocarbon detector.
Y = Number of batches since the reactor was last opened to the atmosphere.
Z = Average kg of polyvinyl chloride produced per batch in the number of batches since the reactor was last opened to the atmosphere.

(A) If Method 106 is used to determine the concentration of vinyl chloride (Cb), the sample is to be withdrawn at a constant rate with a probe of sufficient length to reach the vessel bottom from the manhole. Samples are to be taken for 5 minutes within 6 inches of the vessel bottom, 5 minutes near the vessel center, and 5 minutes near the vessel top.

(B) If a portable hydrocarbon detector is used to determine the concentration of vinyl chloride (Cb), a probe of sufficient length to reach the vessel bottom from the manhole is to be used to make the measurements. One measurement will be made within 6 inches of the vessel bottom, one near the vessel center and one near the vessel top. Measurements are to be made at each location until the reading is stabilized. All hydrocarbons measured are to be assumed to be vinyl chloride.

(C) The production rate of polyvinyl chloride (Z) is to be determined by a method submitted to and approved by the Administrator.

(ii) A calculation based on the number of evacuations, the vacuum involved, and the volume of gas in the reactor is hereby approved by the Administrator as an alternative method for determining reactor opening loss for postpolymerization reactors in the manufacture of bulk resins.

§ 61.68 Initial report.

(a) An owner or operator of any source to which this subpart applies shall submit a statement in writing notifying the Administrator that the equipment and procedural specifications in §§ 61.65 (b)(1), (b)(2), (b)(3), (b)(4), (b)(5), (b)(6), (b)(7), and (b)(8) are being implemented.

(b)(1) In the case of an existing source or a new source which has an initial startup date preceding the effective date, the statement is to be submitted within 90 days of the effective date, unless a waiver of compliance is granted under § 61.11, along with the information required under § 61.10. If a waiver of compliance is granted, the statement is to be submitted on a date scheduled by the Administrator.

(2) In the case of a new source which did not have an initial startup date preceding the effective date, the statement is to be submitted within 90 days of the initial startup date.

(c) The statement is to contain the following information:

(1) A list of the equipment installed for compliance.

(2) A detailed engineering description of the physical and functional characteristics of each piece of equipment.

(3) A description of the methods which have been incorporated into the standard operating procedures for measuring or calculating the emissions for which emission limits are prescribed in §§ 61.65 (b)(1)(i) and (b)(6)(i).

(4) A statement that each piece of equipment is installed and that each piece of equipment and each procedure is being used.

§ 61.69 Semiannual report.

(a) The owner or operator of any source to which this subpart applies shall submit to the Administrator on a continuing basis each 180 days a report in writing containing the information required by this section.

(b)(1) In the case of an existing source or a new source which has an initial startup date preceding the effective date, the first report is to be submitted within 180 days of the effective date, unless a waiver of compliance is granted under § 61.11. If a waiver of compliance is granted, the first report is to be submitted on a date scheduled by the Administrator.

(2) In the case of a new source which did not have an initial startup date preceding the effective date, the first report is to be submitted within 180 days of the initial startup date.

(c) Unless otherwise specified, the owner or operator shall use the Test Methods in Appendix B to this part to conduct emission tests as required by paragraphs (c)(2) and (c)(3) of this section, unless an equivalent or an alternative method has been approved by the Administrator. If the Administrator finds reasonable grounds to dispute the results obtained by an equivalent or alternative method, he may require the use of a reference method. If the results of the reference and equivalent or alternative methods do not agree, the results obtained by the reference method prevail, and the Administrator may notify the owner or operator that approval of the method previously considered to be equivalent or alternative is withdrawn.

(1) The owner or operator shall include in the report a record of any emissions in excess of the emission limits prescribed in §§ 61.62(a) or (b), § 61.63(a), or §§ 61.64(a)(1), (b), (c), or (d), or for any control system to which reactor emissions are required to be ducted in § 61.64(a)(2) or to which fugitive emissions are required to be ducted in § 61.65 (b)(1)(ii), (b)(2), (b)(5), (b)(6)(ii), or (b)(9)(ii). The emissions are to be measured with a vinyl chloride detector.

(2) The owner or operator shall include in the report a record of the quantity of emissions of vinyl chloride from the sources following the stripper(s) [or the reactor(s) if the plant has no stripper(s)] in polyvinyl chloride plants for which a stripping operation is used to attain the emission limit prescribed in § 61.64(e). Test Method 107 is to be used to determine emissions as follows:

(i) If batch stripping is used, one representative sample of polyvinyl chloride resin is to be taken from each batch of each grade of resin immediately following the completion of the stripping operation as the resin is transferred out of the stripper, and identified by resin type and grade and the date and time the batch is completed. The corresponding quantity of material processed in each stripper batch is to be recorded and identified by resin type and grade and the date and time the batch is completed.

(ii) If continuous stripping is used, one representative sample of polyvinyl chloride resin is to be taken for each grade of resin processed or at intervals of 8 hours for each grade of resin which is being processed, whichever is more frequent. The sample is to be taken as the resin flows out of the stripper and identified by resin type and grade and the date and time the sample was taken. The corresponding quantity of material processed by each stripper over the time period represented by the sample during the eight hour period, is to be recorded and identified by resin type and grade and the date and time it represents.

(iii) The quantity of material processed by the stripper is to be determined on a dry solids basis and by a method submitted to and approved by the Administrator.

(iv) At the prior request of the Administrator, the owner or operator shall provide duplicates of the samples required in paragraphs (c)(2)(i) and (c)(2)(ii) of this section.

(v) The report to the Administrator by the owner or operator is to include the vinyl chloride content found in all the samples required in paragraphs (c)(2)(i) and (c)(2)(ii) of this section, averaged separately for each type of resin, over each calendar day and weighted according to the quantity of each grade of resin processed by the stripper(s) that calendar day, according to the following equation:

$$A_{T_j} = \frac{\sum_{i=1}^{n} P_{G_i} M_{G_i}}{Q_{T_j}} = \frac{P_{G_1} M_{G_1} + P_{G_2} M_{G_2} + \ldots + P_{G_n} M_{G_n}}{Q_{T_j}}$$

A = 24-hour average concentration of type T_j resin in ppm.
Q = Total production of type T_j resin over the 24-hour period, in kg.
T_j = Type of resin; $j = 1, 2, \ldots m$ where m is total number of resin types produced during the 24-hour period.
M = Concentration of vinyl chloride in one sample of grade G_i resin, in ppm.
P = Production of grade G_i resin represented by the sample, in kg.
G_i = Grade of resin, e.g., G_1, G_2, and G_n.
n = Total number of grades of resin produced during the 24-hour period.

(vi) The owner or operator shall retain at the source and make available for inspection by the Administrator for a minimum of 2 years records of all data needed to furnish the information required by paragraph (c)(2)(v) of this section: The records are to contain the following information:

(A) The vinyl chloride content found in all the samples required in paragraphs (c)(2)(i) and (c)(2)(ii) of this section, identified by the resin type and grade and the time and date of the sample, and

(B) The corresponding quantity of polyvinyl chloride resin processed by the stripper(s), identified by the resin type and grade and the time and date it represents.

(3) The owner or operator shall include in the report a record of the emissions from each reactor opening for which an emission limit is prescribed in § 61.64(a)(2). Emissions are to be determined in accordance with § 61.67(g)(5), except that emissions for each reactor are to be determined.

§ 61.70 Recordkeeping.

(a) The owner or operator of any source to which this subpart applies shall retain the following information at the source and make it available for inspection by the Administrator for a minimum of two years;

(1) A record of the leaks detected by the vinyl chloride detector and the action taken to repair the leaks, as required by § 61.65(b)(8), including the following information:

(i) The concentrations of vinyl chloride as measured, analyzed, and recorded by the vinyl chloride detector, including the location of each measurement and the date and approximate time of each measurement.

(ii) Where the information required by paragraph (a)(1)(i) of this section indicates that the vinyl chloride concentration at any point exceeds the concentration of vinyl chloride designated as a leak, a statement explaining the cause of the leak and any action taken to eliminate that leak and the amount of time used to take this action.

(2) A record of the leaks detected during routine monitoring with the portable hydrocarbon detector and the action taken to repair the leaks, as required by § 61.65(b)(8), including a brief statement explaining the location and cause of each leak detected with the portable hydrocarbon detector, the date and time of the leak and any action taken to eliminate that leak.

(3) A record of emissions from any source for which an emission limit is prescribed in §§ 61.62(a) or (b), 61.63(a), or §§ 61.64(a)(1), (b), (c), or (d), or from any control system to which reactor emissions are required to be ducted in § 61.64(a)(2) or to which fugitive emissions are required to be ducted in §§ 61.65(b)(1)(ii), (b)(2), (b)(5), (b)(6)(ii), or (b)(9)(ii).

(4) For the relief discharges from reactors subject to the provisions of § 61.65(b), a daily operating record for each reactor, including pressures and temperatures.

METHOD 106—DETERMINATION OF VINYL CHLORIDE FROM STATIONARY SOURCES

INTRODUCTION

Performance of this method should not be attempted by persons unfamiliar with the operation of a gas chromatograph, nor by those who are unfamiliar with source sampling, as there are many details that are beyond the scope of this presentation. Care must be exercised to prevent exposure of sampling personnel to vinyl chloride, a carcinogen.

1. Principle and Applicability.

1.1 An integrated bag sample of stack gas containing vinyl chloride (chloroethylene) is subjected to chromatographic analysis, using a flame ionization detector.

1.2 The method is applicable to the measurement of vinyl chloride in stack gases from both vinyl chloride and polyvinyl chloride manufacturing processes, except where the vinyl chloride is contained in particulate matter.

2. Range and Sensitivity.

The lower limit of detection will vary according to the chromatograph used. Values reported include 1×10^{-7} mg and 4×10^{-7} mg.

3. Interferences.

In the course of a study to identify the interference potential of several hydrocarbons associated with vinyl chloride, none were found to prevent resolution of the vinyl chloride peak with the Chromosorb 102[1] column. However, if resolution of the vinyl chloride peak is not satisfactory for a particular sample, then chromatograph parameters may be altered with prior approval of the Administrator. If there is reason to believe that some other hydrocarbon with an identical retention time is present in the sample, then supplemental confirmation of the vinyl chloride peak through an absolute analytical technique, such as mass spectroscopy, should be performed.

4. Apparatus.

4.1 Sampling (Figure 1).

4.1.1 Probe—Stainless steel, Pyrex glass, or Teflon tubing according to stack temperature, each equipped with a glass wool plug to remove particulate matter.

4.1.2 Sample line—Teflon, 6.4 mm outside diameter, of sufficient length to connect probe to bag. A new unused piece is employed for each series of bag samples that constitutes an emission test.

4.1.3 Male (2) and female (2) stainless steel quick-connects, with ball checks (one pair without) located as shown in Figure 1.

4.1.4 Tedlar bags, 100 liter capacity—To contain sample.

4.1.5 Rigid leakproof containers for 4.1.4, with covering to protect contents from sunlight.

4.1.6 Needle valve—To adjust sample flow rate.

4.1.7 Pump—Leak-free. Minimum capacity 2 liters per minute.

4.1.8 Charcoal tube—To prevent admission of vinyl chloride to atmosphere in vicinity of samplers.

4.1.9 Flow meter—For observing sample flow rate; capable of measuring a flow range from 0.10 to 1.00 liter per minute.

4.1.10 Connecting tubing—Teflon, 6.4 mm outside diameter, to assemble sample train (Figure 1).

4.1.11 Pitot tube—Type E (or equivalent), attached to the probe so that the sampling flow rate can be regulated proportional to the stack gas velocity.

4.2 Sample recovery.

4.2.1 Tubing—Teflon, 6.4 mm outside diameter, to connect bag to gas chromatograph sample loop. A new unused piece is employed for each series of bag samples that constitutes an emission test, and is to be discarded upon conclusion of analysis of those bags.

4.3 Analysis.

4.3.1 Gas chromatograph—With flame ionization detector, potentiometric strip chart recorder and 1.0 to 5.0 ml heated sampling loop in automatic sample valve.

4.3.2 Chromatographic column—Stainless steel, 2.5 m × 3.2 mm, containing 80/100 mesh Chromosorb 102.

4.3.3 Flow meters (2)—Rotameter type, 0 to 100 ml/min capacity, with flow control valves.

4.3.4 Gas regulators—For required gas cylinders.

4.3.5 Thermometer—Accurate to one degree centigrade, to measure temperature of heated sample loop at time of sample injection.

4.3.6 Barometer—Accurate to 5 mm Hg, to measure atmospheric pressure around gas chromatograph during sample analysis.

4.3.7 Pump—Leak-free. Minimum capacity 100 ml/min.

4.4 Calibration.

4.4.1 Tubing—Teflon, 6.4 mm outside diameter, separate pieces marked for each calibration concentration.

4.4.2 Tedlar bags—Sixteen-inch square size, separate bag marked for each calibration concentration.

4.4.3 Syringe—0.5 ml, gas tight.

4.4.4 Syringe—50 ml, gas tight.

4.4.5 Flow meter—Rotameter type, 0 to 1000 ml/min range accurate to ±1%, to meter nitrogen in preparation of standard gas mixtures.

4.4.6 Stop watch—Of known accuracy, to time gas flow in preparation of standard gas mixtures.

5. Reagents. It is necessary that all reagents be of chromatographic grade.

5.1 Analysis.

5.1.1 Helium gas or nitrogen gas—Zero grade, for chromatographic carrier gas.

5.1.2 Hydrogen gas—Zero grade.

5.1.3 Oxygen gas—Zero grade.

5.2 Calibration.

5.2.1 Vinyl chloride, 99.9+%—For preparation of standard gas mixtures.

5.2.2 Calibration cylinders (3), optional—One each of 50, 10 and 5 ppm vinyl chloride in nitrogen with certified analysis.

5.2.3 Nitrogen gas—Zero grade, for preparation of standard gas mixtures.

6. Procedure.

6.1 Sampling. Assemble the sample train as in Figure 106–1. Perform a bag leak check according to Section 7.4. Observe that all connections between the bag and the probe are tight. Place the end of the probe at the centroid of the stack and start the pump with the needle valve adjusted to yield a flow of 0.5 lpm. After a period of time sufficient to purge the line several times has elapsed, connect the vacuum line to the bag and evacuate the bag until the rotameter indicates no flow. Then reposition the sample and vacuum lines and begin the actual sampling, keeping the rate proportional to the stack velocity. Direct the gas existing the rotameter away from sampling personnel. At the end of the sample period, shut off the pump, disconnect the sample line from the bag, and disconnect the vacuum line from the bag container. Protect the bag container from sunlight.

[1] Mention of trade names on specific products does not constitute endorsement by the Environmental Protection Agency.

V 40 248 DEC 24 75 XUM

6.2 Sample storage. Sample bags must be kept out of direct sunlight. When at all possible, analysis is to be performed within 24 hours of sample collection.

6.3 Sample recovery. With a piece of Teflon tubing identified for that bag, connect a bag inlet valve to the gas chromatograph sample valve. Switch the valve to withdraw gas from the bag through the sample loop. Plumb the equipment so the sample gas passes from the sample valve to the leak-free pump, and then to a charcoal tube, followed by a 0–100 ml/min rotameter with flow control valve.

6.4 Analysis. Set the column temperature to 155° C, the detector temperature to 225° C, and the sample loop temperature to 70° C. When optimum hydrogen and oxygen flow rates have been determine, verify and maintain these flow rates during all chromatograph operations. Using zero helium or nitrogen as the carrier gas, establish a flow rate in the range consistent with the manufacturer's requirements for satisfactory detector operation. A flow rate of approximately 15 ml/min should produce adequate separations. Observe the base line periodically and determine that the noise level has stabilized and that base line drift has ceased. Purge the sample loop for thirty seconds at the rate of 100 ml/min, then activate the sample valve. Record the injection time (the position of the pen on the chart at the time of sample injection), the sample number, the sample loop temperature, the column temperature, carrier gas flow rate, chart speed and the attenuator setting. Record the laboratory pressure. From the chart, select the peak having the retention time corresponding to vinyl chloride, as determined in Section 7.2. Measure the peak area, A_m, by use of the automatic integrator. Record A_m and the retention time. Repeat the injection at least two times or until two consecutive vinyl chloride peaks do not vary in area more than 5%. The average value for these two areas will be used to compute the bag concentration.

7. Calibration and Standards.

7.1 Preparation of vinyl chloride standard gas mixtures. Evacuate a sixteen-inch square Tedlar bag that has passed a leak check (described in Section 7.4) and meter in 5.0 liters of nitrogen. While the bag is filling, use the 0.5 ml syringe to inject 250μl of 99.9+ % vinyl chloride through the wall of the bag. Upon withdrawing the syringe needle, immediately cover the resulting hole with a piece of adhesive tape. This gives a concentration of 50 ppm of vinyl chloride. In a like manner use the other syringe to prepare dilutions having 10 and 5 ppm vinyl chloride concentrations. Place each bag on a smooth surface and alternately depress opposite sides of the bag 50 times to further mix the gases.

7.2 Determination of vinyl chloride retention time. This section can be performed simultaneously with Section 7.3. Establish chromatograph conditions identical with those in Section 6.3, above. Set attenuator to X 1 position. Flush the sampling loop with zero helium or nitrogen and activate the sample valve. Record the injection time, the sample loop temperature, the column temperature, the carrier gas flow rate, the chart speed and the attenuator setting. Record peaks and detector responses that occur in the absence of vinyl chloride. Maintain conditions. With the equipment plumbing arranged identically to Section 6.3, flush the sample loop for 30 seconds at the rate of 100 ml/min with one of the vinyl chloride calibration mixtures and activate the sample valve. Record the injection time. Select the peak that corresponds to vinyl chloride. Measure the distance on the chart from the injection time to the time at which the peak maximum occurs. This quantity, divided by the chart speed, is defined as the retention time. Record.

7.3 Preparation of chromatograph calibration curve. Make a gas chromatographic measurement of each standard gas mixture (described in Section 7.1) using conditions identical with those listed in Section 6.3 above. Flush the sampling loop for 30 seconds at the rate of 100 ml/min with each standard gas mixture and activate the sample valve. Record C_c, the concentrations of vinyl chloride injected, the attenuator setting, chart speed, peak area, sample loop temperature, column temperature, carrier gas flow rate, and retention time. Record the laboratory pressure. Calculate A_s, the peak area multiplied by the attenuator setting. Repeat until two injection areas are within 5%, then plot those points vs C_c. When the other concentrations have been plotted, draw a smooth curve through the points. Perform calibration daily, or before and after each set of bag samples, whichever is more frequent.

7.4 Tedlar bag leak checks. Before each use, make sure a bag is leak-free by checking it for leaks. To leak check, connect a water manometer and pressurize the bag to 5–10 cm H_2O (2–4 in. H_2O). Allow to stand for 10 minutes. Any displacement in the water manometer indicates a leak.

(NOTE: An alternative leak check method is to pressurize the bag to 5–10 cm H_2O or 2–4 in. H_2O and allow to stand overnight. A deflated bag indicates a leak.)

8. Calculations.

8.1 Determine the sample peak area as follows:

$$A_s = A_m A_f$$

Equation 106–1

where:
A_s = The sample peak area.
A_m = The measured peak area.
A_f = The attenuation factor.

8.2 Vinyl chloride concentrations. From the calibration curve described in Section 7.3, above, select the value of C_c that corresponds to A_s, the sample peak area. Calculate C_b as follows:

$$C_b = \frac{C_c P_r T_i}{P_i T_r}$$

Equation 106–2

where:
C_b = The concentration of vinyl chloride in the bag sample in ppm.
C_c = The concentration of vinyl chloride indicated by the gas chromatograph, in ppm.
P_r = The reference pressure, the laboratory pressure recorded during calibration, mm Hg.
T_i = The sample loop temperature on the absolute scale at the time of analysis, °K.
P_i = The laboratory pressure at time of analysis, mm Hg.
T_r = The reference temperature, the sample loop temperature recorded during calibration, °K.

METHOD 107—DETERMINATION OF VINYL CHLORIDE CONTENT OF INPROCESS WASTEWATER SAMPLES, AND VINYL CHLORIDE CONTENT OF POLYVINYL CHLORIDE RESIN, SLURRY, WET CAKE, AND LATEX SAMPLES

INTRODUCTION

Performance of this method should not be attempted by persons unfamiliar with the operation of a gas chromatograph, nor by those who are unfamiliar with sampling, as there are many details that are beyond the scope of this presentation. Care must be exercised to prevent exposure of sampling personnel to vinyl chloride, a carcinogen.

1. Principle and Applicability.

1.1 The basis for this method relates to the vapor equilibrium which is established between RVCM, PVC, resin, water, and air in a closed system. It has been demonstrated that the RVCM in a PVC resin will equilibrate in a closed vessel quite rapidly, provided that the temperature of the PVC resin is maintained above the glass transition temperature of that specific resin.

1.2 This procedure is suitable for determining the vinyl chloride monomer (VCM) content of inprocess wastewater samples, and the residual vinyl chloride monomer (RVCM) content of polyvinyl chloride (PVC) resins, wet cake, slurry, and latex samples. It cannot be used for polymer in fused form, such as sheet or cubes. If a resolution of the vinyl chloride peak is not satisfactory for a particular sample, then chromatograph parameters may be altered with prior approval of the Administrator. If there is reason to believe that some other hydrocarbon with an identical retention time is present in the sample, then supplemental confirmation of the vinyl chloride peak through an absolute analytical technique, such as mass spectroscopy, should be performed.

2. Range and Sensitivity.

The lower limit of detection of vinyl chloride will vary according to the chromatograph used. Values reported include 1×10^{-7} mg and 4×10^{-7} mg. With proper calibration, the upper limit may be extended as needed.

3. Precision and Reproducibility.

An interlaboratory comparison between seven laboratories of three resin samples, each split into three parts, yield a standard deviation of 2.63% for a sample with a mean of 2.09 ppm, 4.16% for a sample with a mean of 1.66 ppm, and 5.29% for a sample with a mean of 62.66 ppm.

4. Safety.

Do not release vinyl chloride to the laboratory atmosphere during preparation of standards. Venting or purging with VCM/air mixtures must be held to a minimum. When they are required, the vapor must be routed to outside air. Vinyl chloride, even at low ppm levels, must never be vented inside the laboratory. After vials have been analyzed, the pressure within the vial must be vented prior to removal from the instrument turntable. Vials must be vented into an activated charcoal tube using a hypodermic needle to prevent release of vinyl chloride into the laboratory atmosphere. The charcoal must be replaced prior to vinyl chloride breakthrough.

6. Apparatus.

5.1 Sampling.

5.1.1 Bottles—60 ml (2 oz), with waxed lined screw on tops, for PVC samples.

5.1.2 Vials—50 ml Hypo-vials,[1] sealed with Teflon faced Tuf-Bond discs for water samples.

5.1.3 Electrical tape—or equivalent, to prevent loosening of bottle tops.

5.2 Sample recovery.

5.2.1 Vials—With seals and caps, Perkin-Elmer Corporation No. 105–0118, or equivalent.

5.2.2 Analytical balance—Capable of weighing to ±0.001 gram.

5.2.3. Syringe, 100 μl—Precision Series "A" No. 010025, or equivalent.

5.2.4 Vial Sealer, Perkin-Elmer No. 105–0106 or equivalent.

5.3 Analysis.

5.3.1 Gas chromatograph—Perkin-Elmer Corporation Model F-40 head-space analyzer, No. 104–0001, or equivalent.

5.3.2 Chromatographic column—Stainless steel, 2 m×3.2 mm, containing 0.4% Carbowax 1500 on Carbopak A, Perkin-Elmer Corporation No. 105–0133, or equivalent.

5.3.3 Thermometer—0 to 100° C, accurate to ±0.1° C, Perkin-Elmer No. 105–0109 or equivalent.

5.3.4. Sample tray thermostat system—Perkin-Elmer No. 105–0103, or equivalent.

5.3.5 Septa—Sandwich type, for automatic dosing, 13 mm, Perkin-Elmer No. 105–1008, or equivalent.

5.3.6 Integrator - recorder — Hewlett - Packard Model 3380A, or equivalent.

5.3.7 Filter drier assembly (3)—Perkin-Elmer No. 2230117, or equivalent.

5.3.8 Soap film flowmeter—Hewlett Packard No. 0101–0113, or equivalent.

[1] Mention of trade names on specific products does not constitute endorsement by the Environmental Protection Agency.

5.4 Calibration.

5.4.1 Regulators—for required gas cylinders.

6. Reagents.

6.1 Analysis.

6.1.1 Hydrogen gas—zero grade.

6.1.2 Nitrogen gas—zero grade.

6.1.3 Air—zero grade.

6.2 Calibration.

6.2.1 Standard cylinders (4)—one each of 50, 500, 2000, and 4000 ppm viuyl chloride in nitrogen, with certified analysis.

7. Procedure.

7.1 Sampling.

7.1.1 PVC sampling—Allow the resin or slurry to flow from a tap on the tank or silo until the tap line has been well purged. Extend a 60 ml sample bottle under the tap, fill, and immediately tightly cap the bottle. Wrap electrical tape around the cap and bottle to prevent the top from loosening. Place an identifying label on each bottle, and record the date, time, and sample location both on the bottles and in a log book.

7.1.2 Water sampling—Prior to use, the 50 ml vials (without the discs) must be capped with aluminum foil and muffled at 400°C for at least one hour to destroy or remove any organic matter that could interfere with analysis. At the sampling location fill the vials bubble-free, to overflowing so that a convex meniscus forms at the top. The excess water is displaced as the sealing disc is carefully placed, Teflon side down, on the opening of the vial. Place the aluminum seal over the disc and the neck of the vial and crimp into place. Affix an identifying label on the bottle, and record the date, time, and sample location both on the vials and in a log book. All samples must be kept refrigerated until analyzed.

7.2 Sample recovery. Samples must be run within 24 hours.

7.2.1 Resin samples—The weight of the resin used must be between 0.1 and 4.5 grams. An exact weight must be obtained (±0.001 gram) for each sample. In the case of suspension resins a volumetric cup can be prepared which will hold the required amount of sample. The sample bottle is opened, and the cup volume of resin is added to the tared sample vial (including septum and aluminum cap). The vial is immediately sealed and the exact sample weight is then obtained. Report this value on the data sheet as it is required for calculation of RVCM. In the case of relatively dry resin samples (water content <0.3 weight %), 100 μl of distilled water must be injected into the vial, after sealing and weighing, using a 100 μl syringe. In the case of dispersion resins, the cup cannot be used. The sample is instead weighed approximately in an aluminum dish, transferred to the tared vial and weighed accurately in the vial. The sample is then placed in the Perkin-Elmer head space analyzer (or equivalent) and conditioned for one hour at 90°C.

NOTE: Some aluminum vial caps have a center section which must be removed prior to placing into sample tray. If not removed, serious damage to the injection needle will occur.

7.2.2 Suspension resin slurry and wet cake samples—Slurry must be filtered using a small Buchner funnel with vacuum to yield wet cake. The filtering process must be continued only as long as a steady stream of water is exiting from the funnel. Excessive filtration time could result in some loss of VCM. The wet cake sample (0.10 to 4.5 grams) is added to a tared vial (including septum and aluminum cap) and immediately sealed. Sample weight is then determined to 3 decimal places. The sample is then placed in the Perkin-Elmer head space analyzer (or equivalent) and conditioned for one hour at 90°C. A sample of wet cake is used to determine TS (total solids). This is required for calculating the RVCM.

7.2.3 Dispersion resin slurry samples.—This material should not be filtered. Sample must be thoroughly mixed. Using a tared vial (including septum and aluminum cap) add approximately 8 drops (0.25 to 0.35 grams) of slurry or latex using a medicine dropper. This should be done immediately after mixing. Seal the vial as soon as possible. Determine sample weight accurate to 0.001 grams. Total sample weight must not exceed 0.50 grams. Condition the vial for one hour at 90°C in the analyzer. Determine the TS on the slurry sample (Section 7.3.5).

7.2.4 Inprocess wastewater samples—Using a tared vial (including septum and aluminum cap) quickly add approximately 1 cc of water using a medicine dropper. Seal the vial as soon as possible. Determine sample weight accurate to 0.001 gram. Condition the vial for two hours at 90°C in the analyzer.

7.3 Analysis.

7.3.1 Preparation of gas chromatograph—Install the chromatographic column and condition overnight at 150°C. Do not connect the exit end of the column to the detector while conditioning.

7.3.1.1 Flow rate adjustments—Adjust flow rates as follows:

a. Nitrogen carrier gas—Set regulator on cylinder to read 50 psig. Set regulator on chromatograph to 1.3 kg/cm². Normal flows at this pressure should be 25 to 40 cc/minute. Check with bubble flow meter.

b. Burner air supply—Set regulator on cylinder to read 50 psig. Set regulator on chromatograph to supply air to burner at a rate between 250 and 300 cc/minute. Check with bubble flowmeter.

3. Hydrogen supply—Set regulator on cylinder to read 30 psig. Set regulator on chromatograph to supply approximately 35±5 cc/minute. Optimize hydrogen flow to yield the most sensitive detector response without extinguishing the flame. Check flow with bubble meter and record this flow

7.3.1.2 Temperature adjustments—Set temperatures as follows:

a. Oven (chromatographic column), 50° C.

b. Dosing line, 140° C.

c. Injection block, 140° C.

d. Sample chamber, water temperature, 90° C±1.0° C.

7.3.1.3 Ignition of flame ionization detector—Ignite the detector according to the manufacturer's instructions.

7.3.1.4 Amplifier balance—Balance the amplifier according to the manufacturer's instructions.

7.3.2 Programming the chromatograph—Program the chromatograph as follows:

a. I—Dosing time—The normal setting is 2 seconds.

b. A—Analysis time—The normal setting is 6 minutes. Certain types of samples contain high boiling materials which can cause interference with the vinyl chloride peak on subsequent analyses. In these cases the analysis time must be adjusted to eliminate the interference. An automated backflush system can also be used to solve this problem.

c. B—Flushing—The normal setting is 0.2 minutes.

d. W—Stabilization time—The nomal setting is 0.2 minutes.

e. X—Number of analyses per sample—The normal setting is 1.

7.3.3 Preparation of sample turntable—Before placing any sample into turntable, be certain that the center section of the aluminum cap has been removed. The numbered sample bottles should be placed in the corresponding numbered positions in the turntable. Insert samples in the following order:

V40I248 DEC 24 75 XUM

Positions 1 & 2—Old 2000 ppm standards for conditioning. These are necessary only after the analyzer has not been used for 24 hours or longer.

Position 3—50 ppm standard, freshly prepared.

Position 4—500 ppm standard, freshly prepared.

Position 5—2000 ppm standard, freshly prepared.

Position 6—4000 ppm standard, freshly prepared.

Position 7—Sample No. 7 (This is the first sample of the day, but is given as 7 to be consistent with the turntable and the integrator printout.)

After all samples have been positioned, insert the second set of 50, 500, 2000, and 4000 ppm standards. Samples, including standards must be conditioned in the bath of 90° C for 1 hour (not to exceed 5 hours).

7.3.4 Start chromatograph program—When all samples, including standards, have been conditioned at 90° C for 1 hour, start the analysis program according to the manufacturers' instructions. These instructions must be carefully followed when starting and stopping program to prevent damage to the dosing assembly.

7.3.5 Determination of total solids (TS). For wet cake, slurry, resin solution, and PVC latex samples, determine TS for each sample by accurately weighing approximately 3 to 4 grams of sample in an aluminum pan before and after placing in a draft oven (105 to 110° C). Samples must be dried to constant weight. After first weighing return the pan to the oven for a short period of time and then reweigh to verify complete dryness. TS is then calculated as the final sample weight divided by initial sample weight.

8. Calibration.

Calibration is to be performed each eight-hour period when the instrument is used. Each day, prior to running samples, the column should be conditioned by running two of the previous days 2000 ppm standards.

8.1 Preparation of Standards.

Calibration standards are prepared by filling the vials with the vinyl chloride/nitrogen standards, rapidly seating the septum and sealing with the aluminum cap. Use a stainless steel line from the cylinder to the vial. Do not use rubber or tygon tubing. The sample line from the cylinder must be purged (into hood) for several minutes prior to filling vials. After purging, reduce the flow rate to approximately 500–1000 cc/min. Place end of tubing into vial (near bottom) and after one minute slowly remove tubing. Place septum in vial as soon as possible to minimize mixing air with sample. After the standard vials are sealed, inject 100 µl of distilled water.

8.2 Preparation of chromatograph calibration curve.

Prepare two 50 ppm, two 500 ppm, two 2000 ppm, and two 4000 ppm standard samples. Run the calibration samples in exactly the same manner as regular samples. Plot A_s, the integrator area counts for each standard sample vs C_s, the concentration of vinyl chloride in each standard sample. Draw a line of best fit through the points.

9. Calculations.

9.1 Response factor.

From the calibration curve described in Section 8.2, above, select the value of C_s that corresponds to A_s for each sample. Compute the response factor, R_f, for each sample, as follows:

$$R_f=\frac{A_s}{C_s} \quad \text{Equation 107-1}$$

9.2 Residual vinyl chloride monomer concentration, or vinyl chloride monomer concentration.

Calculate C_{rvc} as follows:

$$C_{rvc}=\frac{A_s P_a}{R_f T_1}\left(\frac{M_v V_v}{m_i R}+K T_2\right) \quad \text{Equation 107-2}$$

where:

C_{rvc} = Concentration of vinyl chloride in the sample, in ppm.
P_a = Laboratory atmosphere pressure, mm Hg.
T_1 = Room temperature, °K.
M_v = Molecular weight of VCM (62.5).
V_v = Volume of vapor phase (vial volume less sample volume).
m_i = Weight of sample, grams.
R = Gas constant (62,360).
K = Henry's Law constant for VCM in PVC at 90°C, $K=6.52\times10^{-4}=K_p$, for VCM in 1 cc (approximate) wastewater sample at 90°C, $K=5.0\times10^{-6}=K_w$.
T_2 = Equilibration temperature, °K.

If the following conditions are met, Equation 107-2 can be simplified as follows:

1. $T_1=22°$ C (295° K).
2. $T_2=90°$ C (363° K).
3. $P_a=750$ mm. Hg.
4. $V_v=V_s-\frac{m_i}{1.4}=23.5-\frac{m_i}{1.4}$

where

V_s = Vial volume, cc (23.5).

5. Sample contains less than 0.5% water.

$$C_{rvc}=\frac{A_s}{R_f}\left(4.197\times10^{-3}+\frac{5.988\times10^{-3}}{m_i}\right)$$

Equation 107-3

The following general equation can be used for any sample which contains VCM, PVC and/or water.

$$C_{rvc}=\frac{A_s P_a}{R_f T_1}\times\left[\frac{M_v V_v}{R m_i}+K_p(TS)\,T_2+K_w(1-TS)\,T_2\right]$$

Equation 107-4

where:

T_s = Total solids.

Note: K_w must be determined.

For a 1 cc (approximate) wastewater sample, Equation 107-4 can be simplified to the following:

$$C_{rvc}=\frac{A_s}{R_f}\frac{5.988\times10^{-3}}{m_i}+(2.066\times10^{-3})$$

Equation 107-5

Results calculated using Equation 107-4 or 107-5 represent concentration based on the total sample. To obtain results based on dry PVC content, divide by TS.

PART III:

GENERAL SERVICES ADMINISTRATION

JOINTLY FUNDED ASSISTANCE TO STATE AND LOCAL GOVERNMENTS AND PRIVATE NONPROFIT ORGANIZATIONS

Proposed Rulemaking

V40248 DEC 24 75 XUM

GENERAL SERVICES ADMINISTRATION

Office of Federal Management Policy

[34 CFR Part 259]

JOINTLY FUNDED ASSISTANCE TO STATE AND LOCAL GOVERNMENTS AND PRIVATE, NONPROFIT ORGANIZATIONS

Notice of Proposed Rulemaking

This notice offers interested parties an opportunity to comment on a proposed regulation establishing uniform administrative requirements for jointly funded assistance to State and local governments and private, nonprofit organizations. It is issued in accordance with the provisions of the Joint Funding Simplification Act of 1974 and Executive Order 11867.

The proposed regulation was developed in cooperation with an interagency group representing the major Federal grantmaking agencies. Its purpose is to establish one set of administrative requirements to be followed by all Federal agencies in supporting jointly funded projects, and to encourage the simplification and standardization of various agency administrative requirements for such projects.

Generally, the proposed regulation discourages Federal agencies from imposing requirements on an applicant for jointly funded Federal assistance or a recipient of jointly funded assistance in addition to those prescribed by this regulation. To the extent that such a restriction may limit or preclude the participation of any Federal agency in jointly funded projects, we invite such agencies to provide comments concerning any additional requirements needed to faciliate such participation.

Interested parties should submit their comments in duplicate to the General Services Administration (AMM), Washington, D.C. 20405. All relevant material should be received within 45 calendar days from the date of this issuance.

NOTE: The forms and applicable instructions for joint funding to be provided as appendix H are on file with the original documents.

Dated: December 11, 1975.

WILLIAM W. THYBONY,
Acting Associate Administrator.

As proposed, the regulations would read as follows:

This is a Federal Management Circular requiring all Federal agencies to adopt and follow uniform administrative requirements in the provision of jointly funded assistance to State and local governments and private, nonprofit organizations. Authority for issuance of such standards is provided under the provisions of the Joint Funding Simplification Act of 1974, and Executive Orders 11717 and 11867.

PART 259—JOINTLY FUNDED ASSISTANCE TO STATE AND LOCAL GOVERNMENTS AND PRIVATE, NONPROFIT ORGANIZATIONS

Sec.
259.1 Purpose.
259.2 Effective Date.
259.3 Supersession.
359.4 Background.
259.5 Policy intent.
259.6 Applicability and scope.
259.7 Definitions.
259.8 Responsibilities.
259.9 Reporting requirements.
259.10 Inquiries.

AUTHORITIES: Joint Funding Simplification Act of 1974; Executive Order 11717; and Executive Order 11867.

§ 259.1 Purpose.

This part establishes policies and procedures to be followed in the joint funding of related programs of Federal assistance to State and local governments and private, nonprofit organizations.

§ 259.2 Effective date.

This part shall take effect in 60 calendar days from the date of issuance, except that existing jointly funded projects developed and administered under the Integrated Grant Administration (IGA) guidelines issued by the Office of Management and Budget on January 14, 1972, may be exempt from conformance to the provisions of this circular until September 30, 1976, or until the project is completed, whichever occurs first. In the interim, such projects will continue to conform to the 972 IGA guidelines and subsequent attachments and amendments.

§ 259.3 Supersession.

This part supersedes Office of Management and Budget memorandum for heads of departments and certain agencies dated January 14, 1972, subject: Integrated Grant Administration Program, and all susequent attachments and amendments.

§ 259.4 Background.

This part is issued pursuant to the Joint Funding Simplification Act of 1974 (Pub. L. 93–510), and Executive Order 11867, dated June 19, 1975, which delegates to the Administrator of General Services authority to issue regulations governing jointly funded assistance to State and local governments and private, nonprofit organizations, and to perform other functions specified in Pub. L. 93–510.

§ 259.5 Policy intent.

The intent of this part, in accordance with section 2, Pub. L. 93–510, is to establish procedures whereby State and local governments and private, nonprofit organizations may use Federal assistance more effectively and efficiently, and may adapt that assistance more readily to their particular needs through the wider use of projects drawing upon resources available from more than one Federal agency, program, or appropriation. It further is the intent of this part to encourage, and to provide guidance related to, the establishment of Federal-State arrangements under which local governments and private, nonprofit organizations may more effectively and efficiently combine State and Federal resources in support of projects of common interest to the governments and organizations concerned.

§ 259.6 Applicability and scope.

The provisions of this part shall apply as follows:

a. *Federal assistance programs.* This part shall apply to all Federal assistance programs, as defined in subparagraph 7d below, that provide support to State and local governments and private, nonprofit organizations, unless excluded under the provisions of section 3(b), Pub. L. 93–510. Where the enabling legislation for a specific Federal assistance program prescribes policies and procedures that exceed any or all of the provisions of this part, or that prohibit the application of any or all of the provisions of this part, the enabling legislation shall govern.

b. *Technical assistance and training.* In accordance with section 9, Pub. L. 93–510, appropriations available to any Federal assistance program for technical assistance or the training of personnel may be made available for the provision of technical assistance and training in connection with projects proposed or approved for joint funding involving that program and any other Federal assistance program.

§ 259.7 Definitions.

For the purpose of this part:

a. The term "Federal agency" means any agency, department, corporation, independent establishment, or other entity of the executive branch of the Government of the United States.

b. The term "participating agency" means any Federal, State, or other agency which provides, or will provide, financial assistance to a jointly funded project at some time during the projected funding period for the project.

c. The term "lead agency" means a Federal or State participating agency designated to coordinate the participation of all grantor agencies involved in a jointly funded project, and to act as the applicant's primary contact for all administrative matters related to the specific project concerned. Generally, the lead agency is a funding agency unless considerable technical assistance or special expertise is being provided in lieu of financial support.

d. The term "management fund agency" means a participating Federal agency responsible for the administration of the management fund as prescribed in appendix D.

e. The term "Federal assistance programs" means programs that provide assistance through grant or contractual arrangements, to include programs commonly referred to as block grants, but does not include assistance in the form of general revenue sharing, loans, loan guarantees, or insurance.

f. The term "applicant" means any State or local government or private, nonprofit organization acting separately or together in seeking assistance with respect to a single project.

g. The term "project" means any undertaking, whether of a temporary or continuing nature, that includes components proposed or approved for assistance under more than one Federal program, or one or more Federal programs and one or more State programs, provided each of those components contributes materially to the accomplishment of a single purpose or closely related purposes, as described in appendix A, subparagraph 2b(1).

h. The term "State" means any of the several States of the United States, District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a State, and any tribe as defined in Section 3(c) of the Indian Financing Act (88 Stat. 77).

i. The term "local government" means a local unit of government including a city, county, parish, town, township, village, school district, or any agency or instrumentality of a local unit of government, and regional governmental entities such as councils of government, intrastate districts, and interstate bodies.

j. The term "private, nonprofit organizations" means private institutions of higher education, private hospitals, and other private, nonprofit organizations such as, but not limited to, community action agencies, Headstart agencies, research institutes, educational associations, and health centers. The term does not include foreign or international organizations (such as agencies of the United Nations and Government-owned facilities) or research centers providing continuing support for mission-oriented, large scale programs which are (usually) Government-owned or controlled, or are designed as federally funded research and development centers.

§ 259.8 Responsibilities.

a. *Federal agencies.* The head of each Federal agency administering programs of assistance to State and local governments and private, nonprofit organizations shall be responsible for:

(1) Assuring implementation of this part through internal directive, order, or regulations by all affected agency personnel within 60 calendar days from the effective date of this part.

(2) Identifying, by "Catalog of Federal Domestic Assistance" reference number, related programs likely to be particularly suitable or appropriate for providing joint support for specific kinds of projects thereunder, in accordance with section 3(b)(1), Pub. L. 93–510. It is further the responsibility of heads of agencies to assure this information is communicated on a timely basis to all concerned agency personnel, other Federal agencies, and Federal Regional Councils, in order to respond more efficiently to applicant inquiries concerning the suitability of various Federal assistance programs for joint funding.

(3) Designating by organizational title and location an office or official:

(a) Within the agency headquarters, to coordinate intra-agency implementation of this part and serve as the primary point of contact for other Federal agencies and prospective applicants with respect to agency joint funding activities and policies; and

(b) Within each regional office, to coordinate agency joint funding activities within the region, and to serve as the primary contact for the Federal Regional Councils, other Federal agencies, and prospective applicants with respect to agency joint funding activities, to include serving on permanent or ad hoc joint funding committees as may be established by any Federal Regional Council, in consultation with member agencies.

b. *Federal Regional Councils.* The Federal Regional Council chairpersons shall:

(1) Make such FRC organizational and staff assignments they consider necessary and appropriate to carry out joint funding functions assigned to the FRC's by this part, to include establishment of ad hoc or permanent interagency committees for purposes of overseeing the processing of requests for, or the administration of, jointly funded assistance;

(2) Take actions, as described in this part, to promote Federal-State provision of joint assistance to local governments and private, nonprofit organizations;

(3) Assure issues of an interagency nature which arise during the processing of requests for, or the administration of, jointly funded assistance are brought to the attention of the FRC and resolved in a timely manner, as appropriate; and

(4) Maintain continuous oversight of jointly funded projects in order to assure such projects are developed and administered in conformance with the policies and procedures established by this part, and to evaluate from time to time the overall effectiveness of joint funding practices within the region.

c. *General Services Administration (GSA).* The Administrator of General Services shall:

(1) Oversee the implementation and application of policies and procedures established by this part;

(2) Assure administrative assistance, to include interpretation of policies and procedures, is provided to Federal agencies, Federal Regional Councils, applicants, and others affected by this part, as appropriate; and

(3) Prepare, in accordance with section 11, Pub. L. 93–510, a comprehensive report for transmission by the President to the Congress at least one year prior to the expiration of Pub. L. 93–510, on actions taken under the Act, and make recommendations for its continuation, modification, or termination. The report shall provide a detailed evaluation of the functioning of the Act, including information regarding the benefits and costs of jointly funded projects accruing to the participating State and local governments and private, nonprofit organizations, and to the Federal Government. The report shall be prepared in cooperation with the aforementioned groups.

§ 259.9 Reporting requirements.

a. *Federal agencies.* The heads of Federal agencies shall provide to the Administrator of General Services, Attention: Office of Federal Management Policy (AMM):

(1) A copy of agency regulations or directives, if any, issued to implement this part, within 30 calendar days of such issuance.

(2) A list of all agency programs identified as suitable for joint funding, and a list of all agency personnel designated to coordinate joint funding activities, as required in subparagraph 9a above. It further shall be the responsibility of agency heads to inform GSA, other Federal agencies, and Federal Regional Councils of any change in program identifications or personnel designations as they occur.

(3) Other reports and information as may from time to time be requested by the Administrator of General Services for the express purpose of meeting assigned responsibilities enumerated in E.O. 11867, dated June 19, 1975, to include information necessary to prepare the comprehensive report to the Congress described in subparagraph 9c(3) above.

b. *Federal Regional Councils.* The chairpersons of the Federal Regional Councils shall assure the submission to GSA of such reports as shall from time to time be requested by the Administrator of General Services for the express purpose of meeting assigned responsibilities enumerated in E.O. 11867, to include information necessary to prepare the comprehensive report to the Congress described in subparagraph 9c (3) above.

§ 259.10 Inquiries.

Additional information concerning this part may be obtained by contacting: General Services Administration (AMM), Washington, D.C. 20405 Telephone (IDS) 183–7461, (FTS) 202–343–7461.

PREAPPLICATION POLICIES AND PROCEDURES

1. *Purpose.* This appendix sets forth policies and procedures to be followed in the submission and review of preapplications for projects which are appropriate for jointly funded assistance from more than one Fed-

V 40248 DEC 24 75 XUM

eral agency, program, or appropriation, or from one or more Federal agencies and one or more State agencies.

2. *Preparation of preapplication.*

a. *Preapplication forms.* Applicants who wish to propose projects appropriate for jointly funded assistance shall complete the required forms as follows:

(1) State and local units of government shall complete Parts I through III of the standard "Preapplication for Federal Assistance," exhibit M–1, FMC 74–7, "Uniform administrative requirements for grants-in-aid to State and local governments." The General Services Administration has agreed to requests from a limited number of Federal agencies to modify the information required in Parts I through III of the standard preapplication form. It shall be the applicant's responsibility to consult with any agencies whose requirements are not known prior to the completion and submission of a preapplication form. In addition to Parts I through III of the standard form, applicants shall complete Part IV "Program Narrative Statement" required by each agency or program from which assistance is requested. Applicants are required to identify all programs from which assistance is requested in the preapplication for a jointly funded project, to include those programs which normally do not require submission of a preapplication form. Copies of standard forms to be used for jointly funded projects and instructions for their use are contained in appendix H.

(2) Private, nonprofit organizations, and other applicants who wish to propose jointly funded projects to be supported by Federal programs which do not require the use of standard forms promulgated through FMC 74–7, are encouraged to consult with the appropriate Federal Regional Council prior to the completion of any preapplication documents. In those instances where the proposed project will be carried out within a given Federal region, and will draw primarily upon Federal programs administered at a headquarters level only, the Federal Regional Council may refer the applicant to headquarters officials for the agency from which the greatest single share of assistance is desired.

b. *Supplemental information.* In addition to the basic preapplication form(s), all applicants shall provide the following:

(1) A narrative justification of the need for jointly funded assistance to complete the proposed project, to include the manner in which each separate program from which assistance is requested will contribute materially to the accomplishment of a single purpose or closely related purposes. In so doing, the applicant must demonstrate that a relationship exists among the programs cited through a commonality of purpose or ability to support related goals. The applicant further must demonstrate the specific activities to be supported by each program are part of an overall strategy to achieve a common stated objective consistent with the functional purposes of the applicant organization, and the general intent of the specific assistance programs requested.

(2) Notice of special timing considerations which may affect the feasibility of the proposed project, in accordance with section 4, Joint Funding Simplification Act of 1974 (P.L. 93–510).

(3) Requests, if any, for waiver of single or specific public agency eligibility requirements applicable to any of the programs from which assistance is requested. In accordance with section 6(c), P.L. 93–510:

". . . Federal agency heads may waive requirements that a single or specific public agency be utilized or designated to receive, supervise, or otherwise administer a part of the Federal assistance drawn upon by any jointly funded project to the extent that administration by another public agency is determined to be fully consistent with applicable State or local law and with the objectives of the Federal assistance program involved. This authority may be exercised only (1) upon request of the head of a unit of general government, with respect to agencies that he certifies to be under his jurisdiction, or (2) with the agreement of the several State or local public agencies concerned."

(4) Identification and request for agency review of any administratively established program requirements, as described in Appendix G, the applicant considers to be a serious impediment to the joint support of the proposed project, in accordance with section 3(b)(3), P.L. 93–510.

(5) Verification by a certified public accountant or authorized Federal agency that private, nonprofit applicant organizations maintain or can develop an accounting system whereby records will be kept by separate Federal programs and appropriations from which assistance is received. Such certification shall be required as a condition for the award of jointly funded assistance, and shall be borne at the applicant's own expense.

3. *Submission of preapplication.*

a. *Submission to A–95 clearinghouses.* A copy of the preapplication for jointly funded assistance shall be submitted by the applicant to the clearinghouse(s) designated in accordance with Office of Management and Budget (OMB) Circular No. A–95, "Evaluation, review, and coordination of Federal and federally assisted programs and projects." This requirement shall apply to all jointly funded projects which may have an impact on State, areawide, or local development, including development of natural, economic, and human resources. Certification by the applicant that a copy of the preapplication has been sent to the appropriate clearinghouse(s) shall be included with the preapplication submitted to Federal officials.

b. *Submission to Federal Regional Councils.* Applicants for jointly funded assistance should submit all required preapplication documents, hereinafter referred to as the preapplication, to the Federal Regional Councils established for the geographic area within which the applicant organization is located. Specific locations and geographic boundaries of the Federal Regional Councils are contained in exhibit A–1. The only exception to this procedure will be in the case of private, nonprofit organizations referred to headquarters officials of a specific Federal agency, as noted in subparagraph 2a(2) above. In such instances, the Federal agency receiving the preapplication will assume all functions normally assigned to the Federal Regional Council throughout the balance of this appendix and subsequent appendixes.

c. *Submission to State agencies.* If the proposed project includes assistance from State sources (including Federal/State funds), the applicant shall submit a copy of the preapplication to appropriate State agencies in conformance with notification procedures established by the individual State(s) concerned. The governor of each State is encouraged to designate a single State agency or function to receive and coordinate all requests for State participation in jointly funded projects. In the absence of direct State financial participation in the proposed project, the applicant is encouraged to submit copies of the preapplication to appropriate State agencies for information purposes only, provided copies have not been submitted previously through the A–95 process.

4. *Responsibilities for preapplication review.*

a. *General responsibilities.* In accordance with section 4, P.L. 93–510, actions taken by Federal officials related to the processing of applications or requests for assistance under two or more Federal programs in support of any project shall be designed to assure, so far as reasonably possible, that:

(1) All required reviews and approvals are handled expeditiously;

(2) Full account is taken of any special considerations of timing that are made known by the applicant that would affect the feasibility of a jointly funded project;

(3) The applicant is required to deal with a minimum number of Federal representatives, acting separately or as a common board or panel;

(4) The applicant is promptly informed of decisions with respect to an application and of any special problems or impediments that may affect the feasibility of Federal provision of assistance on a joint basis; and

(5) The applicant is not required by representatives of any one Federal agency or program to obtain information or assurances concerning the requirements or actions of another Federal agency that could more appropriately be secured through direct communication among the Federal agencies involved.

b. *Federal Regional Councils (FRC).* The Federal Regional Councils shall:

(1) Receive all preapplications for jointly funded assistance, except when an applicant has been advised by the FRC to submit the preapplication directly to the headquarters office of a specific Federal agency.

(2) Coordinate review of the preapplication by Federal and, if appropriate, State agencies from which an applicant requests assistance. The FRC may request the coordination of preapplication review by an individual Federal agency when:

(a) All Federal programs from which an applicant requests assistance are administered by one agency; or

(b) FRC workload or staff limitations are such that coordination by an individual agency acting under the auspices of the FRC can be carried out more efficiently than by FRC staffpersons.

(3) Upon favorable preapplication review, establish a project task force of representatives from each agency participating in the project, and designate a lead agency to chair the task force and assume overall administrative responsibility for the project.

c. *Federal agencies.* Federal agencies shall:

(1) Coordinate review of the preapplication by Federal and, if appropriate, State agencies from which an applicant requests assistance, when so designated by the FRC;

(2) Cooperate with the FRC or designated agency coordinating preapplication review to carry out internal review with respect to agency programs from which an applicant requests assistance; and

(3) Serve as lead agency, if so requested by the FRC, and appoint agency representatives to the project task force established by the FRC.

d. *Appointment of coordinating officer.* Upon receipt of preapplication for jointly funded assistance, the Federal Regional Council or a Federal agency designated by the FRC will appoint a coordinating officer to oversee preapplication review. The coordinating officer shall:

(1) Serve as the applicant's primary Federal contact during the preapplication review period;

(2) Determine whether the preapplication conforms to the standard form described in appendix H, and FMC 74–7, or other prearranged format for programs not covered by FMC 74–7, and that the preapplication is complete with respect to all required information;

(3) Assure copies of the preapplication are provided to all Federal and, if appropriate, State agencies from which an applicant requests assistance;

(4) Establish an official project file, to include at least the following information:

(a) Appropriate FRC and agency file control number;

(b) Date preapplication received;

(c) Date review initiated, if other than date of receipt;

(d) Copy of preapplication and supporting documents submitted by applicant;

(e) Special considerations requested by applicant;

(f) Disposition of proposal, by program and amount;

(g) State programs involved, if any, and disposition of reqeusts for State participation; and

(h) Date review completed;

(5) Assist applicant, in conjunction with other participating agencies, to identify supplemental or alternative sources of Federal support for the proposed project; and

(6) Receive separate agency reviews of the preapplication and, in consultation with the agencies concerned, prepare a consolidated report to the FRC for transmission to the applicant.

5. *Preapplication review procedures.*

a. *Review criteria.* Each Federal and participating State agency shall review the preapplication with respect to the program(s) administered by that agency from which an applicant requests assistance. Each reviewing official should assess:

(1) Applicant eligibility for the program(s) requested;

(2) Feasibility of the proposed project, to include consistency with Federal and agency policies concerning the acope and purpose of joint funding;

(3) The degree to which the applicant has properly demonstrated a relationship between the program(s) administered by the reviewing agency and those of other agencies from which assistance is requested, as required by subparagraph 2b(1) above;

(4) Competitiveness of the proposed project with similar requests for program funds, to include those applications for categorical assistance submitted under normal agency procedures;

(5) Special timing and special eligibility considerations requested by the applicant, if any;

(6) Applicant requests for agency review of administratively established program requirements considered to be a serious impediment to joint funding of the proposed project; and

(7) Administratively established program requirements, in addition to or in the absence of any identified by the applicant, which the reviewing official considers to be a serious impediment to joint funding of the proposed project.

b. *Requests for additional information.* Reviewing officials may request additional information from applicants if necessary to meet preapplication review requirements for the particular program(s) involved, provided such information is required in the approved preapplication forms for the program in question, and is not contained in the preapplication form or supporting documents already submitted by the applicant. Such requests may be made directly to the applicant, provided the coordinating officer is notified in writing of the action taken.

6. *Notice of preapplication review.*

a. *Agency review actions.* Within 30 calendar days of receipt, each Federal and, if appropriate, State agency reviewing the preapplication shall transmit to the coordinating officer a standard "Notice of Preapplication Review," exhibit M–2, FMC74–7, for each program administered by that agency from which an applicant requests assistance. In addition to information contained in the standard form, each agency or program shall indicate:

(1) Whether an applicant's request to waive single or specific public agency eligibility requirements is approved. Eligibility questions of this type must be resolved prior to the submission of a formal application for the proposed project.

(2) The extent to which special timing considerations requested by the applicant can be accommodated, and the impact such actions may have on the feasibility of providing joint assistance to the project.

(3) Action taken, in accordance with appendix G, with respect to administratively established program requirements identified by the applicant or the agency reviewing official as serious impediments to joint funding of the project.

(4) Any special requirements necessary to process a formal application for the proposed project.

(5) If agency review is favorable:

(a) Estimated level of funding for the project;

(b) Name of official to represent agency or program on project task force; and

(c) Whether agency is willing to serve as lead agency for the project.

(6) If agency review is not faboravle:

(a) The reasons why the agency or program has determined it will not participate in the proposed project, with specific references to the review criteria noted in subparagraph 4a above; and

(b) Whether the agency or program will accept for consideration a request for categorical assistance from the applicant in lieu of participation in a jointly funded project.

b. *Notification to applicant.* Within 15 calendar days of receipt of all notices of preapplication review, the coordinating officer, in consultation with all participating agencies, shall consolidate all reviews into a single "Notice of Preapplication Review." The single notice shall be submitted to the FRC chairperson for transmission to the applicant. In addition to information contained in the standard "Notice of Preapplication Review," the notification to the applicant shall comply with (1) or (2) below:

(1) If two or more Federal programs, or one or more Federal and one or more State programs indicate a favorable review of the project, and a relationship exists, among such programs through a commonality of purpose or ability to support related goals, the notification to the applicant shall indicate:

(a) Submission of a formal project application for jointly funded assistance is appropriate;

(b) Special requirements identified by reviewing programs necessary to process a project application;

(c) Lead agency designated by the FRC to which application for jointly funded assistance should be submitted, to include name of project manager appointed by the lead agency;

(d) Disposition of any requests by applicant for special timing and special eligibility considerations;

(e) Disposition of and action taken on any administratively established program requirements identified by the applicant or agency reviewing officials as serious impediments to joint funding of the project, as described in appendix G; and

(f) List of all project task force members.

(2) If the proposed project is not considered favorably for joint funding, the notification shall indicate:

(a) The reasons why the proposal was not favorably reviewed;

(b) Which Federal agencies, if any, will provide technical assistance to the applicant to refine the proposal; and

(c) Which Federal agencies, based upon their review of the preapplication, will accept for consideration applications for categorical assistance from the applicant.

7. *Establishment of task force and preapplication conference.*

a. *Establishment of task force.* When a preapplication for jointly funded assistance has been reviewed favorably, the Federal Regional Council shall:

(1) Establish a project task force consisting of representatives from each participating Federal and State agency; and

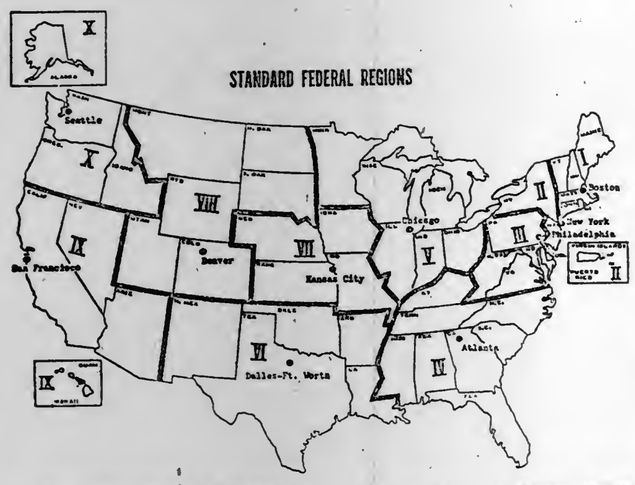
(2) Designate a lead agency for the project. The lead agency shall appoint a project manager, who will convene and chair task force meetings.

b. *Preapplication conference.* As soon as possible following the notification of preapplication review to the applicant, the lead agency shall hold a preapplication conference to be attended by the applicant and members of the project task force. The date and place of the preapplication conference shall be noted in the appropriate section of the standard "Notice of Preapplication Review" sent to the applicant. The purpose of the preapplication conference is to:

(1) Provide the applicant an opportunity to meet with all potential funding agencies and to discuss collective and individual requirements necessary to process a formal project application. At a minimum, the scope and format of any information required by participating agencies or programs in addition to the basic application forms should be established. Such requirements should be specified in writing and, to the extent practicable, shall constitute the total information required by participating agencies to review and approve the project.

(2) Discuss among potential funding agencies and the applicant the probable disposition of unresolved or disputed matters relating to any administratively established program requirements considered to be serious impediments to joint funding of the proposed project.

(3) Determine whether an environmental impact statement must accompany the application. If required, arrangements should be made for preparation of a joint or single environmental impact statement for the project, in accordance with Title 40, Code of Federal Regulations (CFR), section 1500: "Preparation of Environmental Impact Statements: Guidelines." Section 1500.7(b) states:



"Where more than one agency (1) directly sponsors an action, or is directly involved in an action through funding, licenses, or permits, or (2) is involved in a group of actions directly related to each other because of their functional interdependence and geographical proximity, consideration should be given to preparing one statement for all the Federal actions involved (see § 1500.6(d)(1)). Agencies in such cases should consider the possibility of joint preparation of a statement by all agencies concerned, or designation of a single 'lead agency' to assume supervisory responsibility for preparation of the statement. Where a lead agency prepares the statement, the other agencies involved should provide assistance with respect to their areas of jurisdiction and expertise. In either case, the statement should contain an environmental assessment of the full range of Federal actions involved, should reflect the views of all participating agencies, and should be prepared before major or irreversible actions have been taken by any of the participating agencies. Factors relevant in determining an appropriate lead agency include the time sequence in which the agencies become involved, the magnitude of their respective involvement, and their relative expertise with respect to the project's environmental effects. As necessary, the Council [on Environmental Quality] will assist in resolving questions of responsibility for statement preparation in the case of multi-agency actions. . . ."

(4) Arrange for such assistance to the applicant as may be appropriate to prepare the project application.

APPLICATION POLICIES AND PROCEDURES

1. *Purpose.* This appendix sets forth policies and procedures to be followed in the submission, review, and approval of applications for projects which are appropriate for jointly funded assistance from more than one Federal agency, program, or appropriation, or from one or more Federal agencies and one or more State agencies.

2. *Preparation of application.*

a. *Application forms.* Applicants for jointly funded projects shall complete the required forms as follows:

(1) State and local units of government shall complete Parts I through III of the standard "Application for Federal Assistance" described in (a) or (b) below. The General Services Administration has agreed to requests from a limited number of Federal agencies to midify the information required in Parts I through III of the standard application form. It shall be the applicant's responsibility to consult with any agencies whose requirements are not known prior to completion and submission of an application. In addition to Part I through III of the standard form, applicants shall complete the Part IV "Program Narrative" required by each agency or program from which assistance is requested. Copies of the standard forms and instructions for their use are contained in appendix H. The basic forms are:

(a) "Application for Federal Assistance (Nonconstruction Programs)," exhibit M-3, FMC 74-7, to be used to apply for joint funding of projects which do not include requests to support construction or real property acquisition; and

(b) "Application for Federal Assistance (for Construction Programs)," exhibit M-4, FMC 74-7, to be used to apply for joint funding of projects which include one or more requests to support construction or real property acquisition.

(2) Private, nonprofit organizations, and other applicants who apply for jointly funded projects to be supported by Federal programs which do not require the use of standard forms promulgated through FMC 74-7, shall consult with the project task force prior to completion of any application documents. It shall be the responsibility of the task force to develop, to the extent practicable, a single application format acceptable to all agencies and programs participating in the project.

b. *Supplemental information.* In addition to the basic application forms, applicants shall provide the following:

(1) Any special requirements or information identified by participating agencies in the "Notice of Preapplication Review:"

(2) Notice of special timing considerations which may affect the feasibility of the project, in accordance with section 4, Joint Funding Simplification Act of 1974 (P. L. 93-510), provided such notice, if any, was not made or resolved during the preapplication review period; and

(3) Requests for review and modification of specific administratively established program requirements, as described in appendix G, which the applicant believes would impede joint funding of the project under consideration, provided such requests were not made or resolved during the preapplication review period.

3. *Submission of Application.*

a. *Submission to A-95 clearinghouses.* A copy of the application shall be submitted to designated clearinghouse(s) in accordance with the procedures outlined in Office of Management and Budget (OMB) Circular No. A-95. Evidence of clearinghouse review must be included with the application submitted to Federal and, if appropriate, State officials, to include:

(1) Comments and recommendations made by or through clearinghouses, along with a statement that such comments have been considered prior to submission of the application; or

(2) A statement that the procedures outlined in OMB Circular No. A-95 have been followed and no comments or recommendations have been received.

b. *Submission to lead agency.* Applicants shall submit all required application documents, hereinafter referred to as the application, to the lead agency designated by the Federal Regional Council and identified in the "Notice of Preapplication Review" sent to the applicant under the provisions of appendix A, subparagraph 6b.

c. *Submission to State agencies.* If the project is to include assistance from State sources (including Federal/State passthrough funds), the applicant shall submit copies of the application to a State agency or function designated to receive and coordinate requests for State participation in jointly funded projects or, where a single State coordinator has not been designated, to each State agency from which assistance is requested. In the absence of direct State financial participation in the project, the applicant is encouraged to send copies of the application to appropriate State agencies for information purposes only.

4. *Responsibilities for application processing and approval.*

a. *General responsibilities.* In accordance with section 4, Pub. L. 93-510, actions taken by Federal officials related to the processing of applications or requests for assistance under two or more Federal programs in support of any project shall be designed to assure, so far as reasonably possible, that:

(1) All required reviews and approvals are handled expeditiously:

(2) Full account is taken of any special considerations of timing that are made known by the applicant that would affect the feasibility of a jointly funded project;

(3) The applicant is required to deal with a minimum number of Federal representatives, acting separately or as a common board or panel;

(4) The applicant is promptly informed of decisions with respect to an application and of any special problems or impediments that may affect the feasibility of Federal provisions of assistance on a joint basis; and

(5) The applicant is not required by representatives of any one Federal agency or program to obtain information or assurances concerning the requirements or actions of another Federal agency that could more appropriately be secured through direct communication among the Federal agencies involved.

b. *Lead agency.* The lead agency shall:

(1) Advise the A-95 clearinghouse(s) of action taken on the application. For elements of the application approved contrary to clearinghouse(s) recommendations, the participating agency supporting such element(s) shall be responsible for supplying the appropriate clearinghouse(s) with required explanation(s).

(2) Conduct or arrange for the conduct of a preaward survey of the applicant's financial management system. In accordance with appendix F, preaward surveys shall be completed and accepted by the lead agency prior to the joint funding grant award.

(3) Assure an approved cost allocation plan exists or is developed for the applicant organization, in accordance with the following Federal Management Circulars, as appropriate: FMC 74-4, "Cost principles applicable to grants and contracts with State and local governments;" FMC 73-3, "Cost sharing on Federal research;" FMC 73-6, "Coordinating indirect cost rates and audit at educational institutions;" and FMC 73-8, "Cost principles for educational institutions." However, if all participating agencies are supporting a single function or activity, and are able to finance all phases of the work, then the lead agency shall arrange for an agreed upon percentage of support by each participating program for the purpose of distributing charges to the appropriate Federal and non-Federal participants.

(4) Perform the following functions under the direction of the project manager:

(a) Call and chair task force meetings:

(b) Serve as the applicant's primary point of communication with agencies participating in the project during the application processing period;

(c) Coordinate review and approval of the application by participating agencies;

(d) If so requested, arrange for assistance to the applicant to develop the project application, either individually or in cooperation with one or more task force members;

(e) Receive separate agency reviews of the application and, in consultation with the task force, prepare a consolidated notice of approval and grant award, or notice of disapproval, to be forwarded to the applicant by the lead agency;

(f) Maintain an official project file, to include at least the following:

i. agency file control number and, if requested, FRC control number;

ii. original or copy of complete preapplication file;

iii. copy of application and supporting documents submitted by the applicant;

iv. date application received;

v. special considerations requested by applicant;

vi. disposition of application, by program and amount;

vii. list of task force members; and

viii. copy of official notice of approval or disapproval to applicant, and related notification documents.

c. *Participating Federal and State agencies.* Participating Federal and State agencies shall assure the agency is represented on the project task force established by the FRC. The task force representative shall:

(1) Coordinate agency or program review and approval of the application;

(2) Carry out all required actions within deadlines established by the task force, or inform the project manager in writing of the reasons why any such deadlines cannot be met and when the required actions can be taken; and

(3) If so requested, assist the applicant to develop the project application with respect to programs administered by the individual participating agency.

d. *Federal Regional Councils.* The Federal Regional Councils shall:

(1) Maintain a continuing liaison with the lead agency and project task force for purposes of monitoring overall processing of the application; and

(2) Provide a forum for the resolution of specific interagency issues which may arise during the application processing period, and which cannot be resolved by the project task force.

5. *Application review procedures.*

a. *Lead agency functions.* Upon receipt of the application, the project manager shall:

(1) Establish, in consultation with the task force, a deadline for review and approval of the application by participating agencies. The time required for review by participating agencies should be limited to a maximum of 45 calendar days.

(2) Assure copies of the application are provided to all task force members and, if requested, to the FRC.

(3) Arrange for internal review and approval of requests for assistance from lead agency programs.

b. *Participating agency functions.* Upon receipt of the application, task force representatives of participating agencies or programs shall:

(1) Review or arrange for review and approval of the application with respect to programs administered by the task force member's agency.

(2) Notify the project manager in writing at the earliest possible date if the agency or program cannot meet the deadline established for review and approval, to include a statement and justification of the reasons why such deadline cannot be met.

(3) Determine the extent to which the agency or program can accommodate any special timing considerations requested by the applicant, if not previously resolved.

(4) Identify any administratively established program requirements, in addition to or in the absence of any identified by the applicant, which are considered to be impediments to joint funding of the project.

(5) Arrange for review and modification of any administratively established program requirements identified as impediments to joint funding, in accordance with procedures described in appendix G, and discuss the disposition of or actions taken on such requests with the applicant and other task force members, as appropriate.

(6) Discuss with the applicant and other task force members any special conditions upon which agency approval of the application might be subject, and which would be attached to the grant award.

6. *Application approval.*

a. *Agency notification.* Upon completion of its review of the application, each agency shall notify the project manager of the results, in accordance with (1) or (2) below:

(1) *Project approved.* If the agency or program approves the applicant's request for assistance, it shall complete and forward to the lead agency the standard "Participating Agency Grant Award Notice" described in appendix H. In addition to the standard grant award notice, which constitutes an obligation of funds by the agency, the agency or program shall indicate:

(a) Special conditions, if any, to which approval of funds may be subject, based upon prior discussion with the applicant and other participating agencies.

(b) Final disposition or action taken on any administratively established program requirements identified by the applicant or reviewing agency as impediments to joint support of the project.

(c) Any delegation of powers to another Federal agency, if necessary. In accordance with section 7, P.L. 93-510, agency heads may delegate to other Federal agencies powers and functions relating to the supervision or administration of Federal assistance, or otherwise arrange for other agencies to perform such activities, with respect to projects or classes of projects funded under the terms of P.L. 93-510. Delegations may be made only on such conditions as may be appropriate to assure that the powers and functions delegated are exercised in ful conformity with applicable statutory provisions and policies, and shall not relieve agency heads of responsibility for the proper and efficient management of projects funded by their agencies.

(2) *Project disapproved.* If the agency or program disapproves the applicant's request for assistance, it shall indicate the reason(s) for such disapproval.

b. *Task force consolidation of agency actions.* If one or more of the following conditions exist at the end of the review period previously established by the task force, the project manager shall convene the task force to resolve such conditions:

(1) All agencies from which assistance is requested have not completed their review or approved the application. In such instances, the task force shall evaluate the project on the basis of approved funds to ensure it conforms to the scope of a jointly funded project as described in appendix A, subparagraph 2b(1). If the project remains consistent with the purpose and scope of joint funding, the grant may be awarded.

(2) The project is subject to varying or conflicting technical or administrative rules and procedures not required by law. In such instances, the participating agencies shall work in concert to establish uniform, nonconflicting requirements to govern the project, in accordance with procedures described in appendix G.

c. *Notification procedures.* When all contingencies associated with the project have been resolved, the following notification procedures shall be executed:

(1) *Notification to applicant.* The project manager shall comply with (a) or (b) below:

(a) If approved, prepare a single notice of grant award to be forwarded by the lead agency to the applicant, in accordance with procedures described in appendix C; or

(b) If disapproved, prepare an explanation of the reasons for disapproval to be forwarded by the lead agency to the applicant.

(2) *Participating agency notification requirements.* Participating agencies shall comply with notification requirements established by Department of the Treasury Circular (TC) 1082 and Office of Management and Budget (OMB) Circular No. A-95, as appropriate.

f. Continuation applications. The project task force will assist the applicant to develop continuation applications for subsequent project years. Such applications will be processed in accordance with the procedures outlined in this appendix, to include submission to the existing lead agency, and coordination for review and approval purposes by members of the project task force. Use of preapplication forms will not be required except in the case of new programs from which assistance previously has not been received for the specific jointly funded project concerned, and continuing programs which may require the submission of a preapplication for each project year as a general agency requirement. Specific task force functions with respect to establishing deadlines for submission and assisting applicants to develop continuation applications are described in appendix C.

PROJECT MANAGEMENT POLICIES AND PROCEDURES

1. *Purpose.* This appendix sets forth policies and procedures to be followed in the management of jointly funded projects.

2. *Lead agency functions.* The lead agency will coordinate grantor agency participation in the project, and will serve as the grantee's

V 40 248 DEC 24 75 XUM

primary contact for all administrative matters related to the project. The lead agency shall be responsible for the necessary costs of services in administering the jointly funded project unless other arrangements are negotiated with the participating agencies for the provision of funds, services, or materials to aid in the administration of the jointly funded project.

a. *Notification and award of project funds.*

D.

Following approval of the project application, the lead agency shall:

(1) Arrange for establishment of a joint management fund for the project, in accordance with procedures described in appendix

(2) Issue a single notice of grant award to the applicant in letter form. A description of the grant award notice as an obligational document is contained in appendix D, subparagraph 5a. In general, notification to the applicant shall specify:

(a) Programs and amounts approved, and shall be limited to those programs which have submitted a "Participating Agency Grant Award Notice" to the lead agency, in accordance with B, subparagraph 6a(1);

(b) Date funds will be available;

(c) Special conditions of the grant (contract) award imposed by participating grantor agencies, provided such conditions previously were discussed with the applicant and other participating agencies, as noted in appendix B, subparagraph 5b(6);

(d) Disposition of or action taken on requests for review and modification of administratively established program requirements identified by the applicant or participating agencies as impediments to joint support of the project, in accordance with procedures described in appendix G;

(e) Any common technical or administrative rules and procedures established for the project, in accordance with appendix G; and

(f) Standard financial and program reporting requirements applicable to the particular project, in accordance with the provision of FMC 74-7, attachments H and I, or the proposed circular entitled, "Uniform administrative standards for agreements with public and private institutions of higher education, public and private hospitals, and other public and private, nonprofit organizations," attachments G and H.

b. *Administration of project funds.* Specific procedures governing administration of project funds are described in appendix D. In general, the lead agency shall:

(1) Assure approved funds are made available to the grantee on a timely basis;

(2) Receive and process grantee financial reports, and assure such reports are distributed to participating grantor agencies on a timely basis;

(3) Assure accountability by program appropriation for all Federal funds placed in a joint management fund to ensure such funds are spent for the purposes for which each account was established, in accordance with section 8(b) of the Joint Funding Simplification Act of 1974 (P.L. 93-510);

(4) Determine, from time to time, whether amounts in the joint management fund are in excess of the amounts required, and assure such excess amounts are returned to participating Federal agencies according to applicable appropriations and subject to fiscal year limitations, in accordance with section 8(b), P.L. 93-510;

(5) Oversee the establishment, where appropriate, of a single non-Federal share for any project covered in a joint management fund, based on the Federal share ratios applicable to the Federal assistance programs involved and the proportion of funds transferred to the project account from each of those programs, in accordance with section 8(e), P.L. 93-510; and

(6) Take any actions necessary to revise or terminate project funding, such as revisions to project budgets and amendments to the grant award, in cooperation with the participating grantor agencies involved.

c. *Audit of project funds.* Specific audit procedures are described in appendix F. In general, the lead agency shall:

(1) Assure necessary project audits are scheduled and conducted on a timely basis; and

(2) Assure appropriate actions are taken to implement recommendations noted in audit reports.

d. *Project administration and coordination.* The lead agency shall administer and coordinate the project on behalf of participating grantor agencies. However, neither the lead agency nor the Federal Regional Council which designated the lead agency shall make any decisions concerning the participation or amount of assistance provided by any grantor agency. Further, the lead agency shall not evaluate or suggest corrective actions related to grantee performance of project components supported by any program other than those of the lead agency. Authority to make and execute decisions of the types noted above is vested only in the specific agencies concerned, and cannot be delegated to the lead agency. In carrying out administrative and coordinative functions, the lead agency project manager shall:

(1) Establish and maintain an official project file, to include at least the following:

(a) Appropriate agency file control number;

(b) Original or copy of complete preapplication and application files for the project;

(c) Copy of notice of grant (contract) award;

(d) Copies of all grantee reports;

(e) A record and summary of all project task force meetings;

(f) A record and summary of all project site visits;

(g) Pertinent project correspondence; and

(h) Copies of continuation applications submitted by the grantee.

(2) Continue to chair and convene task force meetings for purposes of:

(a) Monitoring and evaluating overall progress of the project as a jointly funded effort, and of the effectiveness of joint funding policies and procedures in general, in order to assist development of a comprehensive report to the Congress on actions taken under P.L. 93-510, at least one year prior to its expiration, and to make recommendations for its continuation, modification, or termination. Specific requirements for information necessary to develop the aforementioned report, which is to be coordinated by the General Services Administration, will be communicated to Federal Regional Councils, project task forces, and participating agencies as appropriate. The lead agency, however, shall not assume responsibility for normal program monitoring of project components supported by other participating agencies.

(b) Providing a forum for the resolution of specific interagency issues related to the project, as appropriate.

(c) Assisting the grantee to develop continuation applications for subsequent project years, to include:

i. establishment of submission deadlines, and review and approval schedules;

ii. provision of assistance by one or more task force members to help the grantee develop continuation application documents, and to identify supplemental or alternative sources of support for specific project components, as appropriate; and

iii. determination of specific processing procedures described in appendixes A and B which are applicable, based on the scope and content of the continuation application proposed by the grantee.

(d) Establishing a schedule of project site visits by the task force, and coordinating such visits with the grantee and participating grantor agencies.

(3) Help arrange for the provision of any appropriate assistance requested by the grantee, relative to the management of the project as a whole, or of specific components thereof.

(4) Inform participating agencies of any problems that may occur relative to project components they are funding, and help arrange for the most expeditious resolution of such problems between the grantee and representatives of the specific agency(s) concerned.

(5) Receive program reports required of the grantee, and assure such reports are distributed on a timely basis to participating grantor agencies.

3. *Participating grantor agency functions.* Participating grantor agencies shall be responsible for:

a. *Statutory accountability.* Participating grantor agencies *are not relieved* of the responsibility to ensure that funds they provide through a jointly funded arrangement are disbursed and expended properly, in a manner consistent with applicable laws and regulations.

b. *Program monitoring.* Participating grantor agencies shall be responsible for normal program monitoring of those specific project components funded by a particular agency or program. Site visits and other requirements related to the execution of such monitoring responsibilities shall be coordinated with the project manager in order to promote efficient scheduling and eliminate duplicative efforts.

c. *Review of grantee reports.* Participating grantor agencies shall review all financial and program reports submitted by the grantee, either directly or through the lead agency, and shall notify the project manager within 15 working days of the receipt of such reports in accordance with (1) or (2) below:

(1) Acceptance of the reports as submitted with respect to project components funded by the particular agency or program; or

(2) A statement of any problems or discrepancies noted in the reports with respect to project components funded by the particular agency or program, and any actions necessary to resolve such problems.

d. *Administrative support to the lead agency.* Participating grantor agencies shall provide administrative support to the lead agency through:

(1) Appointment of task force members, to include affording such appointees the time and resources necessary to participate fully and effectively in task force activities;

(2) Timely compliance with project review, processing, and funding procedures promulgated by this part, to include the review and modification of administratively established program requirements and development of common technical and administrative rules for particular projects, as needed; and

(3) Acceptance of preapplication, application, and reporting prescribed by this part in lieu of any other forms normally used, except in instances where information of a specific nature is required as a prerequisite to necessary agency action, and which meets requirements stated elsewhere in this part.

e. *Provision of technical assistance and training.* Participating agencies shall provide technical assistance and training to grantees to aid them in meeting planned objectives of the jointly funded project, as appropriate, in accordance with section 9, Pub. L. 93-510.

4. *Federal Regional Council functions.* The Federal Regional Councils (FRC) shall:

a. *Maintain continuing oversight of joint funding activities.* The FRC's shall maintain continuing oversight of jointly funded activities within their geographic area of responsibility, to include designating an individual or standing committee at the FRC staff level to serve as a liaison to individual project managers and task forces established within the region.

b. *Provide a forum for the resolution of interagency issues.* Issues which arise in the operation of any jointly funded project of an interagency nature, and which cannot be solved at the project task force level, shall be brought before the Federal Regional Council by the project manager for appropriate action and resolution.

5. *Project evaluation and change of lead agency.* Upon a significant change in the project such as changes in the project core activity or the nature and scope of the project, the project task force shall:

a. *Evaluate the project.* The project shall be evaluated to determine its continued need for jointly funded assistance, with particular emphasis on meeting the criteria for a jointly funded project described in appendix A, subparagraph 2b(1).

b. *Recommend a new lead agency.* If changes in the project warrant designation of a new lead agency, the task force shall recommend the same to the Federal Regional Council. In designating a new lead agency, the FRC shall assure any change:

(1) Meets with the approval of participating grantor agencies, and is acceptable to the grantee; and

(2) Is concurrent with the start of a new project funding period.

c. *Management and audit functions.* When a change in lead agency takes place, appropriate arrangements shall be made between the new lead agency and its predecessor with respect to continuing administration of unexpended amounts in the joint management fund and conduct of previously arranged or scheduled audits by the former lead agency.

5. *Federal-State coordination.* Where Federal and State agencies are providing concurrent assistance to a grantee for the same project, Federal Regional Councils and participating Federal agencies, in accordance with section 10, P.L. 93-510, shall make every effort to coordinate the delivery of Federal and State funds through the development of Federal-State agreements and joint assistance. Specific recommendations for coordinating Federal and State participation in jointly funded projects are described in appendix E.

PROJECT FUNDING POLICIES AND PROCEDURES

1. *Purpose.* This appendix presents policies and procedures to be followed in the transfer of funds awarded from grantor agencies to grantees administering jointly funded projects.

2. *Policy intent.* The use of a management fund as authorized in setcion 8(a), Joint Funding Simplification Act of 1974 (P.L. 93-510), along with the Federal letter of credit shall be the preferred method of funding jointly funded projects. Supplemental or parallel funding procedures that complement the management fund may be used if so requested by the grantee, and if their use promotes efficiency and economy in the administration of jointly funded projects. Under joint funding procedures, non-Federal participants' contributions to projects also may be processed through the management fund. Where the use of the management fund and letter of credit procedures by participating grantor agencies are prohibited by statute, appropriate citations should be presented to the lead agency prior to approval of the project in order that alternative funding procedures may be developed in a timely manner. Subparagraph 4c describes procedures to be followed by non-Federal participants.

(3) *Applicability and scope.* These guidelines are provided to augment the procedures established by the U.S. Department of the Treasury in the use of the management fund process and letter of credit procedures for joint funding purposes.

4. *Management fund policies.*

a. *Management fund use.* A management fund is an account authorized by law to record the transactions of intragovernmental activities necessary to carry out a common purpose or project, other than a continuing cycle of operations, which are financed by more than one Federal program or appropriation. Section 6, P.L. 93-510, authorizes the use of a management fund to support jointly funded projects. The management fund is used as a financial devise to record the receipt and expenditure of funds awarded to jointly funded grantees (States, local governments, and private, nonprofit organizations), to enable the grantee to utilize the Federal letter of credit procedure, and to facilitate management by a single agency (management fund agency as described under subparagraph 5d below). A management fund shall be established for all new jointly funded projects, and for those where previous funding has terminated and continuation funding is approved after the effective date of this Part.

b. *Assignment of management fund symbol.* For the purpose of establishing and maintaining the integrity and control of each account, a joint management fund symbol shall be assigned by the U.S. Department of the Treasury to each Federal department or agency that is serving as a lead or management fund agency for one or more jointly funded projects.

c. *Funding projects through the management fund.* The participating grantor agencies shall transfer to the management fund the proportionate share of amounts needed for payment to the grantee. In accordance with section 8(b), P.L. 93-510, the management fund agency shall account by program and appropriation for the amounts provided in support of the purposes of each account established in the management fund as stated in subparagraph 5d below. Any unexpended amounts shall be returned to the management fund by the grantee at the completion of the project. Further, any amounts in excess of the amounts required shall be returned to the participating Federal and non-Federal agencies by the management fund agency according to the applicable appropriations, subject to fiscal year limitations. Excess amounts of Federal funds applicable to expired appropriations will be lapsed from the management fund.

d. *Participating Federal agencies.* Participating agencies shall:

(1) Not use the management fund to report joint funding transactions to the U.S. Department of the Treasury unless they also are designated as the management fund agency.

(2) Verify to the U.S. Department of the Treasury amounts charged to appropriation or fund accounts by the management fund agency. This shall be verified on Treasury Form 6653, "Undisbursed Appropriation Account," which will be forwarded to participating grantor agencies six weeks after the close of each accounting period.

(3) Use information reported to them by the management fund agency to maintain their administrative accounts and to provide information or other financial reports required by the U.S. Department of the Treasury and the Office of Management and Budget.

(4) Contact management fund agency for any reconciliation of differences in reports on funds transferred through management fund in accordance with subparagraph 5f of this appendix.

e. *Non-Federal participants.* The non-Federal participant is a State agency which provides financial assistance for the project through grants or contractual arrangements as authorized by section 10, P.L. 93-510. In addition to State agencies, non-Federal participants may include organizations designated by Federal statutes to receive certain entitlement funds, such as prime sponsors under the Comprehensive Employment and Training Act, and designated Community Development Block Grant recipients. Such assistance may be provided through the management fund, and may be in the form of Federal grant passthrough funds, programs financed entirely by a State or a combination of both with respective proportions identified. Applicable State matching funds for Federal programs also may be processed through the management fund. The non-Federal participants share of the project shall be advanced by check to the project management fund on a quarterly basis. The amounts of such quarterly advance shall be established in the approved project application and subject to approval by the management fund agency.

f. *Non-Federal funding.* The deposit by a participating State grantor agency of Federal block grant funds, formula grants, and the like which can be further granted by a State to a jointly funded grantee via the management fund *does not* represent a return of State funds for use by the Federal Government. All funds deposited in the management fund retain their identity and are specifically reserved for the particular jointly funded grantee involved.

5. *Management fund procedures.*

a. *Notification of joint funding award.* The lead agency issues the joint funding award to the grantee in letter form, in accordance with the provisions of appendix C, subparagraph 2a(2). The grant award is for a single amount representing a total of all assistance authorized for the project. The approved grant award funds represent budgetary and obligation authority to the grantee for the funding period. The award letter sent to the grantee will serve as the lead agency's obligating document for the budgetary funds in the jointly funded project. A copy of the grant award notice shall be provided to participating grantor agencies and the Federal Regional Council.

b. *Lead agency.* Upon issuance of the joint funding award letter, the Federal lead agency assumes responsibility for establishing the management fund, the letter of credit, and other funding arrangements to which the grantee has agreed in order to expedite the delivery of project funds. For a more complete description of the lead agency's functions, see appendix C, "Project Management Policies and Procedures."

c. *Delegation by lead agency of management fund administration.* In accordance with the provisions of section 7, P.L. 93-510, the lead agency may delegate to the participating Federal grantor agency the powers and functions necessary to administer the joint management fund. Delegation under this section shall be made only on such conditions as may be appropriate for the proper and efficient management of project funds. Such delegation by the lead agency shall not relieve the heads of any participating agencies of the responsibility to account for disbursement of agency funds in a manner consistent with applicable laws and regulations.

d. *Management fund agency.* The management fund agency is responsible for reporting joint funding transactions to the

V 40248 DEC 24 75 XUM

U.S. Department of the Treasury and providing financial data to participating grantor agencies necessary for coordinating administrative and budgetary systems of control. Consolidated financial and audit reports for the entire jointly funded grant are submitted to the management fund agency for review and further reporting to Federal and non-Federal participating agencies. Because accessibility to the Federal Treasury central accounting reporting system is required, the management fund agency must be a Federal agency. However, the management fund agency acts merely as a broker of the Federal and non-Federal funds in the grant. All funds, whatever their origin, do not lose their identity and are available only for use by the grantee in accordance with the terms and conditions of the jointly funded grant. Normally, the management fund agency is the lead agency and shall perform as follows:

(1) Receive the "Participating Agency Grant Award Notice" from each agency providing financial support to the project. The appropriations or fund account to be charged and the amount available for the funding period are noted in the aforementioned form.

(2) Request U.S. Department of the Treasury to establish a joint management fund account and assign the appropriate account symbol. If there is a previously established management fund account assigned to the management fund agency for jointly funded projects, the same shall be utilized. Existing management fund accounts used for purposes other than joint funding will not be used for joint funding transactions.

(3) Utilize the simultaneous charge/credit concept of reporting transactions. No advance payments from Federal participating agencies are required to establish the project management fund. See the U.S. Department of the Treasury Fiscal Requirement Manual for further guidance.

(4) Issue a letter of credit (Standard Form 1193) to the grantee in accordance with the provisions of Treasury Fiscal Requirements Manual, Part VI, as amended. The letter of credit shall be issued to the grantee in an amount equal to the total amount of all grant award notices received from participating agencies. If the management fund agency must administer a holdback provision imposed by a participating agency, the amount shall not be included in the letter of credit.

(5) Report to the U.S. Department of the Treasury charges and credits to the management fund, and off-setting charges and credits to participating agencies' appropriations and to non-Federal participants' payments (advances) to the management fund.

(6) Notify participating agencies, within 15 calendar days after the close of the accounting month, of amounts they have charged to participating agencies' appropriation or fund accounts. This requirement includes the management fund agency's responsibility to report at the same time to non-Federal participants all receipts of advance payments made to the management fund during the accounting month, the distribution of charges to each of their grants and the respective cash balances in the management fund.

(7) Continuously monitor the amount of obligational authority granted by participants for the purpose of identifying unnecessary amounts. This is accomplished by review of the grantee letter of credit drawdown vouchers against the terms of the authorized grant, by review of the grantee financial reports, and by review of the audit reports. Unobligated amounts identified in audit reports will be returned to the original participating Federal and non-Federal agencies in accordance with instructions furnished by those agencies.

Audit requirements for jointly funded projects are described in appendix F.

e. *Use of letters of credit.* Use of letters of credit shall be covered by a clause in the grant, contract, or other financing agreement whereby the grantee organization commits itself to: (1) the practice of initiating cash drawdowns only when actually needed for its disbursements; (2) the timely reporting of cash disbursements and balances as required by the lead or management fund agency; and (3) the imposition of the same standards of timing and amounts upon any secondary recipients, including furnishing of reports of cash disbursements and balances, with the understanding that failure to adhere to these provisions may cause the unobligated portion of the letter of credit to be revoked by the lead or management fund agency or by the U.S. Department of the Treasury. The financial management system of the recipient organization shall provide for effective control over the accountability for all funds, in accordance with provisions set forth in FMC 74–7, or proposed circular on "Uniform administrative standards for agreements with public and private institutions of higher education, public and private hospitals, and other public and private, nonprofit organizations," as appropriate.

f. *Reconciliation of joint funding transactions.*

(1) U.S. Department of the Treasury will report related joint funding transactions (charges and credits reported to the U.S. Department of the Treasury on "Statements of Transactions" by the management fund agency) back to the management fund agency and participating agencies on Treasury Fiscal Service (TFS) Form 6653, "Undisbursed Appropriation Account."

(2) Participating agencies should contact management fund agencies for purposes of reconciliation if the amounts reported to them by the management fund agency and the U.S. Department of the Treasury (TFS Form 6653) vary. Non-Federal participants shall rely on management fund agencies to reconcile disbursements charged to them by the management fund agency.

g. *Treasury reporting requirements for joint funding transactions.* All U.S. Department of the Treasury reporting requirements for joint funding transactions involving the use of the joint management fund are contained in the U.S. Department of the Treasury Fiscal Requirements Manual (FRM). In addition, letter of credit policy and procedures are covered in U.S. Treasury Department Circular 1075, Third Revision, and Part VI, Treasury FRM 2000, respectively. For an example of internal financial operating procedures for jointly funded projects, please refer to Appalachian Regional Commission's (ARC) Instructions 302A–3(1), as amended.

FEDERAL-STATE ASSISTANCE AND AGREEMENTS

1. *Purpose.* It is the purpose of this appendix, in accordance with section 2, Joint Funding Simplification Act of 1974 (P.L. 93–510), to encourage Federal-State arrangements under which local governments and private, nonprofit organizations may more effectively and efficiently combine Federal and State resources in support of projects of common interest to the governments and organizations concerned.

2. *Applicability.* In accordance with section 10, P.L. 93–510, Federal agencies or Federal Regional Councils acting on behalf of member agencies are authorized, and are hereby encouraged, to enter into agreements with States to extend joint funding procedures to projects involving assistance from one or more Federal agencies and one or more State agencies. It also shall be the responsibility of the Federal Regional Councils (FRC) to encourage the governors of States within their geographic areas of responsibility to designate a single State agency or function to receive and coordinate all requests for State participation in jointly funded projects. The FRC's further shall maintain a list of designated State joint funding coordinators within their regions, and shall assure such information is made known to prospective applicants.

3. *Policy intent.* The intent of section 10, P.L. 93–510, is to encourage greater Federal-State cooperation in the provision of joint assistance to eligible applicants. A number of specific suggestions to improve such cooperation are noted in this appendix. It is emphasized, however, that the suggestions given are only a summary list of probable opportunities for shared Federal-State responsibility. Federal and State agencies participating in jointly funded projects are encouraged to examine all possible means to facilitate the provision of joint assistance and, within the general guidelines promulgated through this part, to establish working agreements related to the specific needs of the individual projects and grantees involved.

4. *Types of agreements.* Subject to applicable Federal and State laws, Federal-State arrangements may include agreements for the processing of requests for, or the administration of, assistance to projects on a joint basis. Specific agreements may include, but are not limited to, the following:

a. *Preapplication and application processing.* Agreements to jointly process project preapplications and applications shall conform generally to the procedures described in appendixes A and B, and might include:

(1) Establishment of coordinated Federal-State review and approval schedules and requirements, whereby:

(a) A single Federal or State activity agrees to oversee preapplication or application processing by all participating grantor agencies; or

(b) A single Federal and a single State activity agree to jointly oversee all preapplication or application processing by participating grantor agencies at their respective governmental levels, and to coordinate all responses to the applicant.

(2) Establishment of a single project task force:

(a) Chaired by a lead Federal or a lead State agency, under the general auspices of the FRC; or

(b) Co-chaired by a lead Federal and a lead State agency, again under FRC auspices, each of which shall be responsible for coordinating the participation of grantor agencies at their respective levels of government.

(3) Acceptance by participating State agencies of Federal preapplication and application forms, in order to establish a single format for the project.

(4) Joint agreement to waive single or specific public agency eligibility requirements for programs from which an applicant requests assistance and which are subject to both Federal and State approval, in accordance with the provisions described in appendix A, subparagraph 2b(3).

b. *Project funding.* The delivery of Federal and State funds to the grantee may be coordinated through:

(1) Establishment of parallel Federal and State funding mechanisms, whereby the timing of Federal and State payments to the grantee are synchronized on the basis of a project funding cycle acceptable to all participating grantor agencies; or

(2) Establishment of a single joint management fund for approved Federal revenues which, at their option, participating State grantor agencies may elect to utilize as a

delivery medium for approved State funds, in accordance with procedures described in appendix D.

c. *Project management and monitoring.* Project management and monitoring may be enhanced through:

(1) Establishment of a single Federal-State project task force, chaired by a single Federal or State lead agency, or chaired jointly by a Federal and a State lead agency, as described in subparagraph 4a(2) above;

(2) Coordinated Federal-State program monitoring requirements, to include conduct of joint Federal-State site visits, as needed;

(3) State acceptance of Federal financial and program reporting forms and procedures, in order to establish a single reporting requirement for grantees;

(4) Conduct of single project audits acceptable to all participating agencies; and

(5) Coordinated provision of joint Federal-State technical assistance or training to applicants and grantees, as appropriate.

JOINT FUNDING AUDITS

1. *Purpose.* This appendix sets forth policies to be followed in the audit of jointly funded projects. It supplements policies prescribed by Federal Management Circular (FMC) 73–2, "Audit of Federal Operations and Programs by Executive Branch Agencies," and "Standards for Audit of Governmental Organizations, Programs, Activities and Functions," published by the U.S. General Accounting Office.

2. *Policy and procedures.*

a. *Preaward survey.* Prior to the original award for a jointly funded project, the lead agency shall conduct or arrange for the conduct of a preaward survey to assess the applicant's financial management system, including the accounting methods and internal controls employed by the applicant. Particular emphasis should be placed on the applicant's ability to allocate and account for funds on the basis of the specific programs and activities they benefit. This is necessary since section 8(b) of the Joint Funding Simplification Act of 1974 (P. L. 93–510) states the grantor agency administering a joint management fund "shall be responsible and accountable by program and appropriation for the amounts provided for the purposes of each account established in the fund." The preaward survey may be waived in those cases where participating agencies are satisfied the applicant's financial management system is adequate for joint funding. If a preaward survey is conducted, the audit agency performing the survey shall be given at least 30 calendar days prior to the joint funding grant award to complete the survey and submit its findings to the lead agency.

b. *Interim audit of new projects.* An interim audit of all new jointly funded projects shall be conducted six months after the grant award is made. Such audits shall be arranged by the lead agency in consultation with other participating grantor agencies. The purpose of the interim audit is to ensure that the grantee's financial management system is operating effectively.

c. *Periodic audits.* During each of the first two years of a jointly funded project, the lead agency shall conduct or arrange for the conduct of an annual audit after consultation with the other participating grantor agencies concerning their audit requirements. Thereafter, audits shall be conducted with reasonable frequency, usually annually, but not less frequently than once every two years. The nature, size, and complexity of the project shall be taken into consideration when determining the frequency of audits. More frequent audits should be conducted, however, where there is cause to believe an audit is necessary. Every effort should be made to schedule and announce all audits planned for the forthcoming funding period at the time of the grant award in accordance with subparagraph 5b, FMC 73–2. In those cases where State grantor agencies are involved in joint funding projects, the Federal lead agency shall coordinate with the State agencies involved regarding arrangements for and conduct of audits.

d. *Use of non-Federal audits.* With regard to preaward surveys and audits, the lead agency will utilize to the maximum extent possible survey and audit work conducted through arrangements made by the grantee or by other components of governmental bodies or organizations of which the grantee is a part.

e. *Distribution of audit reports.* The lead agency will furnish copies of audit reports to the grantee, each grantor agency, the Federal Regional Council, and the General Services Administration (AMM), Washington, DC 20405, as quickly as possible after audits are completed.

f. *Access to records.* In accordance with section 8(d), P.L. 93–510, the head of the Federal agency responsible for administering the joint management fund and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination of any books, documents, papers, and records of joint funding recipients that are pertinent to the moners received from such fund.

3. *Grantee responsibilities.*

a. *Financial management.* The grantee financial management system for joint funding projects shall be established in accordance with the provisions set forth in FMC 74–7, attachment G or the proposed circular entitled, "Uniform administrative standards for agreements with public and private institutions of higher education, public and private hospitals, and other public and private, nonprofit organizations," attachment F, whichever is applicable.

b. *Audit.* Grantees are to conduct or arrange for audits with reasonable frequency to assure satisfactory operation of the grantee's financial management system, in accordance with subparagraph 2b, attachment G, FMC 74–7, or subparagraph 2h, attachment F, of the proposed circular on "Uniform administrative standards for agreements with public and private institutions of higher education, public and private hospitals, and other public and private, nonprofit organizations," whichever is applicable.

c. *Response to audit findings and recommendations.* The grantee shall be responsible for timely and appropriate resolution of audit findings and recommendations, in cooperation with the lead agency and participating grantor agencies. Failure by the grantee to correct noted deficiencies within an agreed upon time period may be cause for suspension or termination of all or portions of the joint funding award.

4. *Followup procedure on audit findings.* Compliance with any remedial actions taken in response to audit findings and recommendations shall be in conformance with the following procedures:

a. *Lead agency.* Consistent with lead agency responsibilities set forth in appendix C of this part, the lead agency shall assume oversight responsibility for assuring compliance with audit findings and recommendations, while the resolution of any specific deficiency or discrepancy noted by the audit shall be the responsibility of the grantor agency whose prorgam funds are at issue. The lead agency shall:

(1) Arrange for meetings with the appropriate grantor agency(s), audit agency, and applicant to determine remedial actions to be taken in response to audit findings and recommendations.

(2) Require grantor and grantee agencies subject to audit findings to report on the status of corrective actions taken.

(3) Arrange, at the request of the audit agency or a grantor agency, any meetings necessary to resolve outstanding deficiencies noted in the audit report.

REVIEWING IMPEDING REQUIREMENTS AND ESTABLISHING UNIFORM REQUIREMENTS

1. *Purpose.* This appendix establishes criteria and outlines procedures for review and modification, under the authority of section 3(b)(3) of the Joint Funding Simplification Act of 1974 (P.L. 93–510), of administratively established program requirements which may impede the joint support of projects pursued thereunder. It furthermore provides guidelines for establishment, under section 6(a) of P.L. 93–510, of uniform technical or administrative requirements.

2. *Policy intent.* Review and modification of impeding administratively established program requirements may be necessary to permit joint support of proposed projects, to allow expeditious processing of applications, or to promote effective and efficient management of jointly supported projects. Agencies participating in jointly funded projects should establish uniform provisions in order to provide for projects that would otherwise be subject to varying or conflicting technical or administrative rules and procedures not required by law.

3. *Definition.* As used in this appendix, the term "administratively established program requirement" means a rule or procedure, imposed by administrative regulation or order, which is not *expressly* stated in the enabling legislation under which such administrative regulation or order was formulated.

4. *Policy and procedures.*

a. *Review and modification of administratively established program requirements.*

(1) *Preapplication.* (a) *Applicant request.* As noted in appendix A, subparagraph 2b(4), the applicant shall include as supplemental information to the standard preapplication form an identification and request for agency review of administratively established program requirement(s), if any, which the applicant considers to be serious impediments to the proposed project. An administratively established program requirement, as described in paragraph 3 above, shall be termed a serious impediment if conformance to such requirement would prevent or seriously hamper the joint support of a project pursued thereunder.

(b) *Agency review.* As noted in appendix A, subparagraph 5a(5), each Federal agency reviewing official shall, with respect to the program(s) administered by that agency from which an applicant requests assistance, assess the applicant's identification and request for review of administratively established program requirement(s) considered to be serious impediments to the proposed project. Each agency reviewing official also shall identify administratively established program requirement(s), in addition to or in the absence of any such requirements identified by the applicant, which the agency considers to be serious impediments to the proposed project.

(c) *Agency action.* During the preapplication review, as described in appendix A, paragraph 5, each agency reviewing official shall obtain from the agency head or person designated by the agency head a review and modification, to the greatest practicable extent, of the administratively established program requirement(s) identified by the applicant or agency reviewing official as serious impediments to the proposed project.

V 401248 DEC 24 75 XUM

(d) *Notification.* As described in appendix A, subparagraph 6a(3), each agency shall notify the coordinating officer concerning disposition of or action taken on requests for review and modification of administratively established program requirement(s) identified by the applicant or the agency as serious impediments to the proposed project. In the event of favorable review of the preapplication, the coordinating office shall include such information in the single "Notice of Preapplication Review" transmitted to the applicant, in accordance with appendix A, subparagraph 6b(1)(e).

(e) *Preapplication conference.* The preapplication conference, as described in appendix A, subparagraph 7b(2), provides an opportunity to potential funding agencies and the applicant to discuss the probable disposition of unresolved or disputed matters related to any administratively established program requirements considered to be serious impediments to joint funding of the proposed project, and initially to review administrative questions of an interagency nature.

(2) *Application.* (a) *Applicant request.* As noted in appendix A, subparagraph 2b(3), the applicant shall include as supplemental information to the basic application form an identification and request for agency review and modification of administratively established program requirement(s) the applicant considers to be impediments to joint support of the proposed project, provided such requests were not made and resolved during the preapplication review period. An administratively established program requirement, as described in paragraph 3 above, shall be termed a serious impediment if conformance to such requirement would interfere with the expeditious processing of an application or with effective and efficient management of a jointly supported project pursued thereunder.

(b) *Agency review.* As noted in appendix A, subparagraph 5b(4), each agency task force representative shall, with respect to the program(s) administered by that agency from which an applicant requests assistance, identify administratively established program requirement(s), in addition to or in the absence of any such requirements identified by the applicant, which the task force representative considers to be an impediment to joint funding of the project.

(c) *Agency action.* Upon receipt of the application as described in appendix B, subparagraph 5b(5), each task force representative shall request the agency head or person designated by the agency head to review and modify any administratively established program requirements identified by the applicant or the task force representative as impediments to joint support of the project. Each agency head or person designated by the agency head shall determine the extent to which such requirements can be modified and shall make such modification.

(d) *Notification.* i. As described in appendix B, subparagraph 5b(7), the task force representative shall discuss with the applicant and other task force members the disposition of or action taken on any administratively established program requirements identified by the applicant or the task force representative as an impediment to joint funding of the project. The purpose of such discussion shall be to determine that the disposition of or action taken on requests for review and modification of impeding administratively established program requirements is compatible with any such disposition or action taken by other participating agencies.

ii. As described in appendix B, subparagraph 6a(1)(b), if an agency approves the applicant's request for assistance, the agency shall notify the project manager of the final disposition of or action taken on any requests for review and modification of administratively established program requirement(s) identified by the applicant or task force representative as impediments to joint support of the project.

iii. As described in appendix C, subparagraph 2a(2)(d), the lead agency shall specify in the notice of grant award to the grantee the disposition of or action taken on requests for review and modification of administratively established program requirements identified by the applicant or participating agencies as impediments to joint support of the project.

b. *Establishment of common administrative or technical rules.*

(1) *Scope.* Agencies participating in a jointly funded project shall act in concert during the task force consolidation of agency actions [appendix B, subparagraph 6b(2)] to establish, as necessary, a group of nonconflicting requirements to govern the project. In accordance with section 6(a), Pub. L. 93-510, Federal agency heads or persons specified by them shall adopt common administrative or technical requirements when there are among participating agencies in a jointly supported project inconsistent or conflicting requirements relating to:

(a) Financial administration of such projects, including accounting, reporting, auditing, and maintaining separate bank accounts;

(b) Timing of Federal payments for such projects where a single or combined schedule is to be established for the project as a whole;

(c) Whether assistance be extended in the form of a grant rather than a contract, or a contract rather than a grant; and

(d) Accountability for or the disposition of records, property, or structures acquired or constructed with Federal assistance.

(2) *Limitations.* Authority of heads of Federal agencies to establish common administrative or technical requirements for subjects specified in section 6(a), Pub. L. 93-510, shall:

(a) Be limited to problems that cannot be adequately dealt with through other actions pursuant to the Joint Funding Simplification Act or other applicable law.

(b) Be applied only as necessary to promote expeditious processing of applications or effective and efficient administration of projects.

(c) Be applied in a manner consistent with statutory requirements, program purposes, and the protection of the Federal interest.

(3) *Notification.* As described in appendix C, subparagraph 2a(2)(c), the lead agency shall specify, in the notice of grant award to the grantee, any common technical or administrative rules and procedures established for the project.

PART IV:

ENVIRONMENTAL PROTECTION AGENCY

WATER PROGRAMS

National Interim Primary Drinking Water Regulations

V 40 248 DEC 24 75 XUM

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER D—WATER PROGRAMS

[FRL 464-7]

PART 141—NATIONAL INTERIM PRIMARY DRINKING WATER REGULATIONS

On March 14, 1975, the Environmental Protection Agency (EPA) proposed National Interim Primary Drinking Water Regulations pursuant to sections 1412, 1414, 1415, and 1450 of the Public Health Service Act ("the Act"), as amended by the Safe Drinking Water Act ("SDWA," Pub. L. 93-523), 40 FR 11990. EPA held public hearings on the proposed regulations in Boston, Chicago, San Francisco, and Washington during the month of April. Several thousand pages of comments on the proposed regulations were received and evaluated. In addition, the Agency has received comments and information on the proposed regulations from the National Drinking Water Advisory Council, the Secretary of Health, Education, and Welfare, and from numerous others during meetings with representatives of State agencies, public interest groups and others.

The regulations deal only with the basic legal requirements. Descriptive material will be provided in a guidance manual for use by public water systems and the States.

The purpose of this preamble to the final regulations is to summarize the most significant changes made in the proposed regulations as a result of comments received and the further consideration of available information. A more detailed discussion of the comments and of changes in the proposed regulations is attached as Appendix A.

Water Systems Covered

The Safe Drinking Water Act applies to each "public water system," which is defined in Section 1401(4) of the Act as "a system for the provision to the public of piped water for human consumption, if such system has at least fifteen service connections or regularly serves at least twenty-five individuals." Privately owned as well as publicly owned systems are covered. Service "to the public" is interpreted by EPA to include factories and private housing developments. (See generally, House Report, pp. 16-17.)

The definition of "public water system" proposed in the Interim Primary Drinking Water Regulations sought to explain the meaning of the statutory reference to "regular" service. It was proposed to interpret this term as including service for as much as three months during the year. Because the proposed definition would have excluded many large campgrounds, lodges, and other public accommodations which serve large numbers of tourists but which are open for slightly less than three months each year, the definition in the final version covers systems serving an average of at least twenty-five individuals at least 60 days out of the year. The use of a minimum number of days rather than months also makes clear that a system may qualify as a public water system even if it is not open every day during a given month.

Once "public water system" has been defined, it is necessary to define the two major types of public water systems—those serving residents and those serving transients or intermittent users. The possible health effects of a contaminant in drinking water in many cases are quite different for a person drinking the water for a long period of time than for a person drinking the water only briefly or intermittently. Different regulatory considerations may in some cases apply to systems which serve residents as opposed to systems which serve transients or intermittent users. Accordingly, § 141.2(e) makes clear that all "public water systems" fall within either the category of "community water systems" or the category of "non-community water systems." To make clear which regulatory requirements apply to which type of system, the category covered is specifically indicated throughout the regulations.

The proposed regulations defined a "community water system" as "a public water system which serves a population of which 70 percent or greater are residents." Reliance in the proposed definition on the percentage of water system users who are residents would result in treating some fairly large resort communities with many year-round residents as non-community systems. Therefore, the definition of "community water system" has been changed to cover any system which serves at least 15 service connections used by year-round residents or serves at least 25 year-round residents.

Small Community Water Systems

Many community water systems in the country are quite small. Since it is the intention of the Act to provide basically the same level of health protection to residents of small communities as to residents of large cities, and since a number of advanced water treatment techniques are made feasible only by economies of scale, the cost of compliance with the requirements of the Act may pose a serious problem for many small communities. The regulations seek to recognize the financial problems of small communities by requiring more realistic monitoring for systems serving fewer than 1,000 persons. Variances and exemptions authorized by the Act can also assist in dealing with economic problems of small community systems in appropriate cases, at least temporarily. EPA will provide technical assistance on effective treatment techniques which can be used by small systems.

These methods of dealing with the financial problems of some small community systems may not be sufficient in specific instances to make compliance with all applicable regulatory requirements feasible. EPA is commencing a study of potential problems faced by small community systems in meeting applicable requirements under the Act and these regulations, and, if necessary, will make additional adjustments in the Interim Primary Drinking Water Regulations prior to their effective date.

Non-Community Systems

"Non-community systems" are basically those systems which serve transients. They include hotels, motels, restaurants, campgrounds, service stations, and other public accommodations which have their own water system and which have at least 15 service connections or serve water to a daily average of at least 25 persons. Some schools, factories and churches are also included in this category. It is conservatively estimated that there are over 200,000 non-community water systems in the country. However, it should be recognized that while their number is large, they normally are not the principal source of water for the people they serve.

The regulations as proposed would have applied all maximum contaminant levels to non-community systems as well as to community systems. This approach failed to take into account the fact that the proposed maximum contaminant levels for organic chemicals and most inorganic chemicals were based on the potential health effects of long-term exposure. Those levels are not necessary to protect transients or intermittent users. Therefore, the final regulations provide that maximum contaminant levels for organic chemicals, and for inorganic chemicals other than nitrates, are not applicable to non-community systems. An exception was made for nitrates because they can have an adverse health effect on susceptible infants in a short period of time.

Even without monitoring for organic chemicals or most inorganic chemicals, in the initial stages of implementation of the drinking water regulations, monitoring results from tens of thousands of non-community systems could overwhelm laboratory capabilities and other resources. This could delay effective implementation of the regulations with respect to the community systems which provide the water which Americans drink every day. To avoid this result, non-community systems will be given two years after the effective date of the regulations to commence monitoring. In the meantime, non-community systems which already monitor their water are encouraged to continue to do so, and the States are encouraged to take appropriate measures to test or require monitoring for non-community systems that serve large numbers of people.

Of course, non-community systems which pose a threat to health should be dealt with as quickly as possible. The maximum contaminant levels applicable to non-community water systems therefore will take effect 18 months after promulgation, at the same time as levels applicable to community systems. Inspection and enforcement authority will apply to non-community systems at the same time as to community systems.

Sanitary Surveys

EPA encourages the States to conduct sanitary surveys on a systematic basis.

These on-site inspections of water systems are more effective in assuring safe water to the public than individual tests taken in the absence of sanitary surveys. The regulations provide that monitoring frequencies for coliform bacteria can be changed by the entity with primary enforcement responsibility for an individual non-community system, and in certain circumstances for an individual community system, based on the results of a sanitary survey.

Maximum Contaminant Levels

Numerous comments were received by EPA on the substances selected for the establishment of maximum contaminant levels and on the levels chosen. Congress anticipated that the initial Interim Primary Drinking Water Regulations would be based on the Public Health Service Standards of 1962, and this Congressional intent has been followed. Comments received on the various levels did not contain new data sufficient to require the establishment of levels different from those contained in the Public Health Service Standards.

Water Consumption

The maximum contaminant levels are based, directly or indirectly, on an assumed consumption of two liters of water per day. The same assumption was used in the 1962 Standards. This assumption has been challenged because of instances where much higher water consumption rates occur. EPA's justification for using the two-liter figure is that it already represents an above average water or water-based fluid intake. Moreover, while the factor of safety may be somewhat reduced when greater quantities of water are ingested, the maximum contaminant levels based on the two-liter figure provide substantial protection to virtually all consumers. If, as has been suggested, a water consumption rate of eight liters per day is used as the basis for maximum contaminant level, all of the proposed MCL's would have to be divided by four, greatly increasing the monitoring difficulties, and in some cases challenging the sensitivity of accepted analytical procedures. It could be expected, in such a case, that the maximum contaminant levels would be exceeded to a significant degree, and that specialized treatment techniques would be required to order that the contaminant levels would be reduced. The economic impact of a move in this direction would be enormous. It is not technically or economically feasible to base maximum contaminant levels on unusually high consumption rates.

Safety Factors

A question was raised about the fact that different safety factors are contained in various maximum contaminant levels. The levels are not intended to have a uniform safety factor, at least partly because the knowledge of and the nature of the health risks of the various contaminants vary widely. The levels set are the result of experience, evaluation of the available data, and professional judgment. They have withstood the test of time and of professional review. They are being subjected to further review by the National Academy of Sciences in connection with development of data for the Revised Primary Drinking Water Regulations.

MCL's Based on Temperature

A question was also raised as to whether ranges of maximum contaminant levels should be established on the basis of the climate in the area served by the public water system, as was done with fluoride. EPA believes that the use of a temperature scale for fluoride is more appropriate than for other chemicals because of the studies available on the fluoride-temperature relationship and because there is a small margin with fluoride between beneficial levels and levels that cause adverse health effects.

MCL's Deleted

Three proposed maximum contaminant levels have been eliminated in the final regulations because they are not justified by the available data. One of these is carbon chloroform extract (CCE), which is discussed separately below. The others are the proposed levels for the standard bacterial plate count and cyanide. In the case of the plate count, it is believed that the coliform limits contained in the regulations, combined with the turbidity maximum contaminant level, adequately deal with bacterial contamination. However, EPA continues to believe that the standard plate count is a valid indicator of bacteriological quality of drinking water, and recommends that it be used in appropriate cases in conjunction with the coliform tests as an operational tool.

The proposed maximum contaminant level for cyanide was eliminated because the possibility of cyanide contamination can be effectively addressed only by the use of emergency action, such as under Section 1431 of the Act. EPA's 1969 Community Water Supply Study did not reveal a single instance in which cyanide was present in a water system at a level greater than one-thousandth of the level at which cyanide is toxic to humans. Available data indicate that cyanide will be present in water systems at toxic levels only in the event of an accident, such as a spill from a barge collision. Maximum contaminant levels are not the appropriate vehicle for dealing with such rare, accidental contamination.

Heptachor, heptachlor epoxide and chlordane have also been removed from the list of maximum contaminant levels at least temporarily in view of the pending cancellation and suspension proceedings under the Federal Insecticide, Fungicide and Rodenticide Act involving those pesticides. When the results of these proceedings are available, EPA will again consider whether maximum contaminant levels should be established for those three pesticides.

Sodium and Sulfates

A number of comments were received on the potential health effects of sodium and sulfates. The National Drinking Water Advisory Council has recommended that consideration be given to the monitoring of these constituents, but has not recommended the adoption of maximum contaminant levels because available data do not support the adoption of any specific levels. EPA has requested the National Academy of Sciences to include sodium and sulfates among the contaminants to be studied by NAS, and to include information on the health effects of sodium and sulfates in the report to be made by NAS in December 1976.

Since a number of persons suffer from diseases which are influenced by dietary sodium intake and since there are others who wish to restrict their sodium intake, it is desirable that the sodium content of drinking water be known. Those affected can, by knowing the sodium concentration in their drinking water, make adjustments to their diets or, in extreme cases, seek alternative sources of water to be used for drinking and food preparation. It is recommended that the States institute programs for regular monitoring of the sodium content of drinking water served to the public, and for informing physicians and consumers of the sodium concentration in drinking water.

A relatively high concentration of sulfate in drinking water has little or no known laxative effect on regular users of the water, but transients using such water sometimes experience a laxative effect. It is recommended that the States institute monitoring programs for sulfates, and that transients be notified if the sulfate content of the water is high. Such notification should include an assessment of the possible physiological effects of consumption of the water.

PCB's and Asbestos

An interagency comment expressed concern for asbestos and PCB's in the environment and noted the need for at least a monitoring requirement, if not for MCL's, for these contaminants. EPA is also concerned, but for the moment lacks sufficient evidence regarding analytical methods, health effects, or occurrence in the environment to establish MCL's. The Agency is conducting research and cooperating in research projects to develop criteria for establishing needed limits as quickly as possible. A monitoring study on a number of organic chemical contaminants, including PCB's, for which MCL's are not being established at this time, will be contained in an organic chemical monitoring regulation that is being promulgated with these regulations. Regarding asbestos, HEW and EPA are sponsoring a number of studies this year at an approximate cost of $16 million to establish health effects, anayltical methods and occurrence.

Point of Measurement

Other comments on maximum contaminant levels focused on the proposed requirement that such levels be tested at the consumer's tap. Concern was expressed over the inability of the public water system to control potential sources

V401248 DEC 24 75 XUM

of contaminants which are under the control of the consumer.

The promulgated definition of "maximum contaminant level," § 141.2(d), retains the requirement that the maximum contaminant level be measured at the tap except in the case of turbidity, which should be measured at the point of entry to the distribution system. However, the definition has been expanded to make clear that contaminants added to the water by circumstances under the control of the consumer are not the responsibility of the supplier of water, unless the contaminants result from corrosion of piping and plumbing resulting from the quality of the water supplied. It should be noted, however, that this requirement should not be interpreted as to discourage local, aggressive cross connection control measures.

Coliform Bacteria MCL's

The promulgated MCL's for coliform bacteria are basically the 1962 Public Health Service Standards, with minor refinements and clarifications. However, further changes may be desirable. For example, the MCL's for the membrane filter analytical method do not resolve the question of how many coliform bacteria are assumed to be present in a single highly contaminated sample. Some laboratories assume an upper limit of 50, while others seek to continue to count individual bacteria to a level of 100 or even higher in a single sample. The upper limit assumed will affect the monthly average which is calculated to determine compliance with the MCL's.

Another question relating to the coliform bacteria MCL's is the matter of possible spurious positive samples. As the regulations are written, all routine samples taken to determine compliance with the MCL's must be counted, regardless of the results of analysis of any check samples that may be taken. The reason for this is that bacterial contamination is often intermittent or transient, and as a result negative check samples taken a day or more after a positive sample cannot demonstrate that the positive result was in error. It may be possible, however, to prescribe a means of dealing with spurious positive results without compromising the integrity of the MCL's.

A third question concerning the MCL's for coliform bacteria is the relationship of monthly averages of coliform bacteria levels to monthly percentages of positive samples. For example, the monthly average MCL for the membrane filter method is violated if the monthly average exceeds one coliform bacterium per sample. However, for purposes of determining whether the monthly-percentage-of-positive-samples MCL is violated, a sample is counted as positive only if it contains more than four coliform bacteria. Thus, it is possible, particularly when a relatively small number of samples is taken, for a system to fail the monthly average MCL even when no single sample taken during the month is out of compliance with the limit.

These and other questions concerning the coliform bacteria MCL's will be reviewed further by EPA. If review indicates that changes in the MCL's are desirable, those changes will be made as soon as possible but within 6 months, in time to take effect at the same time as the initial Interim Primary Drinking Water Regulations.

Organic Chemicals

The proposed maximum contaminant levels for organic pesticides, other than the three which are the subject of cancellation and suspension proceedings, have been retained. It is anticipated that additional organic pesticides will be added to the regulations if surveys of pesticides in drinking water being conducted by EPA indicate that this is needed.

The proposed regulations also contained a maximum contaminant level for organic chemicals obtained by the carbon chloroform extract (CCE) method. It was anticipated by Congress that organic chemicals would be dealt with primarily in the Revised Primary Drinking Water Regulations because of the paucity of accurate data on the health effects of various organic chemicals, the large number of such chemicals, uncertainities over appropriate treatment techniques, and the need for additional information on the incidence of specific organic chemicals in drinking water supplies. EPA thought that the CCE standard might provide an appropriate means of dealing with organic chemicals as a class pending action on the Revised Primary Regulations.

The CCE standard was originally developed as a test for undesirable tastes and odors in drinking water. As concern developed over the health effects of organic chemicals, the possibility of using CCE as a health standard rather than an esthetic standard was considered.

As pointed out by numerous comments, CCE has many failings as an indicator of health effects of organic chemicals. To begin with, the test obtains information on only a fraction of the total amount of organic chemicals in the water sampled. Furthermore, there is serious question as to the reliability of CCE in identifying those organic chemicals which are most suspected of adverse health effects. In addition, there are no existing data on which a specific level for CCE can be established on a rational basis. To establish a maximum contaminant level under these circumstances would almost certainly do more harm than good. It could give a false sense of security to persons served by systems which are within the established level and a false sense of alarm to persons served by systems which exceed the level. It also would divert resources from efforts to find more effective ways of dealing with the organic chemicals problem.

EPA believes that the intelligent approach to the organic chemicals question is to move ahead as rapidly as possible along two fronts. First, EPA is adopting simultaneously with these regulations a Subpart E of Part 141, containing requirements for organic chemical monitoring pursuant to Sections 1445 and 1450 of the Act.

The regulations require that designated public water systems collect samples of raw and treated water for submission to EPA for organics analysis. EPA will analyze the samples for a number of broad organic parameters, including carbon chloroform extract (CCE), volatile and non-volatile total organic carbon (VTOC and NVTOC), total organic chlorine (TOCl), ultraviolet absorbancy, and fluorescence. In addition, monitoring will be required for probably 21 specific organic compounds. Selection of the specific compounds has been based on the occurrence or likelihood of occurrence in treated water, toxicity data and availability of practical analytical methods. Laboratory analyses will be used to evaluate the extent and nature of organic chemical contamination of drinking water, to evaluate the validity of the general organic parameters as surrogates for measures of harmful organic chemicals, and to determine whether there is an adequate basis for establishing maximum contaminant levels for specific organics or groups of organics.

Second, EPA is embarking on an intensive research program to find answers to the following four questions:

1. What are the effects of commonly occurring organic compounds on human health?

2. What analytical procedures should be used to monitor finished drinking water to assure that any Primary Drinking Water Regulations dealing with organics are met?

3. Because some of these organic compounds are formed during water treatment, what changes in treatment practices are required to minimize the formation of these compounds in treated water?

4. What treatment technology must be applied to reduce contaminant levels to concentrations that may be specified in the Primary Drinking Water Regulations?

This research will involve health-effects and epidemiological studies, investigations of analytical methodology, and pilot plant and field studies of organic removal unit processes. Some phases of the research are to be completed by the end of this year, while much of the remainder are to be completed within the next calendar year.

As soon as sufficient information is derived from the monitoring program and related research, the Interim Primary Drinking Water Regulations will be amended so that the organic chemicals problem can be dealt with without delay. The monitoring process will be completed within 1 year.

During the interim period, while satisfactory MCL's for organic contamination in drinking water are being developed, EPA will act in specific cases where appropriate to deal with organic contamination. If the EPA monitoring program reveals serious specific cases of contamination, EPA will work with State and local authorities to identify the source and nature of the problem and to take remedial action. EPA will also aid the States in identifying additional community water supplies that require analysis.

Public Notice

The public notice requirements proposed in § 141.32 did not distinguish between community and non-community public water systems. They would have required that public notice of non-compliance with applicable regulations be made by newspaper, in water bills, and by other media for all public water systems. These requirements are inappropriate and ineffective in the case of most non-community water systems. Those systems principally serve transients who do not receive water bills from the system and who probably are not exposed significantly to the local media. A more effective approach would be to require notice that can inform the transient before he drinks the system's water, and thereby both warn the transient and provide an incentive to the supplier of water to remedy the violation. Accordingly, Section 141.32 as adopted provides that in the case of non-community systems, the entity with primary enforcement responsibility shall require that notice be given in a form and manner that will insure that the public using the public water system is adequately informed.

The proposed public notice requirements also failed to distinguish between different types of violations of the Interim Primary Drinking Water Regulations. Since the urgency and importance of a notice varies according to the nature of the violation involved, § 141.32 as promulgated seeks to match the type of notice required with the type of violation involved. Written notice accompanying a water bill or other direct notice by mail is required for all violations of the regulations, including violations of monitoring requirements, and for the grant of a variance or exemption. In addition, notice by newspaper and notification to radio and television stations is required whenever a maximum contaminant level is exceeded, or when the entity with primary enforcement responsibility requires such broader notice.

Quality Control and Testing Procedures

Section 1401(1) of the Act defines "primary drinking water regulation" to include "quality control and testing procedures." The promulgated regulations include testing requirements for each maximum contaminant level, including check samples and special samples in appropriate cases. The regulations also specify the procedures to be followed in analyzing samples for each of the maximum contaminant levels. These procedures will be updated from time to time as advances are made in analytical methods. For example, references to "Standard Methods for the Examination of Water and Wastewater" are to the current, 13th, edition, but these references will be changed to cite the 14th edition when it is available in the near future.

A key element of quality control for public water systems is accurate laboratory analysis. Section 141.28 of the regulations provides that analyses conducted for the purpose of determining compliance with maximum contaminant levels must be conducted by a laboratory approved by the entity with primary enforcement responsibility. EPA will develop as soon as possible, in cooperation with the States and other interested parties, criteria and procedures for laboratory certification. A State with primary enforcement responsibility will have a laboratory certified by EPA pursuant to the prescribed criteria and procedures, and in turn will certify laboratories within the State.

Record-keeping requirements and reports to the State also will assist in quality control efforts.

Record-Keeping

Adequate record-keeping is necessary for the proper operation and administration of a public water system. It is also important for providing information to the public, providing appropriate data for inspection and enforcement activities and providing information on which future regulations can be based. Accordingly, a new § 141.33 has been added to the regulations to require that each public water system maintain records of sample analyses and of actions to correct violations of the Primary Drinking Water Regulations.

Economic and Cost Analysis

A comprehensive economics study has been made of the Interim Primary Drinking Water Regulations. This study estimates the costs of the regulations, evaluates the potential economic impact, and considers possible material and labor shortages. The results of this analysis are summarized here.

Total investment costs to community water systems to achieve compliance with these regulations are estimated to be between $1,050 and $1,765 million. It is estimated that non-community systems will invest an additional $24 million. The range of the estimate is due to uncertainty as to the design flow that will be used in installing treatment facilities. Systems not in compliance will have to consider sizing their new components to reflect average daily flow conditions, or maximum daily flow conditions in cases where system storage is not adequate.

This investment will be spread over several years. Investor-owned systems will bear about one-fourth of these costs, and publicly-owned systems the remainder. It is not anticipated that systems will have difficulty financing these capital requirements.

In annual terms, national costs are expected to be within the following ranges:

	In millions
Capital costs	$146–247
Operations and maintenance	262–263
Monitoring (routine only)	17– 35
Total	$426–545

Although these aggregate figures are large, most water consumers will not be significantly affected. For those users in systems serving 10,000 persons or more, the average annual treatment cost per capita may increase from less than $1.00 for systems requiring disinfection and lead control, to between $15 to $35 for control of turbidity and heavy metal removal. For systems serving less than 100 persons, the average annual per capita costs of disinfection, lead control and fluoride/arsenic removal are estimated to be between $2.10 and $11.80. However, if turbidity control or heavy metal removal were required in a system of this size then costs are expected to range from $52 to $237 per year per capita. EPA is aware of the serious potential economic impact on users in these small systems. However, the legislative history specifies that the regulations should be based on costs that can be reasonably afforded by large metropolitan or regional systems. Further economic evaluation of these systems is being conducted, and realistic options for these small systems are being reviewed. Options that will be under consideration include less costly treatment technologies; formation of regional systems; and use of alternative water sources. Industrial and commercial users, whether providing their own water or using public systems, are not expected to be significantly affected by these regulations.

Possible constraints to the implementation of the interim primary regulations were examined. Although there will be an increase in demand for chemicals, manpower, laboratories, and construction of treatment facilities, it is not anticipated that any of these factors will be a serious obstacle to implementation of these regulations over a reasonable time frame.

For the reasons given above, Chapter 40 of the Code of Federal Regulations is hereby amended by the addition of the following new Part 141. These regulations will take effect 18 months after promulgation.

(It is hereby certified that the economic and inflationary impacts of these regulations have been carefully evaluated in accordance with Executive Order 11821)

Dated: December 10, 1975.

AUTHORITY: Secs. 1412, 1414, 1445, and 1450 of the Public Health Service Act, 88 Stat. 1660 (42 U.S.C. 300g-1, 300g-3, 300j-4, and 300j-9).

Subpart A—General

§ 141.1 Applicability.

This part establishes primary drinking water regulations pursuant to section 1412 of the Public Health Service Act, as amended by the Safe Drinking Water Act (Pub. L. 93-523); and related regulations applicable to public water systems.

§ 141.2 Definitions.

As used in this part, the term:

(a) "Act" means the Public Health Service Act, as amended by the Safe Drinking Water Act, Pub. L. 93-523.

(b) "Contaminant" means any physical, chemical, biological, or radiological substance or matter in water.

(c) "Maximum contaminant level" means the maximum permissible level of a contaminant in water which is delivered to the free flowing outlet of the ultimate user of a public water system, except in the case of turbidity where the maximum permissible level is measured at the point of entry to the distribution system. Contaminants added to the water under circumstances controlled by the user, except those resulting from corrosion of piping and plumbing caused by water quality, are excluded from this definition.

(d) "Person" means an individual, corporation, company, association, partnership, State, municipality, or Federal agency.

(e) "Public water system" means a system for the provision to the public of piped water for human consumption, if such system has at least fifteen service connections or regularly serves an average of at least twenty-five individuals daily at least 60 days out of the year. Such term includes (1) any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system, and (2) any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system. A public water system is either a "community water system" or a "non-community water system."

(i) "Community water system" means a public water system which serves at least 15 service connections used by year-round residents or regularly serves at least 25 year-round residents.

(ii) "Non-community water system" means a public water system that is not a community water system.

(f) "Sanitary survey" means an on-site review of the water source, facilities, equipment, operation and maintenance of a public water system for the purpose of evaluating the adequacy of such source, facilities, equipment, operation and maintenance for producing and distributing safe drinking water.

(g) "Standard sample" means the aliquot of finished drinking water that is examined for the presence of coliform bacteria.

(h) "State" means the agency of the State government which has jurisdiction over public water systems. During any period when a State does not have primary enforcement responsibility pursuant to Section 1413 of the Act, the term "State" means the Regional Administrator, U.S. Environmental Protection Agency.

(i) "Supplier of water" means any person who owns or operates a public water system.

§ 141.3 Coverage.

This part shall apply to each public water system, unless the public water system meets all of the following conditions:

(a) Consists only of distribution and storage facilities (and does not have any collection and treatment facilities);

(b) Obtains all of its water from, but is not owned or operated by, a public water system to which such regulations apply;

(c) Does not sell water to any person; and

(d) Is not a carrier which conveys passengers in interstate commerce.

§ 141.4 Variances and exemptions.

Variances or exemptions from certain provisions of these regulations may be granted pursuant to Sections 1415 and 1416 of the Act by the entity with primary enforcement responsibility. Provisions under Part 142, *National Interim Primary Drinking Water Regulations Implementation*—subpart E (Variances) and subpart F (Exemptions)—apply where EPA has primary enforcement responsibility.

§ 141.5 Siting requirements.

Before a person may enter into a financial commitment for or initiate construction of a new public water system or increase the capacity of an existing public water system, he shall notify the State and, to the extent practicable, avoid locating part or all of the new or expanded facility at a site which:

(a) Is subject to a significant risk from earthquakes, floods, fires or other disasters which could cause a breakdown of the public water system or a portion thereof; or

(b) Except for intake structures, is within the floodplain of a 100-year flood or is lower than any recorded high tide where appropriate records exist.

The U.S. Environmental Protection Agency will not seek to override land use decisions affecting public water systems siting which are made at the State or local government levels.

§ 141.6 Effective date.

The regulations set forth in this part shall take effect 18 months after the date of promulgation.

Subpart B—Maximum Contaminant Levels

§ 141.11 Maximum contaminant levels for inorganic chemicals.

(a) The maximum contaminant level for nitrate is applicable to both community water systems and non-community water systems. The levels for the other inorganic chemicals apply only to community water systems. Compliance with maximum contaminant levels for inorganic chemicals is calculated pursuant to § 141.23.

(b) The following are the maximum contaminant levels for inorganic chemicals other than fluoride:

Contaminant	*Level, milligrams per liter*
Arsenic	0.05
Barium	1.
Cadmium	0.010
Chromium	0.05
Lead	0.05
Mercury	0.002
Nitrate (as N)	10.
Selenium	0.01
Silver	0.05

(c) When the annual average of the maximum daily air temperatures for the location in which the community water system is situated is the following, the maximum contaminant levels for fluoride are:

Temperature Degrees Fahrenheit	Degrees Celsius	Level, milligrams per liter
53.7 and below	12.0 and below	2.4
53.8 to 58.3	12.1 to 14.6	2.2
58.4 to 63.8	14.7 to 17.6	2.0
63.9 to 70.6	17.7 to 21.4	1.8
70.7 to 79.2	21.5 to 26.2	1.6
79.3 to 90.5	26.3 to 32.5	1.4

§ 141.12 Maximum contaminant levels for organic chemicals.

The following are the maximum contaminant levels for organic chemicals. They apply only to community water systems. Compliance with maximum contaminant levels for organic chemicals is calculated pursuant to § 141.24.

	Level, milligrams per liter
(a) Chlorinated hydrocarbons:

§ 141.13 Maximum contaminant levels for turbidity.

The maximum contaminant levels for turbidity are applicable to both community water systems and non-community water systems using surface water sources in whole or in part. The maximum contaminant levels for turbidity in drinking water, measured at a representative entry point(s) to the distribution system, are:

(a) One turbidity unit (TU), as determined by a monthly average pursuant to § 141.22, except that five or fewer turbidity units may be allowed if the supplier of water can demonstrate to the State that the higher turbidity does not do any of the following:

(1) Interfere with disinfection;

(2) Prevent maintenance of an effective disinfectant agent throughout the distribution system; or

(3) Interfere with microbiological determinations.

(b) Five turbidity units based on an average for two consecutive days pursuant to § 141.22.

§ 141.14 Maximum microbiological contaminant levels.

The maximum contaminant levels for coliform bacteria, applicable to community water systems and non-community water systems, are as follows:

(a) When the membrane filter technique pursuant to § 141.21(a) is used, the number of coliform bacteria shall not exceed any of the following:

(1) One per 100 milliliters as the arithmetic mean of all samples examined per month pursuant to § 141.21 (b) or (c);

(2) Four per 100 milliliters in more than one sample when less than 20 are examined per month; or

(3) Four per 100 milliliters in more than five percent of the samples when 20 or more are examined per month.

(b) (1) When the fermentation tube method and 10 milliliter standard portions pursuant to § 141.21(a) are used, coliform bacteria shall not be present in any of the following:

(i) more than 10 percent of the portions in any month pursuant to § 141.21 (b) or (c);

(ii) three or more portions in more than one sample when less than 20 samples are examined per month; or

(iii) three or more portions in more than five percent of the samples when 20 or more samples are examined per month.

(2) When the fermentation tube method and 100 milliliter standard portions pursuant to § 141.21(a) are used, coliform bacteria shall not be present in any of the following:

(i) more than 60 percent of the portions in any month pursuant to § 141.21 (b) or (c);

(ii) five portions in more than one sample when less than five samples are examined per month; or

(iii) five portions in more than 20 percent of the samples when five or more samples are examined per month.

(c) For community or non-community systems that are required to sample at a rate of less than 4 per month, compliance with paragraphs (a), (b)(1), or (b)(2) of this section shall be based upon sampling during a 3 month period, except that, at the discretion of the State, compliance may be based upon sampling during a one-month period.

Subpart C—Monitoring and Analytical Requirements

§ 141.21 Microbiological contaminant sampling and analytical requirements.

(a) Suppliers of water for community water systems and non-community water systems shall analyze for coliform bacteria for the purpose of determining compliance with § 141.14. Analyses shall be conducted in accordance with the analytical recommendations set forth in "Standard Methods for the Examination of Water and Wastewater," American Public Health Association, 13th Edition, pp. 662-688, except that a standard sample size shall be employed. The standard sample used in the membrane filter procedure shall be 100 milliliters. The standard sample used in the 5 tube most probable number (MPN) procedure (fermentation tube method) shall be 5 times the standard portion. The standard portion is either 10 milliliters or 100 milliliters as described in § 141.14 (b) and (c). The samples shall be taken at points which are representative of the conditions within the distribution system.

(b) The supplier of water for a community water system shall take coliform density samples at regular time intervals, and in number proportionate to the population served by the system. In no event shall the frequency be less than as set forth below:

Population served:	*Minimum number of samples per month*
25 to 1,000	1
1,001 to 2,500	2
2,501 to 3,300	3
3,301 to 4,100	4
4,101 to 4,900	5
4,901 to 5,800	6
5,801 to 6,700	7
6,701 to 7,600	8
7,601 to 8,500	9
8,501 to 9,400	10
9,401 to 10,300	11
10,301 to 11,100	12
11,101 to 12,000	13
12,001 to 12,900	14
12,901 to 13,700	15
13,701 to 14,600	16
14,601 to 15,500	17
15,501 to 16,300	18
16,301 to 17,200	19
17,201 to 18,100	20
18,101 to 18,900	21
18,901 to 19,800	22
19,801 to 20,700	23
20,701 to 21,500	24
21,501 to 22,380	25
22,301 to 23,200	26
23,201 to 24,000	27
24,001 to 24,900	28
24,901 to 25,000	29
25,001 to 28,000	30
28,001 to 33,000	35
33,001 to 37,000	40
37,001 to 41,000	45
41,001 to 46,000	50
46,001 to 50,000	55
50,001 to 54,000	60
54,001 to 59,000	65
59,001 to 64,000	70
64,001 to 70,000	75
70,001 to 76,000	80
76,001 to 83,000	85
83,001 to 90,000	90
90,001 to 96,000	95
96,001 to 111,000	100
111,001 to 130,000	110
130,001 to 160,000	120
160,001 to 190,000	130
190,001 to 220,000	140
220,001 to 250,000	150
250,001 to 290,000	160
290,001 to 320,000	170
320,001 to 360,000	180
360,001 to 410,000	190
410,001 to 450,000	200
450,001 to 500,000	210
500,001 to 550,000	220
550,001 to 600,000	230
600,001 to 660,000	240
660,001 to 720,000	250
720,001 to 780,000	260
780,001 to 840,000	270
840,001 to 910,000	280
910,001 to 970,000	290
970,001 to 1,050,000	300
1,050,001 to 1,140,000	310
1,140,001 to 1,230,000	320
1,230,001 to 1,320,000	330
1,320,001 to 1,420,000	340
1,420,001 to 1,520,000	350
1,520,001 to 1,630,000	360
1,630,001 to 1,730,000	370
1,730,001 to 1,850,000	380
1,850,001, to 1,970,000	390
1,970,001 to 2,060,000	400
2,060,001 to 2,270,000	410
2,270,001 to 2,510,000	420
2,510,001 to 2,750,000	430
2,750,001 to 3,020,000	440
3,020,001 to 3,320,000	450
3,320,001 to 3,620,000	460
3,620,001 to 3,960,000	470
3,960,001 to 4,310,000	480
4,310,001 to 4,690,000	490
4,690,001 or more	500

Based on a history of no coliform bacterial contamination and on a sanitary survey by the State showing the water system to be supplied solely by a protected ground water source and free of sanitary defects, a community water system serving 25 to 1,000 persons, with written permission from the State, may reduce this sampling frequency except that in no case shall it be reduced to less than one per quarter.

(c) The supplier of water for a non-community water system shall sample for coliform bacteria in each calendar quarter during which the system provides water to the public. Such sampling shall begin within two years after the effective date of this part. If the State, on the basis of a sanitary survey, determines that some other frequency is more appropriate, that frequency shall be the frequency required under these regulations. Such frequency shall be confirmed or changed on the basis of subsequent surveys.

(d) (1) When the coliform bacteria in a single sample exceed four per 100 milliliters (§ 141.14(a)), at least two consecutive daily check samples shall be collected and examined from the same sampling point. Additional check samples shall be collected daily, or at a frequency estab-

V401248 DEC 24 75 XUM

lished by the State, until the results obtained from at least two consecutive check samples show less than one coliform bacterium per 100 milliliters.

(2) When coliform bacteria occur in three or more 10 ml portions of a single sample (§ 141.14(b)(1)), at least two consecutive daily check samples shall be collected and examined from the same sampling point. Additional check samples shall be collected daily, or at a frequency established by the State, until the results obtained from at least two consecutive check samples show no positive tubes.

(3) When coliform bacteria occur in all five of the 100 ml portions of a single sample (§ 141.14(b)(2)), at least two daily check samples shall be collected and examined from the same sampling point. Additional check samples shall be collected daily, or at a frequency established by the State, until the results obtained from at least two consecutive check samples show no positive tubes.

(4) The location at which the check samples were taken pursuant to paragraphs (d) (1), (2), or (3) of this section shall not be eliminated from future sampling without approval of the State. The results from all coliform bacterial analyses performed pursuant to this subpart, except those obtained from check samples and special purpose samples, shall be used to determine compliance with the maximum contaminant level for coliform bacteria as established in § 141.14. Check samples shall not be included in calculating the total number of samples taken each month to determine compliance with § 141.21 (b) or (c).

(e) When the presence of coliform bacteria in water taken from a particular sampling point has been confirmed by any check samples examined as directed in paragraphs (d) (1), (2), or (3) of this section, the supplier of water shall report to the State within 48 hours.

(f) When a maximum contaminant level set forth in paragraphs (a), (b) or (c) of § 141.14 is exceeded, the supplier of water shall report to the State and notify the public as prescribed in § 141.31 and § 141.32.

(g) Special purpose samples, such as those taken to determine whether disinfection practices following pipe placement, replacement, or repair have been sufficient, shall not be used to determine compliance with § 141.14 or § 141.21 (b) or (c).

(h) A supplier of water of a community water system or a non-community water system may, with the approval of the State and based upon a sanitary survey, substitute the use of chlorine residual monitoring for not more than 75 percent of the samples required to be taken by paragraph (b) of this section, *Provided*, That the supplier of water takes chlorine residual samples at points which are representative of the conditions within the distribution system at the frequency of at least four for each substituted microbiological sample. There shall be at least daily determinations of chlorine residual. When the supplier of water exercises the option provided in this paragraph (h) of this section, he shall maintain no less than 0.2 mg/1 free chlorine throughout the public water distribution system. When a particular sampling point has been shown to have a free chlorine residual less than 0.2 mg/1, the water at that location shall be retested as soon as practicable and in any event within one hour. If the original analysis is confirmed, this fact shall be reported to the State within 48 hours. Also, if the analysis is confirmed, a sample for coliform bacterial analysis must be collected from that sampling point as soon as practicable and preferably within one hour, and the results of such analysis reported to the State within 48 hours after the results are known to the supplier of water. Analyses for residual chlorine shall be made in accordance with "Standard Methods for the Examination of Water and Wastewater," 13th Ed., pp. 129–132. Compliance with the maximum contaminant levels for coliform bacteria shall be determined on the monthly mean or quarterly mean basis specified in § 141.14, including those samples taken as a result of failure to maintain the required chlorine residual level. The State may withdraw its approval of the use of chlorine residual substitution at any time.

§ 141.22 Turbidity sampling and analytical requirements.

(a) Samples shall be taken by suppliers of water for both community water systems and non-community water systems at a representative entry point(s) to the water distribution system at least once per day, for the purpose of making turbidity measurements to determine compliance with § 141.13. The measurement shall be made by the Nephelometric Method in accordance with the recommendations set forth in "Standard Methods for the Examination of Water and Wastewater," American Public Health Association, 13th Edition, pp. 350–353, or "Methods for Chemical Analysis of Water and Wastes," pp. 295–298, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974.

(b) If the result of a turbidity analysis indicates that the maximum allowable limit has been exceeded, the sampling and measurement shall be confirmed by resampling as soon as practicable and preferably within one hour. If the repeat sample confirms that the maximum allowable limit has been exceeded, the supplier of water shall report to the State within 48 hours. The repeat sample shall be the sample used for the purpose of calculating the monthly average. If the monthly average of the daily samples exceeds the maximum allowable limit, or if the average of two samples taken on consecutive days exceeds 5 TU, the supplier of water shall report to the State and notify the public as directed in § 141.31 and § 141.32.

(c) Sampling for non-community water systems shall begin within two years after the effective date of this part.

(d) The requirements of this § 141.22 shall apply only to public water systems which use water obtained in whole or in part from surface sources.

§ 141.23 Inorganic chemical sampling and analytical requirements.

(a) Analyses for the purpose of determining compliance with § 141.11 are required as follows:

(1) Analyses for all community water systems utilizing surface water sources shall be completed within one year following the effective date of this part. These analyses shall be repeated at yearly intervals.

(2) Analyses for all community water systems utilizing only ground water sources shall be completed within two years following the effective date of this part. These analyses shall be repeated at three-year intervals.

(3) For non-community water systems, whether supplied by surface or ground water sources, analyses for nitrate shall be completed within two years following the effective date of this part. These analyses shall be repeated at intervals determined by the State.

(b) If the result of an analysis made pursuant to paragraph (a) indicates that the level of any contaminant listed in § 141.11 exceeds the maximum contaminant level, the supplier of water shall report to the State within 7 days and initiate three additional analyses at the same sampling point within one month.

(c) When the average of four analyses made pursuant to paragraph (b) of this section, rounded to the same number of significant figures as the maximum contaminant level for the substance in question, exceeds the maximum contaminant level, the supplier of water shall notify the State pursuant to § 141.31 and give notice to the public pursuant to § 141.32. Monitoring after public notification shall be at a frequency designated by the State and shall continue until the maximum contaminant level has not been exceeded in two successive samples or until a monitoring schedule as a condition to a variance, exemption or enforcement action shall become effective.

(d) The provisions of paragraphs (b) and (c) of this section notwithstanding, compliance with the maximum contaminant level for nitrate shall be determined on the basis of the mean of two analyses. When a level exceeding the maximum contaminant level for nitrate is found, a second analysis shall be initiated within 24 hours, and if the mean of the two analyses exceeds the maximum contaminant level, the supplier of water shall report his findings to the State pursuant to § 141.31 and shall notify the public pursuant to § 141.32.

(e) For the initial analyses required by paragraph (a) (1), (2) or (3) of this section, data for surface waters acquired within one year prior to the effective date and data for ground waters acquired within 3 years prior to the effective date of this part may be substituted at the discretion of the State.

(f) Analyses conducted to determine compliance with § 141.11 shall be made in accordance with the following methods:

(1) Arsenic—Atomic Absorption Method, "Methods for Chemical Analysis of Water and Wastes," pp. 95–96, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974.

(2) Barium—Atomic Absorption Method, "Standard Methods for the Examination of Water and Wastewater," 13th Edition, pp. 210–215, or "Methods for Chemical Analysis of Water and Wastes," pp. 97–98, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974.

(3) Cadmium—Atomic Absorption Method, "Standard Methods for the Examination of Water and Wastewater," 13th Edition, pp. 210–215, or "Methods for Chemical Analysis of Water and Wastes," pp. 101–103, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974.

(4) Chromium—Atomic Absorption Method, "Standard Methods for the Examination of Water and Wastewater," 13th Edition, pp. 210–215, or "Methods for Chemical Analysis of Water and Wastes," pp. 105–106, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974.

(5) Lead—Atomic Absorption Method, "Standard Methods for the Examination of Water and Wastewater," 13th Edition, pp. 210–215, or "Methods for Chemical Analysis of Water and Wastes," pp. 112–113, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974.

(6) Mercury—Flameless Atomic Absorption Method, "Methods for Chemical Analysis of Water and Wastes," pp. 118–126, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974.

(7) Nitrate—Brucine Colorimetric Method, "Standard Methods for the Examination of Water and Wastewater," 13th Edition, pp. 461–464, or Cadmium Reduction Method, "Methods for Chemical Analysis of Water and Wastes," pp. 201–206, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974.

(8) Selenium—Atomic Absorption Method, "Methods for Chemical Analysis of Water and Wastes," p. 145, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974.

(9) Silver—Atomic Absorption Method, "Standard Methods for the Examination of Water and Wastewater", 13th Edition, pp. 210–215, or "Methods for Chemical Analysis of Water and Wastes", p. 146, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974.

(10) Fluoride—Electrode Method, "Standard Methods for the Examination of Water and Wastewater", 13th Edition, pp. 172–174, or "Methods for Chemical Analysis of Water and Wastes," pp. 65–67, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974, or Colorimetric Method with Preliminary Distillation, "Standard Methods for the Examination of Water and Wastewater," 13th Edition, pp. 171–172 and 174–176, or "Methods for Chemical Analysis of Water and Wastes," pp. 59–60, Environmental Protection Agency, Office of Technology Transfer, Washington, D.C. 20460, 1974.

§ 141.24 Organic chemical sampling and analytical requirements.

(a) An analysis of substances for the purpose of determining compliance with § 141.12 shall be made as follows:

(1) For all community water systems utilizing surface water sources, analyses shall be completed within one year following the effective date of this part. Samples analyzed shall be collected during the period of the year designated by the State as the period when contamination by pesticides is most likely to occur. These analyses shall be repeated at intervals specified by the State but in no event less frequently than at three year intervals.

(2) For community water systems utilizing only ground water sources, analyses shall be completed by those systems specified by the State.

(b) If the result of an analysis made pursuant to paragraph (a) of this section indicates that the level of any contaminant listed in § 141.12 exceeds the maximum contaminant level, the supplier of water shall report to the State within 7 days and initiate three additional analyses within one month.

(c) When the average of four analyses made pursuant to paragraph (b) of this section, rounded to the same number of significant figures as the maximum contaminant level for the substance in question, exceeds the maximum contaminant level, the supplier of water shall report to the State pursuant to § 141.31 and give notice to the public pursuant to § 141.32. Monitoring after public notification shall be at a frequency designated by the State and shall continue until the maximum contaminant level has not been exceeded in two successive samples or until a monitoring schedule as a condition to a variance, exemption or enforcement action shall become effective.

(d) For the initial analysis required by paragraph (a) (1) and (2) of this section, data for surface water acquired within one year prior to the effective date of this part and data for ground water acquired within three years prior to the effective date of this part may be substituted at the discretion of the State.

(e) Analyses made to determine compliance with § 141.12(a) shall be made in accordance with "Method for Organochlorine Pesticides in Industrial Effluents," MDQARL, Environmental Protection Agency, Cincinnati, Ohio, November 28, 1973.

(f) Analyses made to determine compliance with § 141.12(b) shall be conducted in accordance with "Methods for Chlorinated Phenoxy Acid Herbicides in Industrial Effluents," MDQARL, Environmental Protection Agency, Cincinnati, Ohio, November 28, 1973.

§ 141.27 Alternative analytical techniques.

With the written permission of the State, concurred in by the Administrator of the U.S. Environmental Protection Agency, an alternative analytical technique may be employed. An alternative technique shall be acceptable only if it is substantially equivalent to the prescribed test in both precision and accuracy as it relates to the determination of compliance with any maximum contaminant level. The use of the alternative analytical technique shall not decrease the frequency of monitoring required by this part.

§ 141.28 Approved laboratories.

For the purpose of determining compliance with § 141.21 through § 141.27, samples may be considered only if they have been analyzed by a laboratory approved by the State except that measurements for turbidity and free chlorine residual may be performed by any person acceptable to the State.

§ 141.29 Monitoring of consecutive public water systems.

When a public water system supplies water to one or more other public water systems, the State may modify the monitoring requirements imposed by this part to the extent that the interconnection of the systems justifies treating them as a single system for monitoring purposes. Any modified monitoring shall be conducted pursuant to a schedule specified by the State and concurred in by the Administrator of the U.S. Environmental Protection Agency.

Subpart D—Reporting, Public Notification and Record Keeping

§ 141.31 Reporting requirements.

(a) Except where a shorter reporting period is specified in this part, the supplier of water shall report to the State within 40 days following a test, measurement or analysis required to be made by this part, the results of that test, measurement or analysis.

(b) The supplier of water shall report to the State within 48 hours the failure to comply with any primary drinking water regulation (including failure to comply with monitoring requirements) set forth in this part.

(c) The supplier of water is not required to report analytical results to the State in cases where a State laboratory performs the analysis and reports the results to the State office which would normally receive such notification from the supplier.

§ 141.32 Public notification.

(a) If a community water system fails to comply with an applicable maximum contaminant level established in Subpart B, fails to comply with an applicable testing procedure established in Subpart C of this part, is granted a variance or an exemption from an applicable maximum contaminant level, fails to comply with the requirements of any schedule prescribed pursuant to a variance or exemption, or fails to perform any monitoring required pursuant to Section 1445 (a) of the Act, the supplier of water shall notify persons served by the system of the failure or grant by inclusion of a notice in the first set of water bills of the system issued after the failure or grant

V 40248 DEC 24 75 XUM

and in any event by written notice within three months. Such notice shall be repeated at least once every three months so long as the system's failure continues or the variance or exemption remains in effect. If the system issues water bills less frequently than quarterly, or does not issue water bills, the notice shall be made by or supplemented by another form of direct mail.

(b) If a community water system has failed to comply with an applicable maximum contaminant level, the supplier of water shall notify the public of such failure, in addition to the notification required by paragraph (a) of this section, as follows:

(1) By publication on not less than three consecutive days in a newspaper or newspapers of general circulation in the area served by the system. Such notice shall be completed within fourteen days after the supplier of water learns of the failure.

(2) By furnishing a copy of the notice to the radio and television stations serving the area served by the system. Such notice shall be furnished within seven days after the supplier of water learns of the failure.

(c) If the area served by a community water system is not served by a daily newspaper of general circulation, notification by newspaper required by paragraph (b) of this section shall instead be given by publication on three consecutive weeks in a weekly newspaper of general circulation serving the area. If no weekly or daily newspaper of general circulation serves the area, notice shall be given by posting the notice in post offices within the area served by the system.

(d) If a non-community water system fails to comply with an applicable maximum contaminant level established in Subpart B of this part, fails to comply with an applicable testing procedure established in Subpart C of this part, is granted a variance or an exemption from an applicable maximum contaminant level, fails to comply with the requirement of any schedule prescribed pursuant to a variance or exemption or fails to perform any monitoring required pursuant to Section 1445(a) of the Act, the supplier of water shall given notice of such failure or grant to the persons served by the system. The form and manner of such notice shall be prescribed by the State, and shall insure that the public using the system is adequately informed of the failure or grant.

(e) Notices given pursuant to this section shall be written in a manner reasonably designed to inform fully the users of the system. The notice shall be conspicuous and shall not use unduly technical language, unduly small print or other methods which would frustrate the purpose of the notice. The notice shall disclose all material facts regarding the subject including the nature of the problem and, when appropriate, a clear statement that a primary drinking water regulation has been violated and any preventive measures that should be taken by the public. Where appropriate, or where designated by the State, bilingual notice shall be given. Notices may include a balanced explanation of the significance or seriousness to the public health of the subject of the notice, a fair explanation of steps taken by the system to correct any problem and the results of any additional sampling.

(f) Notice to the public required by this section may be given by the State on behalf of the supplier of water.

(g) In any instance in which notification by mail is required by paragraph (a) of this section but notification by newspaper or to radio or television stations is not required by paragraph (b) of this section, the State may order the supplier of water to provide notification by newspaper and to radio and television stations when circumstances make more immediate or broader notice appropriate to protect the public health.

§ 141.33 Record maintenance.

Any owner or operator of a public water system subject to the provisions of this part shall retain on its premises or at a convenient location near its premises the following records:

(a) Records of bacteriological analyses made pursuant to this part shall be kept for not less than 5 years. Records of chemical analyses made pursuant to this part shall be kept for not less than 10 years. Actual laboratory reports may be kept, or data may be transferred to tabular summaries, provided that the following information is included:

(1) The date, place, and time of sampling, and the name of the person who collected the sample;

(2) Identification of the sample as to whether it was a routine distribution system sample, check sample, raw or process water sample or other special purpose sample;

(3) Date of analysis;

(4) Laboratory and person responsible for performing analysis;

(5) The analytical technique/method used; and

(6) The results of the analysis.

(b) Records of action taken by the system to correct violations of primary drinking water regulations shall be kept for a period not less than 3 years after the last action taken with respect to the particular violation involved.

(c) Copies of any written reports, summaries or communications relating to sanitary surveys of the system conducted by the system itself, by a private consultant, or by any local, State or Federal agency, shall be kept for a period not less than 10 years after completion of the sanitary survey involved.

(d) Records concerning a variance or exemption granted to the system shall be kept for a period ending not less than 5 years following the expiration of such variance or exemption.

APPENDIX A—RESPONSE TO PUBLIC COMMENTS

Proposed National Interim Primary Drinking Water Regulations[1] were published for comment on March 14, 1975, 40 FR 11990. Written comments on the proposed regulations were invited, and public hearings were held in Boston, Chicago, San Francisco and Washington, D.C. Almost five hundred written submissions were received, totaling several thousand pages. Seventy-seven witnesses testified at the public hearings. In all, an aggregate of over 3,500 discrete comments were contained in the written submissions and in oral testimony.

As a result of these comments and further consideration of available data by EPA, a number of changes were made in the proposed regulations. The principal changes are summarized in the preamble to the final regulations. The purpose of Appendix A is to discuss the comments received on various aspects of the proposed regulations, and to explain EPA's response to those comments.

I. DEFINITIONS

1. *"Public Water System."* More than fifty comments were directed to the definition of "public water system" contained in § 141.1. Concern was expressed over the fact that the definition does not track the statutory definition word for word. Questions were also raised concerning the coverage of specific types of facilities with their own water systems, such as parks, schools, trailer camps and factories.

The reason for expanding the statutory definition was to express more specifically the Congressional intent. The statutory definition, contained in Section 1401(4) of the Public Health Service Act ("the Act"),[2] covers all systems with at least fifteen service connections or "regularly" serving at least 25 individuals. The term "regularly" is not explained in the statute, but the legislative history of the statute makes clear that Congress intended to cover virtually all public accommodations which have their own water supply and serve at least 25 individuals. The proposed regulations therefore explained "regularly" as meaning "daily at least three months out of the year." This three-month period has been shortened to 60 days in the final regulations because campgrounds and other public accommodations serving water for as much as 60 days during the year appear to fall within the classes of facilities Congress intended to cover. If a public water system serves the requisite number of service connections or persons for a total of 60 days during a calendar year, even if the service is intermittent, it is a public water system.

It is clear from the breadth of the definition of "public water system" in the Act and from the legislative history that the coverage of the Primary Drinking Water Regulations is not limited to traditional water utilities. Campgrounds, trailer camps, factories, parks, schools, restaurants, gasoline stations, motels and other facilities which have their own water systems must comply with the regulations if they serve the requisite number of service connections or the requisite number of persons.

Proposed § 141.3, entitled "Coverage," apparently contributed to confusion over the meaning of "public water system." That section, which was taken from section 1411 of the Act, exempts from the Primary Drinking Water Regulations, public water systems which meet four specified conditions. Over

[1] The proposed regulations actually were designated "Interim Primary Drinking Water Standards." Because the Safe Drinking Water Act refers to "Regulations" rather than "Standards," the final version of the regulations does not use the term "Standards" in the title.

[2] Statutory authority for the adoption of Primary Drinking Water Regulations is derived from the Safe Drinking Water Act, Public Law 93-523, which added a new Title XIV to the Public Health Service Act. References to pertinent sections in the United States Code accordingly are to the Public Health Service Act rather than to the Safe Drinking Water Act.

50 comments were received on this section. In response to comments asking for clarification of the section, it has been revised to make clear that a public water system must meet each of the four listed conditions in order to be exempted from the regulations. Thus, a public water system is exempted only if it consists only of distribution and storage facilities and it obtains all of its water from, but is not owned or operated by, a public water system to which the regulations apply, and it does not sell water and it is not a carrier which conveys passengers in interstate commerce. Interstate carriers, therefore, are not exempted, even if they have only storage and distribution facilities, obtain all their water from a public water system, and do not sell water to the public. However, a public facility such as a hotel or restaurant is exempted if it has only storage and distribution facilities, obtains all its water from a public water system and does not sell water to the public.

Of course, many facilities serving transients obtain water by direct connection to a conventional water utility system and either do not constitute a separate system or are excluded from coverage because they meet all four of the conditions listed in § 141.3. And in some cases, such as gasoline stations, even when the facility has its own water system it often will not qualify as a public water system because it does not serve water to the requisite number of service connections or persons.

2. *"Community Water System."* Two comments requested clarification of the definition of a "community water system," § 141.2. The purpose of defining this term is to allow appropriate regulatory distinctions between public water systems which serve residents on a year-round basis and public water systems which principally serve transients or intermittent users. Different monitoring requirements are appropriate for the two types of systems, and, as discussed below, some maximum contaminant levels are not applicable to non-community systems.

The proposed regulations defined "community water system" as "a public water system which serves a population of which 70 percent or greater are residents." This definition distinguished community systems on the basis of service to residents, but it excluded a number of systems which serve a large number of residents throughout the year. For example, some large resort communities may have several hundred or even several thousand year-round residents who nevertheless make up less than 70 percent of the population of the community at any given time. Water systems in such communities should be treated as "community systems" in order to provide appropriate protection for the year-round residents in the community. Thus, the definition of a "community water system" has been revised to cover any system which serves at least 15 service connections used by year-round residents or serves at least 25 year-round residents.

A definition for "non-community system" has been added to make it clear that a public water system is categorized as being either a community or a non-community system.

3. *"Maximum contaminant level" and "contaminant."* Over 150 comments were directed to the definition of "maximum contaminant level" or the definition of "contaminant."

The definition of "contaminant" contained in § 141.2 was criticized for its breath. The term as defined includes virtually any constituent in water, including constituents considered to be harmless or even beneficial. The definition was taken directly from Section 1401(6) of the Act. It is not intended to suggest that all constituents in water are undesirable, but rather is intended to permit the regulation of any constituent which may be found to be harmful. The definition has been retained as proposed.

The definition of "maximum contaminant level" was criticized for requiring measurement of the level at the "free flowing outlet of the ultimate user of a public water system." This definition carries out the intent of Congress that "drinking water regulations are intended to be met at the consumer's tap." (H. Rep. No. 93-1185, 93rd Cong., 2nd Sess. 13 (1974)). The purpose of the Primary Drinking Water Regulations is to assure that water used by the public is safe. This can be assured only if maximum contaminant levels are met at the tap.

The final regulations retain the requirement that maximum contaminant levels be met at the consumer's tap, but have been amended to meet the point made in many comments that a public water system cannot be held responsible for contamination of water which is the fault of the consumer. It would be unreasonable to hold a public water system in violation of a maximum contaminant level if the level is exceeded at the consumer's tap as a result of the user's attachment of a faulty home treatment device, because of cross-connections in the user's plumbing system or because the plumbing is used to ground electrical systems. The definition of "maximum contaminent level" in § 141.2(d) therefore provides that "Contaminants added to the water under circumstances under the control of the user, except those resulting from corrosion of piping and plumbing caused by water quality, are excluded from this definition." This wording is not meant to deter or to detract from the maintenance of a cross-connection control program by the supplier.

The proposed definition provides for measurement of turbidity at the point of entry to the distribution system, rather than at the consumer's tap, since measurement of turbidity at this point is a more meaningful indicator of the sanitary quality of the water.

4. *"Sanitary survey."* A definition of the term "sanitary survey" has been added as § 141.2(f), because sanitary surveys are referred to at several points in the final regulations. Comments from many sources, including the National Drinking Water Advisory Council, urged EPA to emphasize the importance of sanitary surveys of public water systems as a means of assuring that Primary Drinking Water Regulations will be met. The definition contained in the regulations reflects the broad extent of adequate sanitary surveys, including on-site review of the water source, facilities, equipment, operation and maintenance of a public water system.

5. *Other definitions.* Other comments were received on the definitions of "person" and "supplier of water". These definitions were taken directly from section 1401 of the Act, and have been retained in the final regulations. As in the case of some comments on the definition of "public water system," a number of these comments were based on an erroneously restricted view of the coverage of the Act. As noted above, Congress intended that Primary Drinking Water Regulations apply to a broad range of facilities with their own water systems, not just to conventional water utilities. The owner or operator of a restaurant or motel, for example, is a "supplier of water" if the facility has its own water system and serves the requisite number of service connections or persons.

II. INORGANIC CHEMICALS

1. *General Comments.* Comments on maximum contaminant levels ("MCL's") for inorganic chemicals (§ 141.11) included questions on the analytical aspects of the MCL's—whether these were total or dissolved levels, whether the analytical methodology was adequate for the cited levels, whether an allowance had been made for analytical variations, and whether the public water system's laboratory or some other laboratory would be performing the analyses. The Administrator has verified that all of the substances for which MCL's have been specified can be measured readily by available methodology at the applicable levels. The analytical methods cited in these regulations provide information on analytical variability; and the check-sample and averaging techniques cited in § 141.23 provide additional allowances for human or mechanical errors. Two comments urged that MCL's for inorganic chemicals be deferred until issuance of the report of the National Academy of Sciences pursuant to Section 1412(e) of the Act. However, it was the intent of Congress that the Interim Primary Drinking Water Regulations be promulgated as soon as possible, so that at least minimal protection to water consumers would be available during the period that the Academy is preparing that report.

2. *Water consumption.* The MCL's for inorganic chemicals and other contaminants are based on an individual consumption rate of two liters of water per day. Fourteen comments agreed with the two-liter figure or contended that a lower figure should be used. Four comments urged the adoption of a higher consumption figure. An environmental organization submitted data indicating that some segments of the population, such as foundry workers and heavy drinkers, consume an average of susbtantially more than two liters per day.

EPA's assumption of a two liter per day water intake rate was based on evidence that the average consumption of adult males is at a rate of 1.25–1.5 liters per day and that the average consumption rate of women and children is even lower. Because Congress intended that susceptible groups in the population should be protected to the extent feasible, the use of a two-liter figure provides protection for the great majority of the population which consumes an average amount of water, or less than an average amount, or even as much as one-third more than the average amount. To base all maximum contaminant levels on the water consumption rate of the small percentage of the population which drinks much more water each day would be unrealistic and enormously expensive.

This is not to say that the maximum contaminant levels do not protect persons who drink water at a substantially higher rate than normal. As indicated below, critical maximum contaminant levels have substantial safety factors. The safety factors for persons drinking unusually large quantities of water are not as high as those for the majority of the population, but they do provide a reasonable degree of protection under the circumstances.

3. *Safety factors.* One set of comments questioned the fact that different safety factors are contained in various proposed maximum contaminant levels. The group commenting agreed that a uniform safety factor should not be used, but requested a more systematic discussion of safety factors at least with respect to inorganic chemicals.

The regulations are, as anticipated by Congress, based on the 1962 Public Health Service Standards, as reviewed in 1973 by the EPA Advisory Committee. The standards were not developed by a systematic approach to safety factors, at least partly because of amount of knowledge about, and the nature of the health risk of, the various contaminants covered a very broad range. The regulations are the result of experience, evaluation of the available data, and professional review.

In the Statement of Basis and Purpose for these regulations, the safety factor represented by a number of the maximum contaminant levels for inorganic chemicals was estimated. The purpose of this was to deter-

V 401248 DEC 24 75 XUM

mine whether the estimated safety factor was roughly consistent with the type of information available and the nature of the health risk presented. It was not intended to rewrite the regulations on the basis of estimated safety factors.

The National Academy of Sciences has been asked to review each of the substances for which maximum contaminant levels are being set, as part of the NAS study for the adoption of Revised Primary Drinking Water Regulations. Any new information obtained by NAS on the safety factors involved will be carefully analysed by EPA.

4. *Arsenic.* Thirteen comments addressed the proposed MCL for arsenic (§ 141.11(a)). Most comments regarding arsenic recommended an MCL of 0.1 mg/l on the basis that no adverse health effects have been demonstrated from the consumption of water containing this amount.

The Administrator has considered raising the arsenic limit to 0.1 mg/l for the same reason cited in many comments—no adverse health effects have been demonstrated from consumption of water containing this amount or more, at least not in this country. However, arsenic has been shown to be a potential carcinogen in some of its forms in industrial exposures, and there appears to be a correlation between arsenic levels in drinking water and the occurrence of skin cancer in other countries. While the role of arsenic as a carcinogen or co-carcinogen has not been firmly established, it does not seem to be prudent at this time to raise the arsenic limit.

5. *Barium.* Two comments concerned the MCL for barium, and both expressed concern over required compliance when the MCL is exceeded as the result of naturally occurring barium in ground water.

Maximum contaminant levels apply equally to naturally occurring substances and those occurring as the result of man-made pollution. When barium is found to exist in a ground water source, the course of action is to attempt its removal, such as by conventional water treatment processes or ion exchange, or to obtain a different water source. If such action is not feasible, the system can seek a variance or exemption under the provisions of these and subsequent regulations.

6. *Cadmium.* Three comments suggested that the cadmium limit should be revised to allow more protection for cigarette smokers, while 49 comments emphatically denounced the concept of having non-smokers bear the financial burden of lowering the cadmium limit for the benefit of smokers. The Administrator is aware of the fact that smokers will be provided a smaller factor of safety on the basis of the cadmium limit, but he agrees with the majority that a reduction of the limit cannot be justified.

7. *Chromium.* The seven comments on the MCL for chromium included suggestions that the limit be raised, that it be eliminated, or that it be specified as only for hexavalent chromium.

The limit for chromium is based on the known toxicity of the hexavalent form. Since this form is the one most likely to be found in drinking water, and since the specified analytical detection method (atomic absorption spectrophotometry) does not distinguish between the valence states, the MCL is for total chromium. If part of the chromium present is in a lower valence state, the MCL provides an additional margin of safety.

8. *Cyanide.* There were only two comments on the MCL for cyanide—one stating that the MCL was too low and one stating that the limit was based on insufficient data. Since small amounts of cyanide do not constitute a health hazard, and since chlorination further reduces the toxicity of cyanide, this substance is rarely a problem in drinking water, and there appears to be no justification for including cyanide in the list of inorganic chemicals for which MCL's are established in these Regulations. Cyanide has not been identified during routine sampling of drinking water in concentrations greater than 1/10 of the proposed MCL, which itself is 1/100 of the level at which cyanide has adverse health effects on humans. It does not appear that there is justification for requiring tens of thousands of communities to monitor for this substance. Further, cyanide occurs, however rarely, in drinking water primarily as a result of spills or other accidents, which can be more appropriately controlled by other laws or regulations, such as Section 1431 of the Act. The Administrator, therefore, has decided to withdraw cyanide from the Interim Primary Drinking Water Regulations. The States may require monitoring for cyanide in appropriate circumstances.

9. *Lead.* The one comment on the MCL for lead stated that the limit is too low and that it is below or near the detection limit. The Administrator has verified that the atomic absorption spectrophotometric method specified has the necessary sensitivity for detection of the metal at the specified concentration.

10. *Fluoride.* The 94 comments on the fluoride MCL's covered an extremely broad area. Among the comments were suggestions that a single MCL of 0.05 mg/l, of 1.5mg/l, of 1.8 mg/l, of 2.0 mg/l, of 2.4 mg/l, of 2.5 mg/l, or of 5.0 mg/l be used in place of those in the regulations. There also were suggestions that different ranges be used, and that the reason for temperature-dependent MCL's be given. Some comments requested that fluoride be deleted from the regulations, or at least placed in Secondary Drinking Water Regulations. Quite a number of comments were directed toward controlled fluoridation rather than MCL's for fluoride. Some persons registered their objections to controlled fluoridation, while others requested that limits for controlled fluoridation be included in the regulations. There were comments that all fluoride should be removed from drinking water, and comments that there should be no limit on fluoride. There were comments that water supplies serving transients be excluded from the fluoride limits, and comments that educational institutions should not be excluded.

The fluoride question has been complicated by the fluoridation controversy. It was clearly the intent of Congress that Primary Drinking Water Regulations not be used as the vehicle for a national fluoridation program (House Report, p. 15). At the same time, Congress made it clear that there was no intent to prohibit or discourage fluoridation. As for changing the MCL's, either raising or lowering them, very little data were submitted to support the recommendations.

Suggestions that the MCL's be lowered were for the most part based on presumed toxicity of fluoride or on presumed increased exposure to fluoride from sources other than water. The evidence available to the Administrator indicates that the toxic effect of fluoride in drinking water is limited to mottling of dental enamel and minor changes in bone density, and that these effects occur primarily at fluoride concentrations above the proposed MCL's. It has been postulated that, with the advent of controlled fluoridation, the overall exposure of individuals to fluoride has increased to the point where the addition of more fluoride to drinking water is no longer necessary, or perhaps even to the point where lower MCL's in water ought to be established. While it is true that foods prepared in fluoridated water contribute fluoride to the diet in addition to that obtained from drinking water, it should be noted that the fluoride MCL's are based almost entirely on epidemiological evidence obtained from areas where fluoride is a natural constituent of the water. It can be assumed that in such areas most food was prepared in the local water, so the contribution of fluoride from this source was automatically taken into account;

This same epidemiological evidence showed that there is a temperature-dependent physiological effect of fluoride, both beneficial and detrimental depending on concentration. To ignore this evidence would seem to be most unwise. The use of a temperature scale for fluoride is more appropriate than for other chemicals because of the studies available on the fluoride-temperature relationship and because there is a small margin with fluoride between beneficial levels and levels with adverse health effects.

Suggestions that the MCL's be raised or eliminated were based on the interpretation of dental fluorosis as an esthetic condition rather than as a health problem or on the economic aspects of fluoride removal. The Administrator has available to him a wealth of information on the subject of fluorides, plus the advice and counsel of the dental experts at the National Institutes of Health, DHEW. On the basis of this information and counsel, the Administrator believes that the MCL's in these regulations are adequate for the protection of the health of consumers, and that there is insufficient evidence to justify altering the proposed MCL's. While the Administrator believes that the exemption of educational institutions from the fluoride limits was justified, revision of the regulations to exclude non-community public water systems from most inorganic chemical MCL's will make the exemption provision unnecessary.

11. *Mercury.* Six comments contained suggestions that the mercury limit be left as proposed except that it be applied only to methyl mercury; seven comments suggested that a limit be set for organic mercury only; and 29 comments expressed agreement with the proposed limit—a limit based on the health hazard of methyl mercury but measured as total mercury. One comment expressed dissatisfaction with mercury limits in general, on the basis that the mercury problem has been grossly exaggerated.

A specific limit for organic mercury, or designating the proposed limit as applicable only to organic mercury, both present problems in analysis, and do not provide for potential conversion of inorganic mercury to the organic form. Since the proposed limit for total mercury is based on the "worst case" concept, that is, presumes that all mercury present is in the more toxic, organic form, it provides maximum health protection. Because of the low levels of mercury found in drinking water, the economic impact of the proposed limit is expected to be minimal. The Administrator therefore is satisfied that the proposed limit for mercury is generally acceptable.

12. *Nitrate.* Most of the 21 comments on the nitrate MCL were directed toward naturally occurring nitrate and the difficulty in meeting the limit. As explained in the Statement of Basis and Purpose, nitrate can be toxic to infants. Because of the known adverse health effects of nitrate, the Administrator believes that an MCL for nitrate should be set. While it is acknowledged that removal of nitrate from drinking water is difficult, in many cases the sources of nitrate can be identified and steps taken to prevent its entry into drinking water sources. An example is the nitrate contamination of ground water as the result of surface run-off. Such contamination can often be eliminated by proper well construction.

13. *Sodium.* Several comments suggested the possibility of an MCL for sodium and the National Drinking Water Advisory Council recommended that consideration be given to monitoring for sodium so that the public can be informed of the sodium content of available water. These concerns result from the fact that many persons in the United States suffer from diseases which are influenced by dietary sodium intake. In addition, persons may wish to limit their sodium intake for other reasons. However, EPA has not proposed an MCL for sodium, and the Advisory Council did not recommend an MCL, because the data available do not support any particular level for sodium in drinking water, and because regulation of sodium by an MCL is a relatively inflexible, very expensive means of dealing with a problem which varies greatly from person to person.

EPA has requested the National Academy of Sciences to include sodium in its study of the health effects of inorganic chemicals. In the meantime, the Agency recommends that the States institute monitoring programs for sodium, and that physicians and consumers be informed of the sodium concentration in public water systems so that they can take action they may consider appropriate.

14. *Sulfate.* Comments also were submitted urging the adoption of an MCL for sulfate. As in the case of sodium, the National Drinking Water Advisory Council recommended monitoring for sulfate levels, but did not recommend the adoption of a maximum contaminant level.

The sulfate question is similar to the sodium question in that available data do not support the establishment of any given level: A relatively high concentration of sulfate in drinking water has little or no known effect on regular users of the water, but transients using high sulfate water sometimes experience a laxative effect. Whether this effect will occur, and its severity, varies greatly with such factors as the level of sulfate in the water being consumed and the level of sulfate to which the transient is accustomed. EPA recommends that States institute monitoring programs for sulfates, and that transients be notified if the sulfate content of the water is high. Such notification should include an assessment of the possible physiological effects of consumption of the water.

The National Academy of Sciences has been asked to consider sulfate in its study. An MCL for sulfate will be proposed if it is supported by the available data.

15. *Inorganic chemical MCL's for non-community systems.* As proposed, the regulations would have made all MCL's for inorganic chemicals applicable to non-community water systems. This approach failed to take into account the fact that the proposed MCL's for inorganic chemicals, except nitrates and cyanide, were based on the potential health effects of full-time, long-term exposure. MCL's based on full-time long-term exposure are not necessary to protect transients or intermittent users served by non-community systems. Therefore, the final regulations provide that MCL's for inorganic chemicals other than nitrates are not applicable to non-community systems. Nitrates are applicable to all public water systems because they can have an adverse health effect on susceptible infants in a short period of time after exposure. (As discussed above, the other proposed inorganic chemical MCL based on short-term effects—cyanide—has been deleted.)

16. *Monitoring requirements.* Section 141.23, dealing with inorganic chemical monitoring requirements, received more comments than any other section of the proposed regulations. Altogether, there were over 300 discrete comments on inorganic chemical monitoring, with the largest segment of the comments being directed toward § 141.23 (b), the provision for increased monitoring when 75% of the maximum contaminant level is attained.

The comments on § 141.23(a) dealt mostly with the time interval allowed for compiling a historical record of water quality. Most comments contained the opinion that more time should be allowed for the "phasing in" of, particularly, the non-community water systems. On the other hand, there were comments to the effect that too much time had been allowed. There were a number of requests that non-community systems be exempted from the inorganic chemical monitoring requirements, on the basis that maximum contaminant levels are based on lifetime chronic health effects, and that users of non-community water systems are not exposed for a lifetime. There also were comments requesting that no distinction be made between different types of water systems, such as surface and ground. As noted above, because MCL's for inorganic chemicals have, in most cases, been based on chronic health effects for lifetime exposures, they will not be applied to non-community systems. Therefore, § 141.23 has been rewritten to indicate that, except for nitrates, inorganic chemicals monitoring will be required only for community water systems.

Virtually every comment on § 141.23(b) expressed criticism of the concept of increased monitoring when a contaminant level reaches 75% of the maximum allowed. Reasons given were that such monitoring imposes "a safety factor on top of a safety factor," that the State should determine when increased monitoring frequency is desirable, that analysis for some constituents would be impossible because of the limits of detection, that analytical costs would be prohibitive, that ground water contaminant levels are not variable, and that the proposed monitoring frequency was too demanding. Some commentors suggested that less frequent monitoring be allowed when a contaminant level was below 50% of the MCL.

Section 141.23(b) was written with the intent that, when a contaminant level reached 75% of the MCL, monitoring frequency would be increased so that the supplier of water would have an adequate warning of possible or impending violation of the MCL. By thus being forewarned, the supplier of water could take corrective measures before violation occurred. In light of the comments received, it has been concluded that although such sampling may be a matter of good operating practice, it is not appropriate for inclusion in a primary drinking water regulation for the reasons stated in the comments. Therefore, the Administrator has decided to withdraw § 141.23(b). However, the Administrator believes it would be prudent for the operator of a community water system to increase monitoring frequency for a contaminant which appears to be approaching the MCL, and for the States to direct such increased monitoring when appropriate.

Comments on § 141.23(c) were largely directed toward the requirement that sampling and analysis be repeated within 24 hours after determination that an MCL has been exceeded. It was felt that this did not allow enough time, and in fact there was some misunderstanding as to whether it was intended that only the resampling be completed within 24 hours or that both resampling and reanalysis be completed in this time frame. Section 141.23(c) has been rewritten to indicate that when a sample result does not comply with the MCL, the supplier of water shall initiate three additional samples within one month. Since compliance will be judged on the average of these four samples initiated over a one-month period, the requirement that the first check sample be either completed or initiated within 24 hours is not justified.

Section 141.23(d) elicited a number of comments in regard to the definition of a "moving average," and there were general objections to the public notification provision. The opinions expressed were that the public should be notified only if the violation of an MCL involved an imminent hazard to health, or that emphasis should be placed on correcting a problem rather than increasing the monitoring frequency and notifying the public. The rewording of section 141.23(c) to provide for a one-month average has eliminated the need for paragraph (d). The one-month average provides a less complicated, more efficient means of determining compliance.

In regard to public notification of noncompliance with an MCL, Section 1414(c) of the Act requires that notice of such noncompliance be conveyed to the public. The nature of the corrective measures to be taken are determined by the supplier of water and the State. The comments on § 141.23(e), the special provisions for nitrate, were directed toward the 24-hour re-analysis requirement and the concept of the special provision itself. Most comments contained the opinion that no re-analysis could be performed in the time allotted, and others questioned the basis for singling out nitrate for special consideration. Nitrate was singled out for special consideration among the inorganic chemicals because of the acute toxicity of nitrate to infants. The resampling requirement has been rewritten for improved clarity.

The comments on § 141.23(f) dealt entirely with the suggestion that alternative analytical methods be allowed. As noted above, alternative analytical techiques may be permitted by the State if the substitute method is substantially equivalent to the techniques prescribed in this regulation, in both precision and accuracy, as it relates to the determination of compliance with any maximum contaminant level.

III. ORGANIC CHEMICALS

1. *CCE.* Section 141.12, maximum contaminant levels for organic chemicals, received over 80 comments. Most of these comments criticized the carbon chloroform extract (CCE) method for estimation of organic chemical contamination. Criticisms of the CCE requirement were based on cost, lack of correlation with health effects, inadequacy as a measure of total organic chemical content, inapplicability to ground water, and lack of supporting data. Some comments suggested an alternative surrogate for organic chemical contamination, including total organic carbon and chemical oxygen demand. Other comments concerning CCE were that it be considered for inclusion in the Secondary Drinking Water Regulations, that there be provision for raising the MCL when the organics content of water is shown to be harmless, and that a treatment technique be substituted for the MCL. Over twenty comments requested that the CCE procedure be dropped altogether. Three comments requested that the limit be lowered.

The general problem of organic chemicals in drinking water is accorded top priority by EPA. Concern over organic chemicals was one of the principal reasons for passage of the Safe Drinking Water Act. Surveys conducted by EPA in recent months indicate that man-made organic chemicals are present in small amounts in water supplies in many parts of the country. The Agency is committed to using the regulatory tools provided by the Act to deal with the potential adverse health effects of organic chemicals in drinking water.

The proposed use of a CCE maximum contaminant level was an attempt to deal with gross organic pollution as soon as possible pending the results of further research, sur-

V 401248 DEC 24 75 XUM

veys and the NAS study. CCE was initially used as a means of taste and odor control. As concern over adverse health effects of organic chemicals grew, CCE was turned to as a rough surrogate for organics to be used as a health-based standard rather than as an esthetic standard. Unfortunately, as more is learned about organic chemical pollution of drinking water, CCE looks less and less effective as a surrogate for harmful organics.

The principal difficulty with CCE is that it includes only about one-tenth of the total organic content of the volume of water sampled and it does not measure organic compounds of greatest concern, such as the volatile halomethanes. Thus, a high CCE test result does not necessarily mean that the water tested may pose a hazard to health, and a low CCE test result may be obtained from water with a high level of potentially harmful organic compounds. In short, there is no sound basis of correlation between CCE test results and the level of harmful organic chemicals in the water tested.

To establish a maximum contaminant level under these circumstances would almost certainly do more harm than good. It could give a false sense of security to persons served by systems which are within the established level and a false sense of alarm to persons served by systems which exceed the level. It also would divert resources and attention from efforts to find more effective ways of dealing with the organic chemical problem.

Total organic carbon (TOC) and chemical oxygen demand (COD) are surrogates that have been considered, but they have limitations also. TOC has the advantage of being quicker and cheaper (on a per sample basis) than CCE, but the availability of sensitive instruments for this measurement is questionable. More investigation of the significance of any TOC number as a health effects limit is also needed. COD is easily determined with readily available laboratory equipment, but COD is not limited to organic compounds, and besides a COD number also cannot be adequately related to health significance at this time.

EPA is diverting substantial resources to research into the health effects of specific organic chemicals and groups of organic chemicals. Also, it is expected that the study of the National Academy of Sciences will produce further data on health effects. However, in view of the significance of the potential health problem, it is not enough to wait for this additional health effects data. EPA therefore will undertake to identify one or more surrogate tests for organic chemicals or organic chemical groups, and will also study in depth the presence of specific organic chemicals in drinking water supplies. It is anticipated that this effort will result in the development of an additional MCL or MCL's for organic chemicals by amendment of the Interim Primary Drinking Water Regulations without having to wait for a more complete resolution of the organic chemicals question in the Revised Regulations.

Accordingly, EPA is adopting regulations on organic chemical monitoring, using the authority of Sections 1445 and 1450 of the Act. The regulations require that over 100 selected public water systems serving substantial populations collect samples of raw and treated water for submission to EPA for organics analysis. EPA will analyze the samples for a number of general organic parameters, including CCE, TOC (volatile and nonvolatile), NVOC, Total Organic Chlorine (TOCl), ultraviolet absorbancy, and fluorescence. In addition, the water will be analyzed for 21 specific organic compounds. These laboratory analyses will be used to evaluate the extent and nature of organic chemical contamination of drinking water, to evaluate the validity of the general organic parameters as surrogates for measures of harmful organic chemicals, and to determine whether there is an adequate basis for establishing maximum contamiant levels for specific organics or groups of organics.

In addition, EPA is embarking on an intensive research program to find more definitive answers to the following four questions:

1. What are the effects of commonly occurring organic compounds on human health?

2. What analytical procedures should be used to monitor finished drinking water to assure that any primary drinking water regulations dealing with organics are met?

3. Because some of these organic compounds are formed during water treatment, what changes in treatment practices are required to minimize the formation of the compounds in treated water?

4. What treatment technology must be applied to reduce contaminant levels to the concentrations that may be specified in the regulations?

This research will involve health-effects and epidemiological studies, investigations of analytical methodology, and pilot plant and field studies of organic removal unit processes. Some phases of the research are to be completed by this fall, while much of the remainder is to be completed within the next calendar year.

As soon as sufficient information is derived from the monitoring program and related research, primary drinking water regulations will be amended so that the organic chemicals problem can be dealt with without delay. The monitoring program will be completed within one year.

During the interim period while satisfactory MCL's for organic contamination in drinking water are being developed, EPA will act in specific cases where appropriate to deal with organic contamination. If the EPA monitoring program reveals serious specific cases of contamination, EPA will work with State and local authorities to identify the source and nature of the problem and to take remedial action. EPA will also aid the States in identifying additional community water supplies that require analysis.

2. *Pesticides.* Proposed § 141.13 contained MCL's for several organic pesticides. Most of the comments on § 141.13 (out of a total of 130) requested that the MCL's for pesticides either be raised or deleted entirely. There were two requests for inclusion of limits for 2,4,5-T, one request for an organophosphate insecticide limit, one for a limit on dioxin, and requests for limits for aldrin, dieldrin, DDT and chlorine (sic.) Other comments suggested that pesticide limits be restricted to emergencies or spills, or at least only to surface water during periods of pesticide use. There were also requests for research on carcinogenic risk and bioamplification.

These proposed pesticides levels were carefully considered by the Advisory Committee and have been reviewed in light of available data on the health effects of these pesticides and their incidence in drinking water supplies. The levels established are adequately supported by the authorities cited in the Statement of Basis and Purpose.

A limit for 2,4,5-T was tentatively proposed by the Advisory Committee but was deleted from the Committee's final report in 1973 on the grounds that EPA's ban on the use of 2,4,5-T for aquatic uses made a drinking water limit unnecessary. That ban has now been in effect for about five years, and it is highly unlikely that this herbicide exists in drinking water except perhaps in extremely rare cases in trace amounts. EPA is now investigating reports of 2,4,5-T in some waterways in Northern Louisiana, and will reconsider the desirability of an MCL for 2,4,5-T if new data indicate that the pesticide is appearing in drinking water supplies at a significant rate. Dioxin is a minor contaminant of 2,4,5-T, and the same basic considerations apply to it.

The desirability of an MCL for organophosphorus insecticides, which was recommended in 1973 by the Advisory Committee, was carefully considered by EPA. It was decided not to adopt such a level, because although these pesticides would pose a serious health risk if they were present at the consumer's tap, the fact is that there is no evidence that such pesticides reach the consumer's tap. This was discussed in the preamble to the proposed primary drinking water standards, at 40 FR 11992. As noted there, these pesticides reach water sources usually only by accident or indirectly, and their tendency to degrade rapidly apparently has prevented problems which might occur when they do reach drinking water sources. The principal threat from these pesticides is from accidental spills in water sources. The appropriate way to deal with such spills is by emergency action when they occur, not by periodic monitoring which would not catch the problem in time.

With respect to aldrin, dieldrin and DDT, EPA's national survey of the presence of these pesticides in drinking water supplies has not been completed. If the results of that survey indicate that those pesticides are present in a significant number of water supplies, an appropriate amendment of the Interim Primary Drinking Water Regulations will be proposed.

The proposed MCL's for chlordane, heptachlor, and heptachlor epoxide have been deleted because EPA is currently involved in suspension and cancellation hearings for these pesticides. MCL's will be reconsidered at a later date.

Current research on pesticides, including both surveys of their incidence in water supplies and their health effects, will be continued and expanded.

3. *Monitoring Requirements.* There were over 250 comments on § 141.24, dealing with monitoring for compliance with the MCL's for CCE and pesticides. However, most of these comments were more related to the merits of the MCL's than to the monitoring requirements. The CCE limit has been discussed above, and that discussion will not be repeated here.

A number of comments on § 141.24 suggested that monitoring requirements for pesticides be eliminated, or at least that the responsibility for such monitoring be assumed by EPA or the States rather than by public water system. Concern was expressed over the cost of monitoring for pesticides, and the absence of pesticides in public water systems in some areas.

EPA agrees that regular monitoring for pesticides is not needed for all public water systems using only ground water sources. Pesticides are rarely found in significant levels in ground water. Accordingly, the proposed §141.24 has been amended to provide that for a system using only ground water, monitoring shall be required only when specified by the entity with primary enforcement responsibility. This will more reasonably limit monitoring for pesticides in systems using only ground water to those instances when the State or EPA has reason to suspect the possibility of contamination.

In the case of surface waters, the greater incidence of these pesticides requires monitoring across-the-board. For all community water systems using surface water sources for all or part of their water, monitoring for pesticides will be required within one year of the effective date of the regulations. This monitoring shall be repeated at intervals specified by the State and in no event less frequently than at three year intervals.

Section 1424 has also been amended to require that samples to be analyzed for pesticides must be collected during a period of the year designated by the entity with primary enforcement responsibility as the period when contamination by pesticides is most likely to occur. This takes into account the fact that the level of pesticides in surface waters varies on a seasonal basis in relation to agricultural uses of the pesticides. This amendment will make monitoring for pesticides in drinking water more effective.

Several comments criticized proposed § 141.24(b), which would have required increased monitoring when the contaminant level reaches 75% of the MCL. This is basically the same question addressed above with respect to monitoring requirements for inorganic chemicals. For the same reasons, the 75% increased monitoring requirement for pesticides has been eliminated.

Other comments requested that EPA allow alternative analytical procedures. A new § 141.27 has been added to provide that a supplier of water may, with State approval, employ an alternative analytical technique.

There appears to have been some misunderstanding regarding the role of the public water system laboratory versus State or other laboratories in performing analyses for the purpose of determining compliance with these regulations, and in particular the MCL's for pesticides. Although it is intended that the individual suppliers of water be responsible for the analyses, it was not intended that each supplier of water necessarily possess the analytical capability to perform the analyses himself. It is reasonable to expect each supplier of water without its own laboratory facilities will collect and transmit water samples to approved laboratories.

It should be noted that with respect to organic chemicals and other contaminants, all MCL's and monitoring requirements in these regulations are minimum requirements, and it is incumbent on the entity having primary enforcement authority to require additional monitoring and other requirements where appropriate.

IV. Turbidity

1. *Turbidity MCL's.* About half of the more than 100 comments on the MCL for turbidity (§ 141.14) contained a request that turbidity be deleted from the Primary Drinking Water Regulations or be relegated to the Secondary Drinking Water Regulations. There were also requests that the MCL be raised, that there be a limit of 5 turbidity units ("TU") and a "goal" of 1 TU, and that the MCL be lowered. Other comments referred to turbidity in sub-arctic waters, the use of a two-level MCL for turbidity, and the apparent encouragement of chlorination.

The Administrator has determined that turbidity is indeed appropriately classified as a health limit, in that turbidity has a marked effect on the bacteriological quality of water, whether or not disinfection is practiced.

As noted above, many comments questioned the need for a turbidity limit applicable to systems using only a grcund water source. In this regard the Administrator believes that in most cases, turbidity is not a problem in properly developed wells. In some cases, excess sand is included in the water pumped but this is not a health related problem. In other cases dissolved iron present precipitates upon oxidation. This also is not a health related problem. In some fractured geologic formations and particularly in limestone formations, turbidity could be a periodic problem because of a short retention times in the aquifer. In these cases the State is encouraged to take appropriate action in establishing a limit or treatment requirement.

Some comments questioned the proposal to allow an MCL of 5 TU rather than 1 TU in cases where the entity with primary enforcement responsibility specifically authorized the higher MCL. The Administrator believes this is justified on the basis that not all turbidity is related to bacteriological quality. Examples of instances where the higher turbidity may be allowed are when iron or other minerals, or minute ice crystals in otherwise satisfactory water, are the cause of the turbidity. Proving that a particular type of turbidity does not interfere with disinfection or does not interfere with microbiological determinations is not always easy. One of the best methods for proving the former is an accumulation of data showing good bacteriological quality in the distribution system over an extended period of time, even with turbidity over 1 TU. A microbiologist can, by various manipulative techniques, tell whether or not turbidity is interfering with the coliform test. No doubt a State may employ other means for determining when a public water system has qualified for the higher turbidity limit.

The proposed regulations measured the turbidity MCL only on the basis of a monthly average. The National Drinking Water Advisory Council recommended that a supplementary MCL be established to protect against the appearance of a particularly high turbidity level over a short period of time. In accordance with the Council's recommendation, § 141.13 has been amended to establish an MCL of 5 TU as an average of two consecutive daily samples. EPA agrees with the Council that turbidity levels above 5 TU cannot be justified in surface waters for more than a one-day period.

That there is an implied endorsement of chlorination in these regulations cannot be denied. The Administrator, recognizing chlorination as being the only generally available disinfectant in water treatment, has on several occasions specifically endorsed chlorination as a valuable public health measure. Pending further research, the possible long-term adverse effects of chlorination are in most cases offset by the effectiveness of chlorination for preventing bacteriological contamination.

2. *Turbidity Monitoring.* There were over 120 comments on the turbidity monitoring requirements (§ 141.22). Most of the comments were directed toward the requirements as they applied to water supplies using water from underground sources. It was agreed that turbidity in ground water need not be monitored, and in fact there were a number of comments suggesting that turbidity monitoring be deleted altogether. There were comments that the sampling was too frequent, and comments that in some circumstances the sampling was too infrequent. The question of cost was brought up in connection with sampling frequency. There also were requests for clarification of the entire section, with particular emphasis on defining an "entry point" to a distribution system.

It was the intent of the Administrator that public non-community water systems using ground water be exempted from the turbidity monitoring provisions. Unfortunately, however, the omission of commas in § 141.22(c) made it appear that only community systems using ground water were required to monitor for turbidity. The section has been written so that the turbidity monitoring requirements apply only to water systems using surface water sources. Also, for non-community systems using surface water, the regulations have been modified to require that the turbidity monitoring must be initiated within 2 years of the effective date.

The measurement of turbidity at the entry point to the distribution system, rather than at the consumer's tap, can be justified on at least two bases. First, since turbidity can be controlled only by water treatment processes, it is most appropriately measured immediately after the water has been treated, and before the measurement is affected by scale, sediment or other materials present in pipelines. Second, since one of the principal purposes for limiting turbidity is the fact that turbidity interferes with disinfection, and since disinfection is effected at the treatment plant, turbidity at the consumer's tap is not an adequate reflection of conditions where disinfection is taking place.

Comments suggesting an increased sampling frequency for turbidity in effect were suggesting operational monitoring desirable in specific cases rather than a frequency which is practical when generally applied to thousands of public water systems. It should be reiterated that these regulations contain only minimum requirements, and that more frequent monitoring can be required by EPA or the States in apppropriate cases. Furthermore, there is nothing in these regulations to deter a supplier of water from more frequent turbidity monitoring as an operational guide.

Other comments on turbidity monitoring stated that the proposed requirements were too expensive. However, the cost and effort involved in measuring turbidity are not excessive. This is one parameter which can be, and in fact must be, measured by the individual suppliers of water. Almost anyone can learn to take turbidity measurements, and only a few seconds are required for each measurement. The only cost is in the purchase of a turbidimeter, which lasts for many years.

In order to take into account the fact that turbidity measurements in most cases will not be taken by trained laboratory technicians and that erroneous high readings can be obtained by careless handling of the test, § 141.22(b) has been amended to provide that if the initial daily sample appears to exceed the maximum allowable limit but a repeat sample shows a lower turbidity, the results of the repeat sample shall be used rather than the results of the initial sample.

Because turbidity is closely interrelated with filtration and disinfection, sampling is to be done at "a representative entry point(s) to the water distribution system." This means at a point between the filters and the mains. A clear well would be appropriate, as would be a point between a pump discharge and the mains if there are no filters. In the event that there are several "entry points," such as would be the case when there are several well pumps, a sampling point common to all pump discharges would obviate the necessity to sample at each pump discharge. If there is a question as to whether or not a particular sampling point were "representative" of the water being delivered to the distribution system, the State would make the decision. Alternative analytical procedures, such as continuous turbidity monitors, may be used at the discretion of the State.

V. Microbiological Limits

1. *Coliform Limits and Standard Plate Count.* There were almost 140 comments on § 141.15, Maximum Microbiological Contaminant Levels, of which about half were directed toward § 141.15(b), the standard plant count ("SPC"). Most of the comments on § 141.15(a), coliform limits, were general in nature, covering such points as clarification of the language, use of alternative indicator organisms, raising or lowering the limits, averaging of results, and the assignment of responsibility for performing the tests. Nearly all the comments on the SPC expressed opposition to the imposition of a maximum contaminant level. Opposition was based on the lack of health significance of the SPC and the unfavorable cost-benefit ratio.

cent of laboratory certification, although tained suggestions for modification, such as, at least three months after the supplier learns

V 401248 DEC 24 75 XUM

Section 141.15(a) has been rewritten for clarification. The Administrator believes the coliform group of organisms are the best indicators of bacteriological quality of drinking water, although of course research into possible alternative indicators is ongoing. The Administrator also believes the maximum contaminant levels for coliform organisms are adequate to protect the health of consumers. Other limits for bacteriological quality, such as those in the World Health Organization Drinking Water Standards, may appear to be more stringent and thus more protective of health, but it must be remembered that WHO Standards are merely guidelines, not enforceable regulations. It should also be remembered that the currently proposed regulations contain minimum standards of quality, and that lower levels of contaminants should be attained when feasible. Because of the effect a single sample may have on a monthly average, particularly when only a few samples are examined per month, quarterly averaging will be allowed for those public water systems serving populations of 3300 or less.

Although the Administrator has evidence that the Standard Plate Count does have health significance, and in addition is a valid indicator of bacteriological quality of drinking water, the Administrator has deleted § 141.15(b). Because the coliform limit provides adequate protection against microbiological contamination, the cost of an SPC requirement cannot be justified. However the Administrator recommends that the SPC measurement be applied judiciously wherever indicated, if only as an operational tool, in conjunction with the coliform test.

2. *Chlorine Residual Substitution.* There were over 170 comments on § 141.16, the chlorine residual substitution provision. The comments represented overwhelming opposition to total substitution with concomitant suspension of the coliform test. There were also comments on the analytical procedure, free chlorine residual versus combined residual, and particular opposition to the concept of allowing substitution in the smaller communities. In the latter case, it was stated that a small community would not have a water system operator of sufficient skill or dedication to monitor chlorine residuals accurately or faithfully. There were several questions regarding the different chlorine residuals specified in §§ 141.16(a) and 141.16 (b). Some believed the residual should be raised, while others believed the lower residuals should be permitted.

The chlorine residual substitution provision was inserted so that in those communities where chlorination is practiced, some economic benefits might be realized by the deletion of part of the coliform testing requirements without affecting the health protection provided. In the smallest communities, total substitution of chlorine residual testing would result in a significant economic benefit, since it is in these communities that the maintenance of adequate water quality has the highest per capita cost. The Administrator believed that the maintenance of an adequate chlorine residual in a distribution system throughout a month was at least equivalent, in health safety terms, to isolated coliform tests. In the event that total substitution had been allowed by the State, the slightly higher chlorine residual provided a greater factor of safety.

It is true that a chlorine residual alone does not guarantee the absence of pathogenic bacteria. It is also true that a negative coliform test does not always guarantee the absence of pathogenic bacteria. However, the Administrator concedes that, because of questionable reliance on unskilled operators in the smallest communities, it would not be prudent to permit 100% substitution of chlorine residual testing for coliform tests in those cases. For this reason, proposed § 141.16(b) has been deleted. However, 75% substitution will be permitted where specifically authorized by the entity with primary enforcement authority.

The analytical method specified for chlorine residual testing led to some misunderstanding. The DPD method, as described in "Standard Methods of Examination of Water and Wastewater," appears to be an involved and sophisticated procedure. It was specified primarily on the basis of accuracy and sensitivity, particularly when compared with the o-tolidine procedure in common use. The latter has been shown to be inaccurate and unreliable, but remains popular because of its simplicity and the ready availability of field test kits. What is not known, apparently, is that the DPD test is almost as simple and is also available in reasonably priced field test kits.

Chlorine substitution has been specified, rather than "disinfection substitution," simply because there is no other disinfection procedure of comparable safety and reliability. Iodination has been suggested, but iodine presents a health risk to some persons.

3. *Microbiological Monitoring.* There were over 250 comments on § 141.21, microbiological contaminant monitoring requirements, of which over 70 comments were directed toward § 141.21(g), the standard plate count monitoring requirement. Although both increased and decreased sampling frequencies for coliforms were requested, by far the greater number of comments expressed the opinion that the requirements of this section were unreasonably burdensome, particularly for the smaller communities and non-community public water systems. There were also numerous requests for clarification or modification of the coliform monitoring requirements, such as requests to modify the time for resampling, requests to permit exclusion of sampling points which have been shown to be contaminated, and requests to permit discarding positive bacteriological sampling results for which the check sample results are negative. In regard to § 141.21(g), the standard plate count monitoring requirement, most comments reflected the objections to the parameter itself rather than objections to the frequency of monitoring.

Considerable attention has been given to the sanitary surveys and monitoring frequency for coliforms, particularly in the case of small community systems or non-community systems. The concept of a sanitary survey, expressed in a number of comments, can be considered as a factor in determining the sampling frequency for a particular system. The practicality of sanitary surveys, at annual or even less frequent intervals, versus the collection and analysis of two water samples per month, must be carefully considered on both economic and manpower requirements. It has been estimated that there are 200,00 non-community water systems in this country, but from the information supplied in the comments received it is evident that this number may be too conservative. An adequate sanitary survey of each of these systems in one year would create a severe strain on the skilled manpower necessary.

The consensus of opinion from the States is that, in the event a sanitary survey becomea acceptable for establishing coliform sampling frequency for any segment of public water systems, a priority scheduling of surveys will be established, with populations at risk and known trouble spots being factors to consider. With such priorities, it is evident that the non-community systems, serving small population groups and delivering water on which there is no past record, will be last to receive attention. For this reason, among others, the paragraph on coliform monitoring, § 141.21(a), has been re-written to establish a minimum sampling frequency of one per calendar quarter for non-community systems. A sanitary survey can be used as a basis for modifying the sampling frequency. For the smaller community public water systems, a new population range has been delineated, with an accompanying reduction in coliform sampling frequency. In this range (25–1,000 persons served) one sample per month is the minimum, although the State may, based on a sanitary survey verifying certain conditions, reduce the sampling frequency, except that in no case shall it be reduced to less than one per quarter. In addition, the paragraph has been re-written to clarify the intent and to spell out more precisely the means by which compliance or non-compliance is determined.

An effort has also been made to clarify the samples that should be included and excluded among those used to calculate compliance. In this regard, a paragraph has been added on "special purpose samples", to define those used to check such operations as pipe disinfection procedures.

For non-community systems, in order to ease the laboratory work load, and provide a phased approach, the bacteriological monitoring requirement must be implemented within 2 years after the effective date of the regulations. This provides a 2 year period for the suppliers, State agencies, and laboratories to prepare for the greatly increased number of samples to be analyzed.

In response to the request to permit the elimination from future sampling of those points that have a history of questionable water quality, the wording has been modified to state that any sampling point at which check samples have been required may not be eliminated from future sampling without approval of the State.

Concern has been expressed that in some cases, because of either a sampling or a laboratory error, a microbiological analysis could result in an erroneously large count. The regulations require that this result be included among those samples used in calculating the average monthly coliform bacteria density, even though the subsequent check samples may have been all negative. This high count could cause the supplier to fail the monthly average and thus require that he notify the public.

The Administrator understands this problem, but cannot agree that the one "bad" sample should not be included in calculating the average. The reason is that there is no way to confirm that the bacteriological result of a sample collected in the past was due to sampling or analytical error. It cannot be accomplished, for example, by collecting a check sample, which by the length of the standard test, would have to be collected at least one day after the original sample. The check sample would not necessarily reflect the bacterial situation of the previous day. The only way to confirm bacterial sampling results are to collect and analyze samples in duplicate or triplicate.

Since there is no provision for discarding or adjusting for occasional spurious results from sampling or analytical error, EPA recommends that for positive bacterial analyses standard analytical verification methods be used to verify analytically that coliform bacteria are present.

As stated earlier, the standard plate count requirement has been deleted, although it is recommended that the parameter be employed as conditions warrant.

VI. Laboratory Certification

There were over 100 comments on § 141.27 dealing with laboratory certification. In general, there was agreement with the concept of laboratory certification, although there were a few requests for clarification of the role of the certifying authority. Most of the comments contained objections to the concept of requiring turbidity and chlorine residual tests to be performed by certified laboratories. The remaining comments addressed the cost of certification, the need for time to get labs certified, and the scarcity of qualified laboratories.

It was the intent of the Administrator that EPA would certify at least one laboratory in each State with other laboratories to be certified by the State laboratory or laboratories qualified to perform this function. Because of the transient nature of turbidity and chlorine residual values, it is not possible for a public water system to collect samples and transmit them to a central laboratory for determination of these parameters. It was the intent of the Administrator that the individual operators of public water systems perform their own turbidity and chlorine residual analyses. It would seem advisable, however, that such operators be certified, approved, or at least minimally trained to perform the analytical tasks before a State could accept their analytical determinations as having enough validity for decisions regarding compliance or noncompliance to be made.

VII. Reporting and Public Notification

1. *Reporting.* There were over 200 comments on § 141.31, dealing with reporting requirements, but only three basic criticisms; the reporting requirement should be limited to those situations which are essential to enforcement of the regulations; the section needs clarification; and the institution of reporting requirements makes compliance with the regulations either difficult or impossible. Minor comments included requests for changes in the 36-hour and 40-day reporting requirements, requests for a corrective action requirement rather than a reporting requirement, and requests that Federal agencies report to the States rather than to EPA.

Section 1413 of the Public Health Service Act deals with the role of the States in implementing and enforcing drinking water regulations. Section 1414 of the Act spells out actions to be taken if a State fails to assure enforcement of drinking water regulations. A State could not effectively comply with the provisions of these sections without receiving regular reports from every public water system within its jurisdiction. Monitoring frequencies have been established, and if only violations of maximum contaminant levels were reported the State would not know whether or not monitoring frequencies had been adhered to. Thus all activities of a supplier of water in connection with these regulations are essential to enforcement of the regulations and must be reported to the State.

It is apparent from Section 1447 of the Public Health Service Act and the legislative history of the Safe Drinking Water Act that Federal agencies are to be treated exactly like any other owner or operator of a public water system, except in cases involving national security. Therefore, the Administrator believes that it would be contrary to the intent of the Act to require Federal agencies to report only to EPA and not to States with primary enforcement responsibility. In the revision of § 141.31 of these regulations, no exemption for Federal agencies from the provisions of the regulations will be specified.

2. *Public Notification.* Section 141.32, the public notification provision, received a large number of comments. Of the more than 300 comments, only two approved of this section as written. Two additional comments contained suggestions for modification, such as, for example, to require a second notice to tell the public that the condition previously reported had now been corrected. Every other comment expressed opposition to public notification, either on the basis of disagreement with the concept, on the basis of inappropriateness for some types of water systems, or on the basis of some type of inequity. Most frequently heard comments were: the State should have the authority to notify consumers only if there is an immediate and significant threat to public health; scare tactics will lead to public disregard; notification by radio and TV within 36 hours is an unreasonable requirement; notification of the entire public is unreasonable when only a portion of the public is involved; and notification by means of water bills is unacceptable. One of the more constructive comments was that, while the concept of public notification was opposed, the supplier of water should be given the opportunity to explain the deficiency.

To explain the intent of Congress in requiring public notification, the following is quoted from House Report No. 93–1185:

"The purpose of this notice requirement is to educate the public as to the extent to which public water systems serving them are performing inadequately in light of the objectives and requirements of this bill. Such public education is deemed essential by the Committee in order to develop public awareness of the problems facing public water systems, to encourage a willingness to support greater expenditure at all levels of government to assist in solving these problems, and to advise the public of potential or actual health hazards."

The Administrator agrees that the supplier should be given the opportunity to explain the deficiency. It was not the intent of Congress, that such notices would be merely a flat statement that the water system had failed to meet the requirements of the Regulations. To quote the House Report further:

"the Committee expects that the Administrator's regulations would permit public water systems to give fair explanation of the significance or seriousness for the public health of any violation, failure, exemption or variance. These regulations should also permit fair explanation of steps taken by the system to correct any problem."

The wording has therefore been modified to permit that the supplier may use the notice to explain the significance or seriousness of the violation, to include the results of additional (subsequent) sampling, and to indicate preventative measures that should be taken by the public.

As to the unreasonableness of allowing only 36 hours prior to radio and TV notification, this wording has been modified to read 48 hours and the Administrator believes that this is adequate time to prepare such notification when an MCL is violated.

Time requirements for notification in newspapers has been established. The regulations require that the failure of any MCL shall be published in a daily newspaper or newspapers of general circulation in the area served by the system, on not less than three consecutive days, and that such notification is to be completed within seven days after the supplier learns of the failure. The notice shall be provided to radio and television stations within 48 hours after he learns of the failure.

Public notice for other failures of the regulations, such as failure to comply with testing procedures, failure to comply with monitoring requirements, and failure to comply with a schedule prescribed pursuant to a variance or exemption, is to be made by including a notice with the water bills, within at least three months after the supplier learns of the failure. In the event water bills are not issued, there is a provision for using another form of direct mail.

The provision for mailing notices responds at least in part to the comment that the notice should not be made to the entire public but only to the portion of the public using the water. Otherwise, it is true that a notice given in a newspaper of general distribution, or a radio or television broadcast, will reach more people than those affected by a particular public water system.

There is no way that this can be avoided, but there is nothing in the regulations which would prevent the notice from specifying which person or which area need be concerned about the notice.

The Administrator agrees that the proposed public notice provisions are inappropriate for non-community water systems. Notices in the local media and in water bills will not have the intended effect with these systems serving transients or intermittent users. Therefore, § 141.32 has been revised to include a provision for other types of notification, subject to approval by the State, for non-community water systems. Envisioned here are such types of notification as a poster or sign near the drinking fountain of a facility serving the travelling public, or a handbill distributed to factory workers.

VIII. Economic Considerations

There were over 100 comments on the economic aspects of the regulations. The two most frequent comments were that the estimates in the preamble were much too low, and that the economic impact on the smaller water utilities would be severe. The corrective measure suggested in most cases was that EPA should give grants to the public water systems or should provide funds to the States to pay for monitoring. In general, the comments contained criticisms of the regulations in that they were termed "not cost effective."

It was the intent of Congress that the bulk of the costs associated with the Safe Drinking Water Act would be borne by the individual public water systems and thus the consumers. Of all the comments on the cost of a program to improve the quality of drinking water, it is noteworthy that only one comment stressed the benefits to those consumers.

There is no doubt that money will be spent for increased monitoring. This is particularly true for the smaller water systems, where in the past practically no monitoring has been performed. These very small water systems are the ones which most need improvement, so it can be expected that the costs will be proportionately higher for the small systems when compared with larger systems. On a per capita basis, since so few customers are involved, the costs will be disproportionately higher for the smaller systems. Congress did not intend that the monitoring costs for these systems would be subsidized. Rather, Congress hoped that many small systems would be consolidated into larger systems, so that the costs would be shared by a larger number of consumers, and so that improved drinking water quality would more easily be attained.

A cost and economic analysis of the monitoring requirements are attached as Appendix B.

IX. Other Comments

1. *Siting.* Of the more than 70 comments on § 141.41, siting requirements, most either wanted the section deleted or else clarified in some way. The criticisms were that the requirements for siting were not realistic, that the terms used needed definitions, that State

V 40248 DEC 24 75 XUM

approval be granted before a change in a water system be made, or that State approval is already required in the circumstances. The limitation regarding the "100-year flood" was criticized on the basis that water intakes (for surface water sources) must be in the floodplain. Suggestions included: use the words "geological hazards and man-made disasters;" add the phrase "avoid causing adverse environmental impacts;" and limit the provisions to "ground level or underground storage facilities, vertical wells of a system which has no filtration or any other treatment facilities."

It should be pointed out that the section on siting requirements in these regulations is flexible, in that the phrase "to the extent practicable" allows considerable leeway. These minimum siting requirements were included on the basis of section 1401 (1)(D) of the Public Health Service Act, which states: "The term 'primary drinking water regulation' means a regulation which contains • • • requirements as to (ii) siting for new facilities for public water systems." Obviously, some clarification of even these minimal requirements is called for, so the section has been revised. In accordance with Congressional intent, the revised version makes clear that all final siting decisions are to be made at the State and local government level.

2. *Effective date.* There were only three comments on § 141.51, the effective date of these regulations. All of these comments contained the request that more time be allowed for water systems, particularly those of small communities, to come into compliance.

The effective date of these regulations was established by section 141.12(a)(3) of the Public Health Service Act, which provides that, "The interim primary regulations first promulgated under paragraph (1) shall take effect eighteen months after the date of their promulgation." The Administrator believes that, by scheduling the monitoring requirements in several phases, ample consideration has been given to small systems. Variances and exemptions will be available in appropriate cases.

3. *Radionuclides.* There were approximately 50 comments relating to maximum contaminant levels for radionuclides. However, EPA only proposed MCL's for radionuclides on August 14, 1975, 40 FR 34324. Comments on radionuclides will be taken into account in that rulemaking proceeding.

4. *Water treatment chemicals.* Ten comments addressed chemical requirements in connection with the proposed regulations. The comments stated that certain chemicals, particularly activated carbon and filter grade alum, are in short supply.

It is acknowledged that an increase in the extent of water treatment will cause an increased demand for water treatment chemicals. If a particular treatment technique were to be specified, the demand for any chemical involved in that treatment technique could increase dramatically. Since no treatment in lieu of a monitoring requirement was specified in these regulations, the problem has not surfaced as yet. Before specifying any treatment technique, the Administrator will investigate both the availability of the necessary chemicals and the costs associated with that treatment technique. Naturally, the effect of an increased demand for a particular chemical on the cost of that chemical will also be investigated. Because of the phasing of the provisions of the Safe Drinking Water Act, and because there is currently no shortage of raw materials for the production of water treatment chemicals, it can be expected that ample quantities of these chemicals will be available for conventional water treatment when they are needed.

5. *Treatment techniques.* On the subject of treatment techniques or treatment technology, 30 comments contained criticisms or suggestions. It was noted that no treatment techniques were specified in lieu of MCL's, and almost unanimous support for this approach was expressed. On the other hand, it was suggested that information on treatment technology to remove certain contaminants be supplied.

While no treatment technique requirement was included in these regulations, the Administrator may specify such techniques in revised regulations if warranted. The Administrator believes, however, that it is always preferable to specify monitoring requirements if at all possible, because of the uncertainties involved in a treatment technique. Although a treatment technique may appear to be capable of removing a particular contaminant, based on laboratory or pilot plant studies, in actual water plant operation such removal may not always occur. Without monitoring, the adequacy of the treatment technique cannot be ascertained. As for technology for the operation of a conventional water treatment plant, operation and maintenance regulations are to be published separately. Techniques to be used for the removal of specific contaminants are the subject of ongoing research.

8. *Miscellaneous.* Comments not classified elsewhere addressed a number of miscellaneous topics, including the following: typographical errors, regulations for the quality of intake water, control of pollutants at the source rather than in drinking water, training of water plant operators and the encouragement of young people to enter the water treatment field, control of watersheds as a means for improving the drinking water quality, amending the regulations to eliminate systems serving less than 200 people, setting of priorities according to size and type of system when applying the regulations, regulations for interconnections of supplies, provision of technical support by the Environmental Protection Agency Regional Offices, and the development of a policy on carcinogens as an aid to standard setting.

APPENDIX B—COST AND ECONOMIC ANALYSIS EXECUTIVE SUMMARY[1]

1.0 *Safe Drinking Water Act of 1974.* The objective of the Safe Dranking Water Act (Pub. L. 93-523) is to establish standards which will provide for safe drinking water supplies throughout the United States. To achieve this objective the Congress authorized the Environmental Protection Agency to establish national drinking water regulations. In addition, the Act provides a mechanism for the individual States to assume the primary responsibility for enforcing the regulations, providing general supervisory aid to the public water systems, and inspecting public water supplies.

The purpose of the legislation is to assure that water supply systems serving the public meet minimum national standards for the protection of public health. Prior to passage of the Act, the Environmental Protection Agency was authorized to prescribe Federal drinking water standards applicable only to water supplies used by interstate carriers. Furthermore, these standards could only be enforced with respect to contaminants capable of causing communicable diseases. In contrast, the Safe Drinking Water Act authorized the Environmental Protection Agency to establish regulations to (1) protect public water systems from all harmful contaminants; (2) protect underground sources of drinking water; and (3) promote a joint Federal-State system for assuring compliance with these regulations.

1.1 *National interim primary drinking water regulations.* The EPA published its Proposed National Interim Primary Drinking Water Regulations in the FEDERAL REGISTER, March 14, 1975. The EPA held four public hearings and received several thousand pages of public comments on the proposed regulations. Based upon its review of the comments, the EPA revised the proposed regulations for final publication. The major provisions of the Interim Primary Drinking Water Regulations are:

1. Maximum contaminant levels for certain chemical, biological, and physical contaminants are established;

2. Monitoring frequencies to determine that contaminant levels assure compliance are established; and

3. A methodology to notify consumers of variances, exemptions, and non-compliance with standards is set forth.

1.2 *The Water Supply Industry.*

1.2.1 *Public Water Systems.* The Safe Drinking Water Act of 1974 covers public water systems that regularly serve an average of 25 people or have at a minimum 15 service connections. Systems that serve the travelling public are considered public water systems under the Act. EPA currently estimates there are 240,000 public water systems that will be subject to the regulatory requirements developed under the Act.

The Interim Primary Drinking Water Regulations categorize public systems as community and non-community systems. A community system is defined as a public system which serves at least 15 service connections used by year-round residents or regularly serves at least 25 year-round residents. The non-community system category includes those systems which serve a transient population. At the present time the distribution between the two classes of public systems is estimated as follows:

Community systems	40,000
Non-community systems	200,000
Total	240,000

Based on the data contained in the ongoing EPA public water supply inventory, there are approximately 177 million persons served by community water systems. Table 1-1 shows the distribution of community systems by population served. Most of the community water systems are small in size. Over 90 percent of the nation's supplies are in the under 10,000 persons served category but they provide water to less than 25 percent of the total population served by community systems.

While all public systems do not treat all of the water they supply to their customers, they do employ a variety of treatment processes. The current EPA Inventory of Public Water Supplies indicates that the most prevalent treatment processes are used to control bacteriological contamination and turbidity. The percentage of systems employing the various treatment processes is presented in Table 1-2.

[1] This summary is based on a detailed and comprehensive study prepared for EPA by Energy Resources Company of Cambridge, Massachusetts, titled, "Economic Evaluation of the Interim Primary Drinking Water Regulations" (October 1975).

TABLE 1-1.—*Distribution of community water systems*

System size (persons served)	Number of water systems	Total population served (in thousands)	Percent of total population served
25 to 99	7,008	420	0.2
100 to 9,999	30,150	36,816	20.8
10,000 to 99,999	2,599	61,423	34.6
100,000 and over	243	78,800	44.4
Total	40,000	177,459	100.0

Source: EPA Inventory of Public Water Supplies (July 1975).

TABLE 1-2.—TREATMENT PROCESSES EMPLOYED BY COMMUNITY WATER SYSTEMS

Treatment:	Percent [1]
Aeration	6.6
Prechlorination	7.8
Coagulation	11.3
Sedimentation	8.9
Filtration	12.8
Softening	4.9
Taste and odor control	3.4
Iron removal	5.7
Ammoniation	0.9
Fluoride adjustment	8.5
Disinfection	35.2

[1] Percentages do not total 100 percent since many systems have multiple treatments, or no treatment.

Source: EPA Inventory of Public Water Supplies (July 1975).

Community water systems may be publicly or privately owned. The majority, 58 percent, of the 40,000 community water supplies are publicly owned and these systems supply 88 percent of the total drinking water production.

As indicated earlier, it is estimated that there are approximately 200,000 public non-community water systems. Most of these systems are privately owned. Non-community systems are found at service stations, motels, restaurants, rest areas, camp grounds, State parks, beaches, national parks, national forests, dams, reservoirs, and other locations frequented by the travelling public. Some schools and industries are also included in this category. Data on these systems are very sparse, and only rough cost estimates can be made.

The portion of the water supply industry considered here includes only those systems which primarily supply water for residential, commercial, industrial and municipal use. An approximate allocation of water use by various categories of users is shown in Table 1-3. As might be expected most of the water delivered, 63 percent, is for residential purposes. The second largest use, industrial, consumes 21 percent.

TABLE 1-3.—COMMUNITY WATER SUPPLY USE BY CATEGORY

Type of use:	Percentage of total
Residential	63
Commercial	11
Industrial	21
Municipal	5
Total	100

1.3 *Costs to meet the interim primary drinking water regulations.*

1.3.1 *Monitoring costs.* The implementation of the Interim Primary Drinking Water Regulations will require all public water systems to initiate a monitoring program to determine that the maximum contaminant level requirements of the regulations are not exceeded in finished drinking water. The costs associated with this monitoring activity are a function of system size, water source, and classification (community vs. non-community).

There are two classes of monitoring costs, routine monitoring costs and non-compliance monitoring costs, imposed by the interim regulations. Routine monitoring costs are those incurred in meeting the sampling requirements of the Interim Primary Drinking Water Regulations, to determine compliance with the regulations. Non-compliance monitoring costs are those which are incurred when additional sampling must be made if routine monitoring results indicate that a system is not in compliance with one or more maximum contaminant limit.

The Interim Primary Drinking Water Regulations call for the monitoring of four classes of contamination: inorganic, organic, microbiological, and turbidity. The routine monitoring frequencies for community and non-community systems are shown in Tables 1-4 and 1-5.

TABLE 1-4.—*Monitoring requirements: Community supplies; interim primary drinking water regulations*

Component	System type	Deadline for initial sampling after effective date	Testing frequency
Coliform	Ground and surface	1 mo	Monthly.[1]
Inorganic chemicals	Surface	1 yr	Annually.
	Ground	2 yr	Every 3 yr.
Organic chemicals	Surface	1 yr	(2).
	Ground	As specified by the State	As specified by the State.
Turbidity	Surface	1 d	Daily.

[1] Supplies must collect minimum required samples during each month after effective date. The number of samples varies with the system size from 1 to 500 samples per month.
The State may reduce the sampling frequency based on a sanitary survey of a system that serves less than 1,000 persons from a groundwater source, except that in no case shall it be reduced to less than one per quarter.
[2] The analyses shall be repeated at intervals specified by the State but in no event less frequentlythan at 3-yr intervals.

V 4 0 2 4 8 DEC 24 75 XUM

TABLE 1-5.—*Monitoring requirements: Noncommunity supplies; interim primary drinking water regulations*

Component	System type	Deadline for initial sampling after effective date	Testing frequency
Coliform	Surface and ground	2 yr	Quarterly.[1]
Inorganic chemicals—nitrates only.	Surface and ground	do	Determined by the State.
Turbidity	Surface	do	Daily.

[1] May be modified by the State based on sanitary survey.

In developing routine monitoring costs, the number of systems requiring routine monitoring is fixed by the number of ground and surface water supply systems in each discrete size range and the monitoring frequency prescribed by the regulations. Therefore, the only variable in the cost equation is the price per analysis. This price will depend on the institutional arrangements made by each system for analytical services. At the present time some water supplies perform their own analyses, while others depend on State health agencies or private commercial laboratories. The unit analytical costs developed for the monitoring costs estimates are as follows:

Analysis:	Cost range
Coliform	$5–10
Complete inorganic	70–170
Complete organic	150–260

The lower costs are based on costs incurred in EPA laboratories while the higher costs are based on commercial laboratory estimates.

In developing non-compliance monitoring costs, the critical variable is the number of additional samples required when a system exceeds a maximum contaminant level (MCL). The interim regulations require a minimum of two check samples when the coliform MCL is exceeded and at least three repeat samples when an inorganic or organic MCL is exceeded. In each instance the supplier must continue the sampling procedure until two consecutive samples show that the MCL is not exceeded. For coliform violations it is expected that from 2 to 5 special analyses may be needed. For organic and inorganic violations it is expected that from 3 to 6 special analyses may be necessary.

The estimated costs for routine and special monitoring for public water systems are summarized in Table 1–6. In the first year of implementation the annual costs are expected to fall in a range of $14 million to $30 million. By the end of the third year when the non-community systems begin to monitor, the annual monitoring costs will rise to a range of $17 million to $36 million. These monitoring cost estimates do not reflect the costs of existing monitoring programs. Current routine monitoring is estimated at approximately $10 million to $17 million annually.

TABLE 1–6.—*Total monitoring costs mandated by the interim primary drinking water regulations*

[In millions of dollars]

	1st year	2d year	3d year
Cost of routine monitoring for the 40,000 community systems[1]	13.30–27.3	12.70–26.3	12.3–25.5
Monitoring due to violations of MCL for 40,000 community systems:			
(i) Coliform violation monitoring	.50– 2.0		
(ii) Inorganic violation monitoring	.01– .3	.01– 0.3	
Routine monitoring costs for 200,000 public systems[2]			4.5– 9.4
Monitoring due to violations of MCL for 200,000 public systems[3]			.3– .8
Total	14.00–30.0	13.00–27.0	17.0–36.0

[1] Annual costs beginning the 1st year after implementation of the regulations.
[2] Annual costs beginning the 3d year after implementation of the regulations.
[3] Total monitoring costs due to violations spread over a 5-yr period.

NOTE.—Totals may not add due to rounding.

1.3.2 Treatment costs. Once the monitoring program is initiated, some systems will find that they exceed one or more maximum contaminant levels (MCL). These systems will then be faced with an additional cost in order to meet the required MCL. There are several alternative routes which a system can pursue in order to comply with the Regulations. Some of the alternatives include:

1. Installing treatment facilities capable of reducing the MCL to an acceptable level;
2. Developing a new source of supply of better quality;
3. Purchasing better quality water from another water utility; or
4. Merging the system with one or more adjoining systems which have a higher quality supply.

If none of the above are feasible, a system can apply for a variance or exemption to the MCL under the provisions of the Interim Primary Regulations. Therefore, the costs incurred by a water supply in reducing the concentration of a contaminant to an acceptable level are site specific and will depend on such factors as, treatment facilities available, age of system, proximity of other suppliers, source of water, and many other inter-related problems.

However, in projecting national costs for treatment the option of installing treatment facilities was assumed to be the method systems would select to provide safe drinking water.

The following basic assumptions are implicit in developing costs for the treatment options:

1. Surface water systems not presently clarifying will install some form of filtration;
2. Approximately 30 percent of the community water systems not presently disinfecting will install chlorination units;
3. Advanced treatment is necessary to remove inorganics;

4. Estimates of the number of MCL violations were based on 1969 Community Water Supply Study, except for mercury. Mercury violations were based on recent EPA studies.

The national treatment costs for public water systems are summarized in Table 1–7. The majority of costs, if all systems elect to treat for contaminant violations, will be incurred in order to meet the turbidity and inorganic requirements of the interim regulations. Ranges were developed for capital costs only. This range is based on making two assumptions for daily flow. If a system were required to install treatment, it would have to consider sizing their new components to reflect average daily flow conditions or maximum daily flow conditions in cases where system storage is not adequate. Whatever sizing option a system selected it is unlikely that significant additional operation and maintenance expenses would result.

TABLE 1–7.—*National costs of treating contaminants in drinking water*

[In millions of dollars]

Treatment technology	Contaminant	Capital costs	Annual operation and maintenance
Community systems:			
Clarification	Turbidity	379– 653	180
Chlorination	Coliform	17– 27	7
Ion Exchange	Ba, Cr, Cd, NO_3, Hg, Se	619– 997	53
Activated alumina	As, fluoride	31– 53	11
pH Control	Pb	3– 4	.1
Subtotal		1049–1764	250
Non-community systems:			
Clarification	Turbidity	10	1
Chlorination	Coliform	14	3
Subtotal		24	4
Total		1073–1788	263

NOTE.—Totals may not add due to rounding.

1.4 Economic impact of the interim primary drinking water regulations

The expenditures required to comply with the Interim Primary Regulations will have an impact on all water users served by public water supplies covered by the Safe Drinking Water Act. All persons served by these systems will feel the impact of monitoring costs to some extent. However, the most noticeable impact of the regulations will be on users of public water systems that do not meet the MCL requirements of the regulations.

An estimate of the total annual costs of capital, operation and maintenance, and monitoring necessary to comply with the Regulations is shown in Table 1–8.

TABLE 1–8.—ESTIMATED TOTAL ANNUAL COSTS OF IMPLEMENTING THE INTERIM PRIMARY DRINKING WATER REGULATIONS FOR PUBLIC WATER SUPPLY SYSTEMS IN MILLIONS OF DOLLARS[1]

Annual capital[2]	146–247
Annual operation and maintenance	263
Annual monitoring (routine only)	17–35
Total annual	426–545

[1] 1975 dollars.
[2] Assumes capital costs amortized over 15 years at 7-percent interest.

1.4.1 Water supply economics. The price consumers pay for water is determined, in general, by costs the utility incurs to operate and maintain the system. However, some publicly-owned water systems may have their costs and revenues conglomerated with the cost of other municipal services, and the water bill paid by the consumer may not completely reflect the status of the water system alone.

Water system rate structures vary from system to system, and may also differ for various user classes within the same system. There are four basic types of rate structures which are used around the country. Some systems use a "normal block" structure which results in lower unit costs to customers that use high volumes of water. In the "inverted block" structure, higher units costs are imposed upon customers who use higher volumes of water. Under a "flat" rate structure, there is one single charge per unit for all customers regardless of use. Generally, the flat rate structure applies to residential customers only. Finally, in the "non-incremental" rate structure, the unit cost of water is based on the number of water consumption units owned by the user.

Prices charged for water are usually regulated by a State or local commission appointed to evaluate the need for rate hikes. In most States, investor-owned utilities are under the jurisdiction of State regulatory commissions. Publicly-owned utilities are either regulated by local boards or are unregulated. Any lengthy lag time between rate increase requests and rate increase approvals may pose problems in the implementation of the interim regulations.

Most water utilities, both public and private, finance large capital investments by retaining profits or acquiring debt. Publicly-owned systems may have access to municipal funds or can sell either general obligation or revenue bonds to be repaid from general revenues or water revenues. Private, investor-owned systems may issue stocks and bonds, and unlike publicly-owned systems, their credit ratings are dependent on the profitability of their own operations. Since interest rates are generally proportional to risk, water utilities in more secure financial positions can borrow money at lower interest rates. At the present time the interest rates on municipal bonds is 4–6 percent while the rate for debt issues of private-owned utilities is 6–8 percent.

In the water industry there does not seem to be a correlation between present debt levels and long-term financial soundness. Although a majority of water systems today have debt ratios ranging upward from 40 percent, almost one-fourth of the water systems are presently debt-free. Approximately 85 percent of these debt free systems serve communities of less than 5,000 people. However, many of these small systems do not have a positive net income, while larger water systems with high debt to book value ratios do have positive net income.

Records indicate that per capita consumption of water tends to decrease following significant increases in water rates. Among individual users the decrease would occur where there is a high elasticity of demand; e.g., lawn sprinkling. Industrial and commercial users have shown no elasticity to price increases. If demand declines sharply after initial rate hikes and total revenues do not increase enough to cover increased cost, a second rate increase may be necessary.

1.4.2 Per capita costs. Monitoring costs vary with the size of the water system involved. The number of samples for routine bacteriological monitoring is a function of the number of persons served. For community supplies the number of samples can range from a minimum of 1 sample per quarter for systems serving 1000 people or less to a maximum of 500 samples per month for systems serving more than 4,690,000 people. For non-community supplies only one sample per quarter is required.

In general, the annual impact of routine chemical monitoring will vary depending on the frequency of sampling rather than the number of samples. The frequency of sampling will depend on the system type: ground water vs. surface water; community system vs. non-community. The annual monitoring costs on a per capita basis are shown in Table 1–9. The per capita costs for the smallest community system (25 persons served) are high in comparison to other system sizes. However, there are very few systems in this category and the States may desire to enter into institutional arrangements to lessen their annual monitoring burden.

TABLE 1–9.—*Annual monitoring costs per person served versus system size and type for community water system*

System size	System type	
	Surface	Ground
25	$7.20–$15.05	$3.35–$7.05
100	1.80– 3.75	.85– 1.75
500	.35– .75	.15– .35
1,000	.20– .40	.10– .20
2,500	.15– .30	.06– .10
5,000	.10– .25	.05– .15
10,000	.10– .20	.05– .15
100,000	.05– .15	.05– .15
1,000,000	(1)– .05	(1)– .05
10,000,000	(1)	(1)

[1] Less than $0.05.

However, treatment costs may be responsible for much higher per capita cost increases than monitoring costs. As indicated earlier, public water systems not meeting the MCL requirements of the interim regulations will incur the major cost burden. The impact of the treatment costs will also vary with the size of the water system involved. Table 1–10 summarizes the treatment costs as they affect systems of different sizes.

It should be pointed out that the per capita costs displayed in Table 1–10 are weighted averages. Treatment costs have been weighted by the projected frequency of the various treatment techniques within each size subcategory. By its nature, the weighted average does not give a true representation of the costs to a particular consumer. In all categories, there are five treatments possible with a wide variation in costs. In Table 1–11, the range of annual per capita monitoring and treatment costs are presented. From this table it can be seen that the annual per capita treatment costs for disinfection are expected to range from $3.85 to $2.10 in the Smallest system category, from $2.75 to $0.90 in the Small system category and so on.

V 4 0 2 4 8 DEC 24 75 XUM

	Smallest systems (25 to 99 people served)	Small systems (100 to 9,999 people served)	Medium systems (10,000 to 99,999 people served)	Large systems (over 100,000 people served)
Annual capital costs (in millions)	$3.80–$6.40	$60.20–$101.40	$52.30–$88.10	$80.50–$51.20
Annual operation and maintenance costs (in millions)	2.10	48.60	74.10	134.10
Annual monitoring costs (in millions)	.30–.60	.60–1.30	1.20–2.50	1.80–2.90
Total annual costs (in millions)	6.20–9.10	109.40–151.30	127.60–164.70	165.90–188.20
Weighted average cost per capita per year	37.00–54.00	11.00–15.00	9.00–12.00	10.00–11.00
Increase in household monthly water bill [1]	9.60–14.05	2.85–3.95	2.35–3.05	2.55–2.90

[1] Assumes 3.11 persons per household and that all increases in costs are passed on to the consumer.

TABLE 1–11.—*Annual per capita treatment and monitoring cost ranges for 4 size categories*

	Smallest systems (25 to 99 people served)	Small systems (100 to 9,999 people served)	Medium systems (10,000 to 99,999 people served)	Largest systems (over 100,000 people served)
Treatment: [1]				
Disinfection	$3.85–$2.10	$2.75–$0.30	$0.45–$0.15	<$0.25
Turbidity control	152.00–52.00	78.00–16.00	20.00–12.50	15.00
Heavy metal removal	237.00–101.00	142.00–25.50	35.00–12.00	18.00
Lead control	2.60–1.20	1.80–.30	.40–.20	.20
Fluoride/arsenic removal	11.80–7.85	11.30–3.15	5.60–3.15	3.55
Monitoring	15.80–.85	2.75–.05	.20–.05	.15

[1] Lower cost limit based on assumption that treatment plant built to treat average daily demand and upper cost limit based on maximum daily demand, except for the smallest systems category where costs are based on average daily demand only.

1.4.3 *Impact analysis.* As Table 1–10 and Table 1–11 demonstrate, the potentially most severe impact could occur for users of the smallest or small systems. Assuming that treatment and monitoring costs are directly passed on to the consumer, the monthly water bill for a household in the smallest systems, may increase on the average between $10 and $14.

However, as noted earlier, these systems may choose not to install treatment facilities in order to comply with the regulations. Several options are available to them:

1. Developing a new, less contaminated source;
2. Joining a regional system;
3. Purchasing treated water; or
4. Blending water from existing source with water of higher quality.

The exemption and variance provisions of the Act provide for temporary immunity from the regualtions on the basis of economic hardship or technical difficulties. Federal loan programs may also ease the impact on users of small systems. The Farmers Home Administration sponsors a loan and grant program to aid the financing of water and sewer system construction in small communities. The loans are offered at low interest rates and with long repayment schedules. The Safe Drinking Water Act also authorizes a loan guarantee program for small systems. These programs will reduce community costs, but they will not completely mitigate the possibility of high cost impacts on households in small systems.

It is not certain how systems will finance the costs associated with these regulations—either through higher taxes or higher water rates—but it is certain that the Interim Drinking Water Regulations will have the gratest impact on those served by smaller water systems. Further study is underway to determine if financing will be a serious problem for large or small systems.

At the present time EPA believes that the economic impact of the construction requirements will be spread over at least a four-year period from the promulgation of the regulations because the regulations will not result in immediate compliance. The effective date of the regulations will be 18 months after promulgation. Non-compliance may not be discovered until initial sampling has been completed. For community water supplies the deadlines for initial sampling range from 1 day for turbidity to 2 years for inorganic samples of ground water systems after the effective date. Therefore, in some cases, more than 3 years from promulgation could elapse before inorganic violations would be detected and corrective actions initiated. In addition the use of the exemption or variance provisions of the regulations could further prolong compliance for public water systems unable to comply for economic or technical reasons.

It is estimated that the investor-owned water systems will pay approximately one-fourth of the total treatment costs, while the publicly-owned companies would pay the remainder. However, since many of the investor-owned systems serve very small populations, the capital demands on these systems could be great.

In 1974, the water supply industry spent approximately $1.5 billion for capital improvements. The average yearly total annual capital costs mandated by the Interim Primary Regulations are estimated to be about 13 to 24 percent of this figure. It is anticipated that the industry as a whole would be able to raise the additional necessary capital. Small systems could encounter difficulty in financing new treatment facilities, particularly when clarification, a relatively expensive treatment process, is required. The implementation of these Regulations may force many communities to allocate funds, which may be needed to provide other services to the community, for the treatment of their drinking water.

Data on non-community systems is sparse. However, it is not anticipated that these regulations will have a serious economic impact on them.

The macroeconomic effects of the Interim Primary Drinking Water Regulations are expected to be minimal. On the average, the regulations will cause an increase in water rates of 9.5 percent spread over several years. If this increase occurred in one year, the resulting increase in the Consumer Price Index (CPI) would be less than 0.001 percent. Since the costs of these regulations will be incurred over several years, the average annual increase in the CPI will be even less. The Chase Econometric model was used to examine the impact of all existing pollution abatement regulations.[1] The analysis showed that there will be an average annual increase in the CPI for 1974 to 1980 of less than 0.1 percent due to these pollution abatement regulations.

1.5 *Constraints to implementation of the interim primary drinking water regulations.* The implementation of the National Interim Primary Drinking Water Regulations within a reasonable time frame would greatly depend on the availability of key chemicals and supplies needed in the treatment of drinking water; availability of manpower to operate treatment facilities; adequate laboratory capability to conduct sample analyses; and sufficient supply of engineering and construction services to build or improve treatment facilities.

In particular, the Interim Regulations will increase demand for coagulants and disinfecting agents as the needed treatment facilities are completed. An increased demand could cause some temporary dislocations in chemical markets, but in the long-run, increased demand will result in an expansion of supplies. It is projected that the 1980 demand for ferric chloride may reach 115 to 120 percent of the present production, while alum demand will be approximately 115 percent of current production. There is a general consensus of opinion that organic polyelectrolytes will become the dominant flocculating agents in the future. However, there are no reliable estimates of which polyelectrolyte(s) will be dominant and when the shift in chemical usage will occur.

At the present time there are approximately 180,000 people employed in the water supply industry. With the implementation of the Interim Primary Drinking Water Regulations between 13,000 and 27,000 additional personnel would be needed nationwide. These personnel would be required to perform such tasks as monitoring and enforcing the Regulations, operating the required treatment facilities, performing laboratory analysis of water samples, program assistance and program administration. It is anticipated that water systems may have difficulty hiring qualified personnel.

The third potential constraint is in the availability of adequate laboratories to perform the required chemical and biological analyses. Coliform monitoring is now being performed at State, local and private laboratories. In meeting the coliform monitoring requirements, water suppliers should not have difficulty finding laboratory facilities. At the present time there is little routine monitoring being done for heavy metals and organic compounds of concern in the Regulations. However, there are adequate numbers of public and private laboratories capable of performing these analyses although State certification of laboratories, required by the regulations, could constrain available laboratory facilities.

The final area where constraints could occur is in the design and construction of the required treatment facilities. Although the annual cost of required new construction represents less than 0.4 percent of the present total annual new construction in the United States, design and construction of new water treatment plants is highly specialized. Some communities, especially those in rural areas, may have difficulty obtaining these services due to their expense or unavailability.

[1] Chase Econometric Associates, Inc. "The Macroeconomic Impacts of Federal Pollution Control Programs," prepared for the Council of Environmental Quality and the Environmental Protection Agency, January 1975.

1.6 *Limits of the analysis.* In developing the cost estimates used in this study, it was necessary to use several simplifying assumptions. This section explores these assumptions and what their overall impact might be.

The first assumption is that there are 40,000 community water supply systems in the nation and that they are represented accurately by the current EPA inventory of community water supply systems. There is some evidence that when the inventory is completed there will be a total of 50,000 community systems rather than the estimated 40,000. This increase in systems would cause an increase in monitoring costs of about 12 percent and a similar increase in treatment costs.

All costs for public non-community systems were based on the assumption that there are 200,000 of these systems nationwide. At the present time there is no accurate inventory of these systems, thus, this number is solely an estimate. It is anticipated that the EPA will be performing an inventory of these systems in the next few years so that these estimates can be updated.

A major consideration not used in developing treatment costs is that many systems may use alternative water management practices rather than install more costly treatment processes when they exceed an MCL requirement. For example, ground water systems might blend water from a "clean" well with that from a "dirty" well so that the resultant water will not exceed the MCL. Similarly, no estimate is possible to determine the possible benefits which might result from cascading treatment processes. An example of this is that clarification units might remove enough heavy metals so that the MCL might not be exceeded. These treatment alternatives would vary from site to site so that it is impossible to quantify the benefits which would be derived.

1.7 *Energy use.* It is estimated that approximately 21,200 billion BTU's per year will be required to operate plants and produce chemicals for the various treatment systems necessary for the 40,000 community systems to meet the regulations. This is about 0.028 percent of the 1973 national energy consumption, based on the 1974 Statistical Abstract. The increase in energy use will depend on a number of factors, including whether pollution in surface sources of waters is successfully controlled. There will be no direct energy savings from the recommended action.

[FR Doc.75-33836 Filed 12-23-75;8:45 am]

PART 141—NATIONAL INTERIM PRIMARY DRINKING WATER REGULATIONS

Subpart E—Special Monitoring Regulations for Organic Chemicals

Pursuant to Sections 1445(a) and 1450(a)(1) of the Public Health Service Act, as amended by the Safe Drinking Water Act, Pub. L. 93–523, the Administrator of the Environmental Protection Agency hereby issues a new 40 CFR 141, Subpart E, to become effective immediately. This subpart establishes sampling, monitoring, testing and other requirements applicable to designated public water systems for the purpose of providing data for the establishment of maximum contaminant levels of organic contaminants in drinking water.

Concurrently with this publication, EPA is promulgating National Interim Primary Drinking Water Regulations under the authority of the Safe Drinking Water Act ("SDWA"). Those regulations contain maximum contaminant levels, monitoring frequencies and analytical procedures for microbiological contaminants, turbidity, and selected inorganic and organic chemicals. The Interim Primary Drinking Water Regulations are to become effective 18 months after promulgation.

EPA is embarking on an intensive research program to find answers to the following questions:

1. What are the effects of commonly occurring organic compounds on human health?

2. What analytical procedures should be used to monitor finished drinking water to assure that any Primary Drinking Water Regulations dealing with organics are met?

3. Because some of these organic compounds are formed during water treatment, what changes in treatment practices are required to minimize the formation of these compounds in treated water?

4. What treatment technology must be applied to reduce contaminant levels to concentrations that may be specified in the Primary Drinking Water Regulations?

This research will involve health-effects and epidemiological studies, investigations of analytical methodology, and pilot plant and field studies of organic removal unit processes. Some phases of the research are to be completed by the end of this year, while much of the remainder are to be completed within the next calendar year.

Subpart E is intended to provide a rapid means of obtaining data in support of the possible establishment of additional maximum contaminant levels for organic chemical contaminants of drinking water, either as individual compounds or groups of compounds. These regulations will form the basis of a wide-ranging monitoring and analytical study to be performed by EPA in conjunction with the States and designated participating public water systems. These regulations will also generate information on the occurrence of potentially hazardous organic chemicals in a cross-section of public water systems covering a substantial portion of the population of the United States and representing various types of drinking water sources and treatment processes. They will provide information which is currently lacking on the actual distribution of a number of organic chemicals and will make it possible for EPA to attempt to correlate the presence of these chemicals with the results of several general and chemical group analytical procedures. This information will aid in the development of future primary drinking water regulations.

The recently completed National Organics Reconnaissance Survey (NORS) reported detection of six volatile organic compounds in a sampling of 80 cities. Extensive additional gas chromatographic/mass spectrometric analyses were performed on 10 of these 80 water systems. However, these were one-time samples and therefore do not indicate seasonal effects on drinking water quality nor any other temporary factors such as intermittent discharge or the long term effects of treatment applications in controlling finished water quality. The special study covered by these regulations was derived, in part, from the preliminary results obtained in the NORS Survey and is intended to respond to many of the questions which it raised so that the appropriate regulatory actions may be determined. Many of the systems from the previous survey will be resampled several times during this period to provide an indication of longer-term and seasonal variations in the quality of drinking water.

This study will include analyses for approximately 20 specific organic compounds deemed to be candidates for particular concern, and analyses of 6 surrogate group chemical parameters which are indicators of the total amount of organic contamination. Several of these surrogate procedures show promise as indicators of specific families of compounds such as chlorinated (halogenated) organics or aromatic compounds. They also show promise as practical methods which could be developed and widely applied for surveillance and quality control of drinking water in many water systems, particularly those public water systems which are not large enough to be financially capable of providing highly sophisticated computerized gas chromatographic/mass spectrometric analyses.

In order to assure a rapid and efficient method of providing data of uniform and assured quality, EPA will assume the principal responsibility for analysis and evaluation of the water samples taken by the designated public water systems. The water systems involved may be required to provide background information and follow-up investigation as necessary.

EPA feels that this monitoring study, in conjunction with its other substantial research efforts, will provide the basis for a coherent and rational approach to the control of organic chemical contamination of public water systems.

Good cause exists for promulgation of these regulations without first asking for comment on them, in view of the widespread public concern, the need to move as quickly as possible to carry out the Congressional mandate to deal with organic chemicals, and in view of the fact that the burden imposed on designated public water systems is limited.

ORGANIC CHEMICALS TO BE SURVEYED

The basic monitoring study will be completed within one year and will involve multiple samplings from each designated system. Water samples and concentrates will be collected on site and shipped to EPA laboratories for analysis.

The study will consist of analyses for a number of organic compounds and 6 surrogates in approximately 100 public water systems in the United States. Many of the compounds to be selected for inclusion in this study will be halogenated and aromatic organic compounds. Virtually no chlorinated organic

V 40 248 DEC 24 75 XUM

compounds are known to occur naturally in fresh water. Many are considered to be liver toxins and/or potential carcinogens in some concentration. It would be expected that any chlorinated organic compounds found in drinking water would have been generated either from industrial manufacturing operations, agricultural operations, or during chlorination of water for the purpose of disinfection. Many aromatic compounds are also considered to be chronic toxicants and some have been shown to be carcinogens in test systems such as animal feeding. Aromatic compounds might also reach drinking water systems from industrial sources, urban surface runoff, or from atmospheric fallout of materials generated during combustion processes. Other possible candidates include aromatic amines and nitrosamines.

The compounds to be studied are being selected on the basis of available toxicity data, information on possible occurrence in public water systems with significant frequency, and the availability of practical analytical methods for identification and quantification. They may include: benzene; carbon tetrachloride; p-dichlorobenzene; vinyl chloride; 1, 2, 4-trichlorobenzene; bis-(2-chloroethyl) ether; 1, 1, 2-trichloroethylene; 2, 4-dichlorophenol; fluoranthene; 11, 12-benzofluoranthene; 3, 4-benzofluoranthene; 1, 12-benzoperylene; 3, 4-benzopyrene; indeno (1, 2, 3-cd) pyrene; chloroform; bromodichloromethane; bromoform; 1, 2-dichloroethane; polychlorinated biphenyls; and pentachlorophenol. Additional studies will be performed on aromatic amines (e.g. benzidine) and nitrosamines.

In addition to the analyses of specific compounds, a number of analyses of general organic indicators will be performed in order to determine possible relationships between the presence of the specific chemicals and certain general surrogate analytic procedures which should be more applicable for routine monitoring in public water systems. The following general indicators will be used:

(1) Total Organic Carbon analysis offers promise as a general organic measurement parameter for drinking water and is already widely accepted in the area of waste treatment organics monitoring. The procedure indicates the total amount of organically bound carbon present in the sample and is not selective among types of compounds. The technique essentially consists of oxidation of the organic chemicals in a water sample to carbon dioxide which is either quantified directly or converted to methane which is then quantified. Sample collection is simple, analysis is rapid (10 minutes) and may be automated, cost per sample is low, and interference from inorganic carbon can be avoided. Reliable and accurate instrumentation is now becoming available for application of this procedure to drinking water.

(2) The Ultraviolet and Fluorescence Spectroscopic methods, which primarily indicate the presence of aromatic compounds. The advantages of these methods are sampling simplicity, the small sample size required, and the speed and low cost per sample.

(3) Color analyses, which are relatively simple and rapid methods which may indicate the presence of certain organic compound types, particularly humic substances. Some recent data indicate that a relatively quantitative relationship may exist between color intensity and the quantity of humic substances which represent the largest portion of dissolved organic chemicals in some waters.

(4) Total Organic Chlorine analyses, which offer promise for rapid, accurate indication of the presence of all chlorine-containing organic compounds. This procedure involves oxidation of the haloorganics in a water sample followed by microcoulometric quantification. The analysis is rapid after sample concentration. The present apparatus has not generally been applied to drinking water, but EPA is conducting a concurrent program to develop the application so that this potentially important method may be utilized in this monitoring study.

(5) The Carbon-Chloroform Extract procedure (CCE), which consists of passage of 60 liters of water through a carbon column at a constant rate for 48 hours. The carbon adsorbant is then extracted with refluxing chloroform followed by removal of most of the chloroform and evaporation of the residue to constant weight. The entire analytical process requires about 6 days for completion and the concentrates represent something less than 10% of the total organics content of the sampled water. Therefore, CCE is not amenable to on-line process control monitoring. However, in this study, this CCE data and historical CCE data will be interrelated with specific compound analyses and the other surrogate analyses, to designate the optimum monitoring methodologies for field use which are most indicative of the presence of those organic compounds which potentially pose risks to human health.

Other methods of sample collection and concentration which are being evaluated for this and concurrent studies include the use of macroreticular resins which have shown promise for application to drinking water analytical technology.

Within two weeks from the publication of this subpart, in consultation with the States, EPA will designate approximately 100 public water systems for inclusion in the special monitoring program for organic chemicals. The systems will be selected to represent each major type of water supply (rivers, impoundments and ground water), quality of water, treatment, region and population size. Most of the systems should serve large metropolitan areas, but some may be small enough to be representative of the water types and problems associated with smaller systems. The number of systems to be selected will be sufficient to permit an evaluation of the relationship of specific contaminant concentrations to several general organic parameters.

EPA in consultation with the State will work closely with each system to assure that proper sampling techniques are used. In addition, when preliminary results indicate that a potentially harmful organic chemical is present in significant amounts in a particular water system, EPA and the State will consult with the system and provide technical advice and assistance where appropriate. In some cases, it may be possible to identify a particular point source which is causing serious contamination of a public water system, or to determine that additional treatment should be installed by a system without waiting for the nationwide survey results.

For the reasons given above, Chapter 40 of the Code of Federal Regulations is hereby amended by adding Subpart E to Part 141, as follows. The new regulations take effect December 24, 1975.

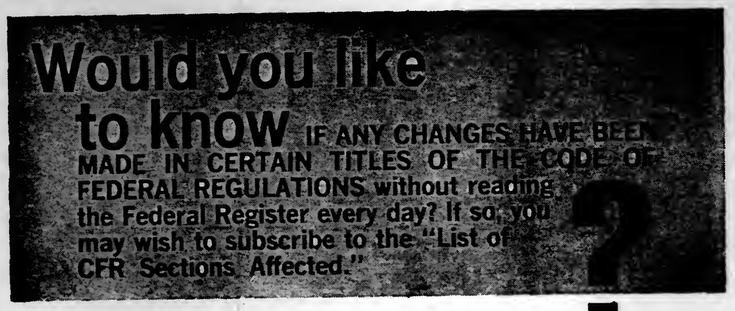
Dated: December 10, 1975.

RUSSELL E. TRAIN,
Administrator.

§ 141.40 Special monitoring for organic chemicals.

(a) The Administrator may designate, by publication in the FEDERAL REGISTER, public water systems which are required to take water samples, provide information, and in appropriate cases analyze water samples for the purpose of providing information on contamination of drinking water sources and of treated water by organic chemicals.

(b) The Administrator shall provide to each public system designated pursuant to paragraph (a) of this section a written schedule for the sampling of source water or treated water by the system, with written instructions for the sampling methods and for handling of samples. The schedule may designate the locations or types of locations to be sampled.



(c) In cases where the public water system has a laboratory capable of analyzing samples for constituents specified by the Administrator, the Administrator may require analyses to be made by the public water system for submission to EPA. If the Administrator requires the analyses to be made by the public water system, he shall provide the system with written instructions as to the analytical procedures to be followed, or with references to technical documents describing the analytical procedures.

(d) Public water systems designated by the Administrator pursuant to paragraph (a) of this section shall provide to the Administrator, upon request, information to be used in the evaluation of analytical results, including records of previous monitoring and analyses, information on possible sources of contamination and treatment techniques used by the system.

(Secs. 1445 and 1450 of the Public Health Service Act, 88 Stat. 1660 (42 U.S.C. 300j–4 and 300j–9))

list of cfr parts affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month.

A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 19]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

This regulation fixes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period Dec. 28, 1975–Jan. 3, 1976. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 910. The quantity of lemons so fixed was arrived at after consideration of the total available supply of lemons, the quantity of lemons currently available for market, the fresh market demand for lemons, lemon prices, and the relationship of season average returns to the parity price for lemons.

§ 910.319 Lemon Regulation 19.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the ensuing week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation with respect to the quantity of lemons it deems advisable to be handled during the ensuing week. Such recommendation resulted from consideration of the factors enumerated in the order. The committee further reports the demand for lemons continues easy this week.

Average f.o.b. price was $5.41 per carton the week ended December 20, 1975, compared to $6.31 per carton the previous week. Track and rolling supplies at 180 cars were down 50 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure and postpone the effective date of this regulation until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on December 22, 1975.

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period December 28, 1975, through January 3, 1976, is hereby fixed at 150,000 cartons.

(2) As used in this section, "handled", and "carton(s)" have the same meaning as when used in the said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 22, 1975.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-34960 Filed 12-23-75;11:20 am]

[Amdt. 1]

PART 971—LETTUCE GROWN IN LOWER RIO GRANDE VALLEY IN SOUTH TEXAS

Handling Regulation

This amendment relieves the Sunday packaging prohibition on December 21 and 28, 1975. Recent rainy weather has reduced harvest and packing. This amendment is necessary so that the industry can have sufficient operating time to satisfy existing and prospective orders for lettuce.

Findings. (a) Pursuant to Marketing Agreement No. 144 and Order No. 971 (7 CFR Part 971) regulating the handling of lettuce grown in the Lower Rio Grande Valley in South Texas it is hereby found that the amendment to the handling regulation, hereinafter set forth, will tend to effectuate the declared policy of the act. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.). The amendment is based upon recommendations and information submitted by the South Texas Lettuce Committee, established pursuant to said marketing agreement and order and upon other available information.

(b) It is hereby found that it is impractical and contrary to the public interest to give preliminary notice, or to engage in public rule making procedure, and that good cause exists for not postponing the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) this amendment must become effective immediately if producers are to derive any benefits therefrom, (2) compliance with this amendment will not require any special preparation on the part of handlers, (3) information regarding the proposed amendment has been made available to producers and handlers in the production area, and (4) this amendment relieves restrictions on the handling of lettuce grown in the production area.

Regulation, as amended. In § 971.316 (40 FR 53225) the introductory paragraph is hereby amended by adding the following thereto:

§ 971.316 Handling regulation.

* * *, except that the prohibition against the packing of lettuce on Sundays shall not apply on December 21 and 28, 1975.

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674)).

V 40 P 59589 DEC 29 75 XUM

Effective date. Dated December 19, 1975 to become effective December 21, 1975.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

[FmHA Instruction 444.4]

PART 1822—RURAL HOUSING LOANS AND GRANTS

Farm Labor Housing Loan Policies, Procedures and Authorizations

Section 1822.63(a) of Subpart C of Part 1822, Chapter XVIII, Title 7, Code of Federal Regulations (31 FR 14148; 39 FR 36110) is amended. The references to "fish farms" and "oyster farms" are changed to aquaculture operations to conform to the revision of Part 1832 of this Chapter.

This amendment is being published without notice of proposed rulemaking inasmuch as it is a technical change made to conform the section to published regulations now in effect and, therefore, the public participation requirements prescribed by 5 U.S.C. 553 are unnecessary.

Section 1822.63(a) is revised to read as follows:

§ 1822.63 Definitions.

As used in this subpart—

(a) "Domestic farm labor" means persons who receive a substantial portion of their income as laborers on farms in the United States and either (1) are citizens of the United States, or (2) reside in the United States after being legally admitted for permanent residence, and may include the families of such persons. Laborers on farms may include laborers engaged in handling agricultural commodities while they are in the unprocessed stage, provided title to the commodity is held by the producer and the place of employment, such as a packing shed, is on or near the farm where the commodity is produced. Domestic farm laborers also include persons working in aquaculture operations as defined in § 1832.3(d) of this Chapter.

• • • • • •

(42 U.S.C. 1480; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70)

Dated: December 16, 1975.

FRANK B. ELLIOTT,
Administrator,
Farmers Home Administration.

[FmHA Instruction 444.6]

PART 1822—RURAL HOUSING LOANS AND GRANTS

Farm Labor Housing Grant Policies, Procedures and Authorizations

Section 1822.203(a) of Subpart E of Part 1822 Chapter XVIII, Title 7, Code of Federal Regulations (35 FR 14437; FR 36111) is amended. The references to "fish farms" and "oyster farms" are changed to Aquaculture Operations to conform to the revision of Part 1832 of this Chapter. This amendment is being published without notice of proposed rulemaking inasmuch as it is a technical change made to conform the section to published regulations now in effect and, therefore, the public participation requirements prescribed by 5 U.S.C. 553 are unnecessary. As amended, § 1822.203 (a) reads as follows:

§ 1822.203 Definitions.

As used in this subpart—

(a) "Domestic farm labor" means persons who receive a substantial portion of their income as laborers on farms in the United States and either (1) are citizens of the United States, or (2) reside in the United States after being legally admitted for permanent residence, and may include the families of such persons. Laborers on farms may include laborers engaged in handling agricultural commodities while they are in the unprocessed stage, provided title to the commodity is held by the producer and the place of employment, such as a packing shed, is on or near the farm where the commodity is produced.

Domestic farm laborers also includes persons working in aquaculture operations as defined in § 1832.3(d) of this Chapter.

Title 12—Banks and Banking

[75-1167]

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

LIMITATIONS ON RATE OF RETURN

Amendments Regarding Waiver of Early Withdrawal Penalty

DECEMBER 19, 1975.

The Federal Home Loan Bank Board considers it desirable to amend Part 526 of the Regulations for the Federal Home Loan Bank System, Part 545 of the Rules and Regulations for the Federal Savings and Loan System, and Part 563 of the Rules and Regulations for Insurance of Accounts (12 CFR Parts 526, 545, and 563), in order to broaden the conditions under which a penalty for premature withdrawal from a certificate account may be waived.

The present regulations authorize such waiver only as to single-ownership accounts and single-ownership testamentary accounts upon the death of the owner thereof and as to accounts which qualify under section 408(a) of the Internal Revenue Code of 1954 as Individual Retirement Accounts (IRA accounts) upon the Account beneficiary's death, disability, or retirement at not less than 59½ years of age.

Upon consideration, the Board had determined that such waiver authority should be extended to include any case of death of a beneficial owner of any account. The Board also deems it advisable to amend its waiver-of-penalty provisions relating to IRA accounts to clarify that it is death, disability, or attainment of not less than 59½ years of age by the IRA participant which triggers the waiver authority and that actual retirement in addition to attainment of the specified age is not necessary for waiver to be authorized under the regulations. It is the Board's understanding and intention that the amendments hereby adopted will bring its regulations on waiver of early withdrawal penalty into substantial accord with regulations of the Federal Reserve and the Federal Deposit Insurance Corporation in this matter.

Accordingly, the Board hereby amends Part 526, Part 545, and Part 563, respectively, by revising § 526.7(b), § 545.1-4 (f)(4), § 545.3-1(c)(6), § 563.3-1(d)(4), and § 563.3-2(d)(3) thereof to read as set forth below, effective December 29, 1975.

Since these amendments relieve restriction, the Board hereby finds that notice and public procedure with respect to said amendments are unnecessary under the provisions of 12 CFR 508.11 and 5 U.S.C. 553(b), and a 30-day delay of effective date is similarly unnecessary under the provisions of 12 CFR 508.14 and 5 U.S.C. 553(d).

PART 526—LIMITATIONS ON RATE OF RETURN

1. In § 526.7, paragraph (b) is revised to read as follows:

§ 526.7 Penalty for early withdrawal.

• • • • • •

(b) Such member institution need not penalize a withdrawal of all or any portion of a certificate account prior to expiration of its term if (1) such withdrawal is made subsequent to the death of any owner of such account; for purposes hereof an "owner" is an individual who at death had full legal and beneficial title to all or a portion of such account, or beneficial title to all or a portion of such account and full power of disposition and alienation with respect thereto, including but not limited to power of revocation with respect to any trust, regardless of whether such owner was a trustee, of which such account comprises all or part of the trust assets; or (ii) such account qualifies as an Individual Retirement Account under section 408(a) of the Internal Revenue Code of 1954, and withdrawal is made to effect distribution of the funds in the Account following the participant's death or disability, or upon attaining not less than 59½ years of age.

PART 545—OPERATIONS

2. In § 545.1-4, paragraph (f)(4) is revised to read as follows:

§ 545.1-4 Other savings deposits.

• • • • • •

(f) • • •

• • • • • •

(4) A Federal association need not penalize a withdrawal of all or any portion of a fixed term savings deposit prior to expiration of its term if (1) such withdrawal is made subsequent to the death of any owner of such deposit; for purposes hereof an "owner" is an individual who at death had full legal and beneficial title to all or a portion of such deposit, or beneficial title to all or a portion of such deposit and full power of disposition and alienation with respect thereto, including but not limited to power of revocation with respect to any trust, regardless of whether such owner was a trustee, of which such deposit comprises all or part of the trust assets; or (ii) such deposit qualifies as an Individual Retirement Account under section 408 (a) of the Internal Revenue Code of 1954, and withdrawal is made to effect distribution of the funds in the Account following the participant's death or disability, or upon attaining not less than 59½ years of age.

3. In § 545.3-1, paragraph (c)(6) is revised to read as follows:

§ 545.3-1 Distribution of earnings at variable rates.

• • • • • •

(c) • • •

• • • • • •

(6) A Federal association need not penalize a withdrawal of all or any portion of a certificate account issued pursuant to paragraph (b)(3) of this section prior to completion of its time eligibility period if (i) such withdrawal is made subsequent to the death of any owner of such account; for purposes hereof an "owner" is an individual who at death had full legal and beneficial title to all or a portion of such account, or beneficial title to all or a portion of such account and full power of disposition and alienation with respect thereto, including but not limited to power of revocation with respect to any trust, regardless of whether such owner was a trustee, of which such account comprises all or part of the trust assets; or (ii) such account qualifies as an Individual Retirement Account under section 408(a) of the Internal Revenue Code of 1954, and withdrawal is made to effect distribution of the funds in the Account following the participant's death or disability, or upon attaining not less than 59½ years of age.

PART 563—OPERATIONS

4. In § 563.3-1, paragraph (d)(4) is revised to read as follows:

§ 563.3-1 Fixed-rate, fixed-term accounts.

• • • • • •

(d) • • •

• • • • • •

(4) An insured institution need not penalize a withdrawal of all or any portion of a fixed-rate, fixed-term account prior to expiration of its term if (i) such withdrawal is made subsequent to the death of any owner of such account; for purposes hereof an "owner" is an individual who at death had full legal and beneficial title to all or a portion of such account, or beneficial title to all or a portion of such account and full power of disposition and alienation with respect thereto, including but not limited to power of revocation with respect to any trust, regardless of whether such owner was a trustee, of which such account comprises all or part of the trust assets; or (ii) such account qualifies as an Individual Retirement Account under section 408(a) of the Internal Revenue Code of 1954, and withdrawal is made to effect distribution of the funds in the Account following the participant's death or disability, or upon attaining not less than 59½ years of age.

5. In § 563.3-2, paragraph (d)(3) is revised to read as follows:

§ 563.3-2 Certificates evidencing other accounts.

• • • • • •

(d) • • •

• • • • • •

(3) An insured institution need not penalize a withdrawal of all or any portion of a certificate account prior to completion of its time eligibility period if (i) such withdrawal is made subsequent to the death of any owner of such account; for purposes hereof an "owner" is an individual who at death had full legal and beneficial title to all or a portion of such account, or beneficial title to all or a portion of such account and full power of disposition and alienation with respect thereto, including but not limited to power of revocation with respect to any trust, regardless of whether such owner was a trustee, of which such account comprises all or part of the trust assets; or (ii) such account qualifies as an Individual Retirement Account under section 408(a) of the Internal Revenue Code of 1954, and withdrawal is made to effect distribution of the funds in the Account following the participant's death or disability, or upon attaining not less than 59½ years of age.

(Sec. 4, 80 Stat. 823, 12 U.S.C. 1425b; Sec. 5, 48 Stat. 132, as amended, 12 U.S.C. 1464; Secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended, 12 U.S.C. 1725, 1726, 1730; Reorg. Plan No. 3 of 1947, 12 FR 4981; 3 CFR, 1943-48 Comp., p. 1071, 1947 Supp.)

By the Federal Home Loan Bank Board.

[SEAL] RONALD A. SNIDER,
Assistant Secretary.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Amdt. 5]

PART 113—NONDISCRIMINATION IN FINANCIAL ASSISTANCE PROGRAMS OF SBA—EFFECTUATION OF PUBLIC LAW 93-495

Miscellaneous Amendment

On November 6, 1975, there was published in the FEDERAL REGISTER a notice that the Small Business Administration proposed to change its procedures involving nondiscrimination in Financial Assistance Programs by amending 13 CFR Part 113. Interested parties were given 30 days to submit comments, suggestions, or objections regarding the proposed amendment. No response was received; therefore, it has been determined to amend this part as published.

Accordingly, Part 113 of Chapter I of Title 13 CFR is hereby amended by:

§ 113.1 [Amended]

1. Amending § 113.1(a) by inserting on line 16 after the word "sex" the words "marital status."

2. Aiding § 113.3(d)

§ 113.3 Discrimination prohibited.

• • • • • •

(d) With regard to all recipients offering credit, such as Small Business Investment Companies and Community Development Companies, discriminate against debtors on the basis of race, color, religion, sex, marital status or national origin.

§ 113.3-1 [Amended]

3. Amending § 113.3-1(a) by inserting on lines 3, 10, and 13 after the word "sex" the words "marital status."

§ 113.5 [Amended]

4. Amending § 113.5(d)(2) by inserting on line 8 after the word "sex" the words "marital status."

Effective date: December 29, 1975.

Dated: December 19, 1975.

LOUIS LAUN,
Acting Administrator.

Subpart—Offering unfair, improper and deceptive inducements to purchase or deal: § 13.1935 Earnings and Opportunities in product or service; § 13.2063 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

In the Matter of National Talent Associates, Inc., a New Jersey corporation, National Talent Associates, Inc., an Illinois corporation, National Talent Associates, Inc., a California corporation, Sanford Storm and Jerome P. Ashfield, individually and as officers of said corporations, William Schuller Agency, Inc., and Monica Stuart, individually and as an officer of said corporation.

Consent order requiring a New York City talent and modeling agency and three closely held corporations in New Jersey, Illinois and California, among other things to cease misrepresenting their ability to place customers into modeling and entertainment positions; using unethical and exploitive high pressure sales tactics and failing to disclose relevant facts. Further, respondents are required to give consumers a three-day cooling-off period within which they may cancel their contracts and receive full refund of all monies paid.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows: [1]

ORDER

I

It is ordered, That National Talent Associates, Inc., New Jersey, Illinois, and California corporations, their successors and assigns, and Sanford Storm and Jerome P. Ashfield, individually and as officers of said corporations, and said respondents' officers, agents, representatives and employees directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale and distribution of products or services in connection with the placement and employment of persons as models, actors, actresses or entertainers in the commercial advertising, talent, modeling or entertainment industries, in or affecting commerce as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing, directly or indirectly, orally or in writing, that:

1. Respondents have received information that a person may possess the necessary personal or physical characteristics or other qualifications suitable for success in the commercial advertising, talent, modeling or entertainment industries.

2. Referrals from past purchasers of their products or services are a significant source from which the names of potential purchasers have been obtained.

3. Respondents have obtained the names of potential purchasers from a source which cannot be divulged.

4. Respondents, when requested, will provide persons with the source from which the information referred to in their solicitation letters, solicitation phone calls, or in any other means of solicitation was obtained and the nature of such information, unless respondents provide such information when requested.

5. National Talent Associates, Inc. has the expertise essential for the judging and selection of the most qualified persons to be used as models, actors, actresses or entertainers in the commercial advertising, talent, modeling or entertainment industries.

6. National Talent Associates' salesmen, agents or representatives have the expertise essential to select and judge the suitability of persons as models, actors, actresses or entertainers in the commercial advertising, talent, modeling or entertainment industries.

7. Persons who prior to an in-person interview have been solicited by National Talent Associates, Inc. have been selected on the basis that they may have the necessary personal or physical characteristics or other qualifiactions suitable for success in the commercial advertising, talent, modeling or entertainment industries.

8. The majority of National Talent Associates' income is derived from its personal management contracts and its ability to place persons under contract with the leading advertising, modeling, talent or entertainment agencies.

9. Persons are selected and offered contracts by National Talent Associates, Inc. only on the basis that they may possess the personal or physical characteristics or other qualifications suitable for success in the commercial advertising, talent, modeling or entertainment industries.

10. A person's chances for selection by Monica Stuart, the William Schuller Agency, Inc. or by any person or agency, will be aided, increased or enhanced, by entering into a contract with National Talent Associates, Inc.

11. Access to Monica Stuart or to the William Schuller Agency, Inc. is available only to persons who contract with National Talent Associates, Inc.

12. Monica Stuart or the William Schuller Agency, Inc. review photographs of only those persons who have contracted with National Talent Associates, Inc.

13. National Talent Associates, Inc., a New Jersey corporation, arranges for professional photographs to be taken of each person placed under its contract by an independent photographic studio.

14. Persons who contract with National Talent Associates, Inc., will receive annually one black and white, 8 x 10 inch, photograph of children in the family not under contract, for a five year period, or for any period in excess of the period in which said photograph is received without any obligation to purchase additional protographs at an added cost.

15. Natural color photographs of persons who contract with National Talent Associates, Inc. are submitted annually, for a five year period, or for any period in excess of the period in which said photographs are submitted to Monica Stuart or to the William Schuller Agency, Inc, for her or their consideration and review, without disclosing that, unless the person comes back for rephotographing annually for a five year period, such person's photographs will not be resubmitted to Monica Stuart or to the William Schuller Agency, Inc.

16. National Talent Associates, Inc. photographs other persons in a family in addition to the person whose name appears on its contract, solely for the purpose of submitting said photographs to Monica Stuart of the William Schuller Agency, Inc. for her evaluation of their potential for the commercial advertising, modeling, talent or entertainment industries.

17. The remuneration received by Monica Stuart of the William Schuller Agency, Inc., in connection with her consideration and review of photographs submitted to her by National Talent Associates, Inc., is derived solely from a percentage of the earnings of persons selected by her and placed under contract by the William Schuller Agency, Inc.

18. Persons placed under contract by National Talent Associates, Inc. can reasonably anticipate significant or substantial earnings from paid employment in the commercial advertising, talent, modeling or entertainment industries as models, actors, actresses or entertainers.

19. Persons who contract with National Talent Associates, Inc. may reasonably anticipate earning sums of money sufficient to provide for a college education or for any other such formal education.

20. A persons' chances for selection as a model, actor, actress or entertainer by the commercial advertising, modeling, talent or entertainment industries is, in any way, enhanced solely because he or she is Black, Oriental, has red hair, freckles or because of his or her size, age or any other specific racial or personal characteristics.

[1] Copies of the Complaint, Decision and Order, filed with the original document.

It is further ordered, That respondents shall disclose the following information, in writing, in a clear and conspicuous manner to each person who is a prospective purchaser of any of their products or services, prior to entering into any agreement for the furnishing of such products or services, including the photographing of, or assistance to, any such persons in seeking or obtaining employment opportunities as models, actors, actresses or entertainers in the commercial advertising, talent, modeling or entertainment industries.

a. The number of persons who contracted with respondents for the purchase of photographs or services to be used in connection with the selection, placement or employment of persons in the commercial advertising, talent, modeling or entertainment industries, as models, actors, actresses or entertainers, within the two calendar years immediately preceding the year in which the prospective purchaser was contacted, the number and percentage of such persons who obtained paid employment through the auspices of respondents, as well as the number of paid jobs and agency contracts obtained by such persons.

b. The total number of persons placed under contract by respondents in each of the following categories of gross annual earnings, derived from paid employment in the commercial advertising, talent, modeling or entertainment industries, as models, actors, actresses or entertainers, during the two calendar years immediately preceding the year in which the prospective purchaser was contacted by respondents:

Under $100, $100–$250, $250–$500, $500–$1,000, $1,000–$2,000, $2,000–$4,000, $4,000–$6,000, $6,000–$8,000, $8,000–$10,000, $10,000 and above.

c. Whether any financial agreement, arrangement or connection, exists between respondents and any photographic studio to which they may refer prospective purchasers of their photographs or services.

d. Whether any financial agreement, arrangement or connection, exists between respondents and any person, firm or agency to whom photographs, or any other information, concerning the prospective purchaser of their products or services may be sent by respondents.

e. The source or sources from which the names, addresses, or any other information about prospective purchasers, or about any other members of their immediate family, was obtained by respondents.

At the time when the foregoing disclosures are made, respondents shall furnish the prospective purchaser of any of their products or services with a retainable duplicate copy of the disclosure document, and secure from such prospective purchaser a signed acknowledgment of the receipt thereof on the properly dated original copy. The document containing the disclosures shall be headed *"Important Information,"* and shall not contain information or representations other than those set forth above.

It is further ordered, That respondents maintain, for a five year period following the execution thereof, the originals of the signed acknowledgments of receipt of the disclosures described in the preceding paragraphs and make them available for examination and copying, if necessary, by a duly authorized representative of the Federal Trade Commission, upon reasonable notice, during normal business hours.

It is further ordered, That, if any representations are made by the respondents, their salesmen, representatives or agents, either expressly or impliedly, orally or in writing, pertaining to any standards, qualifications or characteristics which a person must meet or possess before respondents will agree to place such a person under contract, photograph them or otherwise assist or render services to said person, respondents shall maintain complete and detailed records as to such persons who have failed to meet or possess such standards, qualifications or characteristics, including their names, addresses, date of rejection, and the reason or reasons for their rejection by respondents. Such records shall be made available for examination and copying if necessary, by a duly authorized representative of the Federal Trade Commission, upon reasonable notice, during normal business hours.

It is further ordered, That the respondents named in Part I of this order shall submit to respondents Monica Stuart and the William Schuller Agency, Inc., for their inspection and evaluation, copies of all written promotional or sales materials, including but not limited to sales solicitation letters, contract forms, brochures, flyers, and sales presentation scripts. Said respondents will submit said materials to Monica Stuart and the William Schuller Agency, Inc., on a continuing basis whenever there is a change, revision or modification of any of the materials.

It is further ordered, That respondents shall cease and desist from:

a. Failing to furnish the buyer with a fully completed receipt or copy of any contract pertaining to such sale at the time of its execution, which is in the same language, e. g., Spanish, as that principally used in the oral sales presentation and which shows the date of the transaction and contains the name and address of the seller, and in immediate proximity to the space reserved in the contract for the signature of the buyer or on the front page of the receipt if a contract is not used and in bold face type of a minimum size of 10 points, a statement in substantially the following form: "YOU, THE BUYER, MAY CANCEL THIS TRANSACTION AT ANY TIME PRIOR TO MIDNIGHT OF THE THIRD BUSINESS DAY AFTER THE DATE OF THIS TRANSACTION. SEE THE ATTACHED NOTICE OF CANCELLATION FORM FOR AN EXPLANATION OF THIS RIGHT."

b. Failing to furnish each buyer, at the time he signs the door-to-door sales contract or otherwise agrees to buy consumer goods or services from the seller, a completed form in duplicate, captioned "NOTICE OF CANCELLATION", which shall be attached to the contract or receipt and easily detachable, and which shall contain in ten point bold face type the following information and statements in the same language, e.g., Spanish, as that used in the contract:

NOTICE OF CANCELLATION

(enter date of transaction)

(Date)

YOU MAY CANCEL THIS TRANSACTION, WITHOUT ANY PENALTY OR OBLIGATION, WITHIN THREE BUSINESS DAYS FROM THE ABOVE DATE. IF YOU CANCEL, ANY PROPERTY TRADED IN, ANY PAYMENTS MADE BY YOU UNDER THE CONTRACT OR SALE, AND ANY NEGOTIABLE INSTRUMENT EXECUTED BY YOU WILL BE RETURNED WITHIN 10 BUSINESS DAYS FOLLOWING RECEIPT BY THE SELLER OF YOUR CANCELLATION NOTICE AND ANY SECURITY INTEREST ARISING OUT OF THE TRANSACTION WILL BE CANCELLED. IF YOU CANCEL, YOU MUST MAKE AVAILABLE TO THE SELLER AT YOUR RESIDENCE, IN SUBSTANTIALLY AS GOOD CONDITION AS WHEN RECEIVED, ANY GOODS DELIVERED TO YOU UNDER THIS CONTRACT OR SALE; OR YOU MAY IF YOU WISH, COMPLY WITH THE INSTRUCTIONS OF THE SELLER REGARDING THE RETURN SHIPMENT OF THE GOODS AT THE SELLER'S EXPENSE AND RISK.

IF YOU DO MAKE THE GOODS AVAILABLE TO THE SELLER AND THE SELLER DOES NOT PICK THEM UP WITHIN 20 DAYS OF THE DATE OF YOUR NOTICE OF CANCELLATION, YOU MAY RETAIN OR DISPOSE OF THE GOODS WITHOUT ANY FURTHER OBLIGATION. IF YOU FAIL TO MAKE THE GOODS AVAILABLE TO THE SELLER, OR IF YOU AGREE TO RETURN THE GOODS TO THE SELLER AND FAIL TO DO SO, THEN YOU REMAIN LIABLE FOR PERFORMANCE OF ALL OBLIGATIONS UNDER THE CONTRACT. (Amended November 1, 1973). TO CANCEL THIS TRANSACTION, MAIL OR DELIVER A SIGNED AND DATED COPY OF THIS CANCELLATION NOTICE OR ANY OTHER WRITTEN NOTICE, OR SEND A TELEGRAM, TO (Name of seller), AT (address of seller's place of business) NOT LATER THAN MIDNIGHT OF _____

(Date)

I HEREBY CANCEL THIS TRANSACTION.

_____

(Date)

_____

(Buyer's Signature)

c. Failing, before furnishing copies of the "Notice of Cancellation" to the buyer, to complete both copies by entering the name of the seller, the address of the seller's place of business, the date of the transaction, and the date, not earlier than the third business day following the date of the transaction, by which the buyer may give notice of cancellation.

d. Including in any door-to-door contract or receipt any confession of judgment or any waiver of any of the rights to which the buyer is entitled under this rule including specifically his right to cancel the sale in accordance with the provisions of this rule.

e. Failing to inform each buyer orally, at the time he signs the contract or purchases the goods or services, of his right to cancel.

f. Misrepresenting in any manner the buyer's right to cancel.

g. Failing or refusing to honor any valid notice of cancellation by a buyer

V40N249 DEC 29 75 XUM

and within 10 business days after the receipt of such notice, to (i) refund all payments made under the contract or sale; (ii) return any goods or property traded in, in substantially as good condition as when received by the seller; (iii) cancel and return any negotiable instrument executed by the buyer in connection with the contract or sale and take any action necessary or appropriate to terminate promptly any security interest created in the transaction.

h. Negotiating, transferring, selling or assigning any note or other evidence of indebtedness to a finance company or other third party prior to midnight of the fifth business day following the day the contract was signed or the goods or services were purchased.

i. Failing, within 10 business days of receipt of the buyer's notice of cancellation, to notify him whether the seller intends to repossess or to abandon any shipped or delivered goods.

Provided, however, That nothing contained in this order shall relieve respondents of any additional obligations respecting contracts required by federal law or the law of the state in which the contract is made. When such obligations are inconsistent, respondents can apply to the Commission for relief from this provision with respect to contracts executed in the state in which such different obligations are required. The Commission, upon a showing of inconsistency, shall make such modifications as may be warranted in the premises.

II

It is ordered, That William Schuller Agency, Inc., a corporation, its successors and assigns, and Monica Stuart, individually and as an officer of said corporation, and respondents' officers, agents, representatives and employees directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale and distribution of products or services in connection with the placement and employment of persons as models, actors, actresses or entertainers in the commercial advertising, talent, modeling or entertainment industries, in or affecting commerce as "commerce is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing to consumers, directly or indirectly, orally or in writing, that:

1. A person's chances for selection by Monica Stuart, the William Schuller Agency, Inc. or by any person or agency, will be aided, increased or enhanced by entering into a contract with National Talent Associates, Inc.

2. Access to Monica Stuart or to the William Schuller Agency, Inc. is available only to persons who contract with National Talent Associates, Inc.

3. Monica Stuart or the William Schuller Agency, Inc., review photographs of only those persons who have contracted with National Talent Associates, Inc.

4. National Talent Associates, Inc. photographs other persons in a family in addition to the person whose name appears on its contract, solely for the purpose of submitting said photographs to Monica Stuart of the William Schuller Agency, Inc. for her evaluation of their potential for the commercial advertising, modeling, talent or entertainment industries.

5. The remuneration received by Monica Stuart of the William Schuller Agency, Inc., in connection with her consideration and review of photographs submitted to her by National Talent Associates, Inc., is derived solely from a percentage of the earnings of persons selected by her and placed under contract by the William Schuller Agency, Inc.

6. Natural color photographs of persons who contract with National Talent Associates, Inc. are submitted annually, for a five year period, or for any period in excess of the period in which said photographs are submitted to Monica Stuart or to the William Schuller Agency, Inc. for her or their consideration and review without disclosing that, unless the person comes back for rephotographing annually for a five year period, such person's photographs will not be resubmitted to Monica Stuart, or to the William Schuller Agency, Inc.

It is further ordered, That respondents Monica Stuart and William Schuller Agency, Inc. shall maintain complete and detailed records as to the number of persons whose photographs were submitted to them by any of the respondents set forth under Part I of the Order herein, and the number of such persons who have failed to meet or possess the standards, qualifications or characteristics which a person must meet or possess before respondents herein will agree to place such a person under contract, or otherwise assist or render services to said person, including their names, place of residence, and month and year of rejection. Such records shall be made available for examination and copying if necessary by a duly authorized representative of the Federal Trade Commission, upon reasonable notice, during normal business hours.

It is further ordered, That respondents Monica Stuart and William Schuller Agency, Inc, shall inspect and evaluate the written promotional and sales material submitted to them by respondents named in Part I of this order. Within 30 days of their receipt of said materials, respondents Monica Stuart and William Schuller Agency, Inc. shall notify said other respondents, in writing as to any comments, complaints they might have, or any corrections they might require, concerning any representations relating to them contained in the materials submitted. Monica Stuart and William Schuller Agency, Inc. shall simultaneously submit to the New York Regional Office a copy of such notification to the respondents named in Part I of this order.

It is further ordered, That respondents Monica Stuart and William Schuller Agency, Inc. shall notify the Federal Trade Commission, in writing, of any consumer complaints received by them concerning any of the respondents named in Part I of this order. Such notification shall be made to the New York Regional Office within 30 days after receipt of the consumer complaint. This provision shall apply only to those complaints about representations by or practices of the respondents named in Part I which relate to respondents Monica Stuart and William Schuller Agency, Inc.

III

For the purposes of the following provisions of this order, unless otherwise specified, the term "respondents" shall include each of the respondents named heretofore in this order.

It is further ordered, That respondents William Schuller Agency, Inc. and Monica Stuart shall forthwith deliver a copy of this order or a memorandum incorporating its provisions to all present and future employees engaged in the sale of said respondents' products or services and shall secure from each such person a signed statement acknowledging receipt of a copy of this order or the memorandum.

It is further ordered, That corporate respondents National Talent Associates, Inc. and individual respondents Sanford Storm and Jerome P. Ashfield shall forthwith deliver a copy of this order or a memorandum incorporating its provisions to all present and future salesmen or other employees engaged in the sale of said respondents' products or services and shall secure from each such salesman or employee a signed statement acknowledging receipt of a copy of this order or the memorandum.

It is further ordered, That respondent corporations shall forthwith distribute a copy of this order to each of their operating divisions.

It is further ordered, That each individual respondent shall promptly notify the Commission of any discontinuance of his or her present business or employment and of his or her affiliation with any new business or employment. Such notice shall include such respondent's current business address and a statement as to the nature of the business or employment in which he or she is engaged as well as a description of his or her duties and responsibilities.

It is further ordered, That corporate respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondents such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other changes in the corporations which may affect compliance obligations arising out of this order.

It is further ordered, That the respondents shall within sixty days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this order.

The decision and order was issued by the Commission Nov. 26, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

Title 31—Money and Finance: Treasury

CHAPTER II—FISCAL SERVICE, DEPARTMENT OF THE TREASURY

PART 214—DEPOSITARIES FOR FEDERAL TAXES

Miscellaneous Technical Amendments

The Department of the Treasury finds it necessary to amend its regulations at 31 CFR Part 214—Depositaries for Federal Taxes (also appearing as Treasury Department Circular 1079), to reflect technical changes in the format and design of the Federal tax deposit form referred to in § 214.6 (a)(2), (a)(4) and (b)(2). This change in design eliminates the portion of the deposit form now referred to as the "stub portion".

The Department also finds in accordance with 5 U.S.C. 553(b) that notice and public procedure are unnecessary because the amendments reflect rules of agency procedure or practice.

Therefore, 31 CFR Part 214 is hereby amended effective January 1, 1976, in the following three ways:

1. Section 214.6(a)(2) is amended by deleting the clause "• • • which may be accomplished by completing and returning to the taxpayer the stub portion of the Federal tax deposit form • • •"

2. Section 214.6(a)(4) is amended by deleting the phrase "• • • with stubs detached • • •"

3. Section 214.6(b)(2) is amended by deleting the clause "• • • which may be accomplished by completing and returning to the taxpayer the stub portion of the Federal tax deposit form • • •"

As amended the pertinent subsections read as follows:

§ 214.6 Handling of deposits of Federal taxes.

(a) *Deposits with depositaries.* • • •

(2) When requested to do so by a taxpayer who makes a deposit of Federal taxes in cash over the counter, issue a counter receipt.

• • • • •

(4) Forward each day to the Federal Reserve Bank of its district the Federal tax deposit forms for all tax deposits received that day, together with payment in funds • • •

• • • • •

(b) *Deposits with Federal Reserve Banks.* • • •

(2) When requested to do so by a taxpayer who makes a deposit of Federal taxes in cash over the counter, issue a counter receipt.

• • • • •

(12 U.S.C. 265; 31 U.S.C. 771; 26 U.S.C. 6302 (c)).

Dated: December 18, 1975.

DAVID MOSSO,
Fiscal Assistant Secretary.

Title 41—Public Contracts and Property Management

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

[FPMR Amdt. E-176]

PART 101-27—INVENTORY MANAGEMENT

Shelf-Life Materials

This regulation provides new shelf-life codes and other changes involving the management of shelf-life items.

The table of contents for Part 101–27 is amended to delete §§ 101–27.204–1, 101–27.204–2, 101–27.205–1, 101–27.205–2, and 101–27.205–3, and to include the following new and revised entries:

101–27.204	Types of shelf-life items.
101–27.205	Shelf-life codes.
101–27.206	Procurement of shelf-life materials.
101–27.206–1	General considerations.
101–27.206–2	Identification and shipping requirements.
101–27.206–3	Packaging.
101–27.207	Control and inspection.
101–27.207–1	Agency controls.
101–27.207–2	Inspection.
101–27.207–3	Marking material to show extended shelf life.

Subpart 101–27.2—Management of Shelf-Life Materials

1. Section 101–27.204 is revised to read as follows:

§ 101–27.204 Types of shelf-life items.

Shelf-life items are classified as nonextendable (type I) and extendable (type II). Type I items have a definite storage life after which the item or material is considered to be no longer usable for its primary function and should be discarded. Type II items are those for which successive reinspection dates can be established when the items have a continued usability as determined by examination based upon criteria that have been agreed upon. Examples of type I items are drugs and medicines with certain characteristics. Examples of type II items are paint and ink.

§§ 101–27.204–1, 101–27.204–2 [Removed]

2. Sections 101–27.204–1 and 101–27.204–2 are deleted.

3. Section 101–27.205 is revised to read as follows:

§ 101–27.205 Shelf-life codes.

Shelf-life items shall be identified by use of a one-digit code to provide for uniform coding of shelf-life materials by all agencies.

(a) The code designators for shelf-life periods of up to 60 months are as follows:

Shelf-life period (months)	Type I item code	Type II item code
1	A	
2	B	
3	C	I
4	D	
5	E	
6	F	J
9	G	S
12	H	4
15	J	
18	K	5
21	L	
24	M	6
27	N	
30	P	7
36	Q	8
48	R	9
60	S	

(b) Code designator 0 is used to identify items not included in a shelf-life program.

(c) Code designator X shall be used to identify critical end-use items, military essential items, and medical items with a shelf life greater than 60 months. Agencies shall establish controls for such materials to prevent issuance of any unserviceable items.

(d) Agencies may also establish controls for materials with a shelf life greater than 60 months that are not identified in paragraph (c) of this section. Such controls should be established only when they are necessary for effective management of the items.

§§ 101–27.205–1, 101–27.205–2, 101–27.205–3 [Removed]

4. Sections 101–27.205–1, 101–27.205–2, and 101–27.205–3 are deleted.

5. Sections 101–27.206, 101–27.206–1, 101–27.206–2, and 101–27.206–3 are revised to read as follows:

§ 101–27.206 Procurement of shelf-life materials.

§ 101–27.206–1 General considerations.

In determining requirements for shelf-life items, the following elements should be taken into consideration:

(a) Assigned storage time periods; and

(b) Appropriate contracting techniques for the particular item involved, including specification requirements, industry practices, and storage and delivery procedures.

§ 101–27.206–2 Identification and shipping requirements.

Manufacturers shall, whenever practicable, be required to mark the unit or container with the month and year of manufacture or production and the batch number on all shelf-life items (60 months or less) procured from other than GSA sources. Whenever practical, the supplier shall be required to ship or deliver material within a given number of months from the date of manufacture or production. These "age on delivery" requirements should not be imposed in such a manner as to unduly restrict competition at any trade level. The following guidelines are suggested as appropriate for most shelf-life items:

V 40 N 249 DEC 29 75 XUM

Shelf-life period	*Age on delivery*
25 mos. or more	6 mos.
19 to 24 mos	4 mos.
13 to 18 mos	3 mos.
7 to 12 mos	2 mos.
6 mos. or less	1 mo. or less.

§ 101–27.206–3 Packaging.

To the extent feasible and economical, shelf-life material shall be packaged in such a way as to provide for minimum deterioration.

6. Section 101–27.07 is revised to read as follows:

§ 101–27.207 Control and inspection.

7. Sections 101–27.207–1, and 101–27.207–2, and 101–27.207–3 are added as follows:

§ 101–27.207–1 Agency controls.

Agencies shall establish the necessary controls to identify shelf-life items on their stock records (and in other appropriate elements of their supply system), and shall determine the appropriate shelf life for other than GSA managed items. Shelf-life items shall be stored in such a way as to ensure that the oldest stock on hand is issued first. Agencies shall issue the oldest stock of shelf-life items first except when it is not feasible as in shipments to overseas activities.

§ 101–27.207–2 Inspection.

Type II items remaining in stock immediately before the end of the designated shelf-life period shall be inspected to determine whether the shelf life can be extended, except items having a line item inventory value of $300 or less, or if the cost of inspection or testing is significant in relation to the value of the item. If the material is found suitable for issue on the date of inspection, the shelf life should be extended for a period equal to 50 percent of the original shelf-life period and the next reinspection date established accordingly. Material should be reinspected before the end of each extended shelf-life period and the shelf life extended again up to 50 percent of the original shelf life as long as the material conforms to the established criteria. Material on which the shelf life has been extended shall not be shipped to overseas activities if the time remaining in the extended shelf-life period is relatively short.

§ 101–27.207–3 Marking material to show extended shelf-life.

When the shelf-life period of type II material (except for critical end-use items as described below) is extended, only the shipping and intermediate containers of bulk stocks need be annotated or labeled to indicate the date of inspection and date material is to be reinspected. Individual units of issue not classified as having a critical end-use application are not required to be annotated or labeled as long as controls are established to preclude issuance of unserviceable material to a user. (A critical end-use item is any item which is essential to the preservation of life in emergencies; e.g., parachutes, marine life preservers, and certain drug products, or any item which is essential to the performance of a major system; e.g., aircraft, the failure of which would cause damage to the system or endanger personnel.) At the time of shipment, the date of inspection and date for reinspection shall be affixed by label or marked by other means on each unit of issue of type II items having a critical end-use application.

8. Section 101–27.208 is revised to read as follows:

§ 101–27.208 Inventory analyses.

(a) An inventory analysis shall be conducted periodically for each type I item to determine whether the quantity on hand will be used within the established shelf-life period. If the analysis indicates there are quantities which will not be used within the shelf-life period, arrangements shall be made to ensure use of the item(s) within the holding agency or for redistribution to other agencies.

(b) An inventory analysis shall be conducted periodically for each type II item with a shelf life of 60 months or less to determine whether issue of the quantity on hand is anticipated prior to the expiration of the designated shelf life. This analysis shall be made as follows:

Shelf-life period	*Date of analysis*
48 to 60 mos	12 to 16 mo. prior to expiration.
36 to 48 mos	8 to 12 mo. prior to expiration.
18 to 36 mos	6 to 8 mo. prior to expiration.
12 to 18 mos	4 to 6 mo. prior to expiration.
6 to 12 mos	3 to 4 mo. prior to expiration.
Up to 6 mos	No analysis required, but special emphasis should be placed on good requirements determination and proper order quantity.

(1) If the analysis indicates that the quantity on hand will not be issued within the shelf-life period and the cost of inspection or testing is not significant in relation to the line item value, the items shall be inspected to determine if the shelf-life period can be extended.

(2) If the analysis indicates that the quantity on hand will be issued within the shelf-life period, inspection is not required. However, such items shall be viewed again during the last month of the shelf-life period to determine whether quantities are sufficient to warrant inspection. The guidelines in § 101–27.207–2 shall be used to determine whether quantities are sufficient to warrant inspection and for extending the shelf-life period.

(3) If an agency does not have an inspection capability and the quantity and value of an indicated overage is sufficiently large to warrant special consideration, arrangements shall be made for qualified inspection or laboratory testing to determine whether the material is suitable for issue.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. This regulation is effective January 1, 1976.

Dated: December 9, 1975.

JACK ECKERD,
Administrator of General Services.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20492; RM-2351, RM-2426, RM-2521]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations; Table of Assignments

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Garden City, Hinesville, and Springfield, Georgia).

1. The Commission has before it the notice of proposed rule making, adopted May 22, 1975, 40 FR 24751, inviting comments on a proposal to assign Channel 288A to Garden City, Georgia, Channel 221A to Hinesville, Georgia, and Channel 280A to Springfield, Georgia, as first FM channel assignments. This plan was proposed by the Commission to accommodate three parties who filed mutually exclusive petitions for assignment of Channel 221A to the above-mentioned communities. West Chatham Broadcasting (West Chatham), licensee of Garden City's only local aural service, daytime AM Station WNMT, and Liberty Broadcasting (Liberty), licensee of Hinesville's only local aural service, daytime AM Station WGML, petitioned the Commission for assignment of Channel 221A to Garden City and Hinesville respectively. Effingham Enterprises (Effingham) also filed a petition requesting assignment of either Channel 280A or Channel 221A to Springfield, which has no local aural service. All three of these parties filed comments.

2. West Chatham responded to the proposal of the notice by stating that it would not apply for a construction permit if Channel 288A were assigned to Garden City (pop. 5,741)[1] because the area in which the transmitter facilities would have to be located to comply with the required minimum mileage separation is mostly inaccessible swampland, unserved by necessary public utilities.[2] West Chatham argues that such a transmitter location would present formidable

[1] All population data are from the 1970 U.S. Census, unless otherwise indicated.

[2] In order to assign Channel 288A to Garden City, the transmitting antenna must be located 7 miles northeast of the community to meet the 65 mile co-channel separation requirement with Station WIFO-FM (Channel 288A) located in Jessup, Georgia. Section 73.207(a) of the Commission's rules.

construction problems. However, West Chatham would apply for a construction permit if Channel 221A were assigned to Garden City. West Chatham points out that Garden City is located in the western part of Chatham County (pop. 187,767) which is in need of nighttime local service because the nearby Savannah stations report very little news about western Chatham County. In addition, West Chatham claims that Garden City is the largest port terminal in Georgia and the fourteenth largest port in the nation in the dollar value of its international trade.

3. Liberty favors the Commission's proposal to assign Channel 221A to Hinesville (pop. 4,115), the seat of Liberty County (pop. 17,569). It points out that Hinesville and Liberty County need full-time aural service because this area is experiencing tremendous growth due to the expansion of nearby Fort Stewart, which petitioner alleges is the largest military installation east of the Mississippi River. Liberty also argues that a full-time FM station is needed because daytime AM Station WGML, of which it is the licensee, cannot reach the eastern portion of the county, which lies on the Atlantic coast, and thus cannot provide adequate warning of hurricanes, tornadoes, and flash floods. Finally, Liberty adds that if the Commission assigned Channel 280A to Hinesville instead of Channel 221A, Liberty could not use Channel 280A because the transmitter site would have to be located six miles northeast of Hinesville, which would be on the Fort Stewart reservation.

4. Effingham, petitioner for the assignment of Channel 280A or Channel 221A to Springfield (pop. 1,001), filed a brief comment supporting the Commission's proposal to assign Channel 280A to Springfield and expressed its intention to apply for a construction permit if the Commission grants the assignment. In its reply comments, Effingham requested the Commission to sever the Springfield rule making (RM–2521) from the Hinesville and Garden City proceeding since there is no opposition to the proposal to assign Channel 280A to Springfield. Effingham argued that the severance of the Springfield rule making would provide Springfield, as well as Effingham County (pop. 13,632), with its first local aural service at an early date.

5. We believe that the public interest would be served by assigning Channel 280A to Springfield, the seat of Effingham County. This assignment would bring a first local aural service to the 13,632 residents of Effingham County, which is a growing rural area. We are not presently assigning Channel 288A to Garden City because West Chatham has not expressed in its comments an intention to apply for its use of Channel 288A as is required by Commission policy. Princeton, Illinois, 48 F.C.C. 2d 1036, 1037 (1974). West Chatham's decision is based on the unavailability of a suitable transmitter site. It states, however, that it would apply for Channel 221A if it were assigned to Garden City. Since Liberty wants Channel 221A assigned to Hinesville, a determination on whether Channel 221A should be assigned to Garden City or to Hinesville must be made.

6. The Commission's priorities for FM assignments state that insofar as possible, an FM broadcast station should be assigned "to provide each community with at least one FM broadcast station, especially where the community has only a daytime-only or local (Class IV) AM station, and especially where the community is outside of an urbanized area." Further notice of proposed rule making, Docket No. 14185, adopted July 25, 1962 (FCC 62–867). Incorporated by reference in paragraph 25 of the Third Report, Memorandum Opinion and Order, 40 F.C.C. 747, 758 (1968). The only local aural service at both Garden City and at Hinesville consists of a daytime-only AM station. However, Hinesville is outside of an urbanized area while Garden City is not. In fact, Garden City is located only 3 miles from Savannah, Georgia, and receives service from the 6 AM and 6 commercial FM station assigned to Savannah. Consequently, we believe that Channel 221A should be assigned to Hinesville rather than to Garden City.

7. Since the assignment of Channel 280A to Springfield and Channel 221A to Hinesville are first FM assignments to communities not near large population centers, no preclusion studies are required. Policy to Govern Requests for Additional FM Assignments, 8 F.C.C. 2d 79 (1967).

8. Accordingly, *it is ordered*, That effective February 2, 1976, the FM Table of Assignments, § 73.202(b) of the Commission's rules, is amended, insofar as the cities below are concerned, to read:

City	*Channel No.*
Hinesville, Ga	221A
Springfield, Ga	280A

9. Authority for the action taken herein is contained in Sections 4(i), 5(d)(1), 303, and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's rules.

10. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 5, 303, 307, 48 Stat., as amended, 1066, 1068, 1082, 1083; 47 U.S.C. 154, 155, 303, 307)

Adopted: December 16, 1975.

Released: December 19, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.75-34829 Filed 12-24-75;8:45 am]

[Docket No. 19964]

PART 73—RADIO BROADCAST SERVICES

Television Broadcast Stations; Table of Assignments

In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations. (Boca Raton, Florida; Ardmore, Hugo, and Lawton, Oklahoma; and Longview, Texas).

1. The Commission here considers its notice of proposed rule making in Docket No. 19964, adopted on March 7, 1974 (39 FR 11111), which proposed a freeze on the present television channel assignments and the assignment of replacement channels at Boca Raton, Florida, Longview, Texas, and Ardmore, Hugo, and Lawton, Oklahoma. The commenting parties in this proceeding are The Electronic Industries Association, The Land Mobile Communications Council, The Special Industrial Radio Service Association, Inc., The American Petroleum Institute, and The Utilities Telecommunications Council.

2. On May 20, 1970, the Commission adopted a plan in the First report and order in Docket No. 18261 in which licensees of the land mobile radio services in the ten largest urban areas of the country are allowed to share a maximum of two of the lower seven UHF television channels (Channels 14 through 20) (23 F.C.C. 2d 235). In the fourth further notice of proposed rule making adopted March 7, 1974, in Docket No. 18261 (39 FR 11109), the Commission proposed to extend the frequency sharing plan to three other urban areas: Miami, Florida, and Houston and Dallas-Fort Worth, Texas. The proposed extension, however, allowed for only one channel to be shared in each of these areas, rather than two. Channel 14 would be shared at Miami, Channel 17 at Houston, and Channel 16 at Dallas-Fort Worth. This sharing proposal was finalized by the Commission in the Fifth report and order in Docket 18261 adopted July 17, 1974, 48 F.C.C. 2d 360.

3. As a result of the adoption of the proposed plan, the land mobile users in the Miami area cannot afford appropriate protection against interference to an occupant of Channel °14 at Boca Raton, Florida (presently unoccupied and unapplied for). Similarly, there are UHF channels, presently unoccupied and unapplied for, at Longview, Texas (Channel 16), and the Oklahoma communities of Ardmore (Channel °17), Hugo (Channel °15), and Lawton (Channel 16), to which land mobile users at Dallas-Fort Worth could not afford adequate protection if the channels were to become occupied. The use of Channel 17 at Houston would not create an interference problem since the UHF channels currently assigned in the vicinity of Houston are afforded adequate protection. In order to avoid interference problems, the notice in the present proceeding proposed to freeze the aforementioned channel assignments at the communities mentioned in the event that the proposed sharing plan was adopted. In view of the fact that there had been some interest shown in activating certain of these assignments, the notice also proposed to provide replacement channels for them.

4. By freezing the channels, we stated that we meant we would not accept applications for construction permits for new television facilities on them, and that we would not accept requests for changes in the table of assignments that would involve moving an assignment of an affected channel to another geographic location within 212 miles, co-channel, and 140 miles, adjacent channel, of the geographic centers of the three aforementioned urbanised areas as set

V 40 P 249 DEC 29 75 XUM

forth in the proposed amendment of Table G, § 89.123 of the rules, appearing in Appendix A to the Fourth further notice of proposed rule making in Docket No. 18261.

5. All of the parties filing comments in this proceeding were in favor of freezing the present television channel assignments at Boca Raton, Florida, Longview, Texas, and Hugo, Ardmore, and Lawton, Oklahoma, and providing replacement channels for those which would be frozen.

6. Since the sharing proposal was found to be in the public interest and was adopted, we now find it appropriate to adopt our proposal to freeze the channels at the five communities as proposed in the notice and to assign replacement channels for them.

7. In view of the foregoing and pursuant to the authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307 (b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, *it is ordered*, That effective February 2, 1976, the Television Table of Assignments contained in § 73.606(b) of the Commission's rules and regulations is amended, insofar as the cities listed below are concerned, to read as follows:

City:	Channel No.
Boca Raton, Fla	°14[1], °62+
Ardmore, Okla	12−, °17[1], °28−
Hugo, Okla	42+, °15+[1], °48+
Lawton, Okla	7+, °36−, 16+[1], 45
Longview, Tex	16+[1], 51−

[1] Following the decision in Docket No. 18261, channels so indicated will not be available for television use until further action by the Commission.

8. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 5, 303, 307, 48 Stat., as amended, 1066, 1068, 1082, 1083; 47 U.S.C. 154, 155, 303, 307)

Adopted: December 16, 1975.

Released: December 19, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

Title 49—Transportation

CHAPTER I—MATERIALS TRANSPORTATION BUREAU, DEPARTMENT OF TRANSPORTATION

[Docket No. HM-132; Amdt. No. 173-92]

PART 173—SHIPPERS

Asphalts in Cargo Tanks

● The purpose of this amendment to 49 CFR Part 173 of the Hazardous Materials Regulations is to permit certain asphalt formulations, newly defined as flammable liquids by regulations adopted under Docket HM-102 (See 39 FR 2768, 40 FR 22263, 40 FR 25024), to be shipped in cargo tanks currently in service. ●

A petition has been received requesting reclassification of these materials as combustible liquids, however, no justification for this request based on safety was submitted. The Bureau believes that the materials should be identified as flammable liquids not only because of their flash points but also due to the fact that they are usually shipped and maintained at temperatures at or above their flash points during transportation.

The Bureau has received a number of requests for exemptions for continued shipment of these materials in a type of cargo tank similar to a MC 306 cargo tank. Of the several tanks authorized for the carriage of flammable liquids, a specification MC 303 provides the minimum safety features believed necessary to accommodate such cargo. The cargo tanks, apparently in widespread use, which are covered by these exemption requests, are manufactured by several firms and meet the basic structural requirements for a MC 306 cargo tank except for manhole design, venting, and emergency flow control.

Tanks used for the transport of hot asphalt are well-insulated double-shell tanks. This construction increases their resistance to impact and puncture over that of standard MC 306 tanks. The vapor pressures of asphalt materials are quite low. One asphalt, RC-70, which has a flash point in the 80° F. range, has a boiling range of approximately 350 to 600° F. Since asphalt materials do not reach these temperatures during transportation, the need for venting is minimized. Also, the high viscosity of these materials makes the valving requirements specified for a MC 306 cargo tank impractical.

In consideration of the foregoing, 49 CFR Part 173 is amended by adding paragraph (a)(2) in § 173.131 to read as follows:

§ 173.131 Road asphalt, or tar, liquid.

(a) * * *

(2) If the material has a flash point of 73° F. or higher, it may be transported in a nonspecification cargo tank that is at least equivalent in design and construction to specification MC 306 (§§ 178.340, 178.341 of this subchapter) except for the requirements of §§ 178.340-10, 178.341-3, 178.341-4, and 178.341-5.

Because this amendment will provide for the continued use of cargo tanks that in the past have proved safe with respect to the carriage of asphalt materials with flash points of 73° F. or higher, I find that notice and public procedure thereon are unnecessary.

In addition, since this amendment provides for the continued use of cargo tanks that would otherwise be prohibited on and after January 1, 1976, and does not impose any new duties or obligations, it is being made effective in less than 30 days after publication in the FEDERAL REGISTER.

(18 U.S.C. 834, 49 CFR 1.53(g)).

Effective: January 1, 1976.

Issued in Washington, D.C. on December 22, 1975.

JAMES T. CURTIS, Jr.,
Director,
Materials Transportation Bureau.

[FR Doc.75-34848 Filed 12-24-75;8:45 am]

CHAPTER X—INTERSTATE COMMERCE COMMISSION

[Service Order No. 1226]

PART 1033—CAR SERVICE

Chicago, Milwaukee, St. Paul and Pacific Railroad Company Authorized To Operate Over Tracks of Chicago and North Western Transportation Company

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 18th day of December, 1975.

It appearing, That the existing line of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW) terminating in Fond du Lac, Wisconsin, traverses nineteen grade crossings with streets and highways and two grade crossings with other railroads within a distance of less than three miles; that the excessive number of such grade crossings results in substantial hazard to the public and excessive expense to the railroad and to local governmental bodies for the maintenance of adequate crossing safety devices; that the Chicago and North Western Transportation Company (CNW) has consented to the use by the MILW of approximately 2.77 miles of its parallel line in Fond du Lac; that use of these CNW tracks by the MILW will enable that line to eliminate nineteen such grade crossings with streets and highways and two with other railroads; that operation by the MILW over the aforementioned tracks of the CNW is necessary in the interest of the public and the commerce of the people pending disposition of an application of the MILW seeking permanent authority to operate over such tracks; and that the Commission finds that notice and public procedure herein are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1226 Chicago, Milwaukee, St. Paul and Pacific Railroad Company authorized to operate over tracks of Chicago and North Western Transportation Company.

(a) The Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW) be, and it is hereby, authorized to operate over tracks of the Chicago and North Western Transportation Company (CNW) between CNW milepost 175.44 and CNW milepost 177.85, thence over 1,898 ft. of a track identified as CNW ICC track No. 30 to a connection with joint CNW-MILW track ICC No. 37 all at Fond du Lac, Wisconsin, a total distance of approximately 2.77 miles.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) Nothing herein shall be considered as pre-judgment of the application of the MILW seeking permanent authority to operate over these tracks of the CNW.

(d) *Effective date.* This order shall become effective at 12:01 a.m., December 22, 1975.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., June 30, 1976, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17(2).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.75-34909 Filed 12-24-75;8:45 am]

[Service Order No. 1227]

PART 1033—CAR SERVICE

Chicago and North Western Transportation Company and SOO Line Railroad Company Authorized To Operate Over Tracks of Chicago, Rock Island and Pacific Railroad Company, William M. Gibbons, Trustee

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 19th day of December, 1975.

It appearing, That the city of South St. Paul, Minnesota, has completed plans for highway relocation and redevelopment of an area in the center of that city; that consummation of such plans require removal of tracks of the Chicago and North Western Transportation Company (CNW) passing through that portion of the city; that the Chicago, Rock Island and Pacific Railroad Company, William M. Gibbons, Trustee (RI) has consented to use of its parallel line through the city of South St. Paul by both the CNW and its tennant the SOO Line Railroad Company (SOO); that no shippers will be deprived of railroad service by removal of these tracks of the CNW; that removal of these CNW tracks will result in the elimination of six crossings at grade level with city streets, thereby greatly increasing public safety and reducing interference with both railroad and vehicular movements in the area; that operation by the CNW and the SOO over these tracks of the RI is necessary in the interest of the public and the commerce of the people pending disposition of the applications of the CNW and the SOO seeking permanent authority to discontinue operations over these CNW tracks and to conduct substitute operations over tracks of the RI; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1227 Chicago and North Western Transportation Company and SOO Line Railroad Company authorized to operate over tracks of Chicago, Rock Island and Pacific Railroad Company, William M. Gibbons, Trustee.

(a) The Chicago and North Western Transportation Company (CNW) and the SOO Line Railroad Company (SOO) be, and they are hereby authorized to operate over tracks of the Chicago, Rock Island and Pacific Railroad Company, William M. Gibbons, Trustee, (RI) between a point of connection of the CNW and RI in the vicinity of RI milepost 1.53 and another connection of these companies in the vicinity of RI milepost 5.19, a distance of approximately 3.66 miles, all within the city of South St. Paul, Minnesota.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Rates applicable.* Inasmuch as this operation by the CNW and by the SOO over tracks of the RI is deemed to be due to carriers' disability, the rates applicable to traffic moved by the CNW and by the SOO over the tracks of the RI shall be the rates which were applicable on the shipments at the time of shipment as originally routed.

(d) Nothing herein shall be considered as a pre-judgment of the applications of the CNW and the SOO seeking authority to abandon operations over tracks of the CNW and authority to operate over tracks of the RI.

(e) *Effective date.* This order shall become effective at 11:59 p.m., December 22, 1975.

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., June 30, 1976, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17(2).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

V 40 249 DEC 29 75 XUM

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Fiscal Service

[31 CFR Part 223]

SURETY COMPANIES DOING BUSINESS WITH THE UNITED STATES

Proposed Fee Schedule Revision

The Department of the Treasury proposes to amend its regulations at 31 CFR Part 223 (also appearing as Treasury Circular No. 297) governing surety companies doing business with the United States. The proposed amendment's purpose is to revise the schedule of fees in order to recover costs related to services performed for, and special benefits conferred upon, surety companies by the Department. Any services performed and benefits conferred are in connection with the Fiscal Service's maintenance and publication of an annual listing (Treasury Department Circular No. 570) of surety companies holding certificates of authority from the Secretary of the Treasury as acceptable sureties or reinsurers on Federal bonds. The revised fees are proposed for adoption pursuant to 31 U.S.C. 483a, the user charge statute, and Office of Management and Budget Circular No. A–25, as amended, entitled "User Charges."

Accordingly, notice is hereby given pursuant to 5 U.S.C. 553, that the Secretary of the Treasury is considering the adoption, effective January 31, 1976, under authority of 5 U.S.C. 301 and 31 U.S.C. 483a, of the following revision to Part 223 of Subchapter A, Chapter II of Title 31 of the Code of Federal Regulations.

Section 223.22 is amended by revising the first sentence of the introductory text and paragraphs (a) and (c) to read as follows:

§ 223.22 Schedule of fees.

The fees specified below shall be imposed and collected for services performed by the Treasury Department, whether the action requested is granted or denied, effective January 31, 1976.

• • •

(a) For examining a company's application for a certificate of authority as an acceptable surety on Federal bonds, or for examining a company's application for a certificate of authority as an acceptable reinsuring company on such bonds: $800 (see § 223.2).

• • • • •

(c) For determining the continuing qualifications for annual renewal of a company's certificate of authority: $550 (see § 223.3).

• • • • •

Prior to adoption of the proposed amendment, consideration will be given to written views or arguments submitted to the Commissioner, Bureau of Government Financial Operations, U.S. Department of the Treasury, Washington, D.C. 20226, and received on or before January 28, 1975. Copies of comments received will be available for inspection and copying upon request in accordance with the Treasury's rules entitled "Access to Records" (31 CFR Part 1, Subpart A).

(5 U.S.C. 301, 31 U.S.C. 483a (6 U.S.C. 6–13))

Dated: December 18, 1975.

DAVID MOSS,
Fiscal Assistant Secretary.

DEPARTMENT OF THE INTERIOR

National Park Service

[36 CFR Part 7]

LASSEN VOLCANIC NATIONAL PARK, CALIFORNIA

Designation of Snowmobile Routes; Withdrawal of Notice of Proposed Rulemaking

The purpose of this notice is to withdraw the notice published at 39 FR 41260 in which the National Park Service solicited comments on a proposed amendment to § 7.11 of Title 36 of the Code of Federal Regulations which would have designated certain routes for snowmobile use in Lassen Volcanic National Park.

A number of comments were received in response to the notice, all but two of which were opposed to the establishment of snowmobile routes in Lassen Volcanic.

The principal objections made by the commentators were that snowmobile use would interfere with other, more popular, winter uses of the park such as cross-country skiing and snowshoeing and that the sounds produced by snowmobiles would detract from the quiet, natural atmosphere of the park's winter scene.

In consideration of the foregoing, the notice of proposed rulemaking published in the FEDERAL REGISTER (39 FR 41260) on November 26, 1974 and entitled "Lassen Volcanic National Park, Designation of Snowmobile Routes," is hereby withdrawn.

Dated: October 17, 1975.

HOWARD H. CHAPMAN,
Regional Director,
Western Regional Office.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

[7 CFR Part 210]

NATIONAL SCHOOL LUNCH PROGRAM

Reimbursement Payments

Notice is hereby given that the Food and Nutrition Service, U.S. Department of Agriculture, intends to amend the National School Lunch Program regulations pertaining to reimbursement payments to require allocation of income to all types of lunch (full price, free and reduced price) only where another allocation is not specifically authorized under State or local law.

Federal reimbursement is based on national average payments: A general cash-for-food assistance factor for all lunches served and special cash assistance factors for free and reduced price lunches. These factors are adjusted semi-annually to reflect changes in the cost of operating a school lunch program. In assigning per lunch reimbursement rates for a school, the State agency, or FNSRO where applicable, must consider the need of the School Food Authority to serve free and reduced price lunches to eligible children, and all resources available to it to meet this need.

Current regulations require consideration of income from all sources, but do not specify the manner in which such income is applied to types of meals. The Conference Report which accompanied Pub. L. 94–105 (H.R. 4222) indicated that Congressional intent was for State agencies to have maximum flexibility in utilizing section 4 funds, State funds, and local resources in order to maintain the lowest possible lunch prices to participating children. This intent is reflected in the proposed amendment in that State and local officials will be permitted to target their resources to specific categories of meals where State and local laws allow. In general, all income which is available to cover costs that are common to the total food service operation must be allocated equally to full price, free and reduced price lunches. In those instances where it is specifically required by applicable legislation, ordinance, or similar authority, income may be allocated as specified, to full price, or free or reduced price lunches.

Additionally, provisions requiring section 4 rate assignments to be at the national average level, when combined rates exceed the national average factors or equal the cost of providing the lunch, have been deleted.

Comments, suggestions, or objections are invited. In order to be assured of consideration, such comments, suggestions, or objections should be delivered to William G. Boling, Manager, Child Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, or submitted by mail postmarked no later than January 28, 1976. Communications should identify the regulation section and paragraph on which comments, etc., are offered. All comments, suggestions, or objections will be considered before the final amendments are published. All written submissions received pursuant to this notice will be made available for public inspection at the Office of the Manager, Child Nutrition Programs, during the regular business hours (8:30 a.m. to 5 p.m.) (7 CFR 1.27(b)).

The following changes are proposed:

1. Section 210.2 is amended by adding a new paragraph (c–2) to read as follows:

§ 210.2 Definitions.

• • • • •

(c–2) "Income" means the value of all resources available to operate the lunch service, including cash funds, goods and services.

• • • • •

2. Section 210.11 is amended by revising paragraphs (b) and (c) as follows:

§ 210.11 Reimbursement payments.

• • • • •

(b) For the six-month period July–December, 1973, the maximum rate of reimbursement from general cash-for-food assistance funds shall be 16 cents for a Type A lunch. For each succeeding six-month period, such maximum rate shall be adjusted by an amount equal to the amount that the national average general cash-for-food assistance factor is adjusted pursuant to § 210.4(c). In assigning rates of reimbursement, the State agency, or FNSRO where applicable, shall assign the same rate of reimbursement from general cash-for-food assistance funds for the lunches provided by a School Food Authority to children at the full price and for lunches provided to children free or at a reduced price. However, based upon determination of need, State agencies, and FNSROs where applicable, shall have maximum flexibility in assigning rates of reimbursement from general cash-for-food assistance funds between School Food Authorities.

(c) In addition to the assigned rate of reimbursement from general cash-for-food assistance funds, rates of reimbursement for free and reduced price lunches shall be assigned from special cash assistance funds, as applicable. The rate assigned for each type of lunch, together with income available from other sources for that type of lunch (including an amount equal to the highest reduced price charge to the child per lunch), shall not exceed the cost of that type of lunch during the fiscal year. The combined rates of reimbursement from general cash-for-food assistance and special cash assistance funds for each free or reduced price lunch are hereinafter referred to as the "per lunch reimbursement". For the six-month period July–December, 1973, the maximum per lunch reimbursement shall be 70 cents for a free lunch and 60 cents for a reduced price lunch. For each succeeding six-month period, (1) the maximum per lunch reimbursement for a free lunch shall be adjusted by an amount equal to the sum of the amounts by which the national average general cash-for-food assistance factor for all lunches and the national average special cash assistance factor for free lunches are adjusted pursuant to § 210.4(c); and (2) the maximum per lunch reimbursement for a reduced price lunch shall be adjusted to 10 cents less than the maximum per lunch reimbursement for a free lunch. In assigning per lunch reimbursement, the State agency, or FNSRO where applicable, shall consider the need of the School Food Authority to serve free and reduced price lunches to eligible children, and the income available for such lunches from all sources. The School Food Authority shall allocate all available income at the same rate for all lunches (full price, free or reduced price), except where such income is specifically required by applicable legislation, ordinance, or similar authority to be applied to a particular type (full price, free or reduced price) of lunch. Acceptable accounting principles must be utilized in all allocations of income.

• • • • •

Effective Date: January 28, 1976

Dated: December 22, 1975.

RICHARD L. FELTNER,
Assistant Secretary.

[FR Doc.75–34873 Filed 12–24–75;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 20660; RM–2559]

TELEVISION BROADCAST STATIONS

Proposed Table of Assignments

1. The Commission, by the Chief, Broadcast Bureau, has before it for consideration a petition for rule making filed by the Nebraska Educational Television Commission (NETC). The petition seeks amendment of § 73.606(b) of the Commission's rules, the Television Table of Assignments, by assigning channels reserved for noncommercial educational use at Beatrice (Channel *23), Falls City (Channel *24), and Pawnee City (Channel *33).

2. NETC is the Nebraska state agency responsible for providing noncommercial educational television service to state residents. The educational television network for the state of Nebraska is composed of Station KUCN–TV (Channel *12), licensed to the University of Nebraska, and eight other educational TV stations, licensed to NETC. These nine stations, together with four television broadcast translator stations, provide service to most of the state. There exists, however, an area in the southeastern part of the state which remains unserved. Hence NETC requests the assignments mentioned in paragraph 1 to permit it to complete service coverage of the state. This will be accomplished initially by the operation of high-powered translators on the requested assignment with future upgrading of the facilities to full broadcast station capability possible.[1]

3. Beatrice (pop. 12,389; Gage County, pop. 25,731), Falls City (pop. 5,444; Richardson County, pop. 12,277), and Pawnee City (pop. 1,267; Pawnee County, pop. 4,473) are located in southeastern Nebraska near the Nebraska-Kansas and Nebraska-Missouri boundary. NETC states that a first educational television service will be provided to 26,621 persons if its proposals are adopted. This first service figure, it indicates, does not include cable television system subscribers.

4. The proposed assignments meet the Commission's separation requirements and other technical criteria. Each may also be assigned without requiring changes at other communities listed in the Table of Assignments. It appears that a minimum of seventeen channels are available for assignment at the selected communities and the petitioner has selected channels with the lowest numbers available for assignment to these communities.

5. The Commission is persuaded that a rule making proceeding should be instituted to request comments on the NETC proposal. Therefore, we propose to consider the following revisions in the Television Table of Assignments (§ 73.606(b) of the rules) with respect to the cities listed below:

City	Channel No.	
	Present	Proposed
Beatrice, Nebr.		*23+
Falls City, Nebr.		*24
Pawnee City, Nebr.		*33+

6. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained below and are incorporatel by reference herein.

7. Interested parties may file comments on or before February 13, 1976, and reply comments on or before March 4, 1976.

Adopted: December 16, 1975.

Released: December 19, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[1] Pursuant to paragraph 4 of the report and order in Docket No. 18661, 23 R.R. 2d 1504 (1971), high-powered UHF translators may be operated only on channels which are listed in the Television Table of Assignments. See also § 74.702(g) and 74.735(e) of the rules.

V 40 0249 DEC 29 75 XUM

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's rules and regulations, as set forth in the notice of proposed rule making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the notice of proposed rule making. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rule making. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[FR Doc.75-34831 Filed 12-24-75;8:45 am]

[47 CFR Part 97]

[Docket No. 20679; FCC 75-1408]

AMATEUR RADIO SERVICE; VOLUNTEER EXAMINERS

Submission of Copies of Operator Licenses With Examination Papers

1. In this notice of proposed rulemaking the Commission proposes to amend § 97.29 of the rules concerning the manner of conducting examinations by mail for licenses in the Amateur Radio Service.

2. Under current procedure, a volunteer examiner may, under certain limited circumstances, administer a written Amateur examination to a prospetcive Amateur. After administering the required examination in International Morse Code, the volunteer examiner, assuming the applicant has passed, requests the Commission to forward to him the written portion of the examination. The request includes, inter alia, a description of the examiner's qualifications to administer the examination and the examiner's signature. This procedure has proven to be unsatisfactory, however, because the Commission has neither the resources nor the time to verify the putative qualifications or even the existence of the volunteer examiner, and, as a result, substantial abuse of the examination by mail system has occurred.

3. The rule proposed herein is a step towards a more efficient and fair system of examinations by mail. It amends § 97.29 by adding a requirement that the volunteer examiner enclose with his request for the written portion of the examination a photocopy of his current Amateur license. All other aspects of the examination by mail system remain unchanged.

4. The proposed amendments to the Rules, as set forth below, are issued pursuant to the authority contained in sections (1) and 303 of the Communications Act of 1934, as amended.

5. Pursuant to the procedures set forth in § 1.415 of the Commission's rules, interested persons are invited to file comments on or before February 2, 1976, and reply comments on or before February 12, 1976. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

6. In accordance with the provisions of § 1.419 of the Commission's rules, an original and eleven copies of all statements, briefs, or comments shall be furnished to the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C. 20554.

Adopted: December 19, 1975.

Released: December 22, 1975.

FEDERAL COMMUNICATIONS COMMISSION,

[SEAL] VINCENT J. MULLINS, *Secretary.*

Part 97 of Chapter 1 of Title 47 of the Code of Federal Regulations is amended as follows:

1. Section 97.29(b)(1), third sentence, is amended to read as follows:

§ 97.29 Manner of conducting examinations.

* * * * *

(b) * * *

(1) * * * The examiner's written request shall include (i) the names and permanent addresses of the examiner and the applicant, (ii) a description of the examiner's qualifications to administer the examination, (iii) a photocopy of the volunteer examiner's operator license, (iv) the examiner's statement that the applicant has passed the code test for the class of license involved under his supervision within the 10 days prior to submission of the request, and (v) the examiner's written signature. * * *

* * * * *

[FR Doc.75-34832 Filed 12-24-75;8:45 am]

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 211]

MONTHLY PETROLEUM REPORTING SYSTEM

Proposed Rulemaking

The Federal Energy Administration hereby gives notice of a proposal to amend Title 10, Chapter II, Part 211 of the Code of Federal Regulations, the Mandatory Petroleum Allocation Regulations, to provide for a monthly petroleum reporting system. The FEA will receive written comments with respect to this proposal.

FEA regulations, § 211.224, require weekly petroleum reports from each refiner or other firm which operates or controls a refinery, bulk terminal, crude oil pipeline or petroleum products pipeline. Weekly reports are also required of firms which import petroleum products by tanker, barge or pipeline. These reports are currently submitted in accordance with Forms FEO-1002 to FEO-1006.

FEA has determined that its data requirements would be adequately served by a monthly, rather than a weekly reporting system. FEA in conjunction with the Bureau of Mines, Department of the Interior, has also determined that by modifying the reporting system in several respects, the reporting system would serve the data needs of the Bureau of Mines, as well as FEA.

FEA has entered into an agreement with the Bureau of Mines to consolidate in a single reporting system FEA's present mandatory system under § 211.224 and the Bureau of Mines' voluntary reporting system. The purpose of the agreement is to serve the data collection requirements of the two agencies through one common set of data collection forms, thus reducing the reporting burden imposed upon the industry. Under the agreement, the Bureau of Mines will act as the collecting agent for FEA and may make statistical use of the data. FEA may make general use of the data provided.

A new series of forms to be used in the new monthly system was designed by FEA and submitted to the General Accounting Office (GAO) in accordance with the Federal Reports Act. On October 6, 1975, GAO approved the new forms FEA-P320 through FEA-P323.

The proposed amendments set forth below include a new § 211.223, which establishes the Monthly Petroleum Reporting System. Its provisions are similar to those of the present § 211.224, except that the reports are to be submitted on a monthly rather than weekly basis. In addition, the definitions of "Crude oil pipeline" and "Petroleum products pipeline" are changed to eliminate the references to "trunk function." Thus, both gathering lines and trunk lines would be covered for purposes of this reporting system. The definition of "Bulk terminal" is also expanded to clarify that reports are to be submitted for facilities used for storage as well as marketing of refined petroleum products. The phrase "gasoline, kerosene, and distillate and residual fuel oils" is modified to read "gasoline, middle distillate, aviation fuels, naphthas, residual fuel oil, other products or asphalt". These are the products for which information would be submitted in the bulk terminal report. Finally, importers would not be required to submit monthly reports under proposed § 211.224. Importers are excluded from this system to avoid duplicating the information they are required to file under § 213.23 of FEA's Oil Import Regulations.

It is also proposed that § 211.224 be amended to require monthly rather than weekly reports. This change would be effective concurrently with § 211.223, and would provide for dual reporting for a trial period for the new forms FEA-P320 through FEA-P323. Thereafter, § 211.224 would be deleted, leaving only the monthly reports under § 211.223.

Interested persons are invited to submit data, views, or arguments with respect to the proposed regulations to Executive Communications, Federal Energy Administration, Box EV, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on documents submitted to FEA Executive Communications with the designation "Monthly Petroleum Reporting System." Fifteen copies should be submitted. All comments received by January 9, 1976, and all relevant information, will be considered by FEA.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

The amendments proposed below have been reviewed in accordance with Executive Order 11821, issued November 27, 1974, and have been determined not to require evaluation of their inflationary impact.

Since the proposed regulations will not affect the quality of the environment, FEA has not submitted the proposed regulations to the Administrator of the Environmental Protection Agency for comment, as provided in section 7(c)(2) of the Federal Energy Administration Act of 1974, Pub. L. 93-275 (FEAA). Also, since the proposed regulations are not likely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses, no public hearing will be conducted with respect to this proposed rulemaking, as provided in section 7(i)(1)(c) of the FEAA.

(Federal Energy Administration Act of 1974, Pub. L. 93-275; E.O. 11790, 39 FR 23185)

In consideration of the foregoing, it is proposed to amend Chapter II, Title 10, Code of Federal Regulations, as set forth below.

Issued in Washington, D.C., December 23, 1975.

MICHAEL F. BUTLER, *General Counsel.*

1. Part 211 is amended by adding § 211.223 to read as follows:

§ 211.223 Monthly petroleum reporting system.

(a) This section establishes a monthly petroleum reporting system for each refiner or other firm which operates or controls a (1) refinery, (2) bulk terminal, (3) crude oil pipeline or (4) petroleum products pipeline.

(b) *Definitions.* For purposes of this section—

"Bulk terminal" means a facility which is used for the marketing or storage of gasoline, middle distillate, aviation fuels, naphthas, residual fuel oil, other products or asphalt and which (1) has total bulk storage capacity of 2,100,000 gallons or more, or (2) receives its petroleum products by tanker, barge, or pipeline.

"Crude oil pipeline" means a pipeline which carries crude oil, including interstate, intrastate and intracompany pipelines.

"Petroleum products pipeline" means a pipeline which carries petroleum products, including interstate, intrastate and intracompany pipelines.

(c) *Monthly report.* Every refiner or other firm which operates or controls a refinery, bulk terminal, crude oil pipeline or petroleum products pipeline shall prepare and file with FEA a monthly report in accordance with forms and instructions issued by FEA. The monthly petroleum reporting system shall become effective December, 1975. The first report will apply to information for November, 1975, and must be received by FEA by 5:00 p.m., not later than ten days following the effective date of this section.

(d) Each firm required to file monthly reports under paragraph (c) of this section shall retain a copy of each monthly report, signed by the officer responsible for submitting the reports, on file at its principal place of business.

2. Section 211.224 is amended by deleting the word "weekly" wherever it appears and by substituting therefor the word "monthly", and is amended by adding a new paragraph (e) to read as follows:

§ 211.224 Monthly petroleum reporting system.

* * * * *

(e) This section shall expire January 31, 1976.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 270]

[Release No. IC 9084, File No. S7-514]

ANCSA CORPORATIONS

Extension of Comment Period

On August 22, 1975, the Commission published for comment a revised version of proposed Rule 6c-2, which, if adopted, would exempt corporations organized pursuant to the Alaska Native Claims Settlement Act of 1971 from many provisions of the Investment Company Act of 1940 (Investment Company Act Release No. 8902, 40 FR 41818, September 9, 1975). On October 1, 1975, pursuant to request, the Commission extended from October 1, 1975, until December 1, 1975, the time for public comment on this proposal (Investment Company Act Release No. 8966, 40 FR 47152, October 8, 1975). Since the date of this extension, the Commission has received three requests for an additional extension of the comment period. The latest requests are based on the assertion that, to avoid incurring unnecessary expense in the preparation of comments, the ANCSA Corporations should be allowed to ascertain the outcome of Congressional consideration of pending legislation which would, if enacted, moot the issues involved in proposed Rule 6c-2 by totally exempting the ANCSA Corporations from the Federal securities laws. While the Commission opposes such exemption, it is sympathetic to the needs of the ANCSA Corporations to avoid unnecessary expense and has extended from December 1, 1975, to January 15, 1976, the period within which written views and comments may be submitted.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS, *Secretary.*

DEPARTMENT OF JUSTICE

Antitrust Division

UNITED STATES v. SLIDE-RITE MFG. CORP., ET AL.

Proposed Consent Judgment In and Competitive Impact Statement Thereon

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16 (b) through (h), that a proposed consent judgment and a competitive impact statement as set out below have been filed with the United States District Court for the Southern District of New York in *United States of America* v. *Slide-Rite Mfg. Corp., et al.*, Civil Action No. 74-3927. The complaint in this case alleges that the three defendants conspired to fix the prices of zipper sliders. The proposed judgment enjoins the defendants from continuing or renewing the alleged conspiracy or from entering into any other conspiracy having a like purpose or effect. Public comment is invited on or before Feb. 24, 1976. Such comments and responses thereto will be published in the FEDERAL REGISTER and filed with the Court. Comments should be addressed to Bernard Wehrmann, Chief, New York Office, Antitrust Division, Department of Justice, 26 Federal Plaza, New York, New York 10007.

Dated: December 18, 1975.

Assistant Attorney General
Antitrust Division.

UNITED STATES DISTRICT COURT

SOUTHERN DISTRICT OF NEW YORK

United States of America, Plaintiff, v. Slide-Rite Mfg. Corp.; Pilling Chain Company, Inc.; and Acme Associates Incorporated, defendants. Civ. Action No. 74 Civ. 3927; Filed: Decembr 18, 1975.

STIPULATION

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. A final judgment in the form hereto attached may be filed and entered by the Court, upon the motion of either party or upon the Courts' own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16), and without further notice to either party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed final judgment by serving notice thereof upon the defendants herein and by filing that notice with the Court.

2. In the event plaintiff withdraws its consent or if the proposed final judgment is not entered pursuant to this stipulation, this stipulation shall be of no effect whatever and the making of this stipulation shall be without prejudice to plaintiff and defendants in this or any other proceeding.

Dated: Dec. 18, 1975.

For the Plaintiff: Thomas E. Kauper, *Assistant Attorney General*, Baddia J. Rashid, Charles F. B. McAleer, Bernard Wehrmann, Mary K. Smith, Samuel London, Erwin L. Atkins, *Attorneys, Department of Justice.*

For the Defendants: Slide-Rite Mfg. Corp., Guggenheimer & Untermeyer, *New York, New York.* Pilling Chain Company, Inc., Abedon Stanzler & Biener, *Providence, Rhode Island.* Acme Associates Incorporated, Fried, Frank, Harris, Shriver & Jacobson, *New York, New York.*

United States of America, Plaintiff, v. Slide-Rite Mfg. Corp.; Pilling Chain Company, Inc.; and Acme Associates Incorporated, defendants. Civ. Action No. 74 Civ. 3927 Filed: December 18, 1975.

FINAL JUDGMENT

Plaintiff, United States of America, having filed its complaint herein on September 10, 1974, and defendants having appeared by their attorneys and the plaintiff and the defendants Slide-Rite Mfg. Corp., Pilling Chain Company, Inc. and Acme Associates Incorporated, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein and without this Final Judgment constituting evidence or an admission by any party with respect to any issue of fact or law herein;

NOW, THEREFORE, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein, and upon the consent of the parties hereto, it is hereby,

ORDERED, ADJUDICATED AND DECREED AS FOLLOWS:

I. This Court has jurisdiction of the subject matter herein and of the parties hereto. The complaint states claims upon which relief may be granted against the defendants under Section 1 of the Act of Congress of July 2, 1890, as amended (15 U.S.C. § 1), commonly known as the Sherman Act.

II. As used in this Final Judgment:

(A) "Slider" means the component of a zipper which is attached to and slides on a zipper chain;

(B) "Person" means any individual, partnership, corporation, or other business or legal entity.

III. The provisions of this Final Judgment shall apply to each defendant, its officers, directors, agents and employees and to each defendant's subsidiaries, affiliates, successors and assigns, and to each of their respective officers, directors, agents and employees, and to all other persons in active concert or participation with any of them who receive actual notice of this Final Judgment by personal service or otherwise.

IV. Each defendant is enjoined and restrained directly or indirectly from entering into, adhering to, maintaining or engaging in any agreement, understanding, arrangement, plan or program with any other seller or manufacturer of sliders to fix, determine, establish, maintain or stabilize the prices for the sale of sliders to any third person.

V. Each of the defendants is enjoined and restrained directly or indirectly from communicating to or exchanging with any other seller or manufacturer of sliders, any actual or proposed price, price change or discount at which any slider item is to be, or has been, sold to any third person prior to the communication of such information to the public or to customers generally.

VI. Each defendant is ordered and directed to:

(A) Serve within sixty (60) days after the date of entry of this Final Judgment a conformed copy of this Final Judgment upon each of its officers and directors, and each of its employees who have any responsibility for the sale of sliders by said defendant;

(B) Serve a conformed copy of this Final Judgment upon each successor officer and director, and each successor employee having any responsibility for the sale of sliders by said defendant; and

(C) Within ninety (90) days after the date of entry of this Final Judgment, to file with this Court and to mail to the plaintiff, an affidavit setting forth the fact and manner of compliance with subsection (A) of this Section VI.

VII. (A) For the purpose of securing or determining compliance with this Final Judgment and for no other purpose, each of the defendants shall permit any authorized representative or representatives of the Department of Justice upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice, subject to any legally recognized privilege:

(1) Access, during the regular business hours of each of the defendants, to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of each of the defendants which relate to any matters contained in this Final Judgment;

(2) Subject to the reasonable convenience of each of the defendants, and without restraint or interference from them, to interview each of their officers and employees, who may have counsel present, regarding any such matters.

(B) Upon the written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, each of the defendants shall submit such reports in writing to the Department of Justice with respect to any matters contained in this Final Judgment as from time to time may be requested.

No information obtained by the means provided in this Section VII shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

VIII. Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further

V 40 249 DEC 29 75 XUM V

orders and directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, and for the enforcement of compliance therewith and punishment of violations thereof.

IX. Entry of this Judgment is in the public interest.

United States District Judge.

UNITED STATES DISTRICT COURT

SOUTHERN DISTRICT OF NEW YORK

United States of America, Plaintiff, v. Slide-Rite Mfg. Corp.; Pilling Chain Company, Inc.; and Acme Associates Incorporated, defendants. Civil No. 74–3927. Filed: December 18, 1975. Proposed Consent Decree: Competitive Impact Statement.

Pursuant to Section 2(b) of the *Antitrust Procedures and Penalties Act* (15 U.S.C. 16(b)–(h)), The United States of America hereby files this Competitive Impact Statement relating to the proposed consent judgment submitted for entry in this civil antitrust proceeding.

NATURE AND PURPOSE OF THE ACTION

On September 10, 1974, the Department of Justice filed a civil antitrust action alleging that the three above-named defendants had combined and conspired to fix, raise and maintain the prices of sliders in violation of Section 1 of the Sherman Act. It was alleged that as a result of the conspiracy:

(a) price competition among the defendants in the sale of sliders has been restrained;

(b) prices of sliders have been fixed, raised and maintained at artificial, noncompetitive levels; and

(c) customers of the defendants have been deprived of the opportunity to obtain sliders at competitive prices.

In its prayer for relief, the Department of Justice requested that the Court enjoin the defendants from continuing the alleged conspiracy or from engaging in any other conspiracy having a similar purpose or effect.

PRACTICES AND EVENTS GIVING RISE TO THE ALLEGED VIOLATION

Each of the defendants is engaged in the business of manufacturing and selling sliders. A slider is the component of a zipper which is attached to and slides on a zipper chain. Movement of the slider from one end of the chain to the other opens and closes the zipper. The defendant corporations are the principal producers of sliders sold to semi-integrated manufacturers of zippers and zipper assemblers. As a group, the corporate defendants account for approximately 90 percent of all sliders sold to these zipper producers. Their aggregate gross sales of sliders in 1973 were approximately $6 million. Beginning in or about the middle of 1966 and continuing thereafter up to the date of the filing of the complaint, officers of the defendant coporations attended meetings and engaged in telephone conversations during which they discussed and fixed the prices of sliders sold to semi-integrated zipper manufacturers and zipper assemblers.

EXPLANATION OF THE PROPOSED CONSENT JUDGMENT

The proposed consent judgment provides specific measures to dispel the anticompetitive effects alleged by the complaint. Each defendant will be enjoined and restrained from entering into any agreement or arrangement with any other seller or manufacturer of sliders to fix the prices for the sale of sliders to any third person. Each of the defendants will also be enjoined and restrained from communicating to or exchanging with any other seller or manufacturer of sliders, any actual or proposed price, price change or discount at which any slider item is to be, or has been, sold to any third person prior to the communication of such information to the public or customers generally. Further, each defendant will be required to provide each of its officers and directors, and each of its employees having any responsibility for the sale of sliders with a conformed copy of the consent judgment.

COMPETITIVE EFFECTS OF THE PROPOSED PLAINTIFFS

It is anticipated that the proposed consent judgment will have the effect of eliminating the conspiracy which restrained price competition and restoring price competition among the defendants.

ALTERNATIVE REMEDIES CONSIDERED BY THE GOVERNMENT

The alternative to the proposed consent judgment considered by the Antitrust Division was a full trial on the merits. The Antitrust Division determined that the judgment provided substantially all of the relief which might reasonably be expected following a trial and a decision favorable to the Government, without the commitment of manpower and delay involved in a trial.

REMEDIES AVAILABLE TO POTENTIAL PRIVATE JUDGMENT

Any potential private plaintiffs who might have been damaged by the alleged violation will retain the same right to sue for monetary damages and any other legal and equitable remedies which they would have had, were the proposed consent judgment not entered. However, this judgment may not be used as *prima facie* evidence in private litigation pursuant to Section 5(a) of the Clayton Act, as amended, 15 U.S.C. 16(a).

PROCEDURES AVAILABLE FOR MODIFICATION OF THE PROPOSED CONSENT JUDGMENT

The proposed consent judgment is subject to a stipulation by and between the United States and the defendants, which provides that the United States may withdraw its consent to the proposed judgment until the Court has found that entry of the proposed judgment is in the public interest. By its terms, the proposed judgment provides for retention of jurisdiction of this action in order, among other things, to permit any of the parties thereto to apply to the Court for such orders as may be necessary or appriate for its modification.

As provided by the *Antitrust Procedures and Penalties Act*, any persons believing that the proposed judgment should be modified may, for a 60-day period, submit written comments to the United States Department of Justice, Antitrust Division, 26 Federal Plaza, New York, New York 10007, which will file with the Court and publish in the Federal Register such comments and its response to such comments. The Department of Justice will thereafter evaluate any and all such comments and determine whether there is any reason for withdrawal of its consent to the proposed consent judgment.

DETERMINATIVE DOCUMENTS

There are no materials or documents which the Government considered determinative in formulating this proposed consent judgment. Therefore, none is being filed with this Competitive Impact Statement.

Dated: December 18, 1975.

SAMUEL LONDON,
ERWIN L. ATKINS,
Attorneys,
Department of Justice.

Law Enforcement Assistance Administration

CONFIDENTIALITY OF IDENTIFIABLE RESEARCH AND STATISTICAL INFORMATION

Meeting

In the September 24, 1975, issue of the FEDERAL REGISTER (40 F.R. 44034), the Law Enforcement Assistance Administration published a notice of proposed rule making concerning the Confidentiality of Identifiable Research and Statistical Information. A hearing was held on October 16, 1975. In addition, interested parties were given an opportunity to provide written comments.

This notice is to announce that on January 8, 1976, a meeting will be held with an ad hoc group of researchers to discuss revisions to the proposed regulations. This meeting will be held in the 13th Floor Conference Room, Law Enforcement Assistance Administration, 633 Indiana Avenue, N.W., Washington, D.C. beginning at 10:00 a.m. The meeting will be open to the public.

Dated: December 18, 1975.

RICHARD W. VELDE,
Administrator.

[FR Doc.75-34812 Filed 12-24-75;8:45 am]

DEPARTMENT OF THE INTERIOR

National Park Service

ROCKY MOUNTAIN REGIONAL ADVISORY COMMITTEE

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Rocky Mountain Regional Advisory Committee will be held beginning at 8:30 a.m. on February 4–5, 1976, at the Rocky Mountain Regional Office and Denver Service Center, 655 Parfet Street, Lakewood, Colorado.

The purpose of the Rocky Mountain Regional Advisory Committee is to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems and programs pertinent to the Rocky Mountain Region of the National Park Service.

The members of the Advisory Committee are as follows:

Dr. John D. Hunt, Logan, Utah (Chairman)
Mr. Samuel J. Taylor, Moab, Utah
Mr. Ralph M. Clark, Denver, Colorado
Mr. William W. Robinson, Denver, Colorado
Mr. Hoadley Dean, Rapid City, South Dakota
Mrs. Harold (Alice) Fryslie, Bozeman, Montana
Mr. D. C. "Del" Shipman, Watford City, North Dakota
Mr. Jack Rosenthal, Casper, Wyoming.
Mr. Vince R. Lee, Wilson, Wyoming

The matters to be discussed at this meeting include:

1. Denver Service Center functions and the planning process.
2. National Park Service Contracts and Permits.
3. Air quality, air space and land use controls in, over, and around Service areas.
4. Election of officers.

The meeting will be open to the public. Any member of the public may file with the committee a written statement concerning the matters to be formally discussed by the committee.

Persons wishing further information concerning this meeting or who wish to submit written statements, may contact Committee Manager, Forrest Benson, Rocky Mountain Regional Office, National Park Service, Denver, Colorado 80225. Telephone (303) 234–4943.

Minutes of the meeting will be available for public inspection approximately 4 weeks after the meeting at the Rocky Mountain Regional Office, 655 Parfet Street, Denver, Colorado.

LYNN H. THOMPSON,
Regional Director,
Rocky Mountain Region.

UNITED STATES DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

SHIPPERS ADVISORY COMMITTEE

Public Meeting

SHIPPERS ADVISORY COMMITTEE MEETING MARKETING ORDER NO. 905—7 CFR PART 905 REGULATING THE HANDLING OF ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA.

Pursuant to the provisions of section 10(a)(2) of the Federal Advisory Committee Act (86 Stat. 770), notice is hereby given of a meeting of the Shippers Advisory Committee established under Marketing Order No. 905 (7 CFR Part 905). This order regulates the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida and is effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The committee will meet in the A. B. Michael Auditorium of the Florida Citrus Mutual Building, 302 South Massachusetts Avenue, Lakeland, Florida, at 10:30 a.m., on January 13, 1976.

The meeting will be open to the public and a brief period will be set aside for public comments and questions. The agenda of the committee includes analysis of current information concerning market supply and demand factors, and consideration of recommendations for regulation of shipments of the named fruits.

The names of committee members, agenda, summary of the meeting and other information pertaining to the meeting may be obtained from Frank D. Tropvillion, Manager, Growers Administrative Committee, P.O. Box R, Lakeland, Florida 33802; telephone 813–682–3103.

Dated: December 22, 1975.

DONALD E. WILKINSON,
Administrator.

DEPARTMENT OF COMMERCE

National Bureau of Standards

NATIONAL BUREAU OF STANDARDS VISITING COMMITTEE

Notice of Meeting

Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. III, 1973), notice is hereby given that the National Bureau of Standards Statutory Visiting Committee will meet in Boulder, Colorado, at 7 p.m. February 26, 1976, at the Boulder Country Club and at 8:30 a.m. February 27, 1976, at the National Bureau of Standards, Room 1107, Radio Building, 325 Broadway.

The NBS Visiting Committee is composed of five members prominent in the fields of science and technology and appointed by the Secretary of Commerce.

The purpose of the meeting is to review the efficiency of the Bureau's scientific work and the condition of its equipment, to assist the Committee in reporting to the Secretary of Commerce as required by law.

The public will be permitted to attend and the Chairman will entertain comments or questions at an appropriate time during the meeting. Persons wishing to attend the meeting should notify Ms. Elaine D. Bunten, Office of Programs, National Bureau of Standards, Washington, D.C. 20234, telephone (301) 921–3591.

Dated: December 12, 1975.

ERNEST AMBLER,
Acting Director.

[FR Doc.75-34132 Filed 12-24-75;8:45 am]

National Bureau of Standards

PROPOSED FEDERAL INFORMATION PROCESSING STANDARD

Revised Instructions for Implementing Standard Character Codes and Collating Sequence

Under the provisions of Public Law 89–306 and Executive Order 11717, the Secretary of Commerce is authorized to establish Federal automatic data processing standards for use by Federal agencies in the design, operation and maintenance of computer systems and in the acquisition of computer systems and services. A proposed revision to Federal Information Processing Standard Publication (FIPS PUB) 1—Code for Information Interchange, and FIPS PUB 7—Implementation of the Code for Information Interchange and Related Media Standards, is being recommended for Federal use. This revision, identified as FIPS PUB 1–1—Character Codes and Collating Sequence, will supersede FIPS PUB 1 and FIPS PUB 7.

The current standards are based upon the Federal adoption of the voluntary standard that has been developed and approved by the American National Standards Institute in its standard X3.4–1968, Standard Code for Information Interchange (commonly referred to as "ASCII"). The proposed revision is based upon recommendations resulting from a study conducted by the National Bureau of Standards on the significance and impact of ASCII as a Federal standard which was accomplished with the cooperative efforts of Federal departments and agencies, the computer industry and non-government users. This revision is intended to strengthen and clarify the implementation instructions provided for ASCII in the earlier publications cited above.

Prior to the submission of a final endorsement of this proposal to the Secretary of Commerce for approval, it is essential to assure that proper consideration is given to the needs and views of manufacturers, the public, and state and local governments. The purpose of this notice is to solicit such views.

The proposed Federal Information Processing Standard contains two basic sections: (1) an announcement section which provides information concerning the applicability, implementation, and maintenance of the standard; and (2) a specification section which deals with the technical requirements of the standard. The announcement section is provided in its entirety in this notice.

Interested parties may obtain a copy of the specification section from and may submit comments to the Associate Director for ADP Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234, on or before February 29, 1976.

ERNEST AMBLER,
Acting Director.

DECEMBER 19, 1975.

FEDERAL INFORMATION PROCESSING STANDARDS PUBLICATION 1–1

(DATE)

ANNOUNCING THE STANDARD FOR

CHARACTER CODES AND COLLATING SEQUENCE (FIPS 1–1)

Federal Information Processing Standards are issued by the National Bureau of Standards to provide for the more economic and efficient purchase, lease, maintenance, operation and utilization of automatic data processing equipment and services by Federal departments and agencies. These standards are issued pursuant to the Federal Property and Administrative Services Act of 1949, as amended, Public Law 89–306 (79 Stat. 1127), as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973), and Part 6 of Title 15 Code of Federal Regulations.

Name of Standard. Character Codes and Collating Sequence (FIPS 1–1).

Category of Standard. Hardware Standard, Interchange Codes and Media.

Explanation. This standard provides a coded character set and collating sequence to be used in Federal information processing systems, telecommunications systems and associated equipment and software. This standard was developed to achieve greater compatibility among computer and telecommunications systems applications thereby affording users the capability of making more effective utilization of their data, soft-

V 40249 DEC 29 75 XUM

ware and equipment resources. It is intended to serve as the basic standard for representing, in a binary coded form, the graphic characters and controls that are commonly used in the collection, processing, interchange and storage of information. In this sense, this standard is as basic for computer and telecommunications applications as an alphabet is to effective human written communications. This standard is the Federal adoption of the voluntary industry standards that have been developed nationally by the American National Standards Institute and internationally by the International Organization for Standardization. The codes involved have been adopted as standards for international data transmission and have been widely implemented by many electronic computing and communications equipment manufacturers in the design of their hardware and software products.

This FIPS PUB reaffirms the continued use of the Standard Code for Information Interchange (ASCII) as a Federal standard and provides further implementation instructions for its effective use by Federal departments and agencies. The implementing instructions provided herein supersede those contained in FIPS PUB 7 dated March 7, 1969. This FIPS PUB also supersedes FIPS PUB 1, dated November 1, 1968. These revised instructions for implementation are based upon recommendations resulting from a study conducted by the National Bureau of Standards on the significance and impact of ASCII as a Federal standard which was accomplished with the cooperative efforts of Federal departments and agencies, the computer industry and non-government users.

Approving Authority. On March 11, 1968, the President of the United States approved ASCII as a Federal standard. On March 7, 1969, the Secretary of Commerce provided implementing instructions for the use of ASCII as a Federal standard. The earlier approval and implementing instructions were promulgated by NBS through FIPS PUBs 1 and 7. Executive Order 11717 of May 9, 1973, transferred to the Secretary of Commerce the function of approving standards on behalf of the President. This revised standard and implementing instructions are approved by the Secretary of Commerce pursuant to section 111(f)(2) of the Federal Property and Administrative Services Act of 1949, as amended.

Maintenance Agency. Department of Commerce, National Bureau of Standards (Institute for Computer Sciences and Technology).

Cross Index. a. American National Standard X3.4–1968, Standard Code for Information Interchange.

b. ISO Standard 646–1973, 7–Bit Coded Character Set for Information Processing Interchange.

c. CCITT Recommendation V3, Vol. VIII, Green Book, 1972, International Alphabet #5.

d. American National Standard X3.41–1974, Code Extension Techniques for Use with the 7–Bit Coded Character Set of American National Standard Code for Information Interchange (FIPS PUB 35).

e. ISO Standard 2022–1973, Code Extension Techniques for Use with the ISO 7–Bit Coded Character Set.

Applicability. This standard is applicable to the representation of character coded information used in information processing and telecommunications applications and among related equipment and software.

Implementation. a. *Effective Date:* Effective upon the publication date of this FIPS PUB, all Federal departments and agencies will implement this standard as specified herein.

b. *Agency Monitoring Official:* Each department and agency head will designate an official who is responsible for monitoring the implementation of this standard within the computer and telecommunications systems of their department or agency. The name and address of this official will be reported to the National Bureau of Standards within thirty days of he publication date of this FIPS PUB.

c. *Agency Implementing Directives:* Each department and agency will issue implementing directives for the use of this standard within their organization. Two copies of these implementing directives will be provided to the National Bureau of Standards within 120 days of the publication date of this FIPS PUB.

d. *Acquisition of New Systems:* All computer and telecommunications systems hardware, software and services acquired for Federal use on or after the publication date of this FIPS PUB must have the capability to accept, generate and process character coded data and programs recorded in accordance with the code and collating sequence provided by this standard unless a waiver has been obtained in accordance with the waiver procedures provided herein.

e. *Procurement Regulations:* The General Services Administration will provide regulations concerning the use of this standard in Federal acquisitions of applicable equipment, software and services.

f. *Compliance Testing:* All computer and telecommunications systems and applicable components acquired after the publication date of this FIPS PUB will be tested before acceptance to assure that these are capable of accepting, processing and generating data and programs that are represented in accordance with this standard.

g. *Benchmarking:* When computer or telecommunications systems and/or appropriate components are tested (benchmarked) as a basis for evaluating vendors' proposals, these tests (benchmarks) will be performed using the character codes and collating sequence prescribed by this standard. This provision applies only to character coded data. Binary, packed decimal and floating point numeric data need not be converted to character codes for such tests.

h. *Interchange of Data:* Within eighteen months of the publication date of this FIPS PUB, all departments and agencies which are authorized to provide or collect character coded data from other Federal agencies or the public will provide the capability of generating or accepting their character coded data recorded in accordance with the provisions of this standard. Where there is a charge for such services, the charge for data recorded in accordance with this standard will be made available at a cost no greater than data recorded in a non-standard form.

i. *Interchange of Programs and Software:* Within eighteen months of the publication date of this FIPS PUB, all computer programs and associated software that are subject to interchange will be designed to function and will be recorded in accordance with the provisions of this standard. (It is essential that all comparisons are performed based that all comparisons are preformed based upon the collating sequence provided by this standard. Otherwise, incorrect results can be obtained or invalid operations can occur.)

j. *Use in Telecommunications Systems Networks:* This standard has been adopted as a standard character code for use in Federal telecommunications systems networks. In these network applications, unless otherwise specified and arranged for, all character data submitted to or received from these networks will be represented in accordance with the provisions of this standard. This implementation does not preclude the transmission of numeric data in a binary, packed decimal or floating point form when these forms of numeric representation of data are more effective; nor does it preclude the use of bit-oriented control procedures and formats for transmission control purposes.

k. *Use of Non-standard Codes and Collating Sequences:* Where interchange of data and/or programs is not involved, existing equipment and files need not be converted to conform to this standard until such time as replacement systems are specified. However, the continued use of non-standard character codes and collating sequences will not be cited as a requirement when replacement systems are acquired. After new or replacement systems are installed that comply with this standard, the standard character code and collating sequence for representing operational data files, programs and software will be used in order to avoid unwarranted conversions and reduced operational performance and to facilitate the authorized exchange of data, programs and software.

l. *Other Applicable Standards:* This standard is equally applicable to other standards that cite its use in recording data on media or in other data processing or communications applications. Appendix A provides a list of those standards that have also been approved and are applicable to the use of this standard. Additional standards and revisions, as these are developed and approved, will be provided by NBS in the FIPS publications series.

Specifications. This standard adopts, in whole, American National Standard X3.4–1968, Standard Code for Information Interchange, current on the publication date of this FIPS PUB.

Qualifications. The collating sequence of characters as provided by this standard is defined by their binary values and is the standard sequence. However, this does not preclude the ordering of files in other sequences to meet special requirements (e.g. files that are sequenced based on proper names or in other instances where the case distinction of the alphabetic characters is to be ignored).

Representation of this standard code in eight-bit environments shall be in accordance with FIPS PUB 35, Code Extension Techniques in 7 or 8 Bits. The standard collating sequence applies only to the 128 characters defined by the seven-bit code as defined by American National Standard X3.4–1968.

Waiver Procedures. a. Heads of Federal departments and agencies or their duly authorized designees may waive the implementation of this standard when it has been determined that its use would seriously affect the capability of the department or agency to effectively perform its mission responsibilities. Requests for waivers will contain complete justification based upon economic, operational and technical reasons therefor. Life cycle cost and performance will be addressed in addition to the initial acquisition considerations. Approved waivers and justifications not involving procurements will be submitted to the Office of the Federal Register, National Archives and Records Service, within seven days after approval for subsequent publication as a notice in the FEDERAL REGISTER. Where the approved waiver pertains to a procurement action, the submission for notice in the FEDERAL REGISTER will be within seven days after the formal release of the solicitation document.

b. Waivers are not required in the following instances:

1. For equipment installed or on order prior to the publication date of this FIPS PUB.

2. Where procurement actions are into the solicitation phase (i.e. Request for Proposals or Invitation for Bids have been issued) on the publication date of this FIPS PUB.

3. When augmenting existing computer installations with additional peripheral or related equipment that must continue to process files recorded in non-standard codes.

c. The National Bureau of Standards will provide technical assistance to agencies relative to their waiver requirements when requested.

Special Information. The National Bureau of Standards is developing techniques to assist Federal departments and agencies in making conversions from non-standard codes. Also, NBS has under development tests for determining the extent that products are in compliance with this standard. When available, these will be announced by NBS for general use.

Where to Obtain Copies of the Specifications of the Standard. a. Federal Government activities should obtain copies from established sources within each agency. When there is no established source, purchase orders should be submitted to the Office of ADP Standards Management, National Bureau of Standards, Washington, D.C. 20234. A catalog of standards with current prices is available from this NBS office.

b. Others may obtain copies from the American National Standards Institute, (ANSI), 1430 Broadway, New York, New York 10018. Refer to X3.4–1968, Standard Code for Information Interchange. A catalog with price information is available from ANSI.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Resources Administration

NURSING RESEARCH AND EDUCATION ADVISORY COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), announcement is made of the following National Advisory body scheduled to assemble during the month of January 1976:

Name: NURSING RESEARCH AND EDUCATION ADVISORY COMMITTEE.

Date and Time: January 14–16, 1976, 9:00 a.m.

Place: Conference Room 6C–01, Federal Building, 7750 Wisconsin Avenue, Bethesda, Maryland 20014.

Closed on January 14.

Open on January 15, 9:00 a.m.–10:00 a.m.

Closed remainder of meeting.

Purpose: The Committee is charged with the initial review of research grant applications in all areas of nursing education and practice, including studies of extended professional roles, model curricula, clinical investigations, historical research, and institutional research development and with surveying the status of research in nursing education and practice.

Agenda: The open portion of the meeting will be devoted to covering administrative and staff reports. During the closed sessions, the committee will be reviewing grant applications for Federal assistance, and will not be open to the public in accordance with the provisions set forth in section 552(b)(5) and (6), Title 5, U.S. Code and the Determination by the Administrator, Health Resources Administration, pursuant to Public Law 92–463.

Anyone wishing to obtain a roster of members, minutes of meeting, or other relevant information should contact Dr. Doris Bloch, Room 6A–14, Federal Building, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014, Telephone (301) 496–6955.

Agenda items are subject to change as priorities dictate.

Dated: December 23, 1975.

JAMES A. WALSH,
Associate Administrator for Operations and Management.

National Institutes of Health

PUBLIC ADVISORY COMMITTEES

Filing of Annual Reports

Pursuant to Public Law 92–463, notice is hereby given that the Annual Reports for the public advisory committees of the National Institutes of Health have been filed with the Library of Congress.

Copies are available to the public for inspection at the Library of Congress, Special Forms Reading Room, Main Building, or on weekdays between 9:00 a.m. and 4:30 p.m. at the Department of Health, Education, and Welfare Department Library, North Building, Room 1436, 300 Independence Avenue, SW., Washington, D.C. 20201, telephone (202) 245–6791.

Dated: December 18, 1975.

DONALD S. FREDRICKSON,
Director, NIH.

[FR Doc.75–34785 Filed 12–24–75;8:45 am]

DIVISION OF RESEARCH GRANTS

Amended Notice of Meetings

Notice is hereby given of a change in the meeting date and/or place of the following National Institutes of Health Study Sections which were published in the FEDERAL REGISTER on November 25, 1975 (40 FR 54602).

The Experimental Therapeutics Study Section was to have convened at 8:30 a.m. on January 15–17, 1976, but has been changed to 8:30 a.m. on January 14–17, 1976 at the Kenwood Country Club, Bethesda, Maryland.

The Genetics Study Section was to have convened at 9:00 a.m. on January 14–17, 1976, but has been changed to 9:00 a.m. on January 15–17, 1976, at Building 31, Conference Room 6, Bethesda, Maryland, the same location for which it was originally scheduled.

The Pathology A Study Section was to have convened at 9:00 a.m. on January 7–9, 1976, but has been changed to 9:00 a.m. on January 6–9, 1976, at the Sheraton Inn, Silver Spring, Maryland, the same location for which it was originally scheduled.

The Pathology B Study Section was to have convened at 9:00 a.m. on January 8–10, 1976, but has been changed to 9:00 a.m. on January 7–10, 1976, at the Kenwood Country Club, Bethesda, Maryland, the same location for which it was originally scheduled.

These meetings will be open to the public for approximately one hour at the beginning of the first session of the first day of the meeting.

Dated: December 15, 1975.

GENERAL RESEARCH SUPPORT PROGRAM ADVISORY COMMITTEE

Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the General Research Support Program Advisory Committee of the Division of Research Resources, February 19–20, 1976, from 9:00 a.m. to 5:00 p.m. in Building 31, Conference Room 9, Bethesda, Maryland. This meeting will be open to the public from 9:00 a.m. to 1:30 p.m. on February 19, 1976, to discuss administrative matters relating to programs. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552(b)(4), 552(b)(5) and 552(b)(6), Title 5, U.S. Code and Section 10(d) of Public Law 92–463, the meeting of the General Research Support Program Advisory Committee will be closed to the public on February 19 from 1:30 p.m. to 5:00 p.m. and on February 20, from 9:00 a.m. to adjournment for the review, discussion and evaluation of individual initial pending, supplemental and renewal grant applications. The closed portions of the meetings involve solely the internal expression of views and judgments of committee members on individual grant applications containing detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications.

Mr. James Augustine, Chief, Office of Science and Health Reports, Division of Research Resources, National Institutes of Health, Building 31, Room 5B39, Bethesda, Maryland 20014, telephone (301) 496–5545 will furnish rosters of committee members, a summary of the meeting, and other information pertaining to the meeting.

CIVIL AERONAUTICS BOARD

FEDERAL EXPRESS CORP. ET AL.

[Order 75–12–111; Docket 25863 and 22322]

ORDER AMENDING ORDER

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 19th day of December, 1975.

By Order 75–12–5, served December 2, 1975, the Board granted and denied certain petitions for reconsideration in Dockets 22322 and 25953. Inadvertently, however, the order did not reflect the answer which had been filed by Executive Jet Aviation (EJA) in response to the petition of the Federal Express Corporation. While this unintentional omission does not effect our ultimate findings and conclusions, we nevertheless intend to amend Order 75–12–5 in order to acknowledge the answer of EJA and clarify the basis of our decision.

EJA originally entered this case in opposition to an application requesting a disclaimer of jurisdiction or approval of the acquisition by the General Dynamics Corporation and other investors of varying amounts of equity securities of the Federal Express Corporation. By Order 75–3–42, March 13, 1975, we set the application for hearing, and granted EJA's petition for leave to intervene. On April 23, 1975, Federal Express filed a

V 40 249 DEC 29 75 XUM V

petition for reconsideration of Order 75–3–42. In its answer to that petition, EJA stated that it would withdraw both its opposition to Federal Express' application and its request for a hearing thereon if a condition suggested by Federal Express in its petition were imposed. The condition would limit Federal Express to cargo-only operations.

While the Board based its original determination to hold a hearing, in part, upon the understanding that EJA opposed the application, the order on reconsideration clearly states that even in the absence of EJA's opposition, the public interest independently requires a a hearing. Specifically, we said:

"In any event, while our decision to set this matter for hearing took into consideration the answer of Executive Jet Aviation opposing the application, it has always been our basic view that a hearing in this instance is needed in the *public* interest, regardless of lack of formal opposition." (Order 75–12–5, page 5)

Thus, even in light of EJA's answer (which is only one of many considerations to be taken into account) the Board remains convinced that a hearing is necessary in this matter.

Accordingly, *It is ordered that:*

Order 75–12–5 be and it hereby is amended by striking the first sentence on page 5 thereof and inserting the following in its place:

"We note that on May 5, 1975, Executive Jet Aviation filed an answer to the petition stating that it would withdraw its opposition and request for hearing upon the imposition of such a restriction."

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.75–34886 Filed 12–24–75;8:45 am]

[Order 75–12–100; Docket 27573; Agreement C.A.B. 25567]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Specific Commodity Rates

Issued under delegated authority December 19, 1975.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of Traffic Conference 3 of the International Air Transport Assication (IATA). The agreement was adopted at the 14th Meeting of the TC3 Specific Commodity Rates Board held in Hollywood Beach, Florida on October 6, 1975.

With respect to air transportation as defined by the Act the agreement proposes revisions to the specific commodity rate structure between Guam and other Pacific points; establishes several new community descriptions; alters the wording on several existing descriptions; and amends certain other descriptions to preclude or permit their application in the intra-Pacific area. We will approve the new and changed descriptions which have general application within air transportation as defined by the Act but will disapprove the rates that reflect rate increases disapproved by Order 75–11–78.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14:

1. It is not found that the new specific commodity descriptions, listed in attached Appendix A [1] and incorporated in Agreement C.A.B. 25567, which have general application in air transportation as defined by the Act, are adverse to the public interest or in violation of the Act; and

2. It is found that the specific commodity rates, incorporated in Agreement C.A.B. 25567 and listed in attached Appendix B, are adverse to the public interest and in violation of the Act.

Accordingly, *It is ordered that:*

1. Those portions of Agreement C.A.B. 25567 set forth in Appendix A which have general application in air transportation as defined by the Act, be and hereby are approved; and

2. Those portions of Agreement C.A.B. 25567, set forth in Appendix B, be and hereby are disapproved.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

By James L. Deegan, Chief, Passenger and Cargo Rates Division, Bureau of Economics.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN COTTON TEXTILE PRODUCTS FROM PAKISTAN

Establishing Levels of Restraint, Effective on January 1, 1976

DECEMBER 19, 1975.

On May 6, 1975, in furtherance of the objectives of, and under the terms of, the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, the Governments of the United States and Pakistan concluded a comprehensive bilateral cotton textile agreement concerning exports of cotton textiles and cotton textile products from Pakistan to the United States. Among the provisions of the agreement are those establishing an aggregate limit for the 64 categories; group limits for Categories 1–27 and 28–64; and within the aggregate and group limits, specific export limitations on Categories 9/10, 18/19 and part of 26 (printcloth), 22/23, parts of 26 (barkcloth and duck), 31 (other than shop towels), and 41/42 for the agreement year beginning on January 1, 1976.

Accordingly, there is published below a letter of December 19, 1975 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that for the twelve-month period beginning on January 1, 1976 and extending through December 31, 1976 entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 9/10, 18/19 and part of 26 (printcloth), 22/23, parts of 26 (barkcloth and duck), 31 (other than shop towels), and 41/42 be limited to the designated levels. The levels set forth below for Categories 9/10, 18/19 and part of 26 (printcloth), 26 (duck), and 31 (other than shop towels) have been adjusted to account for previous overshipments in these categories, as agreed between the Governments of the United States and Pakistan.

The letter published below and the actions taken pursuant thereto are not designed to implement all of the provisions

V 40 249 DEC 29 75 XUM

of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

DECEMBER 19, 1975.

DEAR MR. COMMISSIONER: According to the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to the Bilateral Cotton Textile Agreement of May 6, 1975 between the Governments of the United States and Pakistan, and in accordance with provisions of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective on January 1, 1976 and for the twelve-month period extending through December 31, 1976, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 9/10, 18/19 and part of 26 (printcloth), 22/23, parts of 26 (barkcloth and duck), 31 (other than shop towels), and 41/42, in excess of the following levels of restraint:

Category:		*12-month level of restraint*
9/10	square yard	47,932,142
18/19/26 (printcloth)[1]	do	20,641,476
22/23	do	5,688,000
26 (barkcloth)[2]	do	8,532,000
26 (duck)[2]	do	12,027,524
31 (other than shop towels)[4]	pieces	13,289,400
41/42	dozen	966,476

[1] In Category 26 the T.S.U.S.A. Numbers for printcloth are:

320.—34	326.—34
321.—34	327.—34
322.—34	328.—34

[2] In Category 26 the T.S.U.S.A. Numbers for barkcloth are:

320.—88	320.—92
321.—88	321.—92
322.—88	322.—92
323.—88	323.—92
324.—88	324.—92
325.—88	325.—92
326.—88	326.—92
327.—88	327.—92
328.—88	328.—92
329.—88	329.—92
330.—88	330.—92
331.—88	331.—92

[3] In Category 26 the T.S.U.S.A. Numbers for duck fabric are: 320.—01 through 04, 06, 08, 321.—01 through 04, 06, 08, 322.—01 through 04, 06, 08, 326.—01 through 04, 06, 08, 327.—01 through 04, 06, 08, 328.—01 through 04, 06, 08.

[4] All T.S.U.S.A. Numbers in Category 31 except T.S.U.S.A. Number 366.2740.

In carrying out this directive, entries of cotton textile products in the above categories, produced or manufactured in Pakistan, which have been exported to the United States from Pakistan, prior to January 1, 1976 shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods for the eighteen-month period beginning on July 1, 1974 and extending through December 31, 1975. In the event the levels of restraint established for that eighteen-month period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels of restraint set forth above are subject to adjustment according to the provisions of the bilateral agreement of May 6, 1975 between the Governments of the United States and Pakistan which provide, in part, that: (1) within the aggregate and group limits of the agreement, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions of the bilateral agreement referred to above will be made to you by letter.

A detailed description of the categories in terms of T.S.U.S.A. Numbers was published in the FEDERAL REGISTER on February 3, 1975 (40 F.R. 5010).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Pakistan and with respect to imports of cotton textiles and cotton textile products from Pakistan have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,
Chairman Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance U.S. Department of Commerce.

[FR Doc.75-34765 Filed 12-24-75;8:45 am]

CERTAIN COTTON TEXTILE PRODUCTS FROM THE SOCIALIST REPUBLIC OF ROMANIA

Establishing Control Levels, Effective on January 1, 1976

DECEMBER 19, 1975.

On June 2, 1975, in furtherance of the objectives of, and under the terms of, the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, the Governments of the United States and the Socialist Republic of Romania concluded a comprehensive bilateral cotton textile agreement concerning exports of cotton textiles and cotton textile products from Romania to the United States over a period of three years beginning on January 1, 1975. Among the provisions of the agreement are these establishing designated annual consultation levels for Categories 26 (other than duck), 41, 42, 43, 47, 48, 49, and 50 for the agreement year beginning on January 1, 1976.

Accordingly, there is published below a letter of December, 1975 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that for the twelve-month period beginning on January 1, 1976 and extending through December 31, 1976 entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 26 (other than duck), 41, 42, 43, 47, 48, 49, and 50 be limited to the designated levels.

This letter and the actions taken pursuant thereto are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

DECEMBER 19, 1975.

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to the Bilateral Cotton Textile Agreement of June 2, 1975 between the Governments of the United States and the Socialist Republic of Romania, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective on January 1, 1976 and extending through December 31, 1976 entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 26 (other than duck), 41, 42, 43, 47, 48, 49, and 50, in excess of the following levels of restraint:

Category:		*12-mo. level of restraint*
26 (other than duck)[1]	square yards	3,000,000
41	dozen	414,708
42	do	414,708
43	do	414,708
47	do	67,610
48	do	80,000
49	do	92,308
50	do	168,568

In carrying out this directive, entries of cotton textile products in the foregoing categories, produced or manufactured in Romania and exported to the United States prior to January 1, 1976 shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the period January 1, 1975 through December 31, 1975. In the event that the levels of restraint established for that twelve-month period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

[1] In Category 26 the T.S.U.S.A. Numbers for duck fabric are: 320.—01 through 04,06,08, 321.—01 through 04,06,08, 322.—01 through 04,06,08, 326.—01 through 04,06,08, 327.—01 through 04,06,08, 328.—01 through 04,06,08.

The levels set forth above are subject to adjustment in the future, pursuant to the provisions of the bilateral agreement of June 2, 1975 between the Governments of the United States and the Socialist Republic of Romania which provide, in part, that: (1) consultation levels may be increased within the aggregate ceiling upon agreement between the two governments; (2) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Appropriate adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Socialist Republic of Romania and with respect to imports of cotton textiles and cotton textile products from Romania have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COTTON TEXTILES AND COTTON TEXTILE PRODUCTS FROM THE SOCIALIST FEDERAL REPUBLIC OF YUGOSLAVIA

Terminating Export Visa Requirements

DECEMBER 19, 1975.

On March 11, 1965, there was published in the FEDERAL REGISTER (30 F.R. 3336) a letter of March 8, 1965 from the Chairman of the Interagency Textile Administrative Committee to the Commissioner of Customs, prohibiting entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textiles and cotton textile products, produced or manufactured in Yugoslavia and exported to the United States, for which the Government of the Socialist Federal Republic of Yugoslavia had not issued a visa. The purpose of this notice is to advise that the export visa requirement is being terminated, effective January 1, 1976.

Accordingly, there is published below a letter of December 19, 1975 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs cancelling the directive of March 8, 1965, as amended.

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

DECEMBER 19, 1975.

DEAR MR. COMMISSIONER: This directive cancels and supersedes the directive of March 8, 1965, as amended, from the Chairman, Interagency Textile Administrative Committee, which directed you to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textiles and cotton textile products, produced or manufactured in Yugoslavia, for which the Government of the Socialist Federal Republic of Yugoslavia had not issued an appropriate export visa.

The actions taken with respect to the Government of the Socialist Federal Republic of Yugoslavia and with respect to imports of cotton textiles and cotton products from Yugoslavia have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions of the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance U.S. Department of Commerce.

CERTAIN COTTON AND MAN-MADE FIBER TEXTILE PRODUCTS FROM MACAU

Establishing Control Levels, Effective January 1, 1976

DECEMBER 19, 1975.

On March 3, 1975, in furtherance of the objectives of, and under the terms of, the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, the Governments of the United States and Portugal concluded a comprehensive bilateral cotton, wool and man-made fiber textile agreement concerning exports of cotton, wool and man-made fiber textile products from Macau to the United States over a period of three years beginning on January 1, 1975. Among the provisions of the agreement are those establishing specific export limitations for Categories 49, 50/51, 219, 221, 222, 223, 224, and 229 for the agreement year beginning on January 1, 1976.

Accordingly, there is published below a letter of December 19, 1975 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that the amounts of cotton and man-made fiber textile products in Categories 49, 50/51, 219, 221, 222, 223, 224, and 229, produced or manufactured in Macau, which may be entered or withdrawn from warehouse for consumption in the United States during the twelve-month period beginning on January 1, 1976 and extending through December 31, 1976, be limited to the designated levels.

This letter and the actions taken pursuant thereto are not designed to implement all of the provisions of the new bilateral agreement but are designed to assist only in the implementation of certain of its provisions.

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

DECEMBER 19, 1975.

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of March 3, 1975, between the Governments of the United States and Portugal, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective on January 1, 1976 and for the twelve-month period extending through December 31, 1976, entry into the United States for consumption and with drawal from warehouse for consumption of cotton textile products in Categories 49 and 50/51 and man-made fiber textile products in Categories 219, 221, 222, 223, 224, and 229, produced or manufactured in Macau, in excess of the following levels of restraint:

Category		*12-month level of restraint*
49	dozen	32,439
50/51	do	62,531
219	do	422,613
221	do	77,852
222	do	293,871
223	do	132,503
224	pounds	306,082
229	dozen	168,076

In carrying out this directive, entries of cotton and man-made fiber textile products in the foregoing categories, produced or manufactured in Macau, which have been exported to the United States before January 1, 1976, shall, to the extent of any unfilled balances, be charged against the levels of

V 401249 DEC 29 75 XUM

restraint established for such goods during the period January 1, 1975 through December 31, 1975. In the event the levels of restraint for that period has been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels of restraint set forth above are subject to adjustment according to the provisions of the bilateral agreement of March 3, 1975 between the Governments of the United States and Portugal which provide, in part, that: (1) within the aggregate and applicable group limits of the agreement, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate future adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Portugal and with respect to imports of cotton, wool and man-made fiber textile products from Macau have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COMMODITY FUTURES TRADING COMMISSION

ADVISORY COMMITTEE ON DEFINITION AND REGULATION OF MARKET INSTRUMENTS

Advisory Committee Meeting

Notice is hereby given, pursuant to Section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. I, § 10(a), that the Commodity Futures Trading Commission Advisory Committee on Definition and Regulation of Market Instruments ("Advisory Committee on Market Instruments") will conduct a public hearing on January 14, 1976, at the Los Angeles Hilton, 930 Wilshire Boulevard, Los Angeles, California in the Garden East Room, beginning at 9:30 a.m. The Advisory Committee on Market Instruments was chartered to consider and submit reports and recommendations to the Commission on the following subjects:

(1) Appropriate standards to be utilized by the Commission in regulating forms of transactions that are subject to the Commodity Exchange Act, as amended, including consideration of such matters as:

(i) Appropriate standards to be utilized by the Commodity Futures Trading Commission regarding the definition of commodity futures contracts; and

(ii) Appropriate restrictions or prohibitions for options relating to commodity transactions and margin or leverage transactions subject to Section 217 of the CFTC Act.

(2) Responsibilities of the Commission over cash commodity markets. This will include consideration of such matters as:

(i) Contracts for forward delivery;

(ii) Cash market manipulations; and

(iii) Data and reporting needs for cash markets.

The Committee is seeking testimony on the following questions:

(1) To what extent and in what manner may and should the Commodity Futures Trading Commission exercise regulatory authority over cash commodity markets?

(2) Under what terms and conditions, if any, should the Commodity Futures Trading Commission allow the public offering and sale of "leverage contracts" or "margin contracts" involving gold or silver bullion or gold or silver bulk coins?

(3) Under what terms and conditions, if any, should the Commodity Futures Trading Commission allow the public offering and sale of commodity option contracts?

In addition to a public hearing to be conducted by the full Committee, the three subcommittees will conduct separate meetings open to the public.

The Subcommittee on Cash Commodity Markets will meet at the conclusion of the public hearing on January 14 in the Garden East Room of the Los Angeles Hilton. The Subcommittee will address the sufficiency of available price and supply data with regard to those commodities which are presently traded on a future delivery contract basis.

The Subcommittee on Futures, Forward and Leverage Contracts will meet at 9:00 a.m., January 15 in the Garden East Room of the Los Angeles Hilton. The Subcommittee will continue discussion and consideration of the legal and economic distinctons among futures, forward and leverage contracts.

The Subcommittee on Commodity Options will meet at 1:00 p.m., January 15 in the Garden East Room of the Los Angeles Hilton. The Subcommittee will address the terms and conditions which should apply to the public offering and sale of options, should the CFTC decide to approve such transactions. The Subcommittee will also consider what additional considerations, if any, should apply to the public offering and sale within the United States of foreign commodity options.

All meetings are open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgement, facilitate the orderly conduct of business. Any member of the public that wishes to testify at the public hearing should write or call Mr. Edward J. Nowicki, Jr., Commodity Futures Trading Commission, 1120 Connecticut Avenue, N.W., Washington, D.C. 20036, telephone (202) 254-6575 by January 9, 1976. Any member of the public that wishes to file a written statement with the Committee should mail a copy of the statement to Mrs. Harrison, The Advisory Committee on Market Instruments, Commodity Futures Trading Commission, 1120 Connecticut Avenue, N.W., Washington, D.C. 20036, by January 9, 1976.

The Commission is maintaining a list of persons interested in the operations of this advisory committee and will mail notice of the meetings to those persons. Interested persons may have their names placed on this list by writing LeVan L. Shumway, Director, Office of Public Information, Commodity Futures Trading Commission, 1120 Connecticut Avenue, N.W., Washington, D.C. 20036.

Dated: December 19, 1975.

WILLIAM T. BAGLEY,
Chairman,
Commodity Futures Trading Commission.

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

Availability

Environmental impact statements received by the Council on Environmental Quality from December 15 through December 19, 1975. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements is forty-five (45) days from this FEDERAL REGISTER notice of availability. (February 9, 1976). The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies will also be available at cost from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE

Contact: Dr. Fowden G. Maxwell, Coordinator of Environmental Quality Activities, Office of the Secretary, U.S. Department of Agriculture, Room 359-A, Washington, D.C. 20250, 202-447-3965.

FOREST SERVICE

Draft

East R. & Upper Crystal R. Land Use Plan Gunnison County Colo., December 19: Proposed is the updating of existing Multiple Use Management Direction on National Forest land in the East River Unit of the Gunnison National Forest and the Upper Crystal River Unit of the White River National Forest in Gunnison County, Colorado. Possible adverse effects include the reduction of property values of some private land, and the eventual loss of attributes exclusive to wilderness in Non-selected Roadless Areas GOI, GPI and GR. (ELR Order No. 51839.)

Mt. Welba Unit Land Use Plan, Routt N.F. Moffat County Colo., December 19: Proposed is the implementation of a land use plan (multiple use plan) for the Mt. Welba Unit, Bears Ears Ranger District, Routt National Forest, Moffat County, Colorado. The Unit contains 13,440 acres of National Forest lands. Adverse effects include modification of scenic values, periodic and temporary changes in water and air quality and increased soil erosion. (ELR Order No. 51840.)

Basket Bay No. 2 Timber Sale, Tongass N.F. Alaska, December 17: The statement deals with the proposal to salvage approximately 5.5 million board feet of blowdown timber from the 1968 Thanksgiving Day storm within the Kook Lake watershed on Chichagof Island. No roads would be constructed or reconstructed and the timber would be clearcut utilizing a helicopter yarding system. The project would remove 186 acres from an undeveloped category, and would result in noise that could have an impact on recreation use of Kook Lake cabins. Comments made by: DOC, HUD, DOI, EPA, and State agencies and one individual. (ELR Order No. 51826.)

SOIL CONSERVATION SERVICE

Final

Okatoma Creek Watershed, Mississippi, several counties, December 18: The statement refers to a watershed protection project on the Okatoma Watershed. Project measures include levee systems, floodwater retarding structures, recreational facilities, and 53.7 miles of channel work. Construction will result in the clearing of some forest land, and reduction in fishery and wildlife resources. Comments made by: USA, HEW, DOI, DOT, EPA, AHP, and State agencies. (ELR Order No. 51836.)

DEPARTMENT OF DEFENSE

ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Development, Attn: DAEN-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue, SW., Washington, D.C. 20314, 202-693-6795.

Draft

Redwood Shores Shopping Center, Permit, San Mateo County, Calif., December 17: Mobil Oil Estates (Redwood) Ltd., Redwood City, California has applied for a Department of Army permit to fill and do storm drainage improvements on the 210-acre area and to improve the existing dike along Steinberger Slough in preparation for the eventual construction of a regional shopping center. Adverse effects include change in land use from open space to urban area, loss of levee-impounded marshland, and water runoff alteration. (ELR Order No. 51832.)

Atlantic IC Waterway Side Channels, Maintenance, several counties in N.C., December 15: The action involves the maintenance of nine authorized side channels to the Atlantic Intracoastal Waterway from Morehead City to Southport, North Carolina. Adverse effects on aquatic organisms will result from turbidity and the removal of benthic organisms. Terrestrial organisms will be buried in the upland diked disposal areas and benthic organisms covered in overhead disposal. (Wilmington District). (ELR Order No. 51819.)

Shallotte & Lockwoods Folly Rivers, Maintenance, Brunswick County, N.C., December 19: The action involves maintenance activities in existing navigation projects in Shallotte and Lockwoods Folly Rivers, North Carolina. Maintenance consists of the removal of shoals in the two navigable water systems. Shoal removal will adversely affect aquatic life and terrestrial organisms will be buried in the upland diked disposal areas. (Wilmington District), (ELR Order No. 51841.)

Offshore Terminal & Submarine Pipeline, Permit, Virgin Islands, December 17: Proposed is the issuance of a dredge and permit application to Hess Oil Virgin Islands Corporation (HOVIC) for the purpose of constructing an offshore oil tanker unloading terminal and submarine pipeline approximately 2 miles south of the HOVIC refinery at Limetree Bay, St. Croix. Adverse effects include destruction of 4½ acres of reef coral habitat and killing of some fish by blasting. Suffocation of adjacent corals, benthic algaes, and seagrasses would also occur due to suspended solids. (Jacksonville District). (ELR Order No. 51827.)

Final

Coos Bay (Supplement), Coos County Oreg., December 18: Proposed is the construction of a channel across the outer bar of Coos Bay 45 feet deep and 700 feet wide; reducing gradually to 35 feet deep and 300 feet wide, and a 15-mile long inner channel. The project also includes the enlarging of existing turning basins. Construction will involve blasting, dredging, and disposal of an estimated 8,550,000 cubic yards of material at sea, in-Bay, and on land. Construction disruption and disturbance of 125 acres of ocean and estuarine bottom area and 437 acres of land disposal area, would result. When the project is completed, the area will require about 1 to 2 months additional dredging time each dredging interval. (Portland), Comments made by: DOI, EPA, HUD, USDA, FPC, DOC, and State and local agencies and inviduals. (ELR Order No. 51837.)

Freeport Hurricane Flood Protection, Tex., December 18: The statement refers to the completion of the hurricane flood protection project for Freeport and vicinity to provide protection to the cities and towns of Freeport, Lake Jackson, Clute, Lake Barbara and adjacent areas. Construction of a tidal control and navigation structure in Old River will cause temporary turbidity during construction and destruction of some benthic organisms. Comments made by: USDA, DOC, DOT, HEW, HUD, EPA, AHP, and State and local agencies. (ELR Order No. 51834.)

Squalicum Small Boat Basin, Wash., December 17: Proposed is the enlarging of Squalicum Small Boat Basin an additional 46 acres to provide moorage space for about 725 recreational boats. The project involves the removal of 600 feet of existing breakwater, the construction of 1,500 feet of a new breakwater and the dredging of 1,000,000 cubic yards of material. Adverse impacts include the disturbance of migrating salmon and the dreding of wetlands. (Seattle District). Comments made by: EPA, HUD, DOC, USDA, DOT, DOI, AHP, and State and local agencies. (ELR Order No. 51829.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Mr. Sheldon Meyers, Director, Office of Federal Activities, Room 3630 Waterside Mall, Washington, D.C. 20460, 202-755-0940.

Draft

Arlington-East District Wastewater Facilities, Duval County, Fla., December 17: Proposed is the awarding of grant funds to the City of Jacksonville, Florida for the preparation of plans and specifications for regional wastewater treatment facilities to service the Arlington-East District. Adverse impacts include the loss of 46.98 acres of wildlife habitat. The operation of the facility will cause the discharge of initially 10 mgd and ultimately 25 mgd of secondary treated wastewater to the St. James River. (ELR Order No. 51825.)

FEDERAL POWER COMMISSION

Contact: Dr. Jack M. Heinermann, Acting Asst. Director, for Environmental Quality, 441 G Street NW., Washington, D.C. 20426, 202-275-4791.

Final

Southern Natural Pipeline System Curtailment, December 18: The action consists of FPC's analysis of two permanent curtailment plans for the Southern Natural Pipeline System. The plan will result in increased use of coal and oil to replace the curtailed natural gas and the associated cost increases, and increased pollution in the form of sulfur dioxide and particulates. Alternatives considered in the statement are unregulated curtailment and new sources of gas supplies. Reference is made to the fact that rate structure and deregulation are not included as alternatives to curtailment. Comments made by: DOI, DOC, and State and local agencies. (ELR Order No. 51833.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director Office of Environmental Quality, Room 7258, 451 7th Street SW., Washington, D.C. 20410, 202-755-6308.

Final

Hutchinson's Green Mt. Village Development, Jefferson County, Colo., December 18: The statement concerns approval of FHA mortgage insurance for Hutchinson's Green Mountain Village—A Planned Development. The 1006-acre, 5098-unit development will provide housing for middle-income families. Adverse impacts include: the alteration of existing plant and animal communities; the increased load on the Lakewood and Denver metropolitan region infrastructure, particularly the solid waste disposal and transportation components; and increased automobile generated pollutants. Comments made by: EPA, DOI, USDA, HEW, COE, FEA, VA, and AHP. (ELR Order No. 51835.)

Eagle Valley Farms, Mortgage Insurance, Marion County, Ind., December 19: The statement concerns the application for Mortgage Insurance for a single family subdivision on 470 acres of land in Indianapolis, Illinois. The proposed development is adjacent to Interstate I-74 and 1465 and U.S. 136. The project will result in a slight decline in farmland. Comments made by: DOC, HEW, DOI, DOT, GSA, USDA, EPA, AHP, and State and regional agencies. (ELR Order No. 51842.)

Section 104(h). The following are Community Development Block Grant statements prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local chief executive. (Copies are not available from HUD.)

Draft

Downtown-West Redevelopment Project, Norfolk, several counties, Va., December 17: The proposed project consists of eliminating blight and negative environmental factors on 67 acres of downtown waterfront property, the provision of as much as 3,300 units of housing and 120,000 square feet of compatible waterfront-related commercial activity, and the provision of public access and amenities along the Elizabeth River in Norfolk, Virginia. Adverse effects include impacts on air quality, noise, public services and the adjacent historic district. (ELR Order No. 51831.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 7260, Department of the Interior, Washington, D.C. 20240, 202-343-3891.

V 40 249 DEC 29 75 XUM

BUREAU OF LAND MANAGEMENT

Draft

Colony Development, Oil Shale Resources, Utah, Colo., December 15: The proposed action is the consideration of a right-of-way permit for an oil shale products pipeline from a plant site in Colorado to Lisbon Valley, Utah. Related to this Federal action would be a 337-acre exchange between BLM and Colony Development Corporation. Adverse impacts include emission of odors characteristic of refining and shale processing, decrease in water quality, destruction of a section of the Middle Fork Creek stream bed, and increased sedimentation. (ELR Order No. 51820.)

BUREAU OF OUTDOOR RECREATION

Draft

Dolores National Wild and Scenic River, several counties, Colo., December 16: Proposed is legislative action to include a 105-mile segment of the Dolores River and 56,400 acres of adjacent land located in the State of Colorado in the National Wild and Scenic Rivers Systems classified as 33 miles wild, 41 miles scenic, and 31 miles recreational. Adverse effects include increased litter, pollution of water and air, and other impacts associated with increased visitation to the proposal area. (ELR Order No. 51823.)

BONNEVILLE POWER ADMINISTRATION

Draft

W. Burley Service Station, Location (Supplement), Cassia county, Idaho, December 17: This statement is the supplement to the BPA FY 1977 draft EIS filed with CEQ July 17, 1975. Proposed is the construction of approximately 7 miles of 138-kV transmission lines between the newly planned West Burley Substation and BPA's Unity Substation, both near Burley, Idaho. Adverse impacts include disturbance to natural vegetation, cropland, and associated wildlife habitat. Noise and other disturbances to residents will occur. (ELR Order No. 51826.)

BUREAU OF RECLAMATION

Neuces River Project, Tex., Live Oak, and McMullen County, Tex., December 16: Proposed is the construction of an earthfill dam and reservoir on the Choke Canyon site of the Frio River. The project is intended to provide municipal and industrial water supply for the Corpus Christi Coastal Bend area, improve downstream freshwater sport fishing, and provide reservoir-based recreation and fishing. Adverse impact would include the taking of 33,860 acres, 80 residences, and related utilities; the inundation of 26,000 acres of wildlife habitat and 34 miles of fish habitat; and the salvage or loss of archeological resources. The effects of the project's water inflow to Corpus Christi Bay would be to increase salinity, modify the Bay's productive capacity, and reduce estuarine fishing. Comments made by: AHP, DOI, USA, DOC, HEW, HUD, DLAB, DOT, EPA, FPC, and State and local agencies and individuals. (ELR Order No. 51822.)

Central Utah Project, Jensen Unit, Uintah County, Utah, December 16: The statement concerns the construction and operation of the Jensen Unit to develop water to irrigate and to augment existing municipal supplies. About 520 acres of land would be inundated by Tyzack Reservoir. The major permanent impact would be scars along the aqueduct alignment which would resist restoration measures. Salinity of the lower Colorado River is estimated to be increased 1.6mg/1 at Imperial Dam as a result of the project. Comments made by: AHP, USDA, USA, EPA, HEW, HUD, DOI, and State and local agencies. (ELR Order No. 51824.)

NATIONAL PARK SERVICE

Draft

St. Croix National Scenic Riverway, Minnesota, and Wisc., December 15: Proposed is the provision of a master plan for the use, preservation, development, and interpretation of the St. Croix National Scenic Riverway and adjacent state lands. Plan implementation would require 77.35 acres of clean-cleared space, 17.35 of which would be removed from available wildlife habitat. Wildlife use of the remaining 60 acres will be reduced. (ELR Order No. 51817.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street, S.W., Washington, D.C. 20590, 202-426-4357.

FEDERAL AVIATION ADMINISTRATION

Final

Manistee County—Blacker Airport, Manistee County, Mich., December 17: The statement refers to the improvement of the Manistee County-Blacker Airport in the city of Manistee. The project involves land acquisition, construction of a combination firecrash maintenance and electrical vault building, installation of lights and markings on one runway, the abandonment of another runway, extension of an apron, and the construction of a taxiway. Adverse impact are the removal of vegetation and topping of trees on part of the 21 acres of aviation easement, and increased levels in the and noise pollution. Comments made by: EPA, DOI, DOT, COE, AHP, USDA, and State and local agencies. (ELR Order No. 51830.)

FEDERAL HIGHWAY ADMINISTRATION

Draft

M-21 Relocation, From M-24 to Near Wadhams, Lapeer, and St. Clair County, Mich., December 15: This project consists of approximately 40 miles of a limited access arterial freeway from M-24 in Lapeer County, easterly to existing M-21 near Wadhams in St. Clair County, Michigan. The new facility would cause the removel of agricultural lands from production, the displacement of residences and other structures, and the alteration of local highway access routes by closure of several county roads. (ELR Order No. 51818.)

SR-90, Junction SR-5 to Vicinity Junction SR-405, King County, Wash., December 18: Proposed is the construction of a 10-lane Interstate Freeway, (SR-90), extending from Junction SR-5 to Vicinity Junction SR-405. Project length is 6.70 miles. Adverse effects include displacement of residences and businesses, the elimination of native vegetation, and the destruction of a small amount of wildlife. A 4(f) statement is included in reference to Sturgas Park, Judkins Playground and Luther Burbank Park. (ELR Order No. 51838.)

U.S. COAST GUARD

Final

Vessel Traffic System, Houston-Galveston Area, Tex., December 15: The statement refers to the establishing of a Vessel Traffic System for the Houston-Galveston area consisting of a combination of VHF-FM Communications, radar surveillance, and a Vessel Movement System in part, or total. There will be a slight noise increase during construction. Comments made by: DOC, USN, USA, DOI, DOT, EPA, and State and local agencies. (ELR Order No. 51821.)

ARMY, NAVY AND AIR FORCE

List of Actions Requiring Environmental Impact Statements

The following list, filed with the Council by the Department of Defense, Army, Navy, and Air Force, indicates those administrative actions that USA, USN, and USAF have determined will require the preparation of environmental impact statements under NEPA.

U.S. Army actions requiring preparation of envirohmental impact statements:

Statements under Preparation:

Subject and Date Scheduled

1. Land acquisition, Ft Carson, CO, 1st qtr 76 (FEIS).
2. Family housing project, Ft Belvoir, VA, 2d qtr 76 (FEIS).
3. South approach, Golden Gate Bridge, Presidio of San Francisco, CA, 2d qtr 77 (FEIS).
4. Family housing, Ft Bragg, NC, Unscheduled (DEIS).
5. Real estate acquisition, Ft Hood, TX, 1st qtr 76 (DEIS).
6. Military operations and activities, 4th Infantry Div. (mech) and Ft Carson, CO, 1st Qtr 76 (DEIS).
7. White Sands Missile Range Interaction with White Sands National Monument, NM, 1st Qtr 76 (FEIS).
8. Military Operations and Mission Change, Ft Polk, LA, 4th Qtr 75 (DEIS).
9. Project EAGLE—Expanded: Supplement C, WETEYE Bombs, Rocky Mt Ars, CO, 4th Qtr 75; Supplement D, HONEST JOHN Warhead, Rocky Mt Ars, CO, 4th Qtr 75 (FEIS).
10. Demilitarization of Toxic-Filled Munitions at US Army Installations, 1st Qtr 76 (DEIS).
11. Project EAGLE, Phase III, Disposal of Obsolete Phosgene (carbonyl chloride), Unschedule (DEIS).
12. Division Stationing Plan and Consolidation of Activities, Ft Ord, CA, 4th Qtr 75 (DEIS).
13. Real Estate Acquisition, Ft Benning, GA, 4th Qtr 75 (DEIS).
14. Off-Post Low Level Helicopter Training, Ft Campbell, KY, 4th Qtr 75 (DEIS).
15. Chemical Agent/Munition Disposal System (CAMDS), 2d Qtr 76 (DEIS).
16. Disposal of Toxic Residue, West Granite Area, Dugway Proving Ground, UT, 2d Qtr 76 (FEIS).
17. Maintenance Dredging at Military Ocean Terminal, Kings Bay, GA, 2d Qtr 76 (FEIS).
18. Mississippi Army Ammunition Plant, Picayunne, MS, 1st Qtr 76 (FEIS).
19. Land Acquisition White Sands Missile Range, (WSMR), TX, 4th Qtr 75 (DEIS).
20. High Explosive Field Test Program (DICETHROW) WSMR, TX, 1st Qtr 76 (DEIS).
21. Activities and Training Mission, Ft Sill, OK, Unscheduled (DEIS).
22. Division Stationing, Ft Stewart/Hunter Army Airfield, GA, 1st Qtr 76 (DEIS).
23. Installation Operations, Ft Lewis, WA, 1st Qtr 76 (DEIS).
24. Vancouver Barracks, WA, 3rd Qtr 76 (DEIS).
25. Recreation Center, Ft Bragg, NC, 1st Qtr 76 (DEIS).
26. Carolina Telephone and Telegraph Lease for Underbuilt Service, Ft Bragg, NC, 4th Qtr 75 (DEIS).
27. Family Housing Project, Ft Campbell, KY, 1st Qtr 76 (DEIS).
28. Installation Operations, Camp Bonneville, WA, 3rd Qtr 76 (DEIS).
29. Installation Operations, Yakima Firing Center, WA, 3rd Qtr 76 (DEIS).
30. LITHIUM—Organic Electrolyte Batteries, 3rd Qtr 76 (DEIS).
31. Harry Diamond Development Center Realignment, WASH, DC, 1st Qtr 76 (DEIS).

32. RDX-HMX Facilities, 2d Qtr 76 (DEIS).
33. Installation Operations and Maintenance, Ft Dix, NJ, 1st Qtr 76 (DEIS).
34. Training Mission, Ft Dix, NJ, 1st Qtr 76 (DEIS).
35. Partial Closure, Ft Dix, NJ, 1st Qtr 76 (DEIS).
36. Mission Change, Ft McClellan, AL, 1st Qtr 76 (DEIS).
37. Outlease of Army Real Property, Ft Lee, VA, Unscheduled (DEIS).
38. Disposal of M139 Bomblets, Tower Grid Area, Dugway Proving Ground, UT, 1st Qtr 77 (DEIS).
39. Mechanized-Armored Div Stationing, Ft Lewis, WA, 3rd Qtr 76 (DEIS).

U.S. Navy actions requiring preparation of environmental impact statements:

Statements Under Preparation.

Subject: Final EIS for "Naval Submarine Base; New London, Groton, Connecticut".
Projected Date: October 1975.
Subject: Final EIS for "Continued Exploration and Evaluation of NPR-4, Alaska".
Projected Date: October 1975.
Subject; Final EIS for "Regulations on Off-Road Vehicle Recreation at the Naval Weapons Center, China Lake, California".
Projected Date: October 1975.
Subject: Final EIS for "Abrasive Blasting of Ships Hulls".
Projected Date: October 1975.
Subject: Draft EIS for "Indian Island Conventional Ordnance Facility; Jefferson County, Washington."
Projected Date: October 1975.
Subject: Draft EIS for "Easement and Land Acquisition/Air Compatible Use Zone; Naval Air Station, Oceana and Outlying Landing Field Fentress, Tidewater Area, Virginia."
Projected Date: November 1975.
Subject: Draft EIS for "Easement and Land Acquisition Air Compatible Use Zone; Naval Air Station, Cecil Field and Outlying Landing Field, Whitehouse, Jacksonville, Florida."
Projected Date: November 1975.

U.S. Air Force actions requiring preparation of environmental impact statements:

Statements Under Preparation.

Subject and Projected Date

1. Airborne Warning and Control System (AWACS) Beddown at Tinker AFB, OK, 2nd Quarter FY 76.
2. A-10 Beddown at Davis-Monthan AFB, Arizona, 2nd Quarter FY 76.
3. F-15 Beddown at Holloman AFB, NM, 3rd Quarter FY 76.
4. Mobile Home Court, Wright-Patterson AFB, OH, 2nd Quarter FY 76.
5. Easement Northwest Field, Guam, 3rd Quarter FY 76.
6. Drone Runway, Tyndall AFB, FL, 3rd Quarter FY 76.
7. Proposed Relocation of AFCS and Related Mission, 3rd Quarter FY 76.
8. Consolidated Medical Facility, Altus AFB, OK, 3rd Quarter FY 76.
9. Advanced Airborne Command Post Offutt AFB, Nebraska, 3rd Quarter FY 76.
10. Consolidated Medical Facility, Offutt AFB, Nebraska, 3rd Quarter FY 76.
11. Alteration of Heating Plant, Pease AFB, NM, 4th Quarter FY 76.
12. Air Pollution Control, Heating Plant, Wright-Patterson AFB, OH, 2nd Quarter FY 76.
13. East Coast Weapons Range, NC, 3rd Quarter FY 76.
14. Aeropropulsion System Test Facility, Arnold AFS, TN, 3rd Quarter FY 76.
15. Establishment of Falcon Military Operating Area, NY, 3rd Quarter FY 76.

GARY L. WIDMAN,
General Counsel.

[FR Doc.75-34862 Filed 12-24-75;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

RCC-TELEPHONE COMPANY INTERCONNECTION

Additional Meetings

DECEMBER 17, 1975.

The Commission's Common Carrier Bureau has scheduled additional meetings concerning interconnection between the wireline telephone companies and the Radio Common Carriers (RCCs), which furnish two-way radiotelephone and one-way signaling service to the public. The meetings will be held on January 7, 8, 14, 15, 16, 26, 27 and 28, 1976. These meetings are in addition to the December 18 and 19 meetings announced in the FCC's November 14, 1975 Public Notice. Accordingly, the schedule of meetings is now as follows:

Wednesday, January 7, (2000 L St.).
Thursday, January 8, (2000 L St.).
Wednesday, January 14, (Room A-110).
Thursday, January 15, (Room 8210).
Friday, January 16, (Room 8210).
Monday, January 26, (Room 8210).
Tuesday, January 27, (Room A-110).
Wednesday, January 28, (Room 8210).

As indicated above, the meetings on January 15, 16, 26 and 28, will be held in Room 8210 of the Commission's offices at 2025 M Street, NW., Washington, D.C. The January 14 and January 27 meetings will be held in Room A-110 of the Commission's Annex at 1229 20th Street, NW., Washington, DC. The meetings on January 7 and 8 will be held at the offices of American Telephone and Telegraph Company, Room 711, 2000 L Street, NW., Washington, D.C. The December 18 meeting will begin at 9:30 a.m. The starting time for each of the other meetings will be determined at the close of the preceding meeting.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.75-34833 Filed 12-24-75;8:45 am]

FEDERAL POWER COMMISSION

ALABAMA-TENNESSEE NATURAL GAS CO.

[Docket No. RP76-40]

Notice of Proposed PGA Rate Adjustment

DECEMBER 18, 1975.

Take notice that on November 14, 1975, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), tendered for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, Thirteenth Revised Sheet No. 3-A. Alabama-Tennessee requests that this revised tariff sheet become effective as of January 1, 1976.

Alabama-Tennessee states that the sole purpose of such revised tariff sheet is to adjust Alabama-Tennessees' rates pursuant to the PGA provisions of Section 20 of the General Terms and Conditions of its tariff to reflect increased rates to become effective on January 1, 1976, to be charged by its sole supplier, Tennessee Gas Pipeline Company.

Alabama-Tennessee states that the revised tariff sheet provides for the following rates:

Rate Schedule	*Thirteenth Revised Sheet No. 3-A*
G-1:	
Demand, (dollars)	3.38
Commodity, (cents)	63.44
SG-1:	
Commodity, (cents)	88.13
I-1:	
Commodity, (cents)	65.44

Alabama-Tennessee also tender for filing Revised Sheet No. 36-H to reduce the minimum notice period in Section 22(d) of the General Terms and Conditions of its tariff from 45 days to 30 days.

Alabama-Tennessee states that copies of the filings have been mailed to all of its jurisdictional customers and affected State regulatory Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 29, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-34863 Filed 12-24-75;8:45 am]

[Docket No. ER76-356]

CENTRAL MAINE POWER CO.

Filing of Service Contract

DECEMBER 18, 1975.

Take notice that on December 11, 1975, the Central Main Power Company (Central Maine) tendered for filing a new service contract with the Town of Madison Department of Electric Works (Madison). Central Maine states that the instant contract succeeds its original contract with Madison which expired October 1, 1975.

Central Maine requests a waiver of the notice requirements of the Commission's Regulations so as to allow an effective date of October 1, 1975. Central Maine

V 40 249 DEC 29 75 XUM

states that it has sent a copy of this filing to Madison.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 30, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-34864 Filed 12-24-75;8:45 am]

[Docket No. CP76-154]

COLUMBIA GAS TRANSMISSION CORP.

Notice of Application

DECEMBER 18, 1975.

Take notice that on November 6, 1975, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25325, filed in Docket No. CP76-154 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Royal China Company (Royal), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant states that Royal has entered into a gas purchase agreement with Petroc Company (Petroc) dated September 30, 1975, by which Royal has agreed to purchase all of the production of natural gas from four of Petroc's gas wells located in Muskingum County, Ohio. It is indicated that Royal has agreed to pay Petroc for three years not less than $1.25 per Mcf of gas initially and not more than $1.50 per Mcf of gas in the event that Applicant pays a field price for gas from new wells in Ohio greater than $1.25 per Mcf.

Applicant would accept delivery of natural gas for the account of Royal in Adams Township, Muskingum County, Ohio, and would deliver such gas to Columbia Gas of Ohio, Inc. (Columbia of Ohio), at an existing point of interconnection. Applicant would transport up to 740 Mcf of gas per day, would transport no gas on a peak day and would transport up to 270,100 Mcf of gas per year for Royal. Applicant states that the proposed transportation service would have no adverse impact on Applicant's ability to provide system-wide deliveries of priority 1 requirements inasmuch as the transportation agreement is said to be expressly subject to the limits of Applicant's pipeline capacity and its service obligations to its existing customers.

The end-use of the gas proposed to be transported is indicated by Applicant to be firing of kilns in which ceramic products are produced, which is alleged by Applicant to be "high priority", or priority 2 or those priority 3 uses that would have been in priority 2 had the gas been purchased on a firm basis.

Applicant would charge Royal a transportation charge for the service said to be equal to Applicant's average systemwide unit storage and transmission costs exclusive of company use and unaccounted for gas. It is indicated that this rate will be 14 cents per Mcf through December 14, 1975. Applicant would retain for company use and as unaccounted for gas 3.6 percent of the volumes of natural gas received from Petroc.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 29, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-34865 Filed 12-24-75;8:45 am]

[Docket No. RP76-47]

McCULLOCH INTERSTATE GAS CORP.

Proposed Substitute Changes in Rates

DECEMBER 18, 1975.

Take notice that on December 10, 1975, McCulloch Interstate Gas Corporation (McCulloch), tendered for filing First Revised Sheet No. 38 in its FPC Gas Tariff, Original Volume No. 1, containing proposed changes in rates for effectiveness on December 1, 1975.

According to McCulloch, First Revised Sheet No. 38, concerning volumes of gas delivered to McCulloch by Mountain Fuel Supply Company for the account of Colorado Interstate Gas Company from the Spearhead Ranch Area, Converse County, Wyoming, is submitted to adjust the rates originally filed in Docket No. RP75-98 to reflect a reclassification and allocation of the test period cost of service to conform to an inch-mile method of cost allocation to an agreed cost of service; the revised rates, reclassified and allocated accordingly to this method result in a jurisdictional increase of approximately $199,000 annually.

According to McCulloch, copies of the filing were served upon each of the parties in the Docket No. RP75-98 proceeding.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 30, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-34866 Filed 12-24-75;8:45 am]

[Docket No. RP76-355]

NANTAHALA POWER AND LIGHT CO.

Filing of Request for Waiver of Fuel Adjustment Clause Conformity Requirements

DECEMBER 18, 1975.

Take notice that on December 11, 1975, Nantahala Power and Light Company filed a request that the Commission grant an extension of time within which to comply with the provisions of Order No. 517 if those provisions should be held applicable to Nantahala by determination of the Commission in Docket No. E-9181.

Nantahala states in support of its request for waiver the fact that the justness and reasonableness of its purchased power clause is the subject of a pending Commission proceeding (Docket No. E-9181), and that it would serve no useful purpose for Nantahala to file a revised fuel adjustment clause conforming to Order No. 517 while this proceeding is pending.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal

Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 30, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RB76-46]

NATURAL GAS PIPELINE COMPANY OF AMERICA

Tariff Change

DECEMBER 18, 1975.

Take notice that on December 8, 1975, Natural Gas Pipeline Company of America (Natural) tendered for filing First Revised Sheets No. 426, No. 434 to its FPC Gas Tariff, Second Revised Volume No. 2. Natural states that the purpose of this filing is to revise paragraph 4, Article III of Rate Schedule X-49, a transportation agreement between Natural and Trunkline Gas Company, to reflect an amendment dated November 26, 1975. Natural states that it included in its submittal copies of the amendment. Natural requests an effective date of January 15, 1976.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 29, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-8 (PGA No. 76-4)]

NORTH PENN GAS CO.

Notice of Proposed Changes in FPC Gas Tariff

DECEMBER 18, 1975.

Take notice that North Penn Gas Company (North Penn) on December 8, 1975, tendered for filing proposed changes in its FPC Gas Tariff, First Revised Volume No. 1, pursuant to its PGA Clause for rates to be effective January 1, 1976. The proposed rate change will increase jurisdictional revenues based on the twelve-month period ending October 31, 1975, by $416.9 Thousand annually.

North Penn states that the PGA filing was triggered by PGA increases filed by Consolidated Gas Supply Corporation on November 26, 1975, and by Tennessee Gas Pipeline Company on November 14, 1975, both to become effective January 1, 1976.

North Penn is requesting a waiver of any of the Commission's Rules and Regulations in order to permit the proposed rates to go into effect on January 1, 1976.

North Penn states that copies of this filing were served upon North Penn's jurisdictional customers, as well as interested state commissions.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 29, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Secretary.

[FR Doc.75-34869 Filed 12-24-75;8:45 am]

[Docket No. RP72-99]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Petition for Declaratory Order

DECEMBER 18, 1975.

Take notice that on December 16, 1975, Transcontinental Gas Pipe Line Corporation (Transco) filed a petition under Section 1.7(c) of the Commission's Rules of Practice and Procedure for a declaratory order interpreting the "1975-1976 Interim Settlement Agreement", which was approved by Commission order of November 28, 1975, in the above-entitled proceeding. Specifically, Transco seeks a determination of the following question:

"Whether it would be a violation of the purpose and intent of the '1975-1976 Interim Settlement Agreement' herein for Transco to transport emergency natural gas to be purchased by a specific distributor-customer under Section 2.68 of the Commission's General Policy and Interpretations under circumstances where Transco would be physically and legally eligible to purchase or transport such gas under Section 2.68 for the benefit of all of its CD and firm direct customers in accordance with the aforesaid Settlement Agreement."

In its petition, Transco states that one of its customers has tentatively arranged for the emergency purchase of natural gas for 60-days under Section 2.68 of the Commission's General Policy and Interpretations. Under the tentative agreement, the gas would be delivered into Transco's system in Texas for redelivery into the customer's system. However, the arrangement is specifically subject to execution of a transportation agreement, which has not been executed pending the outcome of this petition. Transco also states that it has discussed with the producer the direct purchase of the subject gas supply; but, because of the price justification problem, Transco has not determined the manner in which it would obtain the gas. Transco further states that it is not aware of any other active competitor for the gas. Under those circumstances, Transco questions whether it would violate the approved Settlement Agreement, if it agreed to transport the gas for its customer under Section 2.68.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of answers to the petition. Therefore, any person desiring to be heard with reference to this petition should file an answer thereto on or before December 29, 1975, with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR § 1.9). All answers filed with the Commission will be considered by it in determining the appropriate action to be taken on the petition.

KENNETH F. PLUMB,
Secretary.

[AA1921-Inq.-3]

PORTLAND HYDRAULIC CEMENT, OTHER THAN WHITE NONSTAINING CEMENT, FROM MEXICO

Commission Does Not Determine "No Reasonable Indication of Injury"

DECEMBER 18, 1975.

On November 18, 1975, the United States International Trade Commission received advice from the Department of the Treasury that, in accordance with section 201(a) of the Antidumping Act, 1921, as amended, an antidumping investigation was being initiated with respect to portland hydraulic cement, other than white nonstaining cement, from Mexico, and that, pursuant to section 201(c) of the act, information developed during the preliminary investigation led to the conclusion that there is substantial doubt whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such cement from Mexico into the United States. Accordingly, on November 20, 1975, the Commission instituted inquiry No. AA1921-Inq.-3 under section 201(c)(2) of the act to determine whether there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

A public hearing was held on December 5, 1975, in El Paso, Texas. Notice of the institution of the inquiry and hearing was duly given by posting copies of the notice at the Secretary's office in the Commission in Washington, D.C., and at the Commission's office in New York, and by publishing the original notice in the FEDERAL REGISTER of November 26, 1975 (40 F.R. 54883).

The Treasury Department instituted its investigation after receiving a complaint on October 16, 1975, from Southwestern Portland Cement Co. of El Paso, Texas. Treasury's notice of its antidumping proceeding was published in the FEDERAL REGISTER of November 21, 1975 (40 F.R. 54287).

On the basis of its inquiry with respect to imports of portland hydraulic cement, other than white nonstaining cement, from Mexico—the subject of the antidumping investigation initiated by the Department of the Treasury—the Commission (Commissioners Leonard, Moore, Bedell, and Parker)[1] does not determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

STATEMENT OF REASONS OF CHAIRMAN WILL E. LEONARD AND COMMISSIONERS CATHERINE BEDELL AND JOSEPH O. PARKER

The United States International Trade Commission instituted inquiry No. AA1921-Inq.-3 under section 201(c)(2) of the Antidumping Act, 1921(on November 20, 1975; this is the third such investigation under this new section, which was added to the Antidumping Act by the Trade Act of 1974. The purpose of this inquiry was to determine whether "there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation" into the United States of portland hydraulic cement, other than white nonstaining cement, from Mexico, possibly sold at less than fair value. Such cement from Mexico is the subject of a pending Department of the Treasury investigation under section 201(a) of the Antidumping Act, 1921.

[1] Commissioner Abiondi does not determine that "there is no reasonable indication that an industry in the United States . . . is likely to be injured. . . ." Commissioner Minchew determines that "there is no reasonable indication that an industry in the United States is being or its likely to be injured, or is prevented from being established. . . ."

DETERMINATION [1]

On the basis of the information developed with respect to this inquiry, we do not determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation into the United States of portland hydraulic cement, other than white nonstaining cement, from Mexico. As a result of this determination by the Commission, the Treasury may proceed with its pending investigation.

DISCUSSION

U.S. production and shipments of portland cement decreased in 1974 and 1975 after reaching a peak in 1973—a pattern generally parallel to the trend of U.S. building construction over the period. U.S. imports of portland cement from all countries also reached a peak in 1973 and declined thereafter. Imports of portland cement from Mexico reached a high point in 1972 and declined in subsequent periods. However, imports of portland cement from Mexico which entered the United States through the port of El Paso, Texas—the imports which appear to be the focus of the complaint before Treasury—did not follow this pattern; in fact they increased from about 5,000 short tons in January-September 1974 to about 9,000 short tons in the corresponding period of 1975. These imports were sold in the marketing area of southeastern Arizona, New Mexico, and southwestern Texas.

During January-May 1975, imports of portland cement from Mexico through the port of El Paso, virtually all of which were shipped in sacks, were sold at prices which were about 15 percent less than the prices of U.S. producers. According to the preliminary data reported by Treasury, this margin of underselling could be accounted for by the alleged dumping margins. In May 1975, the U.S. cement producer which supplied the great bulk of total sales in the marketing region in question reduced its price in order to compete with the imports from Mexico. This action may have resulted in a loss in revenue of approximately $75,000 for this U.S. cement producer on its sales of cement in sacks during May-November 1975. The Commission also verified that certain customers of U.S. cement producers purchased cement imported from Mexico during January-November 1975.

[1] Commissioner Leonard considers that before making a determination of "no reasonable indication," an affirmative determination under sec. 201(c)(2), the allegations made by the complainant before the Treasury and the information available as a result of the Commission's inquiry must reveal the issues of injury and causation to be so clearly lacking in substance that the resources of the Government should not be used to any further extent in considering the matter, and that trade should not be disrupted further by such consideration.

As stated above, virtually all of the U.S. imports of cement from Mexico through the port of El Paso were shipped in sacks. However, testimony given at the Commission's hearing in connection with this inquiry indicated that a Mexican producer of the cement which is allegedly being sold at less than fair value intends and is making a concerted effort to sell bulk cement in the market area considered here. Sales of bulk cement constitute approximately 90 percent of the total sales of cement in this market. The Mexican producer operates a plant of 115,000 tons annual capacity directly across the U.S. border from El Paso and a larger plant of 261,000 tons annual capacity, both in the State of Chihuahua.[1]

CONCLUSION

In our judgment, the evidence developed in this inquiry is sufficient to preclude a determination that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of imports of portland hydraulic cement from Mexico possibly sold at less than fair value.

STATEMENT OF REASONS OF VICE CHAIRMAN DANIEL MINCHEW

In accordance with new provisions of the Antidumping Act, 1921,[1] the United States Department of the Treasury (Treasury) notified the United States International Trade Commission (Commission) on November 18, 1975, that it had "substantial doubt whether" a U.S. industry "is being, or is likely to be, injured or prevented from being established by reason of importation" of portland hydraulic cement, other than white nonstaining cement, from Mexico (portland cement). On November 20, 1975, pursuant to its responsibilities under section 201(c) of the Antidumping Act, 1921, as amended, the Commission instituted a preliminary investigation to determine whether "there is no reasonable indication" that a U.S. industry "is being or is likely to be injured, or is prevented from being established, by reason of the importation" of portland cement from Mexico.

Under the statute, the Commission is required to complete its investigation within 30 days from receipt of notification by Treasury and, for purposes of preliminary investigations, to consider only the question of injury or likelihood of injury caused by less than fair value (LTFV) sales. On the basis of the information available from the Treasury, the Commission hearing record, the materials submitted by the parties, and other data obtained during the Commission's investigation, I have concluded that there is no reasonable indication that "an industry in the United States is being or is likely to be injured . . . by the importation" of portland cement from Mexico.

In determining whether "there is no reasonable indication" of injury or likelihood of injury caused by LTFV imports, it is necessary to determine that none of the usual indexes of injury are being met. In making this determination, I will look at the various aspects of injury, including but not limited to such things as idling of productive facilities in the industry, inability of domestic industry firms to operate at a reasonable level of profit, unemployment or underemployment within the industry, decline in sales, a higher and growing inventory, and a downward trend in production, profits, wages, or employment in the domestic industry concerned. However, very little guidance is obtained from the statute as to how high or how low the threshold of "reasonable indication" should be. For me, the threshold will have to be higher than one so low that even the weakest cases are returned to Treasury. The legislative intent of the enactment stated at page 171 of Senate Report 93-1298 is as follows:

> The amendment is designed to eliminate unnecessary and costly investigations which are an administrative burden and an impediment to trade.

For the purpose of the present investigation, I have looked at the U.S. industry as a whole. However, since the El Paso, Texas, marketing area is very close to the foreign source, and since the imported portland cement cannot be economically transported great distances, I am asuming that if a reasonable indication of injury were to be found anywhere, it would be evident in the El Paso, Texas, marketing area. If this area does not meet the threshold requirements, I have little reason to believe that injury is being sustained elsewhere. Southwestern's El Paso plant has traditionally supplied 90 to 95 percent of the cement consumed in the marketing area and has provided evidence that in order to meet the market threat of Cementos de Chihuahua (CDC) it has been forced to reduce prices, with a resultant net loss of revenue in the months of May-November 1975 in the amount of $76,916. From the data available to me in the present case, the strongest indication of injury or likelihood of injury is this loss of revenue resulting from meeting the competition's price. Despite this loss of potential revenue, that alone does not establish a "reasonable indication" of injury or likelihood of injury except in instances of an almost meaninglessly low threshold (without indications that profits were seriously reduced).

While Southwestern has been forced to reduce prices, it has succeeded in regaining lost sales at the lower prices without the idling of productive facilities or loss of employment. The petitioner, the dominant producer in the area, enjoys a near-captive market for portland cement in the El Paso, Texas, marketing area, and for me the standard for injury or a likelihood of injury must be more than having to lower the price on a very small portion of the business[1] when a new competitor enters the marketing area.

The petitioner has produced some evidence that CDC has attempted to penetrate the bulk sales market by actions which might be considered unfair trade practices. Thus far, we have evidence only of attempts which have failed. Without establishing a reasonable indication that CDC can succeed in penetrating the domestic market, I do not feel that we should continue the investigation.

This determination, if it had represented a majority of the vote in the present case, would have resulted in the termination of this investigation. However, there is no statutory prohibition nor any regulation or proposed regulation of Treasury that would prevent the domestic industry from filing a new petition at any time in the future should evidence of injury or its likelihood be developed. Nor would termination of this investigation prejudice the petitioner from-filing an unfair trade practice petition under section 337(a) of the Tariff Act of 1930, as amended, should evidence be found that CDC is acting improperly in attempting to enter the market.

The petitioner has produced some evidence that CDC has attempted to penetrate the bulk sales market by actions which might be considered unfair trade practices. Thus far, we have evidence only of attempts which have failed. Without establishing a reasonable indication that CDC can succeed in penetrating the domestic market, I do not feel that we should continue the investigation.

This determination, if it had represented a majority of the vote in the

[1] Commissioner Abiondi concurs with the Commission opinion as set forth here inasmuch as the U.S. industry in this region may be threatened with injury if the Mexican producer gains entry into the market for bulk cement by means of sales at less than fair value.

[1] 19 U.S.C. 160. The relevant amendment to the Antidumping Act was made in sec. 321 of the Trade Act of 1974 (88 Stat. 2044 (1974)), amending sec. 201 of the Antidumping Act. The relevant language reads as follows:

> (2) If in the course of making a determination under paragraph (1) the Secretary concludes, from the information available to him, that there is substantial doubt whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States, he shall forward to the Commission the reasons for such substantial doubt and a preliminary indication, based upon whatever price information is available, concerning possible sales at less than fair value, including possible margins of dumping and the volume of trade. If within thirty days after receipt of such information from the Secretary, the Commission, after conducting such inquiry as it deems appropriate, determines there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States, it shall advise the Secretary of its determination and any investigation under subsection (b) then in progress shall be terminated.

[1] Southwestern was required to lower prices by approximately 10 percent on sack portland cement. This sack portland cement constitutes approximately 10 percent of the production of cement by Southwestern.

V 401249 DEC 29 75 XUM

vironmental Report, pursuant to Section purpose of an antitrust review of the Report (PSAR) pursuant to § 2.101 of

present case, would have resulted in the termination of this investigation. However, there is no statutory prohibition nor any regulation or proposed regulation of Treasury that would prevent the domestic industry from filing a new petition at any time in the future should evidence of injury or its likelihood be developed. Nor would termination of this investigation prejudice the petitioner from filing an unfair trade practice petition under section 337(a) of the Tariff Act of 1930, as amended, should evidence be found that CDC is acting improperly in attempting to enter the market.

By order of the Commission.

Issued: December 22, 1975.

KENNETH R. MASON,
Secretary.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

ADVISORY COMMITTEE EDUCATION PANEL

Meeting

DECEMBER 15, 1975.

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463) notice is hereby given that a meeting of the Education Panel will convene at 9:00 a.m. both days at Washington, D.C., on January 15 and 16, 1976.

The purpose of the meeting is to review Planning applications submitted to the National Endowment for the Humanities for grants to educational institutions and non-profit organizations.

Because the proposed meeting will consider financial information and personnel and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 13, 1973, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, NW., Washington, D.C. 20506, or call area code 202-382-2031.

JOHN W. JORDAN,
Advisory Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[Docket No. P-558-A]

SAN DIEGO GAS AND ELECTRIC CO.

Notice of Receipt of Partial Application for Construction Permits and Facility Licenses; Time for Submission of Views on Antitrust Matters

The San Diego Gas and Electric Company, pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, has filed one part of an application, dated October 29, 1975, in connection with their plans to construct and operate two generating units utilizing two pressurized water reactors. Each reactor will be designed for initial operation at approximately 2800 megawatts thermal, with a net electrical output of approximately 900 megawatts. The facility, designated as the Sundesert Nuclear Plant, Units 1 and 2, will be located in Riverside County, California, about 16 miles southwest of Blythe, California, and 50 miles north-northwest of Yuma, Arizona. The portion of the application filed contains the information requested by the Attorney General for the purpose of an antitrust review of the application as set forth in 10 CFR Part 50, Appendix L.

The remaining portion of the application consisting of a Preliminary Safety Analysis Report accompanied by an Environmental Report, pursuant to Section 2.101 of Part 2, is expected to be filed in July, 1976. Upon receipt of the remaining portions of the application dealing with radiological health and safety and environmental matters, separate notices of receipt will be published by the Commission including an appropriate notice of hearing.

The San Diego Gas and Electric Company has invited other Southern California utilities to participate in the ownership and capacity of these units. As utilities indicate their interest, additional antitrust information will be submitted for them.

A copy of the partial application is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555; the Palo Verde Valley District Library, 125 West Chanslorway, Blythe, California 92255; the Federal Archives and Records Center, 24000 Avila Road, Laguna, California 92677; and the U.S. Nuclear Regulatory Commission, Region V, Inspection and Enforcement, 1990 North California Boulevard, Walnut Creek, California 94596. Docket No. P-558-A has been assigned to the application and it should be referenced in any correspondence relating to it.

Any person who wishes to have his views on the antitrust matters of the application presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Office of Antitrust and Indemnity, Office of Nuclear Reactor Regulation on or before February 3, 1976.

Dated at Bethesda, Maryland, this 1st day of December, 1975.

For the Nuclear Regulatory Commission.

ROBERT A. CLARK,
Chief Gas Cooled Reactors Branch Division of Reactor Licensing.

[Docket No. 50-549]

POWER AUTHORITY OF THE STATE OF NEW YORK

Receipt of Partial Application for Construction Permit and Facility License; Time for Submission of Views on Antitrust Matters

Power Authority of the State of New York (the applicant), pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, has filed a part of an application dated July 25, 1975, in connection with their plans to construct and operate a reactor in Greene County, New York, Greene County Nuclear Power Plant (the facility), will be a pressurized water reactor designed for operation at 3600 thermal megawatts with a net electrical output of approximately 1273 megawatts, This portion of the application filed contains the information requested by the Attorney General for the purpose of an antitrust review of the application as set forth in 10 CFR Part 50, Appendix L.

In addition, the general information portion of the application and the Environmental Report were docketed on September 15, 1975, but without the full Preliminary Safety Analysis Report in accordance with 10 CFR 2.101. The Preliminary Safety Analysis Report was tendered but initially rejected and is expected to be re-submitted for docketing in the near future. A separate notice of receipt for this remaining portion will be published at that time. A notice of hearing is also being published separately dealing with radiological health and safety and environmental matters.

Copies of the individual portions of the application, as noted above, are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Catskill Public Library, Franklin Street, Catskill, New York 12414.

Docket No. 50-549-A has been assigned to this antitrust portion of the application and it should be referenced in any correspondence relating to it. Any person who wishes to have his views on the antitrust matters of the application presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Office of Antitrust and Indemnity, Office of Nuclear Reactor Regulation, on or before February 6, 1976.

Dated at Bethesda, Maryland, this 19th day of November 1975.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Light Water Reactors Branch 2-3, Division of Reactor Licensing.

[FR Doc.75-32702 Filed 12-3-75;8:45 am]

[Docket No. P-564-A]

PACIFIC GAS AND ELECTRIC CO.

Receipt of Partial Application for Construction Permits and Facility License: Time For Submission of Views on Antitrust Matters

Pacific Gas and Electric Company (the applicant), pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, has filed one part of an application, dated August 14, 1975, in connection with their plans to construct and operate two reactors in Stanislaus County, California. The portion of the application filed contains the information requested by the Attorney General for the purpose of an antitrust review of the application as set forth in 10 CFR Part 50, Appendix L.

The remaining portions of the application consisting of an Environmental Report and the Preliminary Safety Analysis Report (PSAR) pursuant to § 2.101 of Part 2, are expected to be filed in September 1976 and April 1977, respectively. Upon receipt of the remaining portions of the application dealing with radiological health and safety and environmental matters, separate notices of receipt will be published by the Commission including an appropriate notice of hearing.

A copy of the partial application will be available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Local Public Document Room, Stanislaus County Free Library, 1500 I Street, Modesto, California 95345. Docket No. P-564-A has been assigned to the application and it should be referenced in any correspondence relating to it.

Any person who wishes to have his views on the antitrust matters of the application presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Office of Antitrust and Indemnity, Office of Nuclear Reactor Regulation, on or before January 30, 1976.

Dated at Bethesda, Maryland, this 21st day of November 1975.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Light Water Reactors Branch 2-3 Division of Reactor Licensing.

OFFICE OF MANAGEMENT AND BUDGET

BUSINESS ADVISORY COUNCIL ON FEDERAL REPORTS

Public Meeting

Pursuant to Public Law 92-463, notice is hereby given of a panel of the Business Advisory Council on Federal Reports to be held in Room 4203, New Executive Office Building, 17th Street between Pennsylvania Avenue and H Street, NW., Washington, D.C., on Thursday, January 15, 1976, starting at 2:00 p.m.

The purpose of the meeting is to advise the Statistical Policy Division of the Office of Management and Budget concerning reporting problems associated with a survey on causal factors in selected worker accidents proposed by the National Institute for Occupational Safety and Health (NIOSH). The meeting will be open to public observation and participation.

Further information regarding the meeting may be obtained from the Statistical Policy Division, Office of Management and Budget, Room 10208, New Executive Office Building, Washington, D.C., telephone (202) 395-5867.

VELMA N. BALDWIN,
Assistant to the Director for Administration.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

DISTRICT OF COLUMBIA DEVELOPMENTAL PLAN

Resubmission of Plan and Availability for Public Comment

1. *Submission and description of plan.* On March 2, 1973, a notice was published in the FEDERAL REGISTER (38 FR 5702) concerning the submission of an occupational safety and health plan for the District of Columbia and inviting public comment on the plan. On April 17, 1973, a notice was published in the FEDERAL REGISTER (38 FR 9540) announcing that on May 9, 1973, an informal hearing would be held on the plan. At that time, serious questions were raised involving certain aspects of the plan which put in issue not only the approval, but possible rejection of the plan. Since that time, the plan and the proposed enabling legislation has been substantially modified to provide for civil rather than criminal enforcement sanctions. As a result of this modification, the District of Columbia resubmitted the plan on August 6, 1975. The Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) has preliminarily reviewed the plan and hereby gives notice that the question of its approval is now in issue before him.

The plan designates the Minimum Wage and Industrial Safety Board, Industrial Safety Division (hereinafter referred to as the Designee) as the agency responsible for administering the Plan throughout the District. It proposes to define issues covered by it as defined by the Assistant Secretary in 29 CFR 1902.2 (c) (1) excluding the following: § 1910.13 Ship repairing, § 1910.14 Shipbuilding, § 1910.15 Shipbreaking, § 1910.16 Longshoring, § 1910.19 Asbestos dust, § 1910.-214 Cooperage machinery, § 1910.216 Mills and calendars in the rubber and plastics industries, § 1910.218 Forging machines, § 1910.261 Pulp paper and paperboard mills, § 1910.262 Textiles, § 1910.265 Sawmills, § 1910.266 Pulpwood logging and § 1910.267 Agricultural operations. The Plan provides for the development and promulgation of occupational safety and health standards which are at least as effective as the Federal standards or changes thereto.

Set forth in the proposed plan is a timetable providing for enactment of enabling legislation and the future drafting of various rules, regulations, and procedures. Included in the plan is a statement of the Mayor's support for the proposed legislation and a statement of legal opinion that it will meet the requirements of the Occupational Safety and Health Act of 1970, and is consistent with the laws of the District of Columbia. All personnel under the plan are covered by an existing merit system. Also included are assurances for the potection of trade secrets and a provision to protect employees against unwarranted discharge and discrimination.

2. *Location of plan for inspection and copying.* A copy of the plan may be inspected and copied during normal business hours at the following locations: Office of the Associate Assistant Secretary for Regional Programs, Occupational Safety and Health Administration, Room N-3112, New Department of Labor Building, 200 Constitution Avenue, N.W., Washington, D.C. 20210; Regional Administrator, Occupational Safety and Health Administration, Room 15220, Gateway Center, 3535 Market Street, Philadelphia, Pennsylvania 19104; Minimum Wage and Industrial Safety Board, Industrial Safety Division, 2900 Newton Street, N.E., Washington, D.C. 20018.

3. *Public participation.* Interested persons are hereby given until January 28, 1976 in which to submit to the Assistant Secretary written data, views, and arguments concerning the Plan. The submissions are to be addressed to the Associate Assistant Secretary for Regional Programs, Room N-3112, New Department of Labor Building, 200 Constitution Avenue, N.W., Washington, D.C. 20210. The written comments will be available for public inspection and copying at the above address.

Any interested person(s) may request an informal hearing concerning the proposed Plan or any part thereof whenever particularized written objections thereto are filed by January 28, 1976. If the Assistant Secretary finds that substantial objections are filed, he shall hold a formal or informal hearing on the subjects and issues involved.

The Assistant Secretary of Labor for Occupational Safety and Health shall thereafter consider all relevant comments and arguments presented and issue his decision as to approval or disapproval of the Plan.

Signed at Washington, D.C., this 19th day of December, 1975.

MORTON CORN,
Assistant Secretary of Labor.

[Notice No. 147]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 C.F.R. Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before January 19, 1976. Pursuant to Section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-76127. By order of December 19, 1975 the Motor Carrier Board approved the transfer to MC & N Transport, Inc., Arnold, Nebraska, of Certificate No. MC 136870 issued February 3, 1975, to George D. Best, Eva Best Executrix, Eva Best and Margaret Wilcox, A partnership, D/B/A Best and Wilcox, Arnold, Nebraska, authorizing the transportation of petroleum and petroleum products, in bulk, in tank vehicles, from Phillipsburg, Kans., to Dunning, Callaway, Arnold and Oconto, Nebr. Tedd C. Huston, 426 South 10th, Broken Bow, Nebraska 68822, Attorney for Applicants.

No. MC-FC-76265. By order entered December 19, 1975 the Motor Carrier Board approved the transfer to Athens Transportation System, Inc., Concord, Calif., of Certificate of Registration No. MC 121321 (Sub-No. 1), issued March 10, 1964, to Bonded Draying Service, a corporation (Internal Revenue Service, Successor-in-Interest), San Francisco, Calif., evidencing a rights to engage in transportation, in interstate or foreign commerce, of general commodities, between specified points in California. Daniel W. Baker, 100 Pine St., Suite 2550, San Francisco, Calif. 94111, attorney for applicants.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Notice No. 145]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 C.F.R. § 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

No. MC 1924 (Sub-No. 10TA), filed December 11, 1975. Applicant: WALLACE-COLVILLE MOTOR FREIGHT, INC., 400 North Sycamore, Spokane, Wash. 99220. Applicant's representative: Michael B. Crutcher, 2000 IBM Bldg., Seattle, Wash. 98101. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (with normal exceptions), but including Classes A and B explosives, between Spokane, Wash., and Lewiston, Idaho, and their commercial zones, including the intermediate and off-route points of Colfax, Pullman and Clarkston, Wash., and Moscow, Idaho. Applicant intends to tack and interline with other carriers at Spokane, Wash., for 180 days. Supporting shipper: This application is supported by more than 150 supporting shippers. The letters may be inspected at the Interstate Commerce Commission office in Washington, D.C., or the Seattle office. Send protests to: L. D. Boone, Transportation Specialist, Bureau of Operations, Interstate Commerce Commission, 858 Federal Bldg., 915 Second Ave., Seattle, Wash. 98174.

No. MC 51146 (Sub-No. 454TA), filed December 12, 1975. Applicant: SCHNEIDER TRANSPORT, INC., 2661 South Broadway St. Green Bay, Wis. 54304. Applicant's representative Neil A. DuJardin, Authority sought to operate as a *Common carrier*, by motor vehicle, over irregular routes, transporting: *Rolls of paper* (a) from West Point, Va., to Toledo, Ohio and (b) from Crossett, Ark., to Sibley, Iowa; and *Paper bags*, from Hudson Falls, N.Y., to Mechanicsburg, Pa., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting Shipper: Chase Bag Company, 314 Commerce Drive, Oak Brook, Ill. 60521. Send protests to: John E. Ryden, Interstate Commerce Commission, Bureau of Operations, 135 West Wells St., Room 807, Milwaukee, Wis. 53023.

No. MC 107403 (Sub-No. 958TA), filed December 9, 1975. Applicant: MATLACK, INC., Ten West Baltimore Ave., Lansdowne, Pa. 19050. Applicant's representative: John Nelson (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Processed clay* for catalyzing, in bulk, in tank vehicles, from Houston, Tex., to Goodhope, Merauz and Chalmete, La., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Filtrol Corporation, 3250 E. Washington Blvd., Los Angeles, Calif. 90023. Send protests to: Monica A. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch St., Room 3238, Philadelphia, Pa. 19106.

No. MC 107496 (Sub-No. 1013TA), filed December 12, 1975. Applicant: RUAN TRANSPORT CORPORATION, 3200 Ruan Center, 666 Grand Ave., Des Moines, Iowa 50309. Applicant's representative: E. Check (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid foundry facings*, in bulk, in tank vehicles, from Highland, Ind., to Kansas City, Mo., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Thermium, Inc., 2550 Industrial Highway, Highland, Ind., 46322. Send protests: Herbert W. Allen, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 875 Federal Bldg., Des Moines, Iowa 50309.

No. MC 110563 (Sub-No. 162TA) (Correction), filed December 3, 1975, published in the FEDERAL REGISTER issue of December 16, 1975, and republished as corrected this issue. Applicant: COLDWAY FOOD EXPRESS, INC., P.O. Box 747, Ohio Bldg., Sidney, Ohio 54365. Applicant's representative: John L. Maurer (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by-products and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates* 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from Booker, Tex., to points in California, namely, San LeAndro, Richmond and Los Angeles, for 180 days. Masters Dressed Beef, d/b/a Booker Custom Packing Co., Box 290, Booker, Tex. 79005. Send protests to: Keith D. Warner, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 313 Federal Office Bldg., 234 Summit St., Toledo, Ohio 43604. The purpose of this republication is to correct the territorial description.

No. MC 113908 (Sub-No. 360TA), filed December 12, 1975. Applicant. ERICKSON TRANSPORT CORPORATION, 2105 East Dale St., P.O. Box 3108 G.S.S., Springfield, Mo. 65804. Applicant's representative: B. B. Whitehead (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Brandy, neutral spirits, distilled spirits and alcohol*, in bulk, from Roberta, Ga., to Dayton, Scobeyville, N.J., and Peoria, Ill., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Monarch Wine Company of Georgia, P.O. Box 6847. Send protests to: John V. Barry, District Supervisor, Interstate Commerce Commission, 600 Federal Bldg., 911 Walnut St., Kansas City, Mo. 64106.

No. MC 117165 (Sub-No. 38TA), filed December 12, 1975. Applicant: ST. LOUIS FREIGHT LINES, INC., 1000 Michigan Ave., P.O. Box 128, St. Louis, Mich. 48880. Applicant's representative: Martin J. Leavitt, P.O. Box 400, 22375 Haggerty Road, Northville, Mich. 48167. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Composition board, ply-*

Fauss, Jr., District Supervisor, Bureau of Operations, Interstate Commerce Commission, Box 35008, 400 West Bay St., Jacksonville, Fla. 32202.

No. MC 128866 (Sub-No. 57TA), filed December 15, 1975. Applicant: B & B TRUCKING, INC., P.O. Box 2830, 9 Brade Lane, Cherry Hill, N.J. 08034. Applicant's representative: J. Michael Farrell, 1725 K St. NW., No. 814, Washington, D.C. 20006. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Aluminum food containers*, from the plantsites of Penny Plate, Inc., (1) at Atkins and Searcy, Ark., to Fresno, Calif.; Elk Grove, Glenview, and Oak Park, Ill.; Fort Wayne, Ind.; Livonia and Mount Clemons, Mich.; and Darien, Wis.; (2) at Cherry Hill, N.J., and Deerfield, Ill., to Fort Wayne, Ind., and Mount Clemens, Mich.; (3) at Cherry Hill, N.J., to Atkins, Ark.; Wilmington, Del.; Elk Grove Village, Ill.; and Greensboro, N.C.; (4) at Deerfield, Ill., to Atkins, Ark., under a continuing contract with Penny Plate, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Penny Plate, Inc., P.O. Box 2830, Haddonfield, N.J. 08033. Send protests to: Dieter H. Harper, District Supervisor, Interstate Commerce Commission, 428 East State St., Room 204, Trenton, N.J. 08608.

No. MC 128988 (Sub-No. 75TA), filed December 9, 1975. Applicant: JO/KEL, INC., 159 South Seventh Ave., P.O. Box 1249, City of Industry, Calif. 91749. Applicant's representative: Patrick E. Quinn, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives and household goods as defined by the Commission, from the facilities of Westinghouse Electric Corporation, at or near Sidney, Ohio, to points in Arizona, California, Nevada, Oregon, and Washington. Restrictions: Restricted against the transportation of commodities in bulk and commodities which by reason of size or weight require the use of special equipment. Further restricted to a transportation service to be performed under a continuing contract or contracts with Westinghouse Electric Corporation, of Pittsburgh, Pa., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Westinghouse Electric Corporation, RD No. 5 Leger Road, North Huntingdon, Pa. 15642. Send protests to: Mildred I. Price, Transportation Assistant, Interstate Commerce Commission, Room 1321 Federal Bldg., 300 North Los Angeles St., Los Angeles, Calif. 90012.

No. MC 128988 (Sub-No. 76TA), filed December 10, 1975. Applicant: JO/KEL, INC., 159 South Seventh Ave., P.O. Box 1249, City of Industry, Calif. 91749. Applicant's representative: Patrick E. Quinn, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Outdoor lighting fixtures*, from the facilities of Westinghouse Electric Corporation, at or near Cleveland, Ohio, to points in Arizona, California, Nevada, Oregon, and Washington. Restrictions: Restricted against the transportation of commodities in bulk and commodities which by reason of size or weight require the use of special equipment. Further restricted to a transportation service to be performed under a continuing contract or contracts with Westinghouse Electric Corporation of Pittsburgh, Pa., for 180 days. Supporting shipper: Westinghouse Electric Corporation, Rd No. 5 Leger Road, North Huntingdon, Pa. 15642. Send protests to: Mildred I. Price, Transportation Assistant, Interstate Commerce Commission, Room 1321 Federal Bldg., 300 North Los Angeles St., Los Angeles, Calif. 90012.

No. MC 129897 (Sub-No. 4TA), filed December 9, 1975. Applicant: M.S.B.P., INC., P.O. Box 904, Council Bluffs, Iowa 51501. Applicant's representative: Gailyn L. Larsen, 521 South 14th St., P.O. Box 81849, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Hide trimmings and tails*, from Meridian, Miss., and Tupelo, Miss., and the facilities of A. C. Lawrence Leather Company, at or near Hazelwood, N.C., to Chicago, Ill., and Oak Creek, Wis., under a continuing contract with Mid-States By-Products Company, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Clyde A. Huddle, Mid-States By-Products Company, 504 North Jackson, Papillion, Nebr. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th St., Omaha, Nebr. 68102.

No. MC 134551 (Sub-No. 8TA), filed December 11, 1975. Applicant: LANTER REFRIGERATED DISTRIBUTING CO., No. 3 Caine Drive, Madison, Ill. 62060. Applicant's representative: Ernest A. Brooks, II, 1301 Ambassador Bldg., St. Louis, Mo. 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, and meat by-products* and articles distributed by meat packinghouses as described in Appendix 1 to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, between Memphis, Tenn., Madison and East St. Louis, Ill., on the one hand, and, on the other points in Missouri, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Dwight L. Helm, Distribution Coordinator, John Morrell & Co., 208 S. LaSalle St., Chicago, Ill. 60604. Send protests to: Harold C. Jolliff, District Supervisor, Interstate Commerce Commission, P.O. Box 2418, Springfield, Ill. 62705.

No. MC 135384 (Sub-No. 17TA), filed December 11, 1975. Applicant: SPECIALIZED TRUCK SERVICE, INC.,

Highway 81 & Interstate 75, McDonough, Ga. 30253. Applicant's representative: Frank D. Hall, Suite 713, 3384 Peachtree Road, NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages, related advertising material, and empty malt beverage containers*, between Pabst, Houston County, Ga., and points in Maryland, Ohio, Wisconsin, Illinois, Indiana, Iowa, Michigan and Missouri, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Pabst Brewing Company, Ga. Highway Spur No. 247, Perry, Ga. 31069. Send protests to: William L. Scroggs, District Supervisor, Interstate Commerce Commission, 1252 W. Peachtree St., N.W., Room 546, Atlanta, Ga. 30309.

No. MC 135828 (Sub-No. 1TA), filed December 15, 1975. Applicant: PEACE BRIDGE BROKERAGE LIMITED, 33 Walnut St., Fort Erie, Ontario, Canada. Applicant's representative: William J. Hirsch, Suite 1125, 43 Court St., Buffalo, N.Y. 14202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment) in express service, between the port of entry on the International Boundary near Wellesley Island, N.Y., on the one hand, and, on the other, Wellesley Island, N.Y., restricted to the transportation of shipments originating at or destined to points in Canada and further restricted to the transportation of express shipments weighing 50 pounds or less in same day service, from any one consignor to any one consignee on any one day. Applicant intends to tack its existing authority with United Parcel Service MC 116200, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: There are approximately 10 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: George M. Parker, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 910 Federal Bldg., 111 West Huron St., Buffalo, N.Y. 14202.

No. MC 135881 (Sub-No. 8TA), filed December 9, 1975. Applicant: GARDNER TRUCKING CO., INC., 320 Woodlawn, Walterboro, S.C. 29488. Applicant's representative: Theodore Polydroff, Suite 600, 1250 Connecticut Ave., N.W., Washington, D.C. 20036. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Chains and related attachments; electric welders; and materials and supplies*, used in connection with electric welders, from the plantsites and shipping facilities of Teledyne McKay, at or near Waukesha, Wis., and York, Pa., to Tulsa and Oklahoma City, Okla.; Jackson, Hattiesburg and Tupelo, Miss.; Jonesboro, Ark.; Shreveport, Baton Rouge and New Orleans, La.; Phoenix, and Tucson, Ariz.; Santa Fe and Albuquerque, N. Mex.; Spokane and Seattle, Wash.; Billings, Mont.; Boise and Pocatello, Idaho; Astoria, Oreg.; and to points in Texas and California, under a continuing contract or contracts with Teledyne McKay, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Teledyne McKay, P.O. Box 1509, York, Pa. 17405. Send protests to: E. E. Strothcld, District Supervisor, Interstate Commerce Commission, Room 302, 1400 Pickens St., Columbia, S.C. 29201.

No. MC 136228 (Sub-No. 13TA), filed December 12, 1975. Applicant: LUISI TRUCK LINES, INC., P.O. Box 606, Milton-Frewater, Oreg. 97214. Applicant's representative: Philip Skofstad, 3076 E. Burnside, Portland, Oreg. 97214. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fresh and frozen meat*, from Wallula, Wash., to Eureka, Yuba City, San Jose, San Leandro, Oakland, San Francisco and Los Angeles, Calif., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Columbia Foods, Inc., P.O. Bx 926, Pasco, Wash. 99301. Send protests to: W. J. Huetig, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 114 Pioneer Courthouse, Portland, Oreg. 97204.

No. MC 136371 Sub-No. 18TA, filed December 10, 1975. Applicant: CONCORD TRICKING CO., INC., 1 Scout Avenue, South Kearny, N.J. 07032. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities*, as are dealt in or used by discount department stores, between the facilities of Gaylords National Corp., at points in the New York, N.Y. Commercial Zone, as defined by the Commission, on the one hand, and, on the other, points in Chickasaw, Dothan, Mobile, Montgomery, Tuscaloosa, Ala.; Dover, Newark, Wilmington, New Castle, Del.; Ft. Walton Beach, Panama City, Fla.; Columbus, Ga.; Aurora, Joliet, Ill.; Arabi, Hovma, Metairie, La.; Fayetteville, N.C.; Barberton, Canton, Cleveland, Euclid, Lorain, Ohio; Butler, Beaver Falls, Baden, Hazelton, New Castle, New Kensington, Washington, Pa.; Gulfport, Meridian, Miss., under continuing contract or contracts with Gaylords National Corp., for 180 days. Supporting shipper: Gaylords National Corporation, 10 Enterprise Ave., Secaucus, N.J. 08094. Send protests to: Robert E. Johnston, District Supervisor, Interstate Commerce Commission, 9 Clinton St., Newark, N.J. 07102.

No. MC 136464 (Sub-No. 18TA), filed December 8, 1975. Applicant: CAROLINA WESTERN EXPRESS, INC., 650 Eastwood Drive, P.O. Box 3961, Gastonia, N.C. 28052. Applicant's representative: Eric Meierhoefer, 303 N. Frederick Ave., Gathersburg, Md. 20760. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Hosiery and apparel, and materials, equipment and supplies*, used in the manufacture and sale of hosiery and apparels, (a) from Hartsville and Marion, S.C., and from points in North Carolina, to Las Cruces, N. Mex., and (b) from Las Cruces, N. Mex., to Winston-Salem, N.C., restricted to transportation service to be performed under a continuing contract or contracts with L'eggs Products, Inc., for 180 days. Supporting shipper: L'eggs Products, Inc., Box 2495, Winston-Salem, N.C. 27102. Send protests to: Terrell Price, District Supervisor, 800 Briar Creek Road, Room CC-516, Mart Office Bldg., Charlotte, N.C. 28205.

No. MC 136899 (Sub-No. 15TA), filed December 12, 1975. Applicant: HIGGINS TRANSPORTATION LTD., 1165 E. Haseltine St., Richland Center, Wis. 53581. Applicant's representative: Wayne W. Wilson, 329 W. Wilson St., Madison, Wis. 53701. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Agricultural implements and machinery and parts and accessories thereof*, from Muscoda, Wis., and Harvard, Ill., to points in the United States (except Alaska and Hawaii); (2) *Materials, equipment and supplies*, used or useful in the manufacture, sale or distribution of agricultural implements and machinery and parts and accessories thereof, from points in the United States (except Alaska and Hawaii), for 180 days. Supporting shipper: Howard Rotavator Co., Inc., Howard Ave., Muscoda, Wis. Send protests to: District Supervisor, Dorothy T. Ramminger, 139 W. Wilson St., Room 202, Madison, Wis. 53703.

No. MC 139686 (Sub-No. 1TA), filed December 9, 1975. Applicant: ABC TRANSIT CO., INC., 11440 West Center Road, Omaha, Nebr. 68144. Applicant's representative: Richard A. Peterson, 521 South 14th St., P.O. Box 81849, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Corrugated shipping containers*, from the plantsite of the Weyerhaeuser Company, at Omaha, Nebr., to Valmeyer, Ill., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: E. A. Coxhead, Manager, Transportation, Weyerhaeuser Company, 100 S. Wacker Drive, Chicago, Ill. 60606. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th St., Omaha, Nebr. 68102.

No. MC 141195 (Sub-No. 1TA), filed December 4, 1975. Applicant: CAL-ARK, INCORPORATED, Rural Route Two, Prairie Grove, Ark. 72753. Applicant's representative: Thomas W. Bartholomew (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Polystyrene disposable*

[I.C.C. Order No. 152 Under Revised Service Order No. 994]

LEHIGH VALLEY RAILROAD CO.

Rerouting Traffic

To all Railroads: In the opinion of R. D. Pfahler, Agent, the Lehigh Valley Railroad Company (Robert C. Haldeman, Trustee) (LV) is unable to transport traffic over its line between Elmira, New York and Horseheads, New York, because of track conditions.

It is ordered, That: (a) *Rerouting traffic.* The LV being unable to transport traffic over its line between Elmira, New York and Horseheads, New York because of track conditions, that line is hereby authorized to reroute or divert such traffic via any available route. Traffic necessarily diverted by authority of this order shall be rerouted so as to preserve as nearly as possible the participation and revenues of other carriers provided in the original routing.

(b) *Concurrence of receiving roads to be obtained.* The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 3:30 p.m., December 16, 1975.

(g) *Expiration date.* This order shall expire at 11:59 p.m., February 29, 1976, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., December 16, 1975.

[SEAL] R. D. PFAHLER, *Agent.*

[FR Doc.75-34911 Filed 12-24-75;8:45 am]

[AB 26 (Sub-No. 8)]

LIVE OAK, PERRY AND SOUTH GEORGIA RAILWAY CO.

Abandonment of Operations Between Foley Junction and Live Oak, in Taylor, Lafayette, and Suwannee Counties, Florida

Upon consideration of the record in the above-entitled proceeding, and of a staff-prepared environmental threshold assessment survey which is available to the public upon request; and

It appearing, That no environmental impact statement need be issued in this proceeding because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. §§ 4321, *et seq.*, and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in a newspaper of general circulation in Taylor, Lafayette, and Suwannee Counties, Fla. on or before December 30, 1975 and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this finding shall be given to the general public by depositing a copy of this order and the attached notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by delivering a copy of the notice to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER as notice to interested persons.

Dated at Washington, D.C., this 8th day of December, 1975.

By the Commission, Commissioner Brown.

[SEAL] ROBERT L. OSWALD, *Secretary.*

The Interstate Commerce Commission hereby gives notice that by order dated December 8, 1975, it has been determined that the proposed abandonment of the Live Oak, Perry and South Georgia Railway Company of operations over its branch extending 39.54 miles between Foley Junction and Live Oak in Taylor, Lafayette, and Suwannee Counties, Fla., if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmetal Policy Act of 1969 (NEPA), 42 U.S.C. 4321, *et seq.*, and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that traffic volume on the line is low consequently the environmental impacts attendant to the diversion of traffic from rail to motor carrier should be minimal. Moreover, most of the traffic is generated at the endpoints of the branch which will continue to have rail service upon abandonment. Applicant proposes to abandon operations only in case future economic development should necessitate a reopening of the line for rail service.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202–343–7966.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C., 20423, on or before January 14, 1976.

This negative environmental determination shall become final unless good and sufficient reason demonstrating why an environmental impact statement should be prepared for this action is submitted to the Commission by the above-specified date.

ROBERT L. OSWALD, *Secretary.*

■

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

V40249 DEC 29 75 XUM

writing to the U.S. Department of Labor,

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determinations by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138), and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the orginal General Wage Determination Decision.

MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State.

CLASSIFICATION DEFINITIONS
POWER EQUIPMENT OPERATORS
STEEL ERECTION

GROUP 1 - Helicopters pilot/engineer.

GROUP 2 - Cranes (all cranes - land or floating with booms - including jib, 140 feet and over above the ground); derricks (land or floating with booms including jib, 140 feet and over above the ground); helicopters co-pilot & communications engineer.

GROUP 3 - Cranes (all cranes - land or floating with booms - including jib, less than 140 feet above the ground); derricks (land or floating, with booms including jib, less than 140 feet above the ground).

GROUP 4 - Aerial platform used as hoist; A-frame; cherry pickers - 6 tons and under (over 6 tons - crane rate applies); fork lifts; hoists (all types except Chicago Boom type); jacks (screw air hydraulic power operated unit or console type, not hand jack or pile load test type); side booms.

GROUP 5 - Compressors (2 or 3 in battery); generators; welding machines (gas or electric convertors of any type 2 or 3 in battery multiple welders); welding system multiple (rectifier transformer type).

GROUP 6 - Maintenance engineer.

GROUP 7 - Fireman

GROUP 8 - Compressor (single); rod bending machines (power); welding machines (gas or electric converters of any type-single).

GROUP 9 - Assistant engineer/oiler; straddle carrier.

50¢ per hour on machines where "Cat Head" or "Sheave Point" is at least 100 feet above ground level and less than 140 feet; 75¢ per hour on machines where "Cat Head" or Sheave Point" is 140 feet, or over above ground level.

DECISION #NJ75-3050 (cont'd)

CLASSIFICATION DEFINITIONS
POWER EQUIPMENT OPERATORS

GROUP 1 - Helicopters pilot/engineer.

GROUP 2 - Autograde-combination subgrader. base MTL spreader & base trimmer (CMI & similar type); autograde placer-trimmer-spreader-combination (CMI & similar types); autograde slip form paver (CMI & similar types); back hoes (all types, including all combination hoe loaders); central power plants (all types); concrete paving machines; cranes (all types, including overhead & straddle travelling type); cranes, gantry; derricks - land or floating (building & heavy construction rate only), drillmaster. quarry master (down the hole drill); draglines; elevator graders; engines, large diesel (1625 HP) and staging pump; front end loaders (5 yds & over); gradalls; grader, rago; helicopters co-pilot and communication engineer; jacks, screw air hydraulic power operated unit or console type (not hand jack or pile load test type); locomotive (large); mucking machines; pavers (21E and over); paver, resinous. Broyhill; pavement and concrete breaker (i.e. superhammer); pavement breaker truck mounted; piledriver; scooper (loader and shovel) Koehring; shovels; treechopper with boom; trench machines.

GROUP 3 - Pump, staging.

GROUP 4 - A-frame, boom attachment on loaders; boring & drilling machines; brush chopper, chipper & shredder; cableways; carryalls; cherry pickers - 6 tons & under (over 6 tons - crane rate applies); concrete pump; concrete pump system, pumpcrete, squeezecrete & similar types; conveyors, 125' & over; economobiles (hilo, lull, hyster similar type equipment); forklifts; front end loaders (2yds but less than 5yds); groove cutting machines (ride or type); heater planer; hoist (Chicago Boom); Pans, LeTourneau. DW's, Ukes, pumpcrete-unit type; pumpcrete machines. squeezecrete & concrete pumping; scrapers-LeTourneau. DW's Ukes; side booms; squeezecrete; "straddle" carrier, Ross and similar types; winch trucks (hoisting).

DECISION #NJ75-3050 (cont'd)

CLASSIFICATION DEFINITIONS (cont'd)
POWER EQUIPMENT OPERATORS

GROUP 5 - Aerial platform (used as hoist); hoists all types except Chicago Boom type (building & heavy construction rate only); elevator or house cars (building and heavy construction rate only); roof hoists.

GROUP 6 - Asphalt spreaders; bridge deck finisher; grader, finish only; rollers-blacktop.

GROUP 7 - Asphalt curbing machines; asphalt plant engineer; autograde tube finisher & texturing machine (CMI & similar types); autograde curecrete machine (CMI & similar types); autograde curb trimmer & sidewalk shoulder, slipform (CMI & similar types); barbanding machines (power); batchers, batching plant & crusher on site; bet convey or systems; boilers and steam jennies (building & heavy construction rate only); boom type skimmer machines (building & heavy construction rate only); car dumpers (railroad); compressor and blower type units; concrete breaking machines; concrete finishing machines; concrete saws & cutters (ride on type); concrete spreaders-hetsel, recomatic & similar types; concrete vibrators (highway, road, street & sewer construction rate only); conveyors, under 125 ft.; crushing machines; ditching machine, small (ditch witch or similar); drill doctor (duties include dust collector); dope pots (mechanical with or without pump); dumpsters; fine grade machine (large type); front end loaders (1 yd & over but less than 2 yds) - highway, road, street & sewer construction rate only; front end loaders (under 2 yds) - building and heavy construction rates only; generators; gireffe grinders; graders and motor patrols; gunnite machines (excluding nozzle); hammer vibratory (in conjunction with generator); hoppers; hopper doors (power operated); ladders (motorized) - building & heavy construction rate only; laddervator; lights, portable generating light plants; locomotive (dinky type); mechanic; mixers (excepting paving mixers); motor patrols & graders; pavers (under 21E); pavement breakers - small, self-propelled ride on type (also maintains compressor or hydraulic unit); pipe bending machine (power); pitch pump; plaster pump (regardless of size) - building & heavy construction rate only; post hole digger; rod bending machines (power); scales, power; seaman pulverizing mixer; silos; skimmer machines (boom type) - highway, road, street & sewer construction rate only; steam jennies and boilers; steel cutting machines, services & maintains; vibrating plants (used in conjunction with unloading); welder and repair mechanic

DECISION #NJ75-3050 (cont'd)

CLASSIFICATION DEFINITIONS (cont'd)
POWER EQUIPMENT OPERATORS

GROUP 8 - Compressors (2 or 3 within a total distance of 100' constitutes a battery) - building & heavy construction rate only; welding machines, gas or electric converters of any type - (2 or 3 in battery) - building and heavy construction rates only; welding system, multiple (rectifier transformer type) - building & heavy construction rate only.

GROUP 9 - Brooms & sweepers; bulldozer, D5 and over; firemen; sprinkler and water pump trucks (used on job site or in conjunction with jobsite); stone spreaders; sweepers & brooms; tractors, D8 & over; water and sprinkler trucks (used on job site or in conjunction with job site).

GROUP 10 - Compressors (2 or 3 within a total distance of 100' constitutes a battery) - highway, road, street and sewer construction rate only.

GROUP 11 - Front end loaders (under 1 yd.) - highway, road, street & sewer construction rate only.

GROUP 12 - Bulldozer under D5; rollers - grade fill or stone base; tractors, under D8.

GROUP 13 - Compressor (single); heaters (Nelson or other type including propane, natural gas or flow type units); pumps (4 inch suction & over including submersible pumps); pumps (2 of less than 4 inch suction including submersible pumps); pumps, diesel engine & hydraulic (immaterial of power) - highway, road, street & sewer construction rate only; temporary heating plant (Nelson or other type, including propane, natural gas or flow type units); welding machines, gas or electric converters of any type - single (building & heavy construction rate only); welding machines, gas or electric converters of any type (2 or 3 in battery) - highway, road, street & sewer construction rate only; wellpoint systems (including installation and maintenance).

DECISION #NJ75-3050 (cont'd)

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:

a. Holidays: A through F.

b. Employer contributes 4% of basic hourly rate for 5 years or more of service or 2% basic hourly rate after 6 months to 5 years of service as Vacation Pay Credit.

c. Holidays: A through F; Washington's Birthday, Good Friday, and Christmas Eve, providing employee has worked 45 full days during the 120 calendar days prior to the holiday, and the regular schedule work days immediately preceding and following the holiday.

d. Holidays: A through F; Washington's Birthday, Election Day for President of the United States and Election of Governor of New York State (provided employee works the day before and after the holiday.

e. After one year, one weeks vacation; 2 years, 6 days vacation; 3 years, 7 days vacation; up to 2 weeks maximum vacation after completion of the 5th year, full vacations are earned by a driver who works 1040 hours or more in the calendar year, vacation will be prorated for either 1 or 2 weeks of vaction on the basis of using the number of hours worked as the numerator and 1040 as the denominator.

f. Paid Holidays, A through F, Friday after Thanksgiving Day except where the employee is laid off 2 or more weeks prior to the holiday, however employees laid off less than 2 weeks prior to election Day will automatically be eligible for the subsequent Friday after Thanksgiving as a paid holiday even though laid off.

TRUCK DRIVERS: HEAVY AND HIGHWAY CONSTRUCTION:

CLASS 1
Warehouseman, yardmen, truck helpers, pickups, panel trucks, flatboy material trucks (straight jobs), single axel dump trucks, dumpsters, material checkers and receivers, greasers, truck firemen, mechanic helpers and parts chaser.

CLASS 2
Tandems, batch trucks, mechanics and dispatcher.

CLASS 3
Semi-trailers, low-boy trucks, asphalt distributor trucks, agitator, mixer trucks and dumpcrete type vehicles, truck mechanic.

CLASS 4
Specialized earth moving equipment - euclid type or similar off-highway equipment, where not self loaded, and straddle (ross) carrier.

CLASS 5
Off-highway tandem back-dump, twin engine equipment and double-hitched equipment where not self loaded.

SUPERSEDEAS DECISION

STATE: NEW YORK

COUNTY: CHAUTAUQUA

DECISION NO.: NY75-3123

DATE: DATE OF PUBLICATION

Supersedeas Decision No. NY75-3033 dated April 11, 1975 in 40 FR 16554
DESCRIPTION OF WORK: Building Construction, (excluding single family homes and garden type apartments up to and including 4 stories), heavy and highway construction.

7-N.Y.-1-2-3 E — 1 of 3

BUILDING, HEAVY AND HIGHWAY CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments: H & W	Pensions	Vacation	App. Tr.
Asbestos workers	$9.81	.82	.55		.04
Boilermakers	9.85	.50	.95		.02
Bricklayers, cement masons, plasterers, stone masons, marble, terrazzo workers & tile setters	9.35	.50	.80		
Cement masons, heavy & highway	8.50	.50	.70		
Carpenters & soft floor layers, bldg.	8.52	.50	.90		.05
Carpenters heavy & highway	8.42	.50	.90		.025
Electricians:					
Twps. of Mina, French Creek, Clymer, Sherman, Chautauqua, Ellery, Harmony, North Harmony, Busti, Cerry, Ellicott, Kiantone, Ellington, Poland & Carroll	10.85	.37	1%+.40		1%
Remainder of County	10.55	.45	1%+.40		.15
Glaziers	9.03	.50	.95		.06
Ironworkers, structural, ornamental & reinforcing:					
Twps. of Cherry Creek, Ellington, Sheridan, Pomfret, Charlotte, Arkwright, Hanover, Villanova & Stockton	10.27	.91	.91		.04
Remainder of County	9.50	.78	.69		.13
Laborers, building:					
Laborers & flagmen	7.00	.50	.60	a	
Blasterers, curb, form setters & pipelayers	7.25	.50	.60	a	
Work 40' & up	7.15	.50	.60	a	
Lathers	7.56	.40	.20		.01
Lead burners	9.25	.35		b	.01
Line Construction:

BUILDING, HEAVY & HIGHWAY CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments: H & W	Pensions	Vacation	App. Tr.

FOOTNOTES (cont'd):

b. Holidays: A through F, Washington's Birthday, Good Friday, Christmas Eve, providing employee has worked 65 full days during the 120 calendar days prior to the holiday and the regularly scheduled work days immediately preceding and following the holidays:

o. Holidays: A through F, Washington's Birthday, Good Friday, Election Day for President of the United States and Election or Governor of New York State (providing employee works the day before and the day after the holiday).

d. Two weeks vacation

e. Holidays: A through F.

f. One week vacation after one year's work; two weeks vacation after 2 years work.

g. One to three months service, 10 hours paid vacation, three to six months service, 20 hours paid vacation, six to nine months service 30 hours paid vacation, nine to twelve months service, 40 hours paid vacation.

NY75-3123 p.4

NY-21-LAB-2-3

LABORERS: HEAVY AND HIGHWAY CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments: H & W	Pensions	Vacation	App. Tr.
CLASS A	$ 7.49	.50	.60	a	
CLASS B	7.69	.50	.60	a	
CLASS C	7.89	.50	.60	a	
CLASS D	8.09	.50	.60	a	

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTE:

a. Paid Holidays A through F, provided the employee has worked the day before and after the holiday.

LABORERS: HEAVY AND HIGHWAY CONSTRUCTION:

CLASS A
Laborers, drill helper, flagmen, outboard and hand boats.

CLASS B
Bull float, chain saw, concrete aggregate, bin, concrete bootman, gin buggy, hand or machine vibrator, jackhammer, mason tender, mortar mixer, pavement breaker, handlers of all steel mesh, small generators for laborers' tools, installation of bridge drainage pipe, pipelayers, vibrator type rollers, tamper, drill doctor, tail or screw op. on asphalt paver, water pump op. (1½" and single diophragm), nozzle (asphalt, gunnite, seeding and sand blasting), laborers on chain link fence erection, rock splitter and power unit, pusher type concrete saw and all other gas, electric, oil and air tool operators, wrecking laborer.

CLASS C
All rock or drilling machine operators (except quarry master and similar type), acetylene torch op., asphalt raker, powderman.

CLASS D
Blasters, form setters, stone or granite curb setters.

NY15-3123 p.5

BUILDING CONSTRUCTION - POWER EQUIPMENT OPERATORS:

GROUP I: Crane with a main boom over 100 feet

GROUP II: All boom type equipment, all pan and carryall operators, Ambrer hoist, back and pull hoe operator, blast or rotary drill, track or cat mounted, boiler (when used for power), boom trucks, cableway operator, concrete paver machine, crane operator, derrick operator, dragline operator, elevating grader (self-propelled), head tower operator, mat roller (finish course), hydraulic booms, hydro crane, maintenance engineer, mucking machine operator, multiple drum hoist, (more than 1 drum in use), Peine crane, pile driving machine operator, power grader machine operator, scoopmobile, shovel operator, skimmer operator, test core drill machine, tractor shovel operator, vertical caisson auger drill, well drilling machine

GROUP III: Back filling machine operator, Kolman loader, roller machine operator, snatch and pusher cats, stone crusher, towed or self-propelled rollers, trenching machine operator

GROUP IV: Air hoist operator, cage hoist operator, conveyor operator, conveyor systems, (belt-crete or similar), hoisting engine op., house elevator, (when used for hoisting), industrial tractor, locomotive op., (irrespective of power), push button hoist op., Strato tower, tractors (when using winch power),

GROUP V: Concrete mixer op., (½ c.y. or over), gasoline driven boring machine, hydraulic system pumps, hydro hammer, finishing machine op., (asphalt spreader), finishing machine op., pump op., (4" or over), pump op., (2 or 3 in a battery)

GROUP VI: Air compressor operator, (under 160 cu. ft.), air compressor op., (over 160 cu. ft.), generator, grount machine operator, heating boiler operator, used for temporary heat), lubrication unit or truck, mechanical heaters, (when 3 are in a battery), mechanic or repairman, pneumatic mixer op., power plant (in excess of 10KW), welding machine operator, (to and including 3 machines)

GROUP VII: Bulldozer (over 50 h.p.), Monorail

GROUP VIII: Bulldozer & tractor, (50 h.p. drawbar or under), jeep trencher, mulchers, power brooms and rakes, seeders

GROUP IX: Fireman

GROUP X: Truck crane driver

GROUP XI: Aggregate bin op., apprentice engineer or oiler, cement bin op., concrete mixer op., (under ½ c.y.), mechanical heaters, (when one or two are used), pump operators (one inch), pump op., (two inches), pump operators, (three inches), tractor machines

POWER EQUIPMENT OPERATORS: HEAVY AND HIGHWAY CONSTRUCTION

CLASS I: Asphalt roller (except rubber tire), Automatic fine grade machine, backhoe (except tractor mounted, rubber tired), belt placer, black top plant (automated) blast or rotary drill, (truck or cat mounted), cableway, caisson auger, central mix plant (automated), cherry picker - over 5 tons capacity, crane, derrick, dragline, dredge, dual drum paver, elevating grader (self-propelled or towed), excavator (all purpose - hydraulically operated), front end loader (4 c.y. and over), gradall, grader, head tower, hoist, 2 or 3 drum, locomotive (irrespective of size or power), maintenance engineer, mine hoist, mucking machine, overhead crane, peine crane or similar type, pile driver, quarry master or equivalent, shovel, skimmer, slip form paver, tractor drawn belt-type loader, truck crane, tunnel shovel

CLASS II: Asphalt roller (rubber tired), asphalt spreader, automatic fine grade machine, backhoe (tractor mounted, rubber tired), back filling machine, bending machine (pipe), bituminous spreader and mixer, blacktop plant (non-automated), boom truck, boring machine, cage hoist, central mix plant (non-automated) and all concrete batching plants, cherry picker 5 tons and under, compressors (4 or less) exceeding 2,000 c.f.m. combined capacity, concrete paver over 16S, concrete pump, crusher, dozer or push cat, drill rigs, tractor mounted, elevator, front end loader (under 4 c.y.) hi-pressure boiler, (15 lbs. and over), hoist, one drum, hydraulic pipe jack machine or similar type machine, jersey spreader, kolman plant loader and similar type loaders (if employer requires another man to clean the screen or to maintain the equipment, he shall be an oiler), maintenance grease man, mixer for stabilized base self-propelled, monorail machine, plant engineer, pump crete, ready mix concrete plant, road widener, rock bit sharpener (all types), roller (all above subgrade, scraper, side boom, slip form paver, snorkel, stump chipping machine, trencher, tube finisher, winch, winch truck with A-frame

NYT5 3123 p. 8

POWER EQUIPMENT OPERATORS: HEAVY AND HIGHWAY CONSTRUCTION CONT'D.

CLASS III: Asphalt curb and gutter machines, blower for burning brush, chipping machine and chip spreader, compressors: 4 not exceed 2,000 c.f.m. combined capacity, 3 or less with more than 1,200 c.f.m. but not to exceed 2,000 c.f.m., compressor, (any size but subject to other provisions for compressors), dust collectors, generators, pumps, welding machines (4 of any type or combination) concrete pavement spreaders and finishers, concrete curb and gutter machine, concrete curing machines, conveyor drill core, drill well, electric pump used in conjunction with well point systems, farm tractor with accessories, fine grade machine, hammers-hydraulic-self-propelled, hydraulic rock expander or similar type machine, hydraulic pump, motorized hydraulic pin puller and seeders, post hole digger and post driver, roller (grade and fill), tractor with towed accessories, vibratory compactor, vibro tamp, well point

CLASS IV: Aggregate plant, boiler, (used in conjunction with production), C.M.I. and similar type concrete spreaders, cement bin operator, compressors: 3 or less not to exceed 1,200 c.f.m. combined capacity, compressors: (any size, but subject to other provisions, for compressors), dust collectors, generators, pumps, welding machines (3 or less of any type or combination), concrete mixer (16S and under), concrete saw self-propelled, fireman, form tamper, mulching machine, oiler, power broom, power heaterman, revinius widener, steam cleaner, tractor

TRUCK DRIVERS: HEAVY AND HIGHWAY CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Appr. Tr.
CLASS 1	$7.39	.55	.50	a	
CLASS 2	7.44	.55	.50	a	
CLASS 3	7.49	.55	.50	a	
CLASS 4	7.64	.55	.50	a	
CLASS 5	7.79	.55	.50	a	

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTE:
a. Paid Holidays A through F, provided the employee has worked the working day before and after the holiday.

TRUCK DRIVERS: HEAVY AND HIGHWAY CONSTRUCTION:

CLASS 1
Warehouseman, yardmen, truck helpers, pickups, panel trucks, flatboy material trucks (straight jobs), single axel dump trucks, dumpsters, material checkers and receivers, greasers, truck tiremen, mechanic helpers and parts chaser.

CLASS 2
Tandems, batch trucks, mechanics and dispatcher.

CLASS 3
Semi-trailers, low-boy trucks, asphalt distributor trucks, agitator, mixer trucks and dumpcrete type vehicles, truck mechanic.

CLASS 4
Specialized earth moving equipment - euclid type or similar off-highway equipment, where not self loaded, and straddle (ross) carrier.

CLASS 5
Off-highway tandem back-dump, twin engine equipment and double-hitched equipment where not self loaded.

SUPERSEDEAS DECISION

STATE: North Carolina COUNTY: Onslow
DECISION NUMBER: NC75-1116 DATE: Date of Publication
Supersedeas Decision No. AR-4048 dated October 25, 1974 in 39 FR 38078.
Description of Work: Building Construction (excluding single family homes and garden type apartments up to and including 4 stories).

	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
Asbestos workers	$5.65				
Bricklayers	6.00				
Carpenters	3.00				
Cement masons	4.33				
Electricians	4.37				
Ironworkers:					
Structural, ornamental & reinforcing	3.00				
Laborers:					
Laborers	2.75				
Lathers	5.00				
Painters, brush	4.25				
Plasterers	5.65				
Plumbers & steamfitters	5.51				
Roofers	3.00				
Sheet metal workers	3.44				
Truck drivers	2.75				
Welders - rate for craft.					
Power Equipment Operators:					
Backhoes	3.38				
Cranes	5.25				
Front end loaders	4.00				
Motor graders	4.18				
Piledriver	6.25				
Tractors	4.10

LABORERS: Goldendale, Longview and Vancouver

POWER EQUIPMENT OPERATORS: Astoria, Goldendale, Hood River, Longview, the Dalles and Vancouver

TRUCK DRIVERS: Astoria, Goldendale, Longview, the Dalles and Vancouver

Zone A - All jobs or projects located within 10 miles of the respective City Hall
Zone B - More than 10 miles but less than 25 miles from the City Hall
Zone C - More than 25 miles but less than 35 miles from the respective City Hall
Zone D - More than 35 miles but less than 45 miles from the City Hall
Zone E - More than 45 miles but less than 75 miles from the respective City Hall
Zone F - More than 75 miles from the respective City Hall

DECISION NO. WA75-5150

LABORERS (Area 1)
All Counties and portions of Counties East of the 120th Meridian

Group 1: Brush Hog Feeder; Carpenter Tender; Concrete Crewman (to include stripping of forms, hand operating jacks on slip form construction, application of concrete curing compounds, pumpcrete machine, handling the nozzle of squeezecrete or similar machine - 6" and smaller); Concrete Signalman; Crusher Feeder; Demolition (to include clean-up, burning, loading, wrecking and salvage of all material); Driller Helper; Dumpman; Fence Erector (to include guard rails, guide and reference posts, sign posts, posts and right-of-way markers); General Laborer; Grout Machine Header Tender; Nipper; Riprap Man; Scaleman; Stake Jumper; Structural Mover (to include spearating foundation preparation, cribbing, shoring, jacking and unloading of structure); Tailhoseman (water nozzle); Track Laborer (RR); Truck Loader; Timber, Bucker and Faller (by hand); Window Cleaner (prior to completion of construction)

Group 2: Cement Finisher Tender; Cement Handler; Demolition Torch; Dope Pot Fireman, non-mechanical; Form Cleaning Machine - Feeder, Stacker; Form setter, paving; Driller Helper (when required to move position machine); Nozzleman, water and air or steam; Pipe Layer, corrugated metal culvert; Pipewrapper; Pot Tender; Powderman Helper; Power Tool Operator, gas, electric, pneumatic; Sandblast Tailhoseman; Scaffold Erector, wood or steel; Railroad Equipment, power driven, except dual mobile power spiker or puller; Rodder and Spreader; Wheelbarrow, power driven; Well-point Man; Vibrator up to 4"

Group 3: Asphalt Raker; Asphalt Roller, walking; Chain Saw Operator with attachments; Concrete Saw Walking; Grade Checker, using level; Jackhammer Operator; Multi-section Pipe Layer; Nozzleman (to include squeeze and flocrete nozzle); Pavement Breaker; Power Buggy Operator; Railroad Power Spiker or Puller, dual mobile; Tamper (to include operation of Barco, Essex and similar tamper and pavement breakers); Trencher, Shawnee; Water Pipe Liner; Wagon Drills

Group 4: Chain Saw (faller); Laser Beam Operator; Pipe Layer (Caulker, Collarman, Jointer, Mortarman, Rigger, Jacker, Shorer and Lagger but not including laying corrugated metal culvert pipe)

Group 5: Concrete Stack; Mortar Mixer

Group 6: Caisson Worker, free air; High Scaler

DECISION NO. WA75-5150

LABORERS (Area 1) (Cont'd)
All Counties and portions of Counties East of the 120th Meridian

Group 7: Brush Machine (to include horizontal construction joint clean-up brush machine, power propelled); Drills (to include down-the-hole drills with 3 inch piston or larger and out-of-the-hole drills with 4 inch piston or larger); Gunnite (to include operation of machine and nozzle); Hod Carrier; Monitor Operator, air track or similar mounting; Nozzleman (to include jet blasting nozzleman over 1200 pounds, jet blast machine power propelled, sand blast nozzle); Vibrator, 4 inches and over

Group 8: Air Track Drills with Dual Masts and Drills; Powderman

Group 9: Tunnel and Shaft, Free Air
Class A: Bull Gang, Pump Crete Crewman including distributing pipe, Assembling and dismantle and nipper
Class B: Brakeman, Dumpman
Class C: Miner and Nozzleman for concrete and laser beam operator on tunnels
Class D: Raise and Shaft Miner and Laser Beam Operator on raises and shafts

LABORERS (Area 2)
All Counties West of the 120th Meridian (except those enumerated in Areas 3 and 4)

Group 1: General Laborer; Nipper; Truck Spotter; Pitman; Brush Cutter; Choke Setter; Concrete and Monolithic Laborer; Pot Tender; Asphalt Laborer; Ditch Digger; Driverman; Concrete Form Stripper; Carpenter Helper; Track Laborer; Wellpoint; Header Laborer and Guardrail Erector

Group 2: Dumpman; Faller and Bucker; Hand; Powderman's Helper; Sloper (over 20'); Wagon Driller and Air Trac Helper

Group 3: Groutman (pressure) including post tension beam; Power Tools (light duty) Chippers, Grinders, Tampers, and similar electric and air operated tools; Swinging Scaffold or Boatswain Chair over water or over 25' in height; Topman

Group 4: Concrete Saw Operator; Pipe Pot Tender; Power Wheel Barrow or Buggy; Power Tools (heavy duty); Jackhammer, Pavement Breaker, Vibrator Tampers (multiple and self-propelled); Railroad spike puller; Rakers-asphalt

DECISION NO. WA75-5150

LABORERS (Area 2) (Cont'd)

All Counties West of the 120th Meridian (except those enumerated in Areas 3 and 4)

Group 5: Form Setter (steel forms); Grademan and Stake Hopper; Rodder; Nozzleman (concrete pump, green cutter when using combination of high pressure air and water on concrete and rock, sand blast, gunnite, shotcrete); Spreader (carrier grade with Rodder)

Group 6: Faller and Bucker; Chain Saw; High Scaler; Mortarman and Hod Carrier; Pipe Layer and Caulker; Pipe Wrapper; Timberman - Sewer; Wagon Driller and Air Track; Manhole Builder; Laser Beam Operator

Group 7: Cement Dumper - paving; Powderman

TUNNEL WORK

Group 8: Topman and Bull Gang

Group 9: Chuck Tender; Mucker and Laborer; Nipper; Brakeman

Group 10: Powderman's Helper

Group 11: Miner (including monolithis work); Spader; Re-timberman; Maintenance Man; Laser Beam Operator

Group 12: Miner, Shaft and Raise

Group 13: Powderman

LABORERS (Area 3)

Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 1: Asphalt Plant Laborers; Asphalt Spreaders; Batch Weighman; Broomers; Brush Burners and Cutters; Car and Truck Loaders; Carpenter Tender; Changehouse Man or Dry Shak Man; Choke Setter; Clean Up Laborers; Concrete Laborers; Culvert, Hand labor; Curing, concrete; Demolition, wrecking, and moving Laborers; Driller Helpers; Dumpers, road oiling crew; Dumpmen (for grading crew); Elevator Feeders; Fence Builder (including guard rail, median rail, reference post, guide post, right-of-way marker); Fine Graders; Flagmen, traffic; Form Strippers (not swinging stages); Landscaping or Planting Laborers; Leverman or Aggregate Spreader (Flaherty and similar types); Loading Spotters; Material Yard Man (including electrical); Powderman Helper; Pittsburgh Chipper Operator or similar types Railroad Track Laborers; Ribbon Setters (including steel forms); Rip Rap Man (hand placed); Road Pump Tender; Sewer Labor; Signalman; Skipmen; Slopers Spraymen; Stake Chaser; Stockpiler; Timber Faller and Bucker (hand labor); Toolroom Man (at job site); Tunnel Bull Gang (above ground); Weight Man - Crusher (aggregate when used)

DECISION NO. WA75-5150

LABORERS (Area 3) (Cont'd)

Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 2: Applicator (including pot tender for same), applying protective material by hand or nozzle on utility lines or storage tanks on project; Brush Cutters (power saw); Burners; Choker Splicer; Clary Power Spreader and similar types; Clean-up Nozzleman-Greencutter (concrete, Rock, etc.); Concrete Power Buggyman; Crusher Feeder; Demolition and Wrecking charred materials; Grade Checker; Gunite Nozzleman Tender; Gunite or Sand Blasting Pot Tender; Handlers or Mixers of all materials of an irritating nature (including cement and lime); Power Tool Operators, includes but not limited to: Dry Pack Machine, Jackhammer, Chipping Guns, Paving Breakers, Vibrators (less than 4" in diameter); Post Hole Digger, air gas or electric; Vibrating Screed; Tampers, Ribbon Setter, head, Rip Rap Man (head), hand placed, Sand Blasting (wet), Stake Setter, Tunnel-Muckers, Brakemen, Concrete Crew, Bull Gang (underground)

Group 3: Asphalt Rakers; Bit Grinder; Drill Doctor; Drill Operators, Air Tracks, Cat Drills, Wagon Drills, Rubber-mounted Drills, and other similar typed; Concrete Saw Operator; Gunite Nozzleman; High Scalers, Strippers and Drillers (covers work in swinging stages, chairs or belts, under extreme conditions unusual to normal drilling, blasting, barring-down, or sloping and stripping); Laser Beam (pipe laying) - Applicable when employee assigned to move, set up, align Laser Beam; Manhole Builder; Powderman; Power Saw Operators (bucking and falling); Pumpcrete Nozzleman; Sand Blasting (dry); Sewer Pipe Layers; Sewer Timberman; Track Liners, Anchor Machines, Ballast Regulators, Multiple Tampers, Power Jacks; Tugger Operator; Tunnel - Chuck Tenders, Nippers, and Timbermen; Vibrators (4" and larger); Water Blaster; Welder

Group 4: Laser Beam (Tunnel) - Tunnel Miners; Tunnel Powderman

LABORERS (Area 4)

Thos portions of Chelan, Douglas, Kittitas, Okanogan and Yakima Counties West of the 120th Meridian

Group 1: General Laborer; Carpenter Tender; Form Stripper; Track Laborer; Choker Setter; Fence Laborer

Group 2: Air Track and Wagon Drill Helper; Crusher Feeder; Dumpman; Powderman Helper; Sloper, over 20 feet, faller and bucker, hand

Group 3: Drill Chipper; Grinder, Tampers and similar light power tools; Grout Man (power); Top Man, Swinging Scaffold or Boatswain Chain over water or over 25' in height

Group 4: Asphalt Raker and Spreader; Cement Handler, Cask or bulk; Dope Pot Tender; House Wreckers; Jackhammer; Pavement Breaker; Vibrator; Track Spike Puller; Concrete Saw and similar Heavy Power Tools; Power Buggy Tampers (multiple and self-propelled)

DECISION NO. WA75-5150

LABORERS (Area 4) (Cont'd)

Those portions of Chelan, Douglas, Kittitas, Okanogan and Yakima Counties West of the 120th Meridian

Group 5: Form Setter, Steel Forms; Grademan, Stake Hopper; Spreader, Rodder, Nozzleman: Concrete Pumps, Gunnite, Sand Blast, Shot-crete, Green Cutter when using combination of high pressure air and water on concrete and rock

Group 6: Air Track and Wagon Drill Operator; High Scaler; Pipe Layer and Caulker; Pipe Wrapper; Timber Man; Mortar Man and Hod Carrier; Faller and Bucker; Chain Saw

Group 7: Cement Dumpers - Paving

Group 8: Tunnel Work:
Class A: Topman and Bull Gang
Class B: Chuck Tender; Mucker and Laborer; Nipper; Brakemen
Class C: Powderman Helper
Class D: Miner (including Monolithic Worker); Re-Timberman; Maintenance Man; Spader, Laser Beam Operator
Class E: Miner; Shaft and Raise
Class F: Powderman

POWER EQUIPMENT OPERATORS (Area 1)

All Counties and portions of Counties East of the 120th Meridian

Group 1: Bit Grinders; Bolt Threading Machine; Compressors, under 2,000 cu. ft. per minute gas, diesel or electric power; Crusher Feeder (mechanical); Deckhand; Drillers' Helper; Fireman and Heater Tender; Grade Checker; Helper (mechanic or welder, H.D.); Oiler; Oiler and Cable Tender, Mucking Machine; Pumpman; Rollers, all types on subgrade (farm type, Case, John Deere and similar - or compacting or vibrator) except when pulled by dozer with operable blade; Steam Cleaner; Welding Machine

Group 2: A-Frame Truck (single-drum); Assistant Refrigeration Plant (under 1,000 tons); Assistant Plant Operator, Fireman or Pugmixer (asphalt); Bagley or Stationary Scraper; Batch Plant and Wet Mix Operator, single unit (concrete); Belt Finishing Machine; Bending Machine (pipeline); Blower Operator (cement); Cement Hogh; Compressor (2,000 cu. ft. or over, 2 or more - gas, diesel or electric power); Concrete Saw (multiple Cut); Distributor Leverman; Elevator Hoisting Materials; Dope Pots (power agitated); Fork Lift of Lumber Stacker, Hydra-lift and similar; Gin Trucks (pipeline); Hoist, single drums; Loader (bucker elevator and conveyors); Longitudinal Float; Mixer (portable-concrete); Pavement Breaker (hydra-hammer and similar); Post Hole Auger or Punch; Power Broom; Railroad Ballast Regulation Operator, (self-propelled); Railroad Power Tamper Operator (self-propelled); Railroad Power Tamper Jack Operator (self-propelled); Spray Curing Machine (concrete); Spreader Jack Operator (self-propelled); Straddle Buggy (Rosa and similar on construction job site); Tractor (farm type R.T with attachments except backhoe); Tugger Operator; Ditch Witch or similar

DECISION NO. WA75-5150

POWER EQUIPMENT OPERATORS (Area 1) (Cont'd)

All Counties and portions of Counties East of the 120th Meridian

Group 3: A-Frame Truck (2 or more drums); Assistant Refrigeration Plant and Chiller Operator (over 1,000 tons); Backfillers (Cleveland and similar); Belt-crete Conveyors with power pack or similar; Belt Loader (Kocal or similar); Blade Operator (motor patrol and attachments); Boat Operators; Boom Cats (side); Boring Machine (earth); Boring Machine (rock under 8" bit) (Quarry Master, Joy or similar); Bump cutter (Wayne, Saginaw or similar); Canal Linning Machine (concrete); Chipper (without crane); Cleaning and Doping Machine (pipeline); Concrete Pumps (squeeze-crete, flow-crete, pump-crete, Whitman and similar); Drills (Churn, Core, Calyx, or Diamond); Elevating Belt-type Loader (Euclid, Barber Greene or similar); Elevating Grader-type Loader (Dumor, Adams, or similar); Equipment Serviceman, Greaser and Oiler; Generator Plant Engineers (diesel, electric); Gunite Combination Mixer and Compressor; Hoist (2 or more drums or tower hoist); Loader (overhead and front-end under 4 yards, R/T); Locomotive Engineer; Mixermobile; Mucking Machines; Paver or Curb Extruder (asphalt and concrete); Pump (grout or jet); Rollerman (finishing pavement); Rubber-tired Scraper (one motor with one scraper, under 40 yards); Screed Operator; Soil Stabilizer (P & H or similar); Spreader Machine; Tractor (crawler, including dozer, scraper, drills, booms, rollers, etc.); Traverse Finishing Machine; Trenching Machines (under 7 feet depth capacity); Turnhead Operator; Vacuum Drill (reverse circulation drill, under 8")

Group 4: Asphalt Plant Operator; Crusher, Grizzle and Screening Plant Operator; H.D. Mechine; H.D. Welder; Refrigeration Plant Engineer (under 1,000 ton); Rubber-tired Scraper, Multi-engine Power, with one scraper (Euclid, TS-24 and similar); Rubber-tired Scrapers, one motor with one scraper (40 yards and over); Surface Heater and Planer Machine; Turnhead (with re-screening)

Group 5: Automatic Subgrader (ditches and trimmers) (Autograde, ABC, R. A. Hansen and similar on grade wire); Backhoes (under 3 yards); Batch and Wet Mix Operator - multiple units (2 and including 4); Chipper (with crane); Clamshell Operator (under 3 yards); Concrete Slip Form Paver; Cranes all (under 3 yards); Drilling Equipment (8" bit and over) (Robbins' reverse circulation and similar); Loader Operator (front end and overhead 4 yards to 8 yards); Piledriving Engineers; Paver (dual drum); Quad-track or similar equipment; Railroad Track Liner Operator (self-propelled); Rubber-tired Scrapers, multi-engine, power with one scraper (Euclid, TS-24 and similar), Push Pull or Help Mate in use; Rubber-tired Scrapers, multiple engines with tow scrapers; Shovels (under 3 yards); Refrigeration Plant Engineer (1,000 tons and over); Signalmen (Whirleys, Highline Hammerheads or similar); Trenching Machines (7 feet depth and over); Multiple Dozer units with single blade

DECISION NO. WA75-5150

POWER EQUIPMENT OPERATORS (Area 1) (Cont'd)

All Counties and portions of Counties East of the 120th Meridian

Group 6: Backhoes (3 yards and over); Batch Plant (over 4 units); Cableway Controller - Dispatcher; Cableway Operator; Clamshell Operator (3 yards and over); Cranes, all - 65 tons and over; Derricks and Stifflegs (65 tons and over); Draglines (3 yards and over); Elevating Belt (Holland type); Loader (360 degrees revolving Koehring Scooper or similar); Loaders (overhead and front-end over 8 to 12 yards); Rubber-tired Scrapers (multiple engine with three or more scrapers); Shovels (3 yards and over); Tower Crane; Whirleys and Hammerheads (all)

Group 7: Helicopter Pilot; Loaders (overhead and front-end - over 12 yards)

POWER EQUIPMENT OPERATORS (Area 2)

All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County

Group 1: Mechanics' Helpers (heavy duty)

Group 2: Oilers, Grade Checkers and Stakemen and/or Brakemen

Group 3: Firemen; Firemen (drier and hot plant)

Group 4: Rollers, Tampers and Vibrators (other than plant, road mix or multi-lift materials); Tractor (farmall type, 60 h.p. and under); Compressor (excavating and general purposes)

Group 5: Oiler Driver on Truck Cranes (over 45 tons up to 100)

Group 6: Blower Distributors and Mulch Seeding Operator; Oil Distributors

Group 7: Locomotives (Dinkey-air, diesel, electric, gas, steam)

Group 8: Equipment Service Oiler; Oiler Driver on Trucks Cranes (100 tons and over)

Group 9: Pump (water); Tractors (Farmall type, over 60 h.p.)

Group 10: Post Hole Diggers (mechanical)

Group 11: Brooms (power, Wayne, Saginaw and similar types); Bulldozers (under D9 or similar); Loaders (Fork Lifts or Lumber Stacker - on construction job site - Drot Travel Lift); Rollers, Tampers and Vibrators (twin engine); Saw (concrete); Scrapers (carry-all type, single)

DECISION NO. WA75-5150

POWER EQUIPMENT OPERATORS (Area 2) (Cont'd)

All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County

Group 12: Batch Plant (batch and mixer, 200 yards per hour and under); Cranes ("A" Frame Trucks, single power drum); Conveyors; Crusher (rock); Washing and Screening Plants; Finishing Machine Operator, Concrete Paving; Hoists, Air Tuggers, Strato Tower Bucket, Elevators and Deck Winches (power); Loaders (Elevating-Athey, Barber Greene and similar types, and overhead and front-end, under 2½ yards); Mixers (asphalt up to 4 tons per batch, and concrete mixer and batch - 200 yards per hour and under); Power Plant Operators; Pumps (Fuller Kenyon and Concrete and Pumpcrete); Rollers, Tampers and Vibrators (on plant, road mix or multi-lifts materials); Screed man; Spreaders (Blaw Knox, Cedarapids, Jaeger, Flarrety or similar types); Trenching Machine (under 16 inches)

Group 13: Mechanics or Welder (heavy duty)

Group 14: Motor Patrol Graders (including Model 14 and similar); Tournapulls, Caterpillar, Euclid Scrapers and similar type equipment (25 yards and under)

Group 15: Compressor (steel erection including sandblasting, painting of the same); Hoists on steel erection, Air Tuggers and Towermobiles; Loaders (fork lifts with tower)

Group 16: Cement Hogs; Loaders (Elevating Grader type, Dumor and similar); Locomotive (greared or rod engine); Mixers (paving); Scraper (carryall type, double)

Group 17: Tractors (farmall type, used as Backhoes, Rubber-tired, Ford, Ferguson, Case and similar type 60 h.p. and under)

Group 18: Bull Dozer (D-9 or similar)

Group 19: Trenching Machines (16 inches and over)

Group 20: Bump Cutter (Concut, Christianson or similar types)

Group 21: Batch Plant (batch and mixer, over 200 yards per hour through 400 yards per hour); Conveyors (Beltcrete with power pack and similar types); Loaders (elevating belt type - Euclid and similar types); Mixer (asphalt, 4 tons and over, per batch, and concrete mixers and batch - Over 200 yards per hour through 400 yards per hour, and paving dual)

DECISION NO. WA75-5150

POWER EQUIPMENT OPERATORS (Area 2) (Cont'd)

All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County

Group 22: Bulldozer engaged in Yo Yo Operation (while clearing and scaling); Cableways (3 yards and under); Cranes ("A" Frame trucks, double power drum: and Crawler, truck type, floating, Locomotive, Whirley, either 3 yards and under, or 150' of boom including jibs and under, or 45 tons and under: and Hydralifts, Hyster Cat Cranes and attachments and Chipper, wood with boom attachment); Derricks, all; Drilling Machine (core, cable rotary and exploration); Loader (fork lift with power boom and swing attachment, and overhead and front end, 2½ yards and up to 4 yards); Mixers (mobile type with hoist combination); Motor Patrol Gradera (over Model 14 and similar); Mucking Machines (mole, tunnel drill, and/or shield); Paydozer and Linker Pusher (Quad-9 and similar); Piledriver Engineer, (L.B. Foster Puller or similar, Paving Breaker); Shovels (Crawler and truck typea, all attachments, 3 yards and under); Sub Grader (Gurries, CMI and similar types); Tractors (Farmall type, used as backhoes, rubber tired - Ford, Ferguson, Case and similar types - over 60 h.p.); Tournapulls, Caterpillar, Euclid Scrapers and similar type equipment - over 25 yards through 40 yards

Group 23: Loaders (overhead and front end, 4 yards up to 8 yards)

Group 24: Mixer (concrete mixers and batch over 400 yards per hour through 600 yards per hour)

Group 25: Tournapulls, Caterpillar, Euclid, Scrapers and similar type (over 40 yards through 55 yards)

Group 26: Cableways (over 3 yards); Crane (Crawler, truck type, floating, Locomotive, Whirley, either over 3 yards, or over 150' of boom including jibs or over 45 tons up to 100 tons: and, Tower Cranes, Pecco, Lorraine, Bucyrus and similar types); Helicopter Winch Operator; Remote Control Operator on Rubber-tired Earth Moving Equipment; Shovels (Crawler and truck type, all attachments, over 3 yards up to 6 yards); Slip Form Paver (Zimmerman, CMI and similar types)

Group 27: Tournapulls, Caterpillar, Euclid, Scrapers, and similar type equipment (over 55 yards through 70 yards)

Group 28: Loaders (overhead and front end 8 yards and over)

Group 29: Tournapulls, Caterpillar, Euclid, Scrapers and similar type equipment (over 70 yards through 85 yards)

Group 30: Cranes (Crawler, Truck type, Floating, Lucomotive, Whirley, either 5 yards and over 200' of boom including jibs and over, or 100 tons and over); Shovel (Crawler and Truck type, all attachments, 6 yards and over)

Group 31: Tournapulls, Caterpillar, Euclid, Scrapers and similar types equipment (over 85 yards through 100 yards)

DECISION NO. WA75-5150

POWER EQUIPMENT OPERATORS (Area 3)

Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 1: Oiler, including plant, crane, cursher, guardrail equipment, and trenching machine; Assistant Conveyor Operator; Crusher Feederman; Deckhand; Self-propelled Scaffolding Operator; Guardrail Punch Oiler; Pump Operator, under 4"; Brakeman; Switchman; Parts Man (tool room)

Group 2: Blade Operator, pulled type; Truck Crane Oiler-driver, 25 ton capacity or over; Crane Fireman, (all equipment except floating); A-Frame Truck Operator, single drum; Tugger or Coffin type Hoist Operator; Drill Helper; Auger Oiler; Boatman; Fork Lift or Lumber Stacker Operator (on job site); Oiler, Combination Guardrail Machines; Temporary Heating Plant Operator; Grade Oiler, required to check grade; Grade Checker; Tar Pot Fireman; Tar Pot Fireman (power agitated); H.D. Repairman Helper; Welder's Helper; Helicoptar Radioman (ground); Roller Operator, grading of base rock (not asphalt)

Group 3: Asphalt Plant Fireman; Pugmill Operator (any type); Truck mounted Asphalt Spreader, with screed; Compressor Operator (any power), under 1,250 cu. ft. total capacity; Convayor Operator; Mixer Box Operator (C.T.B., Dry Batch, etc.); Cement Hog; Concrete Saw; Concrete Curing Machine (riding type); Wire Mat or Brooming Machine; Ross Carrier Operator (on job site); Bucket Elevator Loader, Barber-Greene and similar types; Hydraulic Pipe Press; Pump Operator (any power), 4" and over; Hydrostatic Pump; Motorman; Ballast Jack Tamper; Bell Boy phones, etc.; Tamping Machine, mechanical self-propelled; Hydrographic Seeder Machine, straw, pulp or seed; Broom Operator, self-propelled (on job site); Air Filtration Equipment; Welding Machine Operator

Group 4: Screed Operator; Compactor, including Vibratory; Compressor (any power) over 1,250 cu. ft. total capacity; Combination Mixer and Compressor, Gunnite work; Concrete Mixer Operator, single drum, under five bag capacity; Helicopter Hoist Operator; Floating Equipment Fireman; Lull Hi-lift Operator or similar type; Fork Lift, over 5 ton; Service Oiler (greaser); Hydra Hammer or similar types; Pavement Breaker; Pump Operator, more than 5(any size); Locomotive, under 40 tons; Roller Operator, Oiling, C.T.B.

Group 5: Extrusion Machine; Wagner Factor or similar type (without blade); Concrete Batch Plant Quality Control Operator; Power Jumbo, Setting Slip Forms, etc. in tunnels; Slip Form Pumps, Power driven Hydraulic Lifting Device for concrete forms; Hoist, single drum; Elevator Operator; Fulva-mixer or similar types; Chip Spreading Machine Operator; Lime Spreading (on job site); Sweeper (Wayn type) Self-propelled (on job site); Tractor, rubber-tired 50 H.P. Flywheel and under; Trenching Machine, maximum digging capacity 3 ft. depth

DECISION NO. WA75-5150

POWER EQUIPMENT OPERATORS (Area 3) (Cont'd)

Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 6: Asphalt Burner and Reconditioner; Pavement Grinder and/or Grooving Machine (riding type); Cast-in-place Pipe Laying Machine; Maginnis Internal Full Slab Vibrator; Concrete Finishing Machine, Clary, Johnson, Bidwell, Burgess Bridge Deck or similar type; Curb Machine, Mechanical Berm, Curb and/or Curb and Gutter; Concrete Joint Machine; Concrete Planer; Concrete Paving Machine; Concrete Spreader; Loaders, rubber-tired type, 2-1/2 cu. yds. and under; Rock Spreaders, self-propelled

Group 7: Roller (any asphalt mix); Beltcrete; Pumpcrete Operator (any type); Cement Pump, Fuller-Kenyon and similar; Concrete Pump; Grouting Machine; Concrete Mixer, single drum, five bag capacity and over; Tower Mobile Operator; A-Frame Truck double drum; Boom Truck; Churn Drill and Earth Boring Machine; Hydraulic Backhoe, wheel type 3/8 cu. yds. and under with or without front end attachments 2-1/2 cu. yds. and under (Ford, John Deere, Case type); Elevating Grader, Tractor towed requiring operator or grader; Pot Rammer; Ballast Regulator; Ballast Tamper, Multiple-purpose; Track Liner; Tie Spacer; Shuttle Car; Locomotive, 40 tons and over

Group 8: Diesel-Electric Engineer, Plant, Crusher, Generator, Floating; Batch Plant and/or wet mix, one and two drum; Generator Operator; Belt Loaders, Kolman and Ko Cal types; Asphalt Paver Operator

Group 9: Bulldozer; Drill Cat Operator; Side-boom Cat; Compactor, with blade; Concrete Cooling Machine; Chicago Boom and similar types; Lift Slab Machine; Boom type Lifting Device, 5 ton capacity or less; Cherry Picker or similar type Crane-hoist, 5 ton capacity or less; Grizzley Crusher; Crusher Plant; Drill Doctor; Boring Machine; Guardrail Punch and Auger (all types); Surface Heater and Planer; Hydraulic Backhoe, track type 3/8 cu. yd.; Loader, front end and overhead, 2-1/2 cu. yds. and under 4 cu. yds.; Hammer Operator; Pipe Cleaning, Doping, Bending and Wrapping Machines; Bolt-threading Machine; Drill Doctor (bit grinder); H.D. Mechanic and Welder; Machine Tool Operator; Stationary Drag Scraper; Tractor, rubber-tired over 50 H.P. flywheel; Tractor with boom attachment; Trench Machine, maximum digging capacity over 3 ft. depth; Asphalt Plant Operator

Group 10: Bulldozer, twin engine (TC12 and similar); Cable plow (any type); Compactor, multi-engine; Jack Operator, Elevating Barges; Barge Operator, self-unloading; Combination H.D. Mechanic-Welder, when dispatched and/or when required to do both; Rubber-tired dozers and Pushers (Michigan, Cat, Hough type); Driller-Percussion, Diamond, Core, Cable, Rotary and similar type

DECISION NO. WA75-5150

POWER EQUIPMENT OPERATORS (Area 3) - (Cont'd)

Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and Southern portion of Pacific, Counties

Group 11: Mixer Mobile; Concrete Breaker; Crane Operator, 25 tons and under; Combination Guardrail Machines, i.e., Punch, Auger, etc.; Shovel; Dragline; Clamshell, Hoe, etc., under 1 cu. yd.; Grade-alls, under 1 cu. yd.; Mucking Machine (tunnel)

Group 12: Blade Operator; Batch Plant and/or Wet Mix, 3 units or more; Reinforced Tank Banding Machine (K-17 or similar); Hoist, two or more drums; Elevating Loader, Athey and similar; Piledrver (not crane type); Rubber-tired Scraper, single and twin engine, Single Scraper, with push-pull attachments, self-loading, Paddle Wheel, Auger type; Blade mounted Spreaders, Uirich and similar types; Shielf Operator

Group 13: Blade Operator, finish; Blade, externally controlled by electronic, mechanical hydraulic means; Blade, multi-engines; Concrete Paving Road Mixer; Derrick, under 100 tons; Hoist, Stiff Leg, Guy Derrick or similar, 50 tons a and over; Cableway Operator 25 ton and over; Crane, over 25 ton and including 50 tons; Piledriver Operator; Floating Clamshell, etc. under 3 cu. yds.; Floating Crane (derrick barge), less than 30 ton; Elevating Grader, Operated by tractor operator, Sierra, Euclid, or similar; Back Filling Machine; Shovel, etc., 1 cu. yd. snd less than 3 cu. yds.; Grade-all, 1 cu. yd. and over; Bridge Crane Operator, Locomotive Crane, Gantry sod Overhead

Group 14: Tower Crane Operator; Rubber-tired Scraper, with Tandem Scrapers, self-loading, Paddle Wheel, Auger type, Finish and/or 2 or more units

Group 15: Rock Hound Operator; Losder, 4 cu. yds., but less than 6 cu. yds.

Group 16: Auto-grader or "Trimmer"; Tandem Bulldozer, Quad-nine and similar; Automatic Concrete Slip Form Paver; Concrete Canal Line; Cableway, 25 ton and over; Crane, over 40 ton and including 100 ton; Whirley, 80 ton and under; Floating Clamshell, etc., 3 cu. yds. and over; Floating Crane (derrick barge) 30 ton but less than 80 ton; Loader, 6 cu. yds., but less than 12 cu. yds.; Rubber-tired Scraper, with Tandem Scrapers, Multi-engine; Shovel, etc., 3 cu. yds. but less then 5 cu. yds.; Wheel Excavator, under 750 cu. yds. per hour

Group 17: Crane over 100 ton and including 200 ton; Whirley over 80 ton and including 150 ton; Floating Crane (derrick barge) 80 ton less than 150 ton; Loader, 12 cu. yds. and over; Shovel, etc., 5 cu. yds. and over; Canal Trimmer

Group 18: Crane, over 200 ton; Whirley, 150 ton and over; Floating Crane 150 ton but less than 250 ton; Wheel Excavator, over 750 cu. yds. per hour; Band Wagons, in conjunction with Wheel Excavator

Group 19: Helicopter, when used in erecting work; Floating Crane 250 ton and over; Remote Controlled Earth Moving Equipment; Underwater Equipment, remote or otherwise

DECISION NO. WA75-5150

POWER EQUIPMENT OPERATORS (Areas 1 and 2)
(DREDGING)

Group Description for Areas 1 and 2

Group 1: Assistant Mate (deckhand)

Group 2: Fireman; Oiler

Group 3: Assistant Engineer (Electric, Diesel, Steam or Booster Pump); Mates and Boatmen

Group 4: Engineer Welder; Craneman

Group 5: Assistant Engineer (Electric Generator Operator for primary pump, power barge or dredge)

Group 6: Leverman, Hydraulic

Group 7: Leverman, Dipper:
(a) 5 yards and under
(b) Over 5 yards

Group Deacription for Area 3

Group 1: Leverman, Hydraulic

Group 1A: Leverman, Dipper

Group 2: Assistant Engineer (including Watch Engineer, Welder, Mechanic, and Machinist) and Mate

Group 3: Tenderman (Boatmsn, Attending Dredge Plant); Fireman

Group 4: Assistant Mate (Deckhand); Oiler

DECISION NO. WA75-5150

TRUCK DRIVERS (Area 1)

All Counties and portions of Counties East of the 120th Meridian (except those portions of Kittitas, Klickitat and Yakima Counties)

Group 1: Flat Bed Truck single rear axle; Escort Driver; Fish Truck; Fork Lift, 3,000 pounds and under; Fuel Truck Driver (Steam Cleaner and Washer); Helper and Swamper; Leverperson loading Trucks at Bunkers; Pick-up hauling material; Seeder and Mulcher; Stationary Fuel Operator; Team Driver; Tractor (small rubber tired pulling trailer or similar equipment); Water Tank Truck 1,800 gallons.

Group 2: Bus Driver or Employeehaul Driver; Flat Bed Truck, dual rear axle; Power Boat hauling employees or material; Tireperson No. 1; Warehouseperson

Group 3: Buggy Mobile and similar; Bulk Cement Tanker; Oil Tank Driver; Power Operated Sweeper; Semi-trailer, Low Bed, Truck and Trailer; Straddle Carrier (Ross Hyster and similar); Transit Mixers and Trucks hauling concrete (3 yards and under); Trucks, side, end, and bottom dump (under 6 yds.); Water Tank Truck (1,801 - 4,000 gallons)

Group 4: Auto Crane - 2,000 pounds capacity; Bulk Cement Spreader; Dumptor (6 yards and under); Flaherty Spreader, Box Driver; Flat Bed Truck (using power take off); Fork Lift (over 3,000 pounds); Oil Distributor Drivar (road, bottperson, leverperson helper); Rubber-tired tunnel jumbo; Scissor Truck; Slurry Truck Driver; Transit Mixers and Trucks hauling concrete (over 3 yds. to 6 yds.); Water Tank Truck (4,001 - 6,000 gallons); Wrecker and Tow Trucks

Group 5: Low Boy (under 50 tons); Service Greaser; Tireperson No. 2; Truck, side, end, and bottom dump (over 6 yards to 12 yards)

Group 6: A-Frame (Swedish Crane, Iowa 3,000, Hydrolift); Water Tank Truck (over 6,001 - 8,000 gallons)

Group 7: Dumptor (over 6 yards); Transit Mixers and Trucks hauling concrete (6 yards to 10 yards); Trucks, side, end, and bottom dump (over 12 yards including 20 yards)

Group 8: Low Boy (over 50 tons); Water Tank Truck (8,001 - 10,000 gallons); Tractor with Steer Trailer

Group 9: Transit Mixers and Trucks hauling concrete, (10 yards to 15 yards); Trucks, side, end and bottom dump (over 20 yards including 30 yards); Water Tank Truck (10,001 - 12,000 gallons)

Group 10: Mechanic, Field

Group 11: Tournarocker, D.W.'s and similar, with 2 or 4 wheel power tractor with trailer, g llonage or yardage scale, which is greater; Transit Mixers and Trucks hauling concrete (15 yards to 20 yards); Trucks, side, end and bottom dump (over 30 yards to 40 yards); Water Tank Truck (12,001 - 14,000 gallons)

DECISION NO. WA75-5150

TRUCK DRIVERS (Area 1) (Cont'd)

All Counties and portions of Counties East of the 120th Meridian (except those portions of Kittitas, Klickitat and Yakima Counties)

Group 12: Transit Mixers and Trucks hauling concrete (over 20 yards); Trucks, side, end and bottom dump (over 40 yards to 50 yards)

Group 13: Truck, side, end and bottom dumps (over 50 yards to 100 yards)

Group 14: Helicopter Pilot hauling employees or material ; Trucks, side, end and bottom dump (over 100 yards)

TRUCK DRIVERS (Area 2)

All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County and including all of Kittitas and Yakima Counties

Group 1: Leverman and Loaders at bunkers and batch plants; Pickup Truck, Escort or Pilot Car; Swampers; Warehouseman and Checkers

Group 2: Team Drivers

Group 3: Bull Lifts and similar equipment used in losding and unloading trucks, transporting materials on job site, warehousing; Dumpsters, and similar equipment (including Tournarockers, Tournewagon, Turnatrailer, Cat DW series, Terra Cobra, LeTourneau, Westinghouse, Athey Wagon, Euclid, two and four-wheeled power tractor with trailer and similar top-loaded equipment transporting material: Dump Trucks - side, end and botton dump, including Semi-trucks and Trains or combinations thereof) - up to and including 5 yards; Flatbed, single rear axle; Fuel Truck; Grease Truck; Greaser, Battery Service Man and/or Tire Service Man; Scissor Truck; Spreader, Flaherty; Tractor (small, rubber-tired); Vacuum Truck; Water Wagon and Tank Truck (up to 1,600 gallons); Winch Truck, single rear axle; Wrecker, tow truck and similar equipment

Group 4: Flatbed, dual rear axle

Group 5: Buggymobile; Hyster Operators; Straddle Carrier (Ross, Hyster, and similar equipment); Water Wagon and Tank Truck, 1,600 gallons to 3,000 gallons)

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 1—General Provisions

CHAPTER IV—MISCELLANEOUS AGENCIES (PRIVACY REGULATIONS)

PART 415—BOARD FOR INTERNATIONAL BROADCASTING

Implementation

DECEMBER 23, 1975.

On page 40047 of the FEDERAL REGISTER dated August 29, 1975, there were published notices of proposed regulations for implementation by the Board for International Broadcasting of the Privacy Act of 1974 [1 CFR Part 415], and a listing of the Board's notices of record systems. Public comment was invited.

No public comment was received by the Board. The regulations are hereby adopted without change, as set forth below.

WALTER R. ROBERTS,
Executive Director.

PART 415—PRIVACY ACT IMPLEMENTATION

Sec.
415.1 Purpose and scope.
415.2 Definitions.
415.3 Procedures for requests pertaining to individual records in a record system.
415.4 Times, places, and requirements for the identification of the individual making a request.
415.5 Disclosure of requested information to the individual.
415.6 Request for correction or amendment to the record.
415.7 Agency review of request for correction or amendment of the record.
415.8 Appeal of an initial adverse agency determination on correction or amendment of the record.
415.9 Disclosure of record to a person other than the individual to whom the record pertains.
415.10 Fees.

AUTHORITY: 5 U.S.C. 552a; Pub. L. 93–579.

§ 415.1 Purpose and scope.

The purposes of these regulations are to:

(a) Establish a procedure by which an individual can determine if the Board for International Broadcasting (hereafter known as the Board) maintains a system of records which includes a record pertaining to the individual; and

(b) Establish a procedure by which an individual can gain access to a record pertaining to him or her for the purpose of review, amendment and/or correction.

§ 415.2 Definitions.

For the purpose of these regulations—

(a) The term "individual" means a citizen of the United States or an alien lawfully admitted for permanent residence;

(b) The term "maintain" includes maintain, collect, use or disseminate;

(c) The term "record" means any item; collection or grouping of information about an individual that is maintained by the Board, including, but not limited to, his or her employment history, payroll information, and financial transactions and that contains his or her name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as social security number;

(d) The term "system of records" means a group of any records under the control of the Board from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual; and

(e) The term "routine use" means, with respect to the disclosure of a record, the use of such record for a purpose which is compatible with the purpose for which it was collected.

§ 415.3 Procedures for requests pertaining to individual records in a record system.

An individual shall submit a request to the Special Assistant to the Executive Director of the Board to determine if a system of records named by the individual contains a record pertaining to the individual. The individual shall submit a request to the Special Assistant to the Executive Director of the Board which states the individual's desire to review his or her record.

§ 415.4 Times, places, and requirements for the identification of the individual making a request.

An individual making a request to the Special Assistant to the Executive Director of the Board pursuant to § 415.3 shall present the request at the Board offices, Suite 430, 1030 Fifteenth Street, NW., Washington, D.C. 20006, on any business day between the hours of 9 a.m. and 5:30 p.m. The individual submitting the request should present himself or herself at the Board's offices with a form of identification which will permit the Board to verify that the individual is the same individual as contained in the record requested.

§ 415.5 Disclosure of requested information to the individual.

Upon verification of identity the Board shall disclose to the individual the information contained in the record which pertains to that individual.

§ 415.6 Request for correction or amendment to the record.

The individual should submit a request to the Special Assistant to the Executive Director of the Board which states the individual's desire to correct or to amend his or her record. This request is to be made in accord with the provisions of § 415.4.

§ 415.7 Agency review of request for correction or amendment of the record.

Within ten working days of the receipt of the request to correct or to amend the record, the Special Assistant to the Executive Director of the Board will acknowledge in writing such receipt and promptly either—

(a) Make any correction or amendment of any portion thereof which the individual believes is not accurate, relevant, timely, or complete; or

(b) Inform the individual of his or her refusal to correct or to amend the record in accordance with the request, the reason for the refusal, and the procedures established by the Board for the individual to request a review of that refusal.

§ 415.8 Appeal of an initial adverse agency determination on correction or amendment of the record.

An individual who disagrees with the refusal of the Special Assistant to the Executive Director of the Board to correct or to amend his or her record may submit a request for a review of such refusal to the Executive Director of the Board for International Broadcasting, Suite 430, 1030 Fifteenth Street, NW., Washington, D.C. 20005. The Executive Director will, not later than thirty working days from the date on which the individual requests such review, complete such review and make a final determination unless, for good cause shown, the Executive Director extends such thirty day period. If, after his or her review, the Executive Director also refuses to correct or to amend the record in accordance with the request, the individual may file with the Board a concise statement setting forth the reasons for his or her disagreement with the refusal of the Board and may seek judicial review of the Executive Director's determination under 5 U.S.C. 552a(g)(1)(A).

§ 415.9 Disclosure of record to a person other than the individual to whom the record pertains.

The Board will not disclose a record to any individual other than to the individual to whom the record pertains without receiving the prior written consent of

V 40 250 DEC 30 75 XUM

the individual to whom the record pertains, unless the disclosure has been listed as a "routine use" in the Board's notices of its systems of records.

§ 415.10 Fees.

If an individual requests copies of his or her record, he or she shall be charged ten cents per page, excluding the cost of any search for review of the record, in advance of receipt of the pages.

[FR Doc.75-35082 Filed 12-29-75;8:45 am]

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-11935]

FOCUS

Broker-Dealer Reports

The Securities and Exchange Commission today announced the adoption of the FOCUS Report, a financial and operational combined uniform single report under the Securities Exchange Act of 1934. The FOCUS Report replaces the information presently required by Form X-17A-5 [17 CFR 249.617], Form X-17A-10 [17 CFR 249.618][1], and Form X-17A-11 [17 CFR 249.621], which are the Commission's forms, the Joint Regulatory Report, Forms "M" and "Q," the income and expense reports, and various other financial and operational forms and reports required by self-regulatory organizations.

The Commission also announced the amendment of Rule 17a-4 [17 CFR 240.17a-4], Rule 17a-5 [17 CFR 240.17a-5], Rule 17a-10 [17 CFR 240.17a-10], Rule 17a-11 [17 CFR 240.17a-11], and Rule 17a-20 [17 CFR 240.17a-20], in order to further implement the adoption of the FOCUS Report and a streamlined system of financial and operational reporting for brokers and dealers. Rule 17a-4 [17 CFR 240.17a-4] is amended to require that brokers and dealers maintain, for a minimum period of 3 years, certain books and records required for the preparation of the FOCUS Report. Rule 17a-5 [17 CFR 240.17a-5] is amended to specify the preparation and filing requirements of the FOCUS Report including Parts I, II, and IIA of Form X-17A-5 [17 CFR 249.617] and the annual audit report. Rule 17a-10 is amended to shorten the time period within which Form X-17A-10 [17 CFR 249.618] must be filed. Form X-17A-10 [17 CFR 249.618] is substantially amended to conform to the format of the FOCUS Report and to reduce the amount of income and expense information required. This reduced information is effective for calendar year 1975. Rule 17a-11 [17 CFR 240.17a-11] is amended to require a broker or dealer subject to it to file Part II of Form X-17A-5 [17 CFR 249.617] plus supplementary schedules as required, in place of Form X-17A-11 [17 CFR 249.621]. In addition, those events which require reporting of material inadequacies have been revised, and the filing by the broker or dealer of corrective plans to remedy such inadequacies is required. Rule 17a-20 [17 CFR 240.17a-20] is amended to substantially reduce the information required by Form X-17A-20 [17 CFR 249.636], and to eliminate from the reporting requirements those brokers and dealers with less than 20 percent of gross revenue derived from brokerage commission transactions.

Each of said rules is also amended to conform to Section 15(a)(1) of the Securities Exchange Act of 1934, as amended. That Section now requires all brokers and dealers, whether or not they are members of a national securities exchange, to register with the Commission. Consequently the term "member of an exchange" has been deleted from the phrase "member of an exchange, broker or dealer," as such term is no longer necessary.

The Commission also announced the approval of certain plans submitted by various self-regulatory organizations pursuant to Rule 17a-5 [17 CFR 240.17a-5], Rule 17a-10 [17 CFR 240.17a-10] and Rule 17a-20 [17 CFR 240.17a-20]:

American Stock Exchange ("ASE")
Boston Stock Exchange ("BSE")
Chicago Board Options Exchange ("CBOE")
Midwest Stock Exchange ("MSE")
National Association of Securities Dealers ("NASD")
New York Stock Exchange ("NYSE")
Pacific Stock Exchange ("PSE")
PBW Stock Exchange ("PBW")

Due to the implementation of amended Rule 15c3-1 [17 CFR 240.15c3-1] on January 1, 1976, the financial and operational reports, and the surveillance systems of the Commission and the self-regulatory organizations will become obsolete as of that date. For this reason, the Commission has expedited the adoption of the FOCUS Report and related rule changes in order that the revised reporting system may be implemented concurrently with amended Rule 15c3-1 [17 CFR 240.15c3-1].

I. *Introduction.* Section 17(a)(1) of the Securities Exchange Act of 1934, as amended, provides that the Commission shall prescribe by rule the records to be kept and the reports to be made and disseminated by brokers and dealers. Section 17(e) of the Securities Exchange Act of 1934, as amended, requires every broker or dealer to file annually with the Commission a certified balance sheet and income statement, and such other information concerning its financial condition as the Commission may prescribe by rule, and authorizes the Commission to prescribe the form and content of such financial statements and the accounting standards to be followed in their preparation.

The creation of the SEC Advisory Committee on Broker-Dealer Reports and Registration Requirements was announced by the Commission in September 1972, marking the beginning of a program to review the reporting requirements imposed on brokers and dealers by rules of the Commission and the self-regulators. In December 1972 the Committee submitted its recommendations to the Commission in the "Advisory Committee's Study on Broker-Dealer Reports and Registration Requirements" (Stepanek Report"). The Stepanek Report concluded that there then existed unnecessary and duplicative reporting requirements resulting from lack of coordination by the various regulating entities.

The Commission subsequently established a Staff Task Force to determine whether the recommendations of the Committee could be implemented and if so, in what manner. The Staff Task Force delivered its report to the Commission substantially supporting the conclusions and recommendations of the Stepanek Report. The Commission thereafter formulated a program of implementation based upon the recommendations of the Stepanek Report as supported by the Staff Task Force. In its "Announcement of a Program of Implementation Regarding the 'SEC Advisory Committee Study on Broker-Dealer Reports and Registration Requirements' . . ." the Commission:

1. stated its intention to develop a key regulatory report[2] and sought public comments thereon; and

2. stated its intention to establish a Report Coordinating Group under the Federal Advisory Committee Act to advise the Commission on the consolidation and reduction of reporting requirements and to assist the Commission in the development of a key regulatory report.[3]

In May 1974 the Commission announced the membership of the Report Coordinating Group ("Group"), a federal advisory committee.[4] At its first meeting on June 3, 1974, the Group reviewed the Stepanek Report and decided to give the highest priority to developing recommendations regarding a uniform financial and operational report.[5]

[1] Form X-17A-10 [17 CFR 249.618] is substantially in FOCUS Report format, with some modifications.

[2] The key regulatory report is denominated the FOCUS Report symbolizing a Financial and Operational Combined Uniform Single report.

[3] These two items are only part of a complete program described in Securities Exchange Act Release No. 10612, January 24, 1974, 39 FR 5204, February 11, 1974.

[4] The Report Coordinating Group was established in accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. Appendix 1, 86 Stat. 770 (1972).

[5] The Group also concentrated its efforts on the development of uniform registration and record retention forms. Uniform registration forms for brokers and dealers were adopted by the Commission on May 16, 1975 (Securities Exchange Act Release No. 11424, 40 FR 30634, July 22, 1975). Subsequent to the submission of the Report Coordinating Group's First Annual Report, a Trading Forms Task Force has deliberated for several months and has recommended the elimination or consolidation of the 104 trading forms described in the First Annual Report. The Task Force now proposes 44 simplified and consolidated forms in their place.

An Assessment Forms Task Force working during the same period has made additional proposals for the further simplification of assessment procedures. For background and prior status of these two projects, see *First Annual Report of the Report Coordinating Group, June 16, 1975.*

On August 9, 1974 the Commission issued guidelines for a uniform financial and operational report. In accordance with these guidelines the Group reviewed the reports, forms and similar material required of brokers and dealers by the Commission, the self-regulatory organizations and others. The Group, with the dedicated assistance of staff persons from all sectors of the industry, developed a FOCUS Report Discussion Paper which was distributed on October 15, 1974.

Comments suggesting further simplification and changes in the items of the FOCUS Report were considered in the drafting of the FOCUS Report Revised Discussion Paper released on December 16, 1974.[6] The FOCUS Report Revised Discussion Paper set forth a three part reporting format of financial and operational data to be completed by certain firms at specified intervals.

Since the release of the FOCUS Report Revised Discussion Paper, the Group has held additional public meetings to further simplify the FOCUS Report and at the same time improve its effectiveness as a surveillance tool for the Commission and the self-regulators. The Group released its final recommendation for a FOCUS Report in its First Annual Report on June 16, 1975.[7] The FOCUS Report is the product of the efforts of the Group assisted in large part by the comments and suggestions of members of the industry, the self-regulatory organizations, the accounting profession and interested members of the public. The Commission, after considering the recommendations of the Report Coordinating Group and the comments thereon, believed that the adoption of a reporting system based upon and including the FOCUS Report, with some modifications to the program recommended, would provide an opportunity for uniform industry-wide regulation and would substantially reduce the reporting burdens on the securities industry without compromising the interest of the public and the regulators. In an effort to achieve that goal, on November 1, 1975 there was published in the FEDERAL REGISTER (40 FR 51060) a notice of proposed rulemaking with proposed amended Rule 17a-4 [17 CFR 240.17a-4], Rule 17a-5 [17 CFR 240.17a-5] and related Form X-17A-5 [17 CFR 249.617], Rule 17a-10 [17 CFR 240.17a-10] and related Form X-17A-10 [17 CFR 249.618], Rule 17a-11 [17 CFR 240.17a-11] and related Form X-17A-11 [17 CFR 249.621], and Rule 17a-20 [17 CFR 240.17a-20].

After careful consideration of the public comments submitted and further refinement to the reporting structure, the Commission adopts the FOCUS Report and related rules and forms as set forth herein recognizing that while the reporting system is efficient in theory, and the form satisfactory in substance, certain modifications may subsequently be necessary in order to achieve a smoother practical application. It is the Commission's view that the areas requiring additional refinement will become apparent after the self-regulators and the brokers and dealers have had several months experience with the FOCUS reporting structure; therefore, comments are requested on or before March 31, 1976, suggesting amendments to the FOCUS Report on June 30, 1976. The Commission also requests that the Report Coordinating Group included in its final report to the Commission those amendments it considers necessary. The Commission thereafter intends to review the FOCUS Report at the beginning of each calendar year, in cooperation with the self-regulators and with the advice of the Report Coordinating Group, in order to continue modifying and updating the financial and operational reporting systems to keep pace with the changing securities industry.

II. *Amendment of Rule 17a-4 [17 CFR 240.17a-4].* Rule 17a-4 [17 CFR 240.17a-4] is amended by adding subparagraph (b)(8) to require every broker or dealer who is required to file Part II or Part IIA of Form X17A-5 [17 CFR 249.617] to make and keep certain additional books and records. Such a requirement should not constitute a significant additional burden, inasmuch as said records are now prepared during the course of operation of the broker's or dealer's business. These new schedules replace a number of schedules in current Form X-17A-5 [17 CFR 249.617] and will provide detailed information required for a proper analysis and review of the annual audit report.

III. *Amendment of Rule 17a-5 [17 CFR 240.17a-5] and Related Form X-17A-5 [17 CFR 249.617][8]—A. Reports to be Filed by Brokers and Dealers.* Rule 17a-5(a)(2) [17 CFR 240.17a-5(a)(2)] is amended to prescribe which firms must file the different parts of Form X-17A-5 [17 CFR 249.61.7]. Clearing or carrying firms which have not received notice that they exceed certain safe parameters of financial and operational condition must file Part I monthly and Part II on calendar quarters.[9] Firms which do not carry or clear customer accounts must file Part IIA on calendar quarters. Firms which receive notice of exceeding certain parameters of financial and operational condition must file Part II monthly. Part IIA will be filed quarterly in lieu of Part II by small brokers and dealers, firms not clearing and not carrying customer accounts, and firms conducting a limited type of business. Such of these firms which exceed parameters set by the self-regulators must file Part IIA monthly. In addition, every broker or dealer required to file an annual audit report under paragraph (d) must file Part II or IIA, as applicable, as of the date selected for the annual audit report if such date does not coincide with a calendar quarter.

Rule 17a-5 [17 CFR 240.17a-5]

Current paragraph	Proposed paragraph	Adopted paragraph
	17a-5(a)	17a-5(a).
(a)	17a-5(b)	17a-5(d).
(b)	17a-5(c)	17a-5(e).
(c)	17a-5(d)	17a-5(k).
(d)	17a-5(e)	17a-5(l).
(e)	17a-5(f)	17a-5(i).
(f)	17a-5(g)	17a-5(f).
	17a-5(h)	17a-5(g).
	17a-5(i)	17a-5(h).
(g), (h), and (i)	17a-5(j)	17a-5(i).
	17a-5(k)	17a-5(j).
(j)	17a-5(l)	17a-5(b).
(k)		
(l)	17a-5	
(m), (n), and (o)	17a-5(m)	17a-5(c). 17a-5(m). 17a-5(n).

As proposed for comment, Rule 17a-5(a) [17 CFR 240.17a-5(a)] did not specify the number of days with in which the monthly and quarterly reports must be filed. The Commission requested comment upon this issue, and after consideration of those comments submitted has determined that Part I will be filed within 10 business days of the end of each month, and Parts II and IIA will be filed within 17 business days of the end of each month.

Subparagraph (a)(4) permits the broker or dealer to satisfy the filing requirements under subparagraph (a)(2) by complying with filing requirements established by a plan submitted to the Commission by the appropriate national securities association. Pursuant to the plan, the exchange or association is required to transmit to the Commission a copy of the applicable parts of Form X-17A-5 [17 CFR 249.617] as to each member participating in the plan. The plan must also set forth the time limitations within which the various parts of Form X-17A-5 [17 CFR 249.617] must be filed.

Requests for extension of time or exemption from any of the requirements of paragraph (a) will be considered pursuant to paragraph (1).

Report to be Filed Upon Termination of Membership. Paragraph (j) is renumbered (b) and requires that any broker or dealer who ceases to be a member in good standing of a national securities exchange file with the Commission, no later than two days after the termination, Part II of Form X-17A-5 [17 CFR 249.617] as of the termination. In addition, a national securities exchange which acts to terminate the membership of a broker or dealer or learns of any such action is required to notify the Commission of such action and notify the broker or dealer of its reporting under this paragraph.

[6] The following is a comparison of the current, proposed, and adopted paragraphs:

[7] This reporting sequnce enables the Commission to fulfill its Congressional mandate to collect and report on economic data concerning the securities industry, while simultaneously streamlining the financial and operational reporting required by brokers and dealers. It allows almost the complete integration of the current economic data reporting requirements of Rule 17a-10 [17 CFR 240.17a-10] and Rule 17a-20 [17 CFR 240.17a-20].

Under Section 23 of the Securities Exchange Act of 1934, as amended by the Securities Act Amendments of 1975, the Commission has a duty to make such reports to Congress. The information necessary to prepare such reports would be derived from the calendar quarter filings of Form X-18A-5 [17 CFR 249.617] and the annual filing of Form X-17A-10 [17 CFR 249.618].

[9] Securities Exchange Act Release No. 11499.

V40250 DEC 30 75 XUM V

Financial Statements to be Furnished to Customers. Paragraph (c) combines former paragraphs (m), (n) and (o) and prescribes the form and content of statements to be furnished to customers by all brokers and dealers required to file an annual audit report, with the exception of certain brokers or dealers with limited activities as enumerated in subparagraph (c)(1). The statements, as set forth in subparagraph (c)(2), include a balance sheet, a footnote indicating the broker's or dealer's actual net capital and its required net capital, a notice that a copy of any material inadequacies commented upon by the independent public accountant in connection with the annual audit report is currently available for the customer's inspection at the Commission's principal office in Washington, D.C. and the Commission's regional office for the region in which the broker or dealer has its principal place of business, and a notice indicating that the Statement of Financial Condition of the most recent annual audit report of the broker or dealer is similarly available for inspection. After a re-evaluation of the length and complexity of the statements which must be furnished to customers, the Commission has determined that the period of time within which these statements must be furnished shall be 45 days.

B. *Accountants' Reports—Annual Audit Report.* The Commission also requires that brokers and dealers file an annual audit report on a fiscal or calendar year basis.[14] Rule 17a–5(d)(1) [17 CFR 240.17a–5(d)(1)] requires the following financial data to be included in the annual audit report:

Financial Statements:

Statement of Financial Condition;
Statement of Income (Loss);
Statement of Changes in Financial Position;
Statement of Changes in Stockholders' Equity or Partners' or Sole Proprietor's Capital;
Statement of Changes in Liabilities Subordinated to Claims of General Creditors;

Schedules:

Computation of Net Capital Pursuant to Rule 15c3–1 [17 CFR 240.15c3–11];
Computation for Determination of Reserve Requirements Pursuant to Rule 15c3–3 [17 CFR 240.15c3–3];
Information Relating to the Possession or Control Requirements Under Rule 15c3–3 [17 CFR 240.15c3–3]; and
A Reconciliation Pursuant to Rule 17a–5(d)(4) [17 CFR 240.17a–5(d)(4)].

All of the financial statements and schedules are to be filed on a public basis except those which are bound separately as provided in paragraph (e)(3).

The audited financial statements will be filed at the principal office of the Commission in Washington, D.C., the regional office of the Commission for the region in which the broker or dealer has its principal place of business, and at the principal office of the designated examining authority for said broker or dealer no later than sixty days after the date selected for the annual audited financial statements. The computations contained in the corresponding filing of Part II or Part IIA pursuant to Rules 15c3–1 [17 CFR 240.15c3–1] and 15c3–3 [17 CFR 240.15c3–3], must be reconciled in a report filed pursuant to amended Rule 17a–5(d)(4) [17 CFR 240.17a–5(d)(4)], if such reports differ materially from the computations contained in the audit report.

The term "fiscal year" is defined as the broker's or dealer's fiscal year for reporting purposes. For purposes of defining a time period such as fiscal or calendar quarter, the last business day of such period would be acceptable. The date of the audit may be at any point within the calendar year; however, if such date does not coincide with the close of a calendar quarter, the broker or dealer must file an additional Form X–17A–5 [17 CFR 249.617], Part II or IIA as prescribed in paragraph (a), as of the date of the annual audit. This fifth filing allows the integration of the annual audit report into the surveillance programs of the Commission and the self-regulators.

Section 17(e) of the Securities Exchange Act of 1934 requires all brokers and dealers, including introducing firms, to file an annual audited report, including an income statement. The Commission requested comments on the feasibility of requiring floor members to file an annual audited report, and after consideration of those comments submitted has determined that the adequacy of the self-regulators' surveillance programs is such that the annual audited report will not be necessary.

Audit Objectives & Procedures. Rule 17a–5 ([17 CFR 240.17a–5] also prescribes the audit objectives to be used in the preparation of the broker's or dealer's audited financial statements.[15] Paragraph (g) requires the annual audit to be made in accordance with generally accepted auditing standards. The audit is to be conducted in such a manner as to provide the accountant with the financial statements of the broker or dealer as of the date of the examination. The audit should be designed in such a manner as to provide the accountant with reasonable assurance of the discovery of any material inadequacies in the accounting system, the internal accounting control, procedures for safeguarding securities or the procedures followed in complying with Rule 17a–13 [17 CFR 240.17a–13], which are existing at the date of the audit. If during the course of the audit, inadequacies which have occurred during the period since the date of the last audit are determined to have existed either through preliminary work or through any other procedure conducted in connection with the annual audit such inadequacies must be reported as part of the annual audit report.

Paragraph (h) prescribes the extent and timing of procedures to be followed in the annual audit and permits the accountant to exercise discretion in the area of the extent and timing of such procedures.[16] In addition, the accountant has a responsibility to notify the chief financial officer of the broker or dealer of any material inadequacies discovered in the course of the audit or interim work. If the broker or dealer fails to notify the Commission, the accountant himself must do so.

A determination of a material inadequacy may, in many instances, require completed audit procedures in a particular area, appropriate review at the decision making level by management and the independent accountant, and possible consultation with counsel. While it is expected that a determination in this context involves a contemplative process, the length and complexity of the deliberations should depend on the circumstances and be completed in the shortest time possible.

Accountant's Report on Material Inadequacies. Paragraph (j) requires that the broker or dealer file concurrently with the annual audit report a supplemental report by the accountant describing any material inadequacies found to exist at the audit date and any corrective action taken or proposed by the broker or dealer in regard thereto.

Nature and Form of Audit Reports. Paragraph (b), which prescribes the nature and form of reports which must be filed by the broker or dealer, is renumbered (e). Subparagraph (4)(iii)(b) thereof requires that amounts reported in the Annual General Assessment Reconciliation (Form SIPC–7) be compared with amounts reflected in Form X–17A–5 [17 CFR 249.617] for the fiscal year beginning with fiscal year 1976, rather than the present comparison with the amounts reflected in Form X–17A–10 [17 CFR 249.618]. As proposed for comment, this paragraph did not allow for a transition period between the Form SIPC–7/Form X–17A–10 comparison and the Form SIPC–7/Form X–17A–5 comparison. The Commission has determined that a smoother adjustment will result if Form SIPC–7 is compared with Form X–17A–10 [17 CFR 249.618] for calendar year 1975 and with Form X–17A–5 [17 CFR 249.617] for fiscal year 1976 and thereafter.

Qualification of Accountant. Subparagraph (2) has been added to paragraph (f) which requires every broker or dealer to file with the Commission as of December tenth of each year a statement indicating the existence of an agreement with an independent public accountant covering a contractual commitment to conduct the broker's or dealer's annual audit pursuant to Rule 17a–15 [17 CFR 240.17a–5] for that year.

[14] This is in accordance with Section 14 of the Securities Acts Amendments of 1975 which amended Section 17(e)(1)(A) of the Securities Exchange Act of 1934 to require that the audited financial statements be submitted on a fiscal or calendar year basis.

[15] This is in accordance with Section 17(e)(2) of the Securities Exchange Act of 1934, as amended by the Securities Acts Amendments of 1975.

[16] It is expected that the American Institute of Certified Public Accountants will promulgate guidelines and educational materials concerning audit procedures in this area.

In light of the fact that the date of filing this statement for calendar year 1976 (December 10, 1975) has already passed, the statements which would have been filed on that date shall be filed no later than February 10, 1976. Such letter may be of a permanent nature, i.e., effective until withdrawn, or a new letter may be filed each year.

As proposed for comment, paragraph (f) did not offer the option of filing a permanent letter. After considering public comment, the Commission has determined that this option will further reduce the reporting requirements of brokers and dealers. In addition, new subparagraph (f)(3) requires that the accountant be independent in accordance with Rules 2–01(b) and (c) of Regulation S–X [17 CFR 210.2–01(b) and (c)].

Technical Requirements of Accountant's Report. Paragraph (i) combines former paragraphs (g), (h) and (i) in setting forth the technical requirements of the accountant's report, the representations and opinions to be expressed by the accountant with respect to the annual audit, and the manner in which exceptions noted by the accountant are to be stated. Paragraph (i) also notes that the accountant would be required to perform additional audit procedures if such procedures are necessary to accomplish the audit objectives.

Exemptions and Extensions of Time. Paragraph (d) of the rule has been redesignated paragraph (1) and requires the broker or dealer to include certain representations in its application for an extension of time for filing the annual audit report. The application must be received by the Commission's principal office in Washington, D.C., and the appropriate regional office of the Commission prior to the time that the report is normally due pursuant to paragraph (d). The application is not deemed granted by inaction on the part of the Commission, as is now provided for by the last sentence of the paragraph; accordingly, that sentence has been deleted from paragraph (1).

As proposed for comment, Rule 17a–5 [17 CFR 240.17a–5] did not set forth procedures for granting extensions of time for filing the annual audit report. After reviewing the comments suggesting such procedures, the Commission has determined that the extensions shall be granted or denied by the appropriate regional office within 10 days after receipt of the request, unless the regional office indicates that more time is required to properly analyze the request.

As proposed for comment, Rule 17a–5 [17 CFR 240.17a–5] did not provide an exemption for life insurance companies registered as brokers or dealers for the purpose of selling variable contracts and exempt from Rule 15c3–1 [17 CFR 240.15c3–1] by virtue of a previous application setting forth already existing higher permanent capital standards. The Commission requested comments on whether such life insurance companies should be subject to the requirements of the FOCUS Report, and after consideration of the comments submitted has determined that those life insurance companies which are registered as brokers and dealers engaging exclusively in the sale of variable contracts, and which are exempt from Rule 15c3–1 [17 CFR 240.15c3–1], shall be exempt from the requirements of Rule 17a–5 [17 CFR 240.17a–5]. Such companies will file an annual report on Part III of Form X–17A–10 [17 CFR 249.618].

Notification of Change of Fiscal Year. Proposed Rule 17a–5 [17 CFR 240.17a–5] did not set forth notification procedures pursuant to a broker's or dealer's change of fiscal year. The Commission has determined that such notice is necessary and has defined the procedures in paragraph (m). The notice will be filed with the Commission and the designated examining authority and will explain the reasons for the change and state whether or not the change will result in a delayed filing of the annual audit report. If the audit report will be delayed, the broker or dealer must include the representations required by subparagraph (a)(1) of paragraph (1).

C. Structure of the FOCUS Report (Form X–17A–5 [17 CFR 240.617]). The statements and schedules contained in the FOCUS Report replace present Form X–17A–5 [17 CFR 249.617], but the designation "Form X–17A–5" is retained. Form X–17A–5 [17 CFR 249.617] is divided into two parts with additional supplementary schedules. Part I is a summary report containing key financial and operational information consisting of core line items for all brokers and dealers and supplementary items for small brokers and dealers. These line items will provide regulators with timely information needed for the continued viability of the present day early warning system. This part is designed so that the trend for a full year in any of the line items is shown on a horizontal line on the report.

Nearly all of the information in Part I is presently required to be generated and maintained by rules of the Commission, national securities associations and national securities exchanges. Accordingly, Part I will replace a number of forms currently used by members of the securities industry. Based upon plans of the various self-regulators filed with the Commission and approved today, Part I will replace the monthly reports that the various self-regulators currently require of firms which do not exceed certain safe parameters of financial and operational condition.

Part II of the Form X–17A–5 [17 CFR 249.617] is a general purpose financial and operational report. It is designed to accomplish several objectives: attain simplicity and uniformity, obtain essential regulatory information, and develop financial statements in a format consistent with generally accepted accounting principles. The instructions to Part II set forth detailed definitions. Such definitions are intended as a guide for the correct completion of Parts II and IIA and apply only to those Parts. Part II contains the following financial statements and schedules:

Financial Statements:

Statement of Financial Condition;
Statement of Income (Loss);
Statement of Changes in Stockholders' Equity or Partners' or Sole Proprietor's Capital; and
Statement of Changes in Liabilities Subordinated to Claims of General Creditors.

Schedules:

Information for Possession or Control Requirements Under Rule 15c3–1 [17 CFR 240.15c3–1];
Computation of Net CCapital Under Rule 15c3–1 [17 CFR 240.15c3–1];
Computation for Determination of Reserve Requirements Exhibit A of Rule 15c3–3 [17 CFR 240.15c3–3];
Total Capital and Subordinated Capital Maturing or Proposed to be Withdrawn Within the Next Six Months and Details Thereof; and
Financial and Operational Data.

Part IIA is an abbreviated version of Part II. It includes a Statement of Financial Condition, a Computation of Net Capital Under Rule 15c3–1 [17 CFR 240.15c3–1]; a Statement of Income (Loss), and a Schedule of Details of Total Capital and Subordinated Capital Maturing or Proposed to be Withdrawn Within the Next Six Months.

As proposed for comment, Parts II and IIA did not include a Schedule of Information for Possession or Control Requirements Under Rule 15c3–3 [17 CFR 240.15c3–3]. After consideration of the public comments and a re-evaluation of the importance of this information, the Commission has determined that such information shall be required quarterly.

Based upon plans of the various self-regulators filed with the Commission and approved today, Part II and Part IIA will replace reports currently required on a monthly and quarterly basis by various self-regulators.

Copies of amended Form X–17A–5 [17 CFR 249.617] have been filed with the Office of the Federal Register and copies thereof may be obtained on request from the Securities and Exchange Commission, Washington, D.C. 20549.

IV. *Amendment of Rule 17a–10 [17 CFR 240.17a–10] and Related Form X–17A–10 [17 CFR 249.618].* In response to comments received from members of the public and regulatory authorities a number of changes have been made in Rule 17a–10 [17 CFR 240.17a–10] and related Form X–17A–10 [17 CFR 249.618.] In the original proposal, brokers and dealers with certain exceptions were required to file such reports 45 days after the end of the calendar year. In Rule 17a–10 [17 CFR 240.17a–10], as adopted, brokers and dealers will be given 60 days after the end of the calendar year in which to file Form X–17A–10 [17 CFR 249.618] for calendar year 1975, in order to allow brokers and dealers to become familiar with the revised form.

Proposed Form X–17A–10 [17 CFR 249.618] consisted of two parts. In place of a separate introduction to each part of the form, one uniform introduction for all parts of the form has been developed

V40250 DEC 30 75 XUM

in order to simplify the form and to enhance computerization of the data. The number of parts to the form have been expanded from two to three. Part III of Form X–17A–10 [17 CFR 249.618] is to be filed by insurance companies which are registered as brokers and dealers for the purpose of selling variable annuities and are exempted from Rule 15c3–1 [17 CFR 240.15c3–1]. Several items were added to the revenue and expense statements of Part I and Part II of Form X–17A–10 [17 CFR 249.618] in order to be consistent with generally accepted accounting principals and a number of technical changes were made in order to improve the quality of the information collected.

Rule 17a–10 [17 CFR 240.17a–10] and related Gorm X–17A–10 [17 CFR 249.-618] will be amended, beginning with calendar year 1975, so as to eliminate certain information no longer considered essential, to confrom to the format of the FOCUS Report and to reduce the reporting burden on brokers and dealers. For the first time, the financial and operational data required for surveillance purposes and the information required for economic analysis will be integrated into a single reporting system. Rule 17a–10 [17 CFR 240.17a–10] will be amended to shorten the time period from 120 days to 45 days within which revised Form X–17A–10 [17 CFR 249.618] must be filed. The extension of time after the close of the calendar year will be reduced from 150 days to 105 days. The Commission proposes these changes in view of the reduced amount of information required by revised Form X–17A–10 [17 CFR 249.-618]. In addition, shortening the filing period would result in more timely information being provided to the Commission.

Adopted Form X–17A–10 [17 CFR 249.-618] consists of an Introduction and three parts with additional schedules, the schedules to be filed only by certain large brokers and dealers. The Introduction will be filed by all brokers and dealers. Part I of Form X–17A–10 [17 CFR 249.-618] will be filed by those brokers and dealers with annual gross revenue related to the securities business of less than $500,000, approximately 83 percent of all brokers and dealers. Part II of Form X–17A–10 [17 CFR 249.618] will be filed by all brokers and dealers with annual gross revenue related to the securities business of $500,000 or more. Subsidiary schedules requesting additional information will be filed only by those brokers and dealers with annual gross revenue related to the securities business of ten million dollars or more during the calendar year. Part III of Form X–17A–10 [17 CFR 249.618] will be filed by insurance companies which are registered as brokers and dealers solely for the purpose of selling variable annuities and which are exempted from Rule 15c3–1 [17 CFR 240.15c3–1].

This is the first major revision in Form X–17A–10 [17 CFR 249.618] since the form became mandatory for calendar year 1969. The purpose Rule 17a–10 [17 CFR 240.17a–10] and the related form is to provide the Commission with comprehensive financial data on a comparable basis for all segments of the broker-dealer industry. The Commission is required to carry out broad and comprehensive regulatory responsibilities as mandated by the Securities Acts Amendments of 1975. As a result of the introduction of competitive commission rates and the development of a national market system, and because of significant developments impacting the economics of the securities industry, the need for timely and comparable data regarding various segments of the industry continues to be essential.

Copies of amended Form X–17A–10 [17 CFR 249.618] have been filed with the Office of the Federal Register and copies thereof may be obtained on request from the Securities and Exchange Commission, Washington, D.C. 20549.

V. *Amendment of Rule 17a–11 [17 CFR 240.17a–11] and Revocation of Form X–17A–11 [17 CFR 249.621].* Rule 17a–11 [17 CFR 240.17a–11] is revised to conform to the new net capital rule by the addition of subparagraph (b)(2) which applies to the alternative method of capital computation. Subparagraph (b)(2) is revised to clarify that a broker or dealer must file a report at the end of the month if a capital computation made at any time during the month indicates that his total net capital is below the minimum requirement. The report to be filed is Part II of Form X–17A–5 [17 CFR 249–617] plus any additional statements which may be required, thus eliminating the need for Form X–17A–11 [17 CFR 249.621].

New paragraph (b) requires any broker or dealer who discovers or who receives notice of a material inadequacy pursuant to paragraph ((h)(2) of Rule 17a–5 [17 CFR 240.17a–5] to give telegraphic notice to the Commission and file a corrective plan within forty-eight hours thereafter.

As proposed for comment, paragraph (d) of Rule 17a–11 [17 CFR 240.17a–11] required the broker or dealer to give telegraphic notice only when the independent public accountant has notified the broker or dealer of a material inadequacy. The Commission has determined that a broker or dealer who himself discovers a material inadequacy should also give telegraphic notice pursuant to paragraph (f), and paragraph (d) is amended accordingly.

In addition, Rule 17a–11 [17 CFR 240.17a–11] is amended to require that notice and reports given thereunder shall also be given to the Commodity Futures Trading Commission if such broker or dealer is a member of that Commission.

VI. *Amendment of Rule 17a–20 [17 CFR 240.17a–20] and Related Form X–17A–20 [17 CFR 249.636].* Rule 17a–20 [17 CFR 240.17a–20], which was adopted as part of the Commission's program to monitor the impact of competitive commission rates, is amended to reduce the frequency of filing. The Commission has determined that the program's effectiveness will not be decreased by requiring quarterly rather than monthly filing by all brokers and dealers subject to Rule 17a–20 [17 CFR 240.17a–20].

Paragraph (a) is amended to eliminate from the reporting system certain brokers and dealers who do not derive at least 20 percent of their revenues from securities commissions. Certain technical changes have also been made in order to coordinate the filing requirements with revised Rule 17a–10 [17 CFR 240.17a–10].

As proposed for comment, Rule 17a–20 [17 CFR 240.17a–20] required quarterly filing of current Form X–17A–20 [17 CFR 249.636]. In an effort to further reduce the reporting requirements of brokers and dealers, the Commission has determined that the information required to be reported by Form X–17A–20 [17 CFR 249.636] may be substantially reduced with no detriment to its utility as a monitoring mechanism.

Copies of amended Form X–17A–20 [17 CFR 249.636] have been filed with the Office of the Federal Register and copies thereof may be obtained on request from the Securities and Exchange Commission, Washington, D.C. 20549.

VII. *Approval of Plans Filed Pursuant to Paragraph (a)(4) of Rule 17a–5 [17 CFR 240.17a–5], Paragraph (b) of Rule 17a–10 [17 CFR 240.17a–10], and Paragraph (a)(3) of Rule 17a–20 [17 CFR 240.17a–20].*—A. *Rule 17a–5 [17 CFR 240.17a–5].* Eight self-regulatory organization have filed plans pursuant to paragraph (a)(4) of Rule 17a–5 [17 CFR 240.17a–5], which would allow brokers or dealers who are members of an exchange or association filing an appropriate plan declared effective by the Commission to dispense with a separate filing of the FOCUS Report to the Commission. The ASE, BSE, CBOE, MSE, NASD, NYSE, PSE, and PBW have agreed to collect directly from their members the information required by the rule thereby eliminating for their member firms a direct filing requirement with the Commission.

The plans contain the following general elements. Part I of the FOCUS Report is to be filed monthly with the designated examinating authority by all clearing or carrying firms no later than the tenth business day after the end of the month.[13]

Part II is to be filed each calendar quarter, by clearing or carrying firms, with the designated examining authority no later than the seventeenth business day after the end of the instant

[13] Introducing firms which are designated members of the NASD would file the Part I monthly for an indefinite period pursuant to the accelerated reporting provisions of paragraph (a)(2)(iv) of Rule 17a–5 [17 CFR 240.17a–5]. NYSE designated members would not file the Part I in months in which the Part II is being filed. Pursuant to paragraph (a)(2)(iv) of Rule 17a–5 [17 CFR 240.17a–5], PSE designated firms which clear or carry the accounts of other broker-dealers will file Part I monthly for a phase-in period of 3 months with further evaluation of a continuing need to be made at the conclusion of that period.

quarter.[14] A fifth Part II filing would be submitted by the broker or dealer in connection with the annual audit no later than the seventeenth business day after the end of the fiscal or calendar year audit date when such date is other than on a calendar quarter. The plans for the Part IIA are identical to those for the Part II except that the Part IIA will be filed by firms which do not clear nor carry customer accounts.[15]

All plans state that accelerated reporting will only be required sparingly when circumstances so dictate in light of the goal of reduced reporting.[16] In addition all such plans (except for the NASD) have, pursuant to paragraph (1)(3) of Rule 17a–5 [17 CFR 240.17a–5], requested conditional exemptions from the FOCUS Report for certain individual members, floor traders, floor brokers and specialists.

The Commission has reviewed the procedures and provisions of the plans including the requests for conditional exemption for certain member firms and, pursuant to paragraph (a)(4) of Rule 17a–5 [17 CFR 240.17a–5], having due regard for the public interest and the protection of investors and the fulfillment of the Commission's functions under the provisions of the Securities Exchange Act of 1934, declares the plans to be effective as of January 1, 1976, the proposed effective date of Rule 17a–5 [17 CFR 240.17a–5] as amended.

B. *Rule 17a–10 [17 CFR 240.17a–10].* Eight self-regulatory organizations have filed modifications to existing plans or have for the first time filed plans pursuant to paragraph (b) of Rule 17a–10 [17 CFR 240.17a–10].[17] Paragraph (b) of Rule 17a–10 [17 CFR 240.17a–10] allows brokers or dealers which are members of an exchange or association which files an appropriate plan declared effective by the Commission to dispense with a separate filing of Form X–17A–10 [17 CFR 249.618] to the Commission. The modification of existing Rule 17a–10 [17 CFR 240.17a–10] plans is due to the amendments in Rule 17a–10 [17 CFR 240.17a–10] and related Form X–17A–10 [17 CFR 249.618] adopted hereinabove, which will require the plans to conform with those amendments.

Under the plans, member firms will be required to file the Form X–17A–10 [17 CFR 249.618] by the new date of 60 days after the close of the calendar year 1975 and 45 days after the close of the calendar year for each calendar year thereafter.[18] All NYSE member firms will file directly with the NYSE; all NASD member firms (other than NYSE member firms) with the NASD; and all sole member firms of regional exchanges with their respective exchanges.

The Commission has reviewed the procedures and provisions of the plans and modifications to existing plans and pursuant to paragraph (b) of Rule 17a–10 [17 CFR 240.17a–10], having due regard for the fulfillment of the Commission's functions under the provisions of the Securities Exchange Act of 1934, declares the plans and modifications to existing plans to be effective as of January 1, 1976, the proposed effective date of the amendments to Rule 17a–10] and related Form X–17A–10 [17 CFR 249.618].

C. *Rule 17a–20 [17 CFR 240.17a–20].* The proposed modifications to Rule 17a–20 [17 CFR 240.17a–20] and related Form X–17A–20 [17 CFR 249.636] would reduce the frequency of filing as well as the line item detail of the form. All firms subject to the rule would now report quarterly rather than monthly and reporting would be eliminated for brokers or dealers who do not derive at least 20 percent of their revenues from securities commissions.

The Commission has declared effective plans submitted by the NASD and NYSE pursuant to paragraph (a)(3) of Rule 17a–20 [17 CFR 240.17a–20].[19] Due to the amendments to the rule and form described hereinabove, the NASD and NYSE have submitted modifications to their Rule 17a–20 [17 CFR 240.17a–20] plans which incorporate those amendments. NASD member firms subject to the rule would continue to file a separate Form X–17A–20 [17 CFR 249.636]. NYSE member firms will not complete a separate Form X–17A–20 [17 CFR 249.636], but will file a modified Statement of Income (Loss) as part of their quarterly Part II or Part IIA FOCUS Report submission.[20]

The Commission has reviewed the procedures and provisions of the proposed modifications to the plans and, pursuant to paragraph (a)(3) of Rule 17a–20 [17 CFR 240.17a–20], having due regard for the fulfillment of the Commission's functions under the provisions of the Securities Exchange Act of 1934, declares the modifications to the plans to be effective as of the effective date of the amendments to Rule 17a–20 [17 CFR [240.17a–20] and related Form X–17A–20 [17 CFR 249.636].

VIII. *Delegation of Authority.* Pursuant to subparagraph (1)(3) of Rule 17a–5 [17 CFR 240.17a–5], the Commission has the power to exempt a broker or dealer, unconditionally or on specified terms and conditions, from all or part of the requirements of that rule. The Commission has amended Rule 30–3(a)(5) of its Rules of General Organization [17 CFR 200.30–3(a)(5)] to delegate to the Director of the Division of Market Regulation and to the Associate Director and Assistant Director of the Office of Broker-Dealer Compliance and Financial Responsibility, the authority to grant exemptions pursuant to Rule 17a–5(1)(3) [17 CFR 240.17a–5(1)(3)].

The FOCUS Report and Amendments to Rule 17a–4, [17 CFR 240.17a–4], Rule 17a–5 [17 CFR 240.17a–5] and related Form X–17A–5 [17 CFR 249.617], Rule 17a–10 [17 CFR 240.17a–10] and related Form X17A–10 [17 CFR 249.618], Rule 17a–11 [17 CFR 240.17a–11] and related Form X17A–11 [17 CFR 249.621], and Rule 17a–20 [17 CFR 240.17a–20] and related Form X–17A–20 [17 CFR 249.6361] are effective January 1, 1976. The existing reporting systems of the Commission and of the self-regulatory organizations become obsolete as of January 1, 1976, by virtue of the implementation of amended Rule 15c3–1 [17 CFR 240.15c3–1]; therefore it is essential that the FOCUS Report and the accompanying rule and form amendments be adopted as of that date. As the modifications set forth herein do not substantially alter the rules and forms as proposed, or involve rules of agency organization, procedure or practice, and in light of the fact that the public interest and protection of investors require that effective surveillance and reporting systems be in place as of January 1, 1976, the Commission finds for good cause in accordance with the Administrative Procedure Act (5 U.S.C. 553(b)(3)(A) and (B)), that notice and public procedure are unnecessary as a prerequisite to the adoption of any previously unpublished portions of the FOCUS Report and related rule and form amendments. Further, in order to assure that adequate surveillance and financial reporting systems will continually be in effect, the Commission, pursuant to Section 553(d)(3) of the Administrative Procedure Act (5 U.S.C. 553(d)(3)), finds that there is good cause to declare, and does declare, the adopted amendments to Rule 17a–4 [17 CFR 240.17a–4], Rule 17a–5 [17 CFR 240.17a–5] and related Form X–17A–5 [17 CFR 249.617], Rule 17a–10 [17 CFR 240.17a–10] and related Form X–17A–10 [17 CFR 249.618], Rule 17a–11 [17 CFR 240.17a–11] and related Form X–17A–11 [17 CFR 249.621], and Rule 17a–20 [17 CFR 240.17a–20] and related Form X–17A–20 [17 CFR 249.636] to be effective on January 1, 1976.

IX. *Competitive Considerations.* The Commission has determined that the FOCUS Report and accompanying rule and form amendments impose no burden on competition not necessary or appropriate in furtherance of the purposes of the Act and are not inconsistent with the public interest or the protection of investors. This determination is based on the reason that the adopted amendments

[14] PSE members which file the quarterly Part will accompany that filing with their workpapers on proprietary position data for the phase-in period with a review of the continuing need to be made at the conclusion of that period. ASE designated firms will file Part II of January, 1976 as a phase-in period before moving to the general reporting pattern.

[15] Pursuant to paragraph (a)(2)(iv) of Rule 17a–5 [17 CFR 240.17a–5], NYSE designated firms which introduce accounts but have subsidiaries required to consolidated in accordance with Rule 15c3–1 [17 CFR 240.15c3–1] will indefinitely file the quarterly Part II and PSE designated firms which clear or carry accounts for other broker-dealers will file Part II for a first quarter phase-in period with a review of the continuing need to be made at that time.

[16] *See* notes 14 and 15 *supra* for certain instances where the acceleration power is being invoked.

[17] The ASE, BSE, CBOE, MSE, NASD, NYSE, PSE and PBW.

[18] The NASD plan covers the calendar year 1975 only.

[19] Securities Exchange Act Release No. 11395, May 2, 1975, 40 FR 20073, May 8, 1975.

[20] All other firms subject to the rule would file directly with the Commission. These would constitute less than 9 firms.

V 40 N 250 DEC 30 75 XUM

to the rules and forms lessen any existing burden on competition by reducing the reporting required and resultant costs of brokers and dealers.

X. *Request for Comments.* Due to the implementation of amended Rule 15c3–1 [17 CFR 240.15c3–1] on January 1, 1976, the financial reporting and surveillance systems of the Commission and the self-regulators will become obsolete. Public interest and the protection of investors therefore appear to require that the FOCUS Report and accompanying rule and form amendments be adopted as efficient in theory, and the form satisfactory in substance, certain modifications may subsequently be necessary in order to achieve a smoother practical application. It is the Commission's view that the areas requiring additional refinement will become apparent after the self-regulators and the brokers and dealers have had several months experience with the FOCUS reporting structure. Therefore, comments are requested on or before March 31, 1976, suggesting the adoption on or before June 30, 1976, of proposed amendments to the FOCUS Report and the accompanying implementation program.

Commentators are requested to consider, in addition to other issues, the following subjects:

(1) the viability of the format of Part I, Part II and Part IIA of Form X–17A–5 [17 CFR 249.617], and suggested additions or deletions thereto;

(2) the appropriateness of filing frequencies of Part I, Part II and Part IIA of Form X–17A–5 [17 CFR 249.617];

(3) the feasibility of further combining Form X–17A–5 [17 CFR 249.617], Form X–17A–10 [17 CFR 249.618] and Form X–17A–20 [17 CFR 249.636] in order to effect a greater reduction in reporting requirements;

(4) possible alternative means by which the annual audit requirements, the collection of surveillance material and the collection of economic data on a comparable time basis for all brokers and dealers may be achieved;

(5) the effectiveness of the revised annual audit report format and accompanying changes to Rule 17a–5 [17 CFR 240.17a–5] and Rule 17a–11 [17 CFR 240.17a–11]; and

(6) the appropriateness of requiring municipal securities brokers and dealers to be subject to the FOCUS reporting structure.

Interested persons should submit their comments in writing on or before March 31, 1976. All such communications should be directed to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Comments should refer to File No. S7–594 and will be available for public inspection.

(Secs. 2, 6, 10, 15, 17, 23, 48 Stat. 881, 885, 891, 895, 897, 901 (15 U.S.C. 78b, 78f, 78j, 78o, 78q, 78w) as amended by Secs. 2, 4, 11, 14, 18, Pub. L. 94–29).

By the Commission

[SEAL] GEORGE A. FITZSIMMONS, *Secretary.*

DECEMBER 17, 1975.

PART 200—ORGANIZATION, CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

1. Commission action: Pursuant to section 23 of the Securities Exchange Act of 1934, the Securities and Exchange Commission amends § 200.30–3 in Chapter II of Title 17 of the Code of Federal Regulations by revising the introductory paragraph and (a) (5) to read as follows:

§ 200–30–3 Delegation of authority to Director of Division of Market Regulation.

Pursuant to the provisions of Public Law No. 87–592, 76 Stat. 394, (15 U.S.C. 78d–1, 78d–2), the Securities and Exchange Commission hereby delegates, until the Commission orders otherwise, the following functions to the Director of the Division of Market Regulation to be performed by him or under his direction by such person or persons as may be designated from time to time by the Chairman of the Commission:

(a) * * *

(5) Pursuant to Rule 17a–5(1)(3) (§ 240.17a–5(1)(3) of this chapter), to consider applications, by brokers and dealers for exemptions from, and extension of time within which to file, reports required by Rule 17a–5 (§ 240.17a–5 of this chapter), and to grant, and to authorize the issuance of orders denying, such applications provided such applicant is advised of his right to have such denial reviewed by the Commission.

* * * * *

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. Commission action: Pursuant to sections 2, 10, 15, 17(a), 17(e) and 23(a) of the Securities Exchange Act of 1934, the Securities and Exchange Commission amends § 240.17a–4 in Chapter II of Title 17 of the Code of Federal Regulations by revising paragraph (b) (8) to read as follows:

§ 240.17a–4 Records to be preserved by certain brokers and dealers.

(b) * * *

(8) Records which contain the following information in support of amounts included in reports on Form X–17A–5 (§ 249.617 of this chapter) Part II or Part IIA and in annual audited financial statements required by § 240.17a–5:

(i) money balance position, long or short, including description, quantity, price and valuation of each security including contractual commitments in customers' accounts, in cash and fully secured accounts, partly secured accounts, unsecured accounts, and in securities accounts payable to customers;

(ii) money balance and position, long or short, including description, quantity, price and valuation of each security including contractual commitments in non-customers' accounts, in cash and fully secured accounts, partly secured and unsecured accounts, and in securities accounts payable to non-customers;

(iii) position, long or short, including description, quantity, price and valuation of each security including contractual commitments included in the Computation of Net Capital as commitments, securities owned, securities owned not readily marketable, and other investments owned not readily marketable;

(iv) amount of secured demand note, description, of collateral securing such secured demand note including quantity, price and valuation of each security and cash balance securing such secured demand note;

(v) description of futures commoditiy contracts, contract value on trade date, market value, gain or loss, and liquidating equity or deficit in customers' and non-customers' accounts;

(vi) description of futures commodity contracts, contract value on trade date, market value, grain or loss and liquidating equity or deficit in trading and investment accounts;

(vii) description, money balance, quantity, price and valuation of each spot commodity position or commitments in customers' and non-customers' accounts;

(viii) description, money balance, quantity, price and valuation of each spot commodity position or commitments in trading and investment accounts;

(ix) number of shares, description of security, exercise price, cost and market value of put and call options including short out of the money options having no market or exercise value, showing listed and unlisted put and call options separately;

(x) quantity, price, and valuation of each security underlying the haircut for undue concentration made in the Computation for Net Capital;

(xi) description, quantity, price and valuation of each security and commodity position or contractual commitment, long or short, in each joint account in which the broker or dealer has an interest, including each participant's interest and margin deposit;

(xii) description, settlement date, contract amount, quantity, market price, and valuation for each aged failed to deliver requiring a charge in the Computation of Net Capital pursuant to § 240.15c3–1;

(xiii) detail relating to information for possession or control requirements under § 240.15c2–3 and reported on the schedule in Part II or IIA of Form X–17A–5 (§ 249.617 of this chapter);

(xiv) detail of all items, not otherwise substantiated, which are charged or credited in the Computation of Net Capital pursuant to § 240.15c3–1, such as cash margin deficiencies, deductions related to securities values and undue concentration, aged securities differences and insurance claims receivable; and

(xv) other schedules which are specifically prescribed by the Commission as necessary to support information reported as required by § 240.17a–5.

* * * * *

2. Commission action: Pursuant to sections 2, 10, 15, 17(a), 17(e) and 23 of the Securities Exchange Act of 1934, the Securities and Exchange Commission revises § 240.17a–5 in Chapter II of Title 17 of the Code of Federal Regulations to read as follows:

§ 240.17a–5 Reports to be made by certain brokers and dealers.

(a) *Filing of Monthly and Quarterly Reports.* (1) This paragraph (a) shall apply to every broker or dealer registered pursuant to Section 15 of the Act.

(2) (i) Every broker or dealer subject to this paragraph (a) who clears or carries customer accounts shall file Part I of Form X–17A–5 (§ 249.617 of this chapter) within 10 busines days after the end of each month.

(ii) Every broker or dealer subject to this paragraph (a) who clears or carries customer accounts shall file Part II of Form X–17A–5 (§ 249.617 of this chapter) within 17 business days after the end of the calendar quarter and within 17 business days after the date selected for the annual audit of financial statements where said date is other than a calendar quarter. Certain of such brokers or dealers shall file Part IIA in lieu thereof if the nature of their business is limited as described in the instructions to Part II of Form X–17A–5 (§ 249.617 of this chapter).

(iii) Every broker or dealer who does not carry nor clear customer accounts shall file Part IIA of Form X–17A–5 (§ 249.617 of this chapter) within 17 business days after the end of each calendar quarter and within 17 business days after the date selected for the annual audit of financial statements where said date is other than the end of the calendar quarter.

(iv) Upon receiving written notice from the Commission or the examining authority designated pursuant to Section 17(d) of the Act, a broker or dealer who receives such notice shall file monthly, or at such times as shall be specified, Part II or Part IIA of Form X–17A–5 (§ 249.617 of this chapter) and such other financial or operational information as shall be required by the Commission or the designated examining authority.

(3) The reports provided for in this paragraph (a) shall be considered filed when received at the Commission's principal office in Washington, D.C. and the regional office of the Commission for the region in which the broker or dealer has its principal place of business. Except as provided for in paragraph (e) (3), such reports shall be available for examination at the principal office of the broker or dealer.

(4) The provisions of subparagraphs (2) and (3) of paragraph (a) shall not apply to a member of a national securities exchange or a registered national securities association if said exchange or association maintains records containing the information required by Part I, Part II or Part IIA of Form X–17A–5 (§ 249.617 of this chapter), as to such member, and transmits to the Commission a copy of the applicable parts of Form X–17A–5 (§ 249.617 of this chapter) as to such member, pursuant to a plan, the procedures and provisions of which have been submitted to and declared effective by the Commission. Any such plan filed by a national securities exchange or a registered national securities association may provide that when a member is also a member of one or more national securities exchanges, or of one or more national securities associations, the information required to be submitted with respect to any such member may be submitted by only one specified national securities exchange or registered national securities association. For the purposes of this section, a plan filed with the Commission by a national securities exchange or a registered national securities association shall not become effective unless the Commission, having due regard for the fulfillment of the Commission's duties and responsibilities under the provisions of the Act, declares the plan to be effective. Further, the Commission, in declaring any such plan effective, may impose such terms and conditions relating to the provisions of the plan and the period of its effectiveness as may be deemed necessary or appropriate in the public interest, for the protection of investors, or to carry out the Commission's duties and responsibilities under the Act.

(b) *Report Filed Upon Termination of Membership Interest.* (1) If a broker or dealer holding any membership interest in a national securities exchange ceases to be a member in good standing of such exchange, such broker or dealer shall, within two business days after such event, file with the Commission Part II of Form X–17A–5 (§ 249.617 of this chapter) as of the date of such event.

The report shall be filed at the Commission's principal office in Washington, D.C., and with the regional office of the Commission for the region in which the broker or dealer has its principal place of business: *Provided, however,* That such report need not be made or filed if the Commission, upon written request or upon its own motion, exempts such broker or dealer, either unconditionally or on specified terms and conditions, from such requirement: *Provided, further,* That the Commission may, upon request of the broker or dealer, grant extensions of time for filing the report specified herein for good cause shown.

(2) Attached to the report required by subparagraph (1) of this paragraph shall be an oath or affirmation that to the best knowledge and belief of the individual making such oath or affirmation the information contained in the report is true and correct. The oath or affirmation shall be made before a person duly authorized to administer such oath or affirmation. If the broker or dealer is a sole proprietorship, the oath or affirmation shall be made by the proprietor; if a partnership, by a general partner; or if a corporation, by the chief executive officer, or, in his absence, by the person authorized to act in his place.

(3) For the purposes of this paragraph (b) "membership interest" shall include the following: full membership, allied membership, associated membership, floor privileges, and any other interest that entitles a broker or dealer to the exercise of any privilege on an exchange.

(4) For the purposes of this paragraph (b), any broker or dealer shall be deemed to have ceased to be a member in good standing of such exchange when he has resigned, withdrawn, or been suspended or expelled from a membership interest in such exchange or has directly or through any associated person sold or entered into an agreement for the sale of a membership interest which would on consummation thereof result in the termination of the broker's or dealer's membership interest in such exchange.

(5) Whenever any national securities exchange takes any action which causes any broker or dealer which is a member of such exchange to cease to be a member in good standing of such exchange or when such exchange learns of any action by such member or any other person which causes such broker or dealer to cease to be a member in good standing of such exchange, such exchange shall report such action promptly to the Commission, furnishing information as to the circumstances surrounding the event, and shall send a copy of such notification to the broker or dealer and notify such broker or dealer of his responsibilities under this paragraph (b).

(c) *Customer Statements*—(1) *Who must furnish the statements.* Every broker or dealer shall file with the Commission at its principal office in Washington, D.C., with the regional office of the Commission for the region in which the broker or dealer has its principal place of business, and with each national securities exchange and registered national securities association of which it is a member, and shall send to its customers the statements prescribed by subparagraphs (2) and (3) of this paragraph (c), except if the activities of such broker or dealer are limited to any one or combination of the following and are conducted in the manner prescribed herein:

(i) As introducing broker or dealer, the forwarding of all the transactions of his customers to a clearing broker or dealer on a fully disclosed basis: *Provided,* That such clearing broker or dealer reflects such transactions on its books and records in accounts it carries in the names of such customers and that the introducing broker or dealer does not hold funds or securities for, or owe funds or securities to, customers other than funds and securities promptly forwarded to the clearing broker or dealer or to customers;

(ii) The prompt forwarding of subscriptions for securities to the issuer, underwriter or other distributor of such securities and of receiving checks, drafts, notes, or other evidences of indebtedness payable solely to the issuer, underwriter or other distributor who delivers the security directly to the subscriber or to a custodian bank, if the broker or dealer does not otherwise hold funds or securities for, or owe money or securities to, customers;

(iii) The sale and redemption of redeemable shares of registered investment companies or the solicitation of share accounts of savings and loan associations in the manner contemplated by the $2,500 minimum net capital requirement

V 40 N 250 DEC 30 75 XUM

of § 240.15c3–1 or the offering to extend any credit to or participate in arranging a loan for a customer to purchase insurance in connection with the sale of redeemable shares of registered investment companies; or

(iv) Conduct which would exempt the broker or dealer from the provisions of § 240.17a–13 by reason of the provisions of paragraph (a) of that section.

(2) *Audited statements to be furnished.* The following statements shall be sent to customers within 45 days after the broker or dealer files with the Commission the information required by paragraph (d):

(i) A balance sheet with appropriate notes prepared in accordance with generally accepted accounting principles which shall be audited if the financial statements furnished in accordance with paragraph (d) of this section are required to be certified;

(ii) A footnote containing a statement of the amount of the broker's or dealer's net capital and its required net capital, computed in accordance with § 240.-15c3–1. Such statement shall include summary financial statements of subsidiaries consolidated pursuant to Appendix C of § 240.15c3–1, where material, and the effect thereof on the net capital and required net capital of the broker or dealer;

(iii) If, in connection with the most recent annual audit report pursuant to § 240.17a–5, the independent accountant commented on any material inadequacies in accordance with paragraphs (g) and (h) and § 240.17a–11(d), there shall be a statement by the broker or dealer that a copy of such report and comments is currently available for the customer's inspection at the principal office of the Commission in Washington, D.C., and the regional office of the Commission for the region in which the broker or dealer has its principal place of business; and

(iv) A statment indicating that the Statement of Financial Condition of the most recent annual audit report of the broker or dealer pursuant to § 240.17a–5 is available for examination at the principal office of the broker or dealer and at the regional office of the Commission for the region in which the broker or dealer has its principal place of business.

(3) *Unaudited statements to be furnished.* The statements shall contain the information specified in subparagraphs (c)(2)(i) and (ii). Said unaudited statements shall be as of the date 6 months from the date of the audited statements required to be furnished pursuant to subparagraphs (c)(1) and (2) and shall be furnished not later than six months after the date that the audited statements required by subparagraph (c)(2) were furnished.

(4) *Definition of "customer."* For purposes of this paragraph (c), the term "customer" includes any person other than: (i) another broker or dealer who is exempted by subparagraph (c)(1); (ii) a general, special or limited partner or director or officer of a broker or dealer; or (iii) any person to the extent that such person has a claim for property or funds which by contract, agreement or understanding, or by operation of law, is part of the capital of the broker or dealer or is subordinated to the claims of creditors of the broker or dealer, for or with whom a broker or dealer has effected a securities transaction in a particular month, which month shall be either the month preceding the balance sheet date or the month following the balance sheet date in which the statement is sent. The term "customer" also includes any person for whom the broker or dealer holds securities for safekeeping or as collateral or for whom the broker or dealer carries a free credit balance in the month in which customers are determined for purposes of this paragraph (c).

(d) *Annual Filing of Audited Financial Statements.* (1) (i) Every broker or dealer registered pursuant to Section 15 of the Act shall file annually, on a calendar or fiscal year basis, a report which shall be audited by an independent public accountant. Reports pursuant to this paragraph (d) shall be as of the same fixed or determinable date each year unless a change is approved by the Commission.

(ii) A broker or dealer succeeding to and continuing the business of another broker or dealer need not file a report under this paragraph as of a date in the fiscal or calendar year in which the succession occurs if the predecessor broker or dealer has filed a report in compliance with this paragraph as of a date in such fiscal or calendar year.

(iii) A broker or dealer who has not transacted a business in securities directly with or for other than members of a national securities exchange, and has not carried any margin account, credit balance or security for any person who is defined as a "customer" in paragraph (c)(4) of this section, shall not be required to file a report under this paragraph.

(2) The annual audited report shall contain a Statement of Financial Condition (in a format and on a basis which is consistent with the totals reported on the Statement of Financial Condition contained in Form X–17A–5 (§ 249.617 of this chapter), Part II or Part IIA), a Statement of Changes in Stockholders' or Partners' or Sole Proprietor's Equity, and a Statement of Changes in Liabilities Subordinated to Claims of General Creditors. Such statements shall be in a format which is consistent with such statements as contained in Form X–17A–5 (§ 249.617 of this chapter) Part II or Part IIA.

(3) Supporting schedules shall include, from Part II or Part IIA of Form X–17A–5 (§ 249.617 of this chapter) a Computation of Net Capital Under § 240.15c3–1, a Computation for Determination of the Reserve Requirements under Exhibit A of § 240.15c3–3 and Information Relating to the Possession or Control Requirements Under § 240.15c3–3 and shall be filed with said report.

(4) A reconciliation, including appropriate explanations, of the Computation of Net Capital under § 240.15c3–1 and the Computation for Determination of the Reserve Requirements Under Exhibit A of § 240.15c3–3 in the audit report with the broker's or dealer's corresponding unaudited most recent Part II or Part IIA filing shall be filed with said report when material differences exist. If no material differences exist, a statement so indicating shall be filed.

(5) The annual audit report shall be filed not more than sixty (60) days after the date of the financial statements.

(6) The annual audit report shall be filed at the regional office of the Commission for the region in which the broker or dealer has its principal place of business, the Commission's principal office in Washington, D.C., and the principal office of the designated examining authority for said broker or dealer. Copies thereof shall be provided to all self-regulatory organizations of which said broker or dealer is a member.

(e) *Nature and form of reports.* The financial statements filed pursuant to paragraph (d) of this section shall be prepared and filed in accordance with the following requirements:

(1) (i) An audit shall be conducted by a certified public accountant who shall be in fact independent as defined in paragraph (f)(3) herein, and he shall give an opinion covering the statements filed pursuant to paragraph (d): *Provided, however,* That the financial statements filed pursuant to paragraph (d) need not be audited if, since the date of the previous financial statements of the report filed pursuant to § 240.15b1–2 or this section: (a) the securities business of such broker or dealer has been limited to acting as broker (agent) for the issuer in soliciting subscriptions for securities of such issuer, said broker has promptly transmitted to such issuer all funds and promptly delivered to the subscriber all securities received in connection therewith, and said broker has not otherwise held funds or securities for or owed money or securities to customers; or (b) its securities business has been limited to buying and selling evidences of indebtedness secured by mortgage, deed or trust, or other lien upon real estate or leasehold interests, and said broker or dealer has not carried any margin account, credit balance or security for any securities customer.

(ii) A broker or dealer who files a report which is not covered by an accountant's opinion shall include in the oath or affirmation required by paragraph (e)(2) of this section a statement of the facts and circumstances relied upon as a basis for exemption from the requirement that financial statements and schedules filed pursuant to paragraph (d) be covered by the opinion of an accountant.

(2) Attached to the report shall be an oath or affirmation that, to the best knowledge and belief of the person making such oath or affirmation, the financial statements and schedules are true and correct. The oath or affirmation shall be made before a person duly authorized to administer such oaths or affirmations. If the broker or dealer is a sole proprietorship, the oath or affirmation shall be made by the proprietor; if a partnership, by a general partner; or if a corporation, by a duly authorized officer.

(3) All of the statements filed pursuant to paragraph (d) shall be public, except that, if the Statement of Financial Condition in a format which is consistent with Form X–17A–5 (§ 249.617 of this chapter), Part II or Part IIA, is bound separately from the balance of the annual audited financial statements filed pursuant to subparagraph (d)(1), the balance of the annual audited financial settlements shall be deemed confidential, except that they shall be available for official use by any official or employee of the United States or any State, by national securities exchanges and registered national securities associations of which the person filing such report is a member, and by any other person to whom the Commission authorizes disclosure of such information as being in the public interest. Nothing contained in this subparagraph (3) shall be deemed to be in derogation of the rules of any registered national securities association or national securities exchange which give to customers of a member broker or dealer the right, upon request to such member broker or dealer, to obtain information relative to its financial condition.

(4) The broker or dealer shall file with the report a supplemental report which shall be covered by an opinion of the independent public accountant on the status of the membership of the broker or dealer in the Securities Investor Protection Corporation ("SIPC") if, pursuant to subparagraph (c)(1), a report of the broker or dealer is required to be covered by an opinion of a certified public accountant or a public accountant who is in fact independent. The supplemental report shall cover the SIPC annual general assessment reconciliation or exclusion from membership forms not previously reported on under this subparagraph (4) which were required to be filed on or prior to the date of the report required by paragraph (b) of this section. The supplemental report, which shall be submitted in triplicate original to the regional office of the Commission for the region in which the broker or dealer has its principal place of business, be bound separately, be dated and be signed manually, shall include the following:

(i) A schedule of assessment payments also showing any overpayments applied and overpayments carried forward including: payment dates, amounts, and name of SIPC collection agent to whom mailed, or

(ii) If exclusion from membership was claimed, a statement that the broker or dealer qualified for exclusion from membership under the Securities Investor Protection Act of 1970, and the date and name of the SIPC collection agent with whom a Certification of Exclusion from Membership (Form SIPC–3) was filed, and

(iii) An accountant's report which shall state that in the accountant's opinion either the assessments were determined fairly in accordance with applicable instructions and forms, or that a claim for exclusion from membership was consistent with income reported. If exceptions are noted, the accountant shall state any corrective action taken or proposed. The accountant's review on which his report is based shall include as a minimum the following procedures:

(A) Comparison of listed assessment payments with respective cash disbursements record entries;

(B) For calendar year 1975 or preceding years, comparison of amounts reflected in Form X–17A–10 (§ 249.618 of this chapter) with amounts reported in the Annual General Assessment Reconciliation (Form SIPC–7);

(C) For all or any portion of a fiscal year ending in 1976 and each fiscal year thereafter, comparison of amounts reflected in Form X–17A–5 (§ 249.617 of this chapter) as required by paragraph (b) of this section, with amounts reported in the Annual General Assessment Reconciliation (Form SIPC–7);

(D) Comparison of adjustments reported in Form SIPC–7 with supporting schedules and working papers supporting adjustments;

(E) Proof of arithmetical accuracy of the calculations reflected in Form SIPC–7 and in the schedules and working papers supporting adjustments; and

(F) Comparison of the amount of any overpayment applied with the Form SIPC–7 on which it was computed; or

(G) If exclusion from membership is claimed, the accountant shall review Form X–17A–10 (§ 249.618 of this chapter) for calendar year 1975 or preceding years, Form X–17A–5 (§ 249.617 of this chapter) for all or any portion of a fiscal year ending in 1976 and each fiscal year ending in 1976 and each fiscal year thereafter to ascertain that the Certification of Exclusion from Membership (Form SIPC–3) was consistent with the income reported.

(f)(1) *Qualification of accountants.* The Commission will not recognize any person as a certified public accountant who is not duly registered and in good standing as such under the laws of his place of residence or principal office.

(2) *Designation of accountant.* Every broker or dealer subject to this section shall file no later than December 10 of each year a statement with the Commission's principal office in Washington, D.C., the regional office of the Commission for the region in which its principal place of business is located, and the principal office of the designated examining authority for such broker or dealer. Such statement shall indicate the existence of an agreement dated no later than December first, with an independent public accountant covering a contractual commitment to conduct the broker's or dealer's annual audit during the following calendar year.

The agreement may be of a continuing nature, providing for successive yearly audits, in which case no further filing is required. If the agreement is for a single audit, or if the continuing agreement previously filed has been terminated or amended, a new statement must be filed by the required date.

The statement shall be headed "Notice pursuant to Rule 17a–5(f)(2)" and shall contain the following information: (i) name, address, telephone number and registration number of the broker or dealer; (ii) name, address and telephone number of the accounting firm; and (iii) the audit date of the broker or dealer for the year covered by the agreement.

(3) *Independence of accountant.* An accountant shall be independent in accordance with the provisions of § 210.2–01(b) and (c) of this chapter.

(4) *Replacement of accountant.* A broker or dealer shall file a notice which must be received by the Commission's principal office in Washington, D.C., the regional office of the Commission for the region in which its principal place of business is located, and the principal office of the designated examining authority for such broker or dealer, not more than 15 business days after;

(i) The broker or dealer has notified the accountant whose opinion covered the most recent financial statements filed under paragraph (d) of this section that his services will not be utilized in future engagements; or

(ii) The broker or dealer has notified an accountant who was engaged to give an opinion covering the financial statements to be filed under paragraph (d) that the engagement has been terminated; or

(iii) An accountant has notified the broker or dealer that he would not continue under an engagement to give an opinion covering the financial statements to be filled under paragraph (d); or

(iv) A new accountant has been engaged to give an opinion covering the financial statements to be filed under paragraph (d) without any notice of termination having been given to or by the previously engaged accountant.

Such notice shall state (a) the date of notification of the termination of the engagement or engagement of the new accountant as applicable and (b) the details of any problems existing during the 24 months (or the period of, the engagement, if less) preceding such termination or new engagement relating to any matter of accounting principles or practices, financial statement disclosure, auditing scope or procedure, or compliance with applicable rules of the Commission, which problems, if not resolved to the satisfaction of the former accountant, would have caused him to make reference to them in connection with his report on the subject matter of the problems. The problems required to be reported in response to the preceding sentence include both those resolved to the former accountant's satisfaction and those not resolved to the former accountant's satisfaction. Problems contemplated by this section are those which occur at the decisionmaking level—i.e., between principal financial officers of the broker-dealer and personnel of the accounting firm responsible for rendering its report. The notice shall also state whether the accountant's report on the financial statements for any of the past

V 40 250 DEC 30 75 XUM

two years contained an adverse opinion or a disclaimer of opinion or was qualified as to uncertainties, audit scope, or accounting principles, and describe the nature of each such adverse opinion, disclaimer of opinion, or qualification. The broker or dealer shall also request the former accountant to furnish the broker or dealer with a letter addressed to the Commission stating whether he agrees with the statements contained in the notice of the broker or dealer and, if not, stating the respects in which he does not agree. The broker or dealer shall file three copies of the notice and the accountant's letter, one copy of which shall be manually signed by the sole proprietor, or a general partner or a duly authorized corporate officer, as appropriate, and by the accountant, respectively.

(g) *Audit objectives.* (1) The audit shall be made in accordance with generally accepted auditing standards and shall include a review of the accounting system, the internal accounting control and procedures for safeguarding securities including appropriate tests thereof for the period since the prior examination date. The audit shall include all procedures necessary under the circumstances to enable the independent public accountant to express an opinion on the statement of financial condition, results of operations, changes in financial position, and the Computation of Net Capital under § 240.15c3–1, the Computation for Determination of Reserve Requirements for Brokers or Dealers under Exhibit A of § 240.15c3–3, and Information Relating to the Possession or Control Requirements under § 240.15c3–3. The scope of the audit and review of the accounting system, the internal control and procedures for safeguarding securities shall be sufficient to provide reasonable assurance that any material inadequacies existing at the date of the examination in (a) the accounting system; (b) the internal accounting controls; (c) procedures for safeguarding securities; and (d) the practices and procedures whose review is specified in (i), (ii), (iii) and (iv) of this paragraph would be disclosed. Additionally, as specific objectives, the audit shall include reviews of the practices and procedures followed by the client:

(i) in making the periodic computations of aggregate indebtedness and net capital under § 240.17a–3(a)(11) and the reserve required by § 240.15c3–3(e);

(ii) in making the quarterly securities examinations, counts, verifications and comparisons and the recordation of differences required by § 240.17a–13;

(iii) in complying with the requirement for prompt payment for securities of Section 4(c) of Regulation T (§ 220.4(c) of Chapter II of Title 12) of the Board of Governors of the Federal Reserve System; and

(iv) in obtaining and maintaining physical possession or control of all fully paid and excess margin securities of customers as required by § 240.15c3–3.

(2) If the broker or dealer is exempt from § 240.15c3–3, the independent public accountant shall ascertain that the conditions of the exemption were being complied with as of the examination date and that no facts came to his attention to indicate that the exemption had not been complied with during the period since his last examination.

(3) A material inadequacy in the accounting system, internal accounting controls, procedures for safeguarding securities, and practices and procedures referred to above which is expected to be reported under these audit objectives includes any condition which has contributed substantially to or, if appropriate corrective action is not taken, could reasonably be expected to (i) inhibit a broker or dealer from promptly completing securities transactions or promptly discharging his responsibilities to customers, other broker-dealers or creditors; (ii) result in material financial loss; (iii) result in material misstatements of the broker's or dealer's financial statements; or (iv) result in violations of the Commission's recordkeeping or financial responsibility rules to an extent that could reasonably be expected to result in the conditions described in parts (i), (ii), or (iii) of this subparagraph (3).

(h) *Extent and Timing of Audit Procedures.* (1) The extent and timing of audit procedures are matters for the independent public accountant to determine on the basis of his review and evaluation of existing internal controls and other audit procedures performed in accordance with generally accepted auditing standards and the audit objectives set forth in paragraph (g) above. In determining the extent of testing, consideration shall be given to the materiality of an area and the possible effect on the financial statements and schedules of a material misstatement in a related account. The performance of auditing procedures involves the proper synchronization of their application and thus comprehends the need to consider simultaneous performance of procedures in certain areas such as, for example, securities counts, transfer verification and customer and broker confirmation in connection with verification of securities positions.

(2) If, during the course of the audit or interim work, the independent public accountant determines that any material inadequacies exist in the accounting system, internal accounting control, procedures for safeguarding securities, or as otherwise defined in subparagraph (g)(3), then he shall call it to the attention of the chief financial officer of the broker or dealer, who shall have a responsibility to inform the Commission and the designated examining authority by telegraphic notice within 24 hours thereafter as set forth in paragraphs (d) and (f) of § 240.17a–11. The broker or dealer shall also furnish the accountant with a copy of said notice to the Commission by telegraphic communication within said 24 hour period. If the accountant fails to receive such notice from the broker or dealer within said 24 hour period, or if he disagrees with the statements contained in the notice of the broker or dealer, the accountant shall have a responsibility to inform the Commission and the designated examining authority by report of material inadequacy within 24 hours thereafter as set forth in paragraph (f) of § 240.17a–11. Such report from the accountant shall, if the broker or dealer failed to file a notice, describe any material inadequacies found to exist. If the broker or dealer filed a notice, the accountant shall file a report detailing the aspects, if any, of the broker's or dealer's notice with which the accountant does not agree.

(i) *Accountant's reports, general provisions.*—(1) *Technical requirements.* The accountant's report shall: (i) be dated; (ii) be signed manually; (iii) indicate the city and state where issued; and (iv) identify without detailed enumeration the financial statements and schedules covered by the report.

(2) *Representations as to the audit.* The account's report shall: (i) state whether the audit was made in accordance with generally accepted auditing standards; (ii) state whether the accountant reviewed the procedures followed for safeguarding securities; and (iii) designate any auditing procedures deemed necessary by the accountant under the circumstances of the particular case which have been omitted, and the reason for their omission.

Nothing in this section shall be construed to imply authority for the omission of any procedure which independent accountants would ordinarily employ in the course of an audit made for the purpose of expressing the opinions required under this section.

(3) *Opinion to be expressed.* The accountant's report shall state clearly the opinion of the accountant: (i) in respect of the financial statements and schedules covered by the report and the accounting principles and practices reflected therein; and (ii) as to the consistency of the application of the accounting principles, or as to any changes in such principles which have a material effect on the financial statements.

(4) *Exceptions.* Any matters to which the accountant takes exception shall be clearly identified, the exception thereto specifically and clearly stated, and, to the extent practicable, the effect of each such exception on the related financial statements given.

(5) *Definitions.* For the purpose of this section, the terms "audit" (or "examination"), "accountant's report," and "certified" shall have the meanings given in § 210.1–02 of this chapter.

(j) *Accountant's report on material inadequacies.*

The broker or dealer shall file concurrently with the annual audit report a supplemental report by the accountant describing any material inadequacies found to exist or found to have existed since the date of the previous audit. The supplemental report shall indicate any corrective action taken or proposed by the broker or dealer in regard thereto. If the audit did not disclose any material inadequacies, the supplemental report shall so state.

(k) *Use of certain statements filed with the Securities and Exchange Commission.* At the request of any broker or dealer who is (i) an investment company registered under the Investment Company Act of 1940, or (ii) a sponsor or depositor of such a registered investment company who effects transactions in securities only with, or on behalf of, such registered investment company, the Commission will accept the financial statements filed pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 or Section 30 of the Investment Company Act of 1940 and the rules and regulations promulgated thereunder as a filing pursuant to paragraph (d) of this section. Such a filing shall be deemed to satisfy the requirements of this section for any calendar year in which such financial statements are filed, provided that the statements so filed meet the requirements of the other rules under which they are filed with respect to time of filing and content.

(l) *Extensions and Exemptions.* (1) (a) In the event any broker or dealer finds that it cannot file its report for any year within the time specified in paragraph (d) of this section without undue hardship, it may file with the Commission's principal office in Washington, D.C. and the appropriate regional office as specified in subparagraph (d)(6), an application for an extension of time to a specified date which shall not be more than 90 days after the date as of which his financial condition is reported. Notice of such application shall be sent to the designated examining authority. The application shall be made by the broker or dealer and shall:

(i) state the reasons for the requested extension;

(ii) indicate that the inability to make a timely filing is due to circumstances beyond the control of the broker or dealer if such is the case, and describe briefly the nature of such circumstance;

(iii) indicate if the broker or dealer is in violation of the net capital requirements specified in § 240.15c3–1 or the requirements of § 240.15c3–3, or has any significant financial or recordkeeping problems;

(iv) contain an agreement to file the report on or before the date specified by the broker or dealer in the application; and

(v) be received by the regional office of the Commission for the region in which the broker or dealer has its principal place of business, the Commission's principal office in Washington, D.C. and the principal office of the designated examining authority prior to the date upon which the report is due.

(vi) be accompanied by a letter from the independent public accountant answering the following questions:

(A) What specifically are the reasons for the extension request?

(B) On the basis of that part of your audit to date, do you have an indication that may cause you to consider commenting on any material inadequacies in the accounting system, internal accounting control and procedures for safeguarding securities?

(C) Do you have any indication from that part of your audit completed to date that would lead you to believe that the condition of the firm's records is endangering its ability to supervise its registered representatives and their handling of customer accounts.

(D) Do you have any indication from that part of your audit completed to date that would lead you to believe that the firm is in violation of the net capital requirements specified in § 240.15c3–1 or the requirements of § 240.15c3–3, or has any significant financial or record-keeping problems?

(b) Within 10 calendar days after the request for extension of time has been received by the appropriate regional office as specified in subparagraph (d)(6), the regional office shall:

(i) notify the broker or dealer and its designated examining authority of the grant or denial of the requested extension; or

(ii) indicate to the broker or dealer that additional time is required to satisfactorily analyze the request, in which case the amount of time needed shall be specified.

(2) Any "bank" as defined in section 3(a)(6) of the Act (48 Stat. 882; 15 U.S.C. 78c) and any "insurance company" as defined in Section 3(a)(19) of the Act (78 Stat. 565; 15 U.S.C. 78c) registered as a broker or dealer to sell variable contracts but exempt from § 240.15c3–1 shall be exempt from the provisions of this section.

(3) On written request of any national securities exchange, registered national securities association, broker or dealer, or on its own motion, the Commission may grant an extension of time or an exemption from any of the requirements of this section either unconditionally or on specified terms and conditions.

(m) *Notification of change of fiscal year.* In the event any broker or dealer finds it necessary to change its fiscal year it must file, with the Commission's principal office in Washington, D.C., the regional office of the Commission for the region in which the broker or dealer has its principal place of business, and the principal office of the designated examining authority for such broker or dealer, a notice of such change.

Such notice shall contain a detailed explanation of the reasons for the change, and indicate whether the filing of the annual audit report will be delayed as a result thereof. If the filing of the audit report will be delayed, the broker or dealer shall include in the notice the representations required by subparagraph (a)(1) of paragraph (1).

(n) *Filing Requirements.* For purposes of filing requirements as described in § 240.17a–5, such filing shall be deemed to have been accomplished upon receipt at the Commission's principal office in Washington, D.C., with duplicate originals simultaneously filed at the locations prescribed in the particular paragraph of § 240.17a–5 which is applicable.

3. Commission action: Pursuant to section 2, 6(e), 17(a) and 23 (a) and (b) of the Securities Exchange Act of 1934, the Securities and Exchange Commission amends § 240.17a–10 in Chapter II of Title 17 of the Code of Federal Regulations by revising paragraphs (a), (d) and (e) to read as follows:

§ 240.17a–10 Report of revenue and expenses.

(a) Every broker or dealer registered pursuant to Section 15 of the Act shall, not later than 45 days after the close of each calender year (commencing with the calendar year 1975), file a report of his revenue and expenses, and related financial and other information for such calendar year on Form X–17A–10 (§ 249.618 of this chapter). Brokers or dealers required to complete Part III only or Schedules A through D shall file Form X–17A–10 (§ 249.618 of this chapter) not later than 60 days after the close of each calendar year.

. . . . . .

(d) In the event any broker or dealer finds that he cannot file his report for any year within the time specified in paragraph (a) of this section without undue hardship, he may file with the Commission's principal office in Washington, D.C. an application for an extension of time to a specified date which shall not be later than 105 days after the close of the calendar year for which the report is to be made. The application shall state the reasons for the requested extension and shall contain an agreement to file the report on or before the specified date.

(e) Notwithstanding the time limits for filing established by paragraph (a) of this section any broker or dealer who is subject to said paragraph (a) of this section shall file a report of his revenue and expenses and related financial and other information on Form X–17A–10 (§ 249.618 of this chapter) for calendar year 1975 not later than 60 days after the close of the calendar year.

4. Commission action: Pursuant to Sections 2, 10, 15, 17(a) and 23(a) of the Securities Exchange Act of 1934, the Securities and Exchange Commission revises § 240.17a–11 in Chapter II of Title 17 of the Code of Federal Regulations to read as follows:

§ 240.17a–11 Supplemental current financial and operational reports to be made by certain brokers and dealers.

(a) Every broker or dealer subject to § 240.15c3–1, whose net capital at any time is less than the minimum required by any capital rule to which such person is subject, shall:

(1) Give telegraphic notice as set forth in paragraph (f) of this section that such person's net capital is less than is required by any such capital rule, identifying the applicable net capital rule or rules. The notice shall be given on the same day that such person's capital becomes less than required by any of the aforesaid rules to which such person is subject; and

V40I250 DEC 30 75 XUM

(2) Within 24 hours thereafter file Part II of Form X–17A–5 (§ 249.617 of this chapter) and such supplementary information as may be required.

(b) (1) If a computation made by a broker or dealer pursuant to the requirements of § 240.15c3–1(c) shows, at any point during the month, that his aggregate indebtedness is in excess of 1,200 per centum of his net capital, or that his total net capital is less than 120 per centum of the minimum net capital required of him, such person shall file a report on Part II of Form X–17A–5 (§249.617 of this chapter) within 15 calendar days after the end of the month for which such computation was required to be made, and within 15 calendar days after the end of each month thereafter until 3 successive months shall have elapsed during which his aggregate indebtedness does not exceed 1,200 per centum of his net capital, and his total net capital does not fall below 120 per centum of the minimum net capital required of him.

(2) If a computation made by a broker or dealer pursuant to § 240.15c3–1(f) shows, at any point during the month, that his net capital is less than 6 percent of aggregate debit items computed in accordance with § 240.15c3–3 Exhibit A: Formula for the Determination of Reserve Requirements, or that his total net capital is less than 120 per centum of the minimum net capital required of him, such broker or dealer shall file a report on Part II of Form X–17A–5 (§ 249.617 of this chapter) within 15 calendar days after the end of the month for which such computation is made, and within 15 days after the end of each month thereafter until three successive months shall have elapsed during which his net capital is not less than six percent of aggregate debit items computed in accordance with § 240.15c3–3 Exhibit A, and his total net capital does not fall below 120 per centum of the minimum net capital required of him.

(c) At any time when a broker or dealer subject to § 240.17a–3 fails to make and keep current the books and records specified therein, he shall immediately give telegraphic notice of such fact, specifying the books and records which have not been made or which are not current, and within 48 hours of the telegraphic notice file a report stating what steps have been and are being taken to correct the situation.

(d) Whenever any broker or dealer discovers, or is notified by an independent public accountant, pursuant to paragraph (h) (2) of § 240.17a–5 of the existence of any material inadequacy as defined in paragraph (g) of § 240.17a–5, said broker or dealer shall give telegraphic notice of such material inadequacy within 24 hours, and within 48 hours of the telegraphic notice file a report stating what steps have been and are being taken to correct the situation.

(e) Whenever any national securities exchange or national securities association learns that a member broker or dealer has failed to file a notice or file a report as required by paragraph (a), (b), (c) or (d) of this section, such organization shall immediately report such failure as provided in paragraph (f) of this section.

(f) Every notice and report required to be given or filed by this section shall be given to or filed with the principal office of the Commission in Washington, D.C., with the regional office of the Commission for the region in which the broker or dealer has its principal place of business, with the designated examining authority of which such broker or dealer is a member, and with the Commodity Futures Trading Commission if such broker or dealer is a member of such Commission.

5. Commission action: Pursuant to Sections 2, 6(e), 17(a) and 23(a) and (b) of the Securities Exchange Act of 1934, the Securities and Exchange Commission amends § 240.17a–20 in Chapter II of Title 17 of the Code of Federal Regulations by revising paragraphs (a) (1) and (a) (2) to read as follows:

§ 240.17a–20 Monitoring effect of competitive commission rates.

(a) (1) Every broker or dealer with revenues as shown on line 6 of Statement A to Part III or line 11 of Statement AA to Part II of Form X–17A–10 (§ 249.618 of this chapter) of $500,000 or more, of which at least 20 percent is derived from brokerage commission transactions effected on national securities exchanges as shown on Line 1(a) of Statement A to Part III, or Line 1(e) of Statement AA to Part II, respectively, of Form X–17A–10 (§ 249.618 of this chapter) during calendar year 1974 shall, not later than 17 business days after the close of each calendar quarter, file a report of his revenues and expenses and related financial and other information for each such calendar quarter on Form X–17A–20 (§ 249.636 of this chapter).

(2) Every broker or dealer required to file for calendar year 1975 Part II to Form X–17A–10 (§ 249.618 of this chapter), and whose commissions earned on transactions in listed equity securities executed on an exchange as shown on Line A(11) of Part II to Form X–17A–10 (§ 249.618 of this chapter), and who does not conduct a business with other than other members of an exchange, shall, not later than 17 business days after the close of each calendar quarter (commencing with the calendar quarter ending March 31, 1976), file a report of revenues and expenses and related financial and other information for each such calendar quarter on Form X–17A–20 (§ 249.636 of this chapter).

* * * * *

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

1. Commission action: Pursuant to sections 2, 10, 15, 17(a), 17(e) and 23 of the Securities Exchange Act of 1934, the Securities and Exchange Commission revises § 249.617 in Chapter II of Title 17 of the Code of Federal Regulations to read as follows:

§ 249.617 Form X–17A–5, information required of certain brokers and dealers pursuant to section 17 of the Securities Exchange Act of 1934 and § 240.17a–5 of this subchapter.

This form shall be used by every broker or dealer required to file reports under § 240.17a–5(a) (b) and (d) of this chapter.

2. Commission action: Pursuant to sections 2, 6(e), 17(a) and 23(a) and (b) of the Securities and Exchange Act of 1934, the Securities and Exchange Commission revises § 249.618 in Chapter II of Title 17 of the Code of Federal Regulations to read as follows:

§ 249.618 Form X–17A–10, annual report of revenue and expenses to be filed by brokers and dealers pursuant to Section 17 of the Act and § 240.17a–10 of this chapter.

This form shall be filed as the annual report of revenues and expenses, and related financial and other information, by every broker or dealer required to file a report pursuant to § 240.17a–10(a) of this chapter, unless such broker or dealer has filed the information required by this form with a national securities exchange or a registered national securities association pursuant to § 240.17a–10(b) of this chapter.

§ 249.621 [Removed]

3. Commission action: Pursuant to Sections 2, 10, 15, 17(a) and 23(a) of the Securities Exchange Act of 1934, the Securities and Exchange Commission revokes § 249.621 in Chapter II of Title 17 of the Code of Federal Regulations.

4. Commission action: Pursuant to Sections 2, 6(e), 17(a) and 23(a) and (b) of the Securities Exchange Act of 1934, the Securities and Exchange Commission revises § 249.636 in Chapter II of Title 17 of the Code of Federal Regulations to read as follows:

§ 249.636 Form X–17A–20 Monitoring effect of competitive commission rates—revenue and expense information.

This form shall be completed and filed by every broker or dealer required to file a report pursuant to subparagraphs (1) or (2) of § 240.17a–20(a) of this chapter, unless such a broker or dealer has filed the information required of this form with a national securities exchange or a registered national securities association pursuant to subparagraph (3) of § 240.17a–20(a) of this chapter.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Action

Schedule B, § 213.3259 is amended to show that after March 31, 1976, no new appointments to positions of Regional Directors for Domestic and Anti-Poverty Operations may be made under Schedule B. Current appointees may continue to serve under this authority until expiration of their appointments, and their appointments may be extended as provided in the authority.

Effective December 30, 1975, § 213.3259 (a) (2) is amended as set forth below:

§ 213.3259 ACTION.

(a) *Office of Domestic and Anti-Poverty Operations.* * * *

(2) Not to exceed ten positions of Regional Director, GS–15. Employment under this authority may not exceed 2 years: *Provided* That the Director of ACTION may extend appointments made under this authority for up to 2 additional years if he deems such action essential to the accomplishment of agency goals. No one may be initially appointed under this authority after March 31, 1976.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS)

[Docket No. AO–254–A7]

PART 915—HANDLING OF AVOCADOS IN SOUTH FLORIDA

Correction

In FR Doc. 30312, appearing at page 52605, in the issue for Tuesday, November 11, 1975, in § 915.22(b)(1), the seventh line should read "committee may conduct nominations by".

[Papaya Regulation 6]

PART 928—PAPAYAS GROWN IN HAWAII

Limitation of Shipments

This regulation establishes quality and size requirements for Hawaiian papayas from January 1 through December 31, 1976 at the same levels as Papaya Regulation 5 effective during 1975. It requires all Hawaiian papayas handled to grade at least Hawaii No. 1 grade. Fruit handled in interstate or export channels shall be of pyriform shape and weigh at least 10 ounces and fruit handled in intrastate channels shall weigh at least 14 ounces except such fruit grading Hawaii Fancy shall weigh at least 16 ounces.

Notice was published in the FEDERAL REGISTER issue of December 8, 1975 (40 FR 57221) that the Department was giving consideration to a proposed regulation for handling of papayas grown in Hawaii, pursuant to the applicable provisions of the marketing agreement, and Order No. 928 (7 CFR Part 928) regulating the handling of papayas grown in Hawaii. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). Interested persons were afforded opportunity to file written data, views, or arguments thereon. None were filed.

The Papaya Administrative Committee estimates that 1976 production of Hawaiian papayas will again establish a record high level at 48.0 million pounds. This would be about double the average level of the 1970–72 period. Fresh sales are expected to total 42.0 million pounds and the remaining 6.0 million processed. In-state fresh sales have ranged 10.7–13.1 million pounds in recent years and are projected at 13.5 million for 1976. It is anticipated that out-of-state sales will amount to 68 percent of the total fresh sales next year and reach a record large 28.5 million pounds.

The notice afforded interested persons

gregate quantity of whole or pitted dates

Title 14—Aeronautics and Space

DEC 30 75 V40 N250 XUM

The regulation is based upon an appraisal of the prevailing supply and market situation for papayas. It is concluded that the regulation is appropriate for said supply and market conditions expected to prevail during the effective period of the regulation and, consistent with the objectives of the act, will tend to assure consumers of an adequate supply of acceptable quality papayas while maintaining grower returns at a level consistent with the public interest.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, the recommendations and information submitted by the Papaya Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such papayas, as hereinafter provided, will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this regulation until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) shipments of papayas will be regulated only through December 31, 1975, by current Regulation 5, and, in order to effectuate the declared policy of the act, this regulation should be effective not later than January 1, 1976, to provide continuity of regulation; (2) this regulation is the same as that which was specified in the notice (40 FR 57221), to which no exceptions were submitted; and (3) compliance with this regulation will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective date thereof.

§ 928.306 Papaya Regulation 6.

Order. (a) During the period January 1, 1976, through December 31, 1976, no handler shall ship any container of papayas:

(1) To any destination within the production area unless said papayas grade at least Hawaii No. 1 and are of the size which individually weigh not less than 14 ounces: *Provided*, That papayas handled as Hawaii Fancy grade shall be of a size which individually weigh not less than 16 ounces.

(2) To any export destination unless said papayas grade at least Hawaii No. 1: *Provided*, That such papayas shall be of pyriform shape and weigh not less than 10 ounces each.

(b) When used herein "Hawaii Fancy", "Hawaii No. 1", "Hawaii No. 2" and "pyriform shape" shall have the same meaning as set forth in the State of Hawaii Revised Regulation No. 1 Subsection 5.32—Wholesale Standards for Hawaiian Grown Papayas. All other terms shall have the same meaning as when used in the marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 24, 1975, to become effective January 1, 1976.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-35112 Filed 12-29-75;8:45 am]

PART 982—HANDLING OF FILBERTS GROWN IN OREGON AND WASHINGTON

Free and Restricted Percentages for the 1975–76 Fiscal Year

Notice of a proposal to establish free and restricted percentages of 55 percent and 45 percent, respectively, for filberts grown in Oregon and Washington, was published in the FEDERAL REGISTER on November 25, 1975 (40 FR 54587). These percentages would apply to filberts during the 1975–76 fiscal year, beginning August 1, 1975.

The free percentage prescribes that portion of the total merchantable supply which may be handled as inshell filberts. The restricted percentage prescribes that portion of the total merchantable supply which must be withheld from such handling. Restricted filberts may be shelled (for domestic or foreign consumption), exported, or disposed of in outlets determined by the Filbert Control Board to be noncompetitive with normal market outlets for inshell filberts.

The percentages would be established under § 982.41 of the marketing agreement, as amended, and Order No. 982, as amended (7 CFR Part 982), hereinafter referred to collectively as the "order". The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "act".

Interested persons were afforded an opportunity to submit written data, views, or arguments on the proposal. None were received.

The percentages are based upon the following estimates for the 1975–76 fiscal year:

	Tons
Inshell Supply:	
(1) Total production	12,500
(2) Less substandard, etc	2,250
(3) Total merchantable production	10,250
Inshell requirements:	
(4) Trade demand	5,000
(5) Carryover July 31, 1976	800
(6) Less carryover August 1, 1975, not subject to regulation	157
(7) Inshell requirement	5,643
Percentages:	
(8) Free percentages (Item (7) divided by Item (3)	55
(9) Restricted percentage (100 percent minus 55 percent)	45

After consideration of all relevant material presented, including that in the notice, the information and recommendation submitted by the Filbert Control Board, and other available information, it is found that to establish for the 1975–76 fiscal year, free and restricted percentages applicable to filberts grown in Oregon and Washington, of 55 percent and 45 percent, respectively, will tend to effectuate the declared policy of the act.

It is further found that good cause exists for not postponing the effective time of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), in that: (1) The relevant provisions of the amended marketing agreement and this part require that free and restricted percentages designated for a particular fiscal year shall be applicable to all inshell filberts handled during that fiscal year; (2) the current fiscal year began on August 1, 1975, and the percentages established by this action will automatically apply to all such filberts beginning with that date; and (3) no useful purpose would be served by delaying this action.

Therefore, the free and restricted percentages for merchantable filberts during the 1975–76 fiscal year are established as follows:

§ 982.225 Free and restricted percentages for merchantable filberts during the 1975–76 fiscal year.

The following percentages are established for merchantable filberts for the fiscal year beginning August 1, 1975:

Free percentage	55
Restricted percentage	45

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 19, 1975.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division.

[FR Doc.75-34782 Filed 12-29-75;8:45 am]

PART 987—DOMESTIC DATES PRODUCED OR PACKED IN RIVERSIDE COUNTY, CALIFORNIA

Establishment of Free and Restricted Percentages and Withholding Factors for the 1975–76 Crop Year

Notice was published in the November 24, 1974, issue of the FEDERAL REGISTER (40 FR 54428) regarding a proposal to establish free and restricted percentages and withholding factors of 100 percent, 0 percent, and 0 percent, respectively, for Deglet Noor, Zahidi, Halawy, and Khadrawy dates. The 1975–76 crop year began October 1, 1975. The proposal was pursuant to the marketing agreement as amended, and Order No. 987, as amended (7 CFR Part 987). The amended marketing agreement and order regulate the handling of domestic dates produced or packed in Riverside County, California, and are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The notice afforded interested persons an opportunity to submit written data, views, or arguments with respect to the proposal. None were received.

The free percentages, restricted percentages, and withholding factors for the 1975–76 crop year are applicable to marketable dates and are pursuant to §§ 987.44 and 987.45. These percentages and factors are based on estimates by the California Date Administrative Committee of supply and trade demand, adjusted for handler carryover and other available information, for the current crop year. Trade demand means the aggregate quantity of whole or pitted dates which the trade will acquire from all handlers during the crop year for distribution in the continental United States, Canada, and such other countries as the Committee finds will acquire dates at prices reasonably comparable with prices received in the continental United States.

In determining the percentages for each of the four varieties, the Committee considered the following data, estimates and information for the crop year beginning October 1, 1975:

[In 1,000 lb]

	Deglet Noor	Zahidi	Halawy	Khadrawy
1. Production of marketable dates (1975–76 crop)	35,985	1,926	208	544
2. Plus: Noncertified handler carryover as of Sept. 30, 1975, of marketable dates	7,454	441	130	240
3. Total marketable supply	43,439	2,367	338	784
4. Trade demand for free whole and pitted dates (continental United States and Canada)	15,000	1,800	100	350
5. Plus: Desirable handler carryover as of Sept. 30, 1976, to assure date supplies for early demand	13,000	455	130	241
6. Less: Certified handler carryover as of Sept. 30, 1975, of free dates	2,651	14	0	1
7. Adjusted trade demand	25,349	2,241	230	590

It is estimated that the amounts in excess of adjusted trade demands for these four varieties will be utilized in products and export markets. Hence, free and restricted percentages and withholding factors of 100 percent, 0 percent, and 0 percent, respectively, should be established for each of these varieties.

After consideration of all relevant matter presented, including that in the notice, the information and recommendation submitted by the Committee, and other available information, it is found that to establish free percentages, restricted percentages, and withholding factors as hereinafter set forth will tend to effectuate the declared policy of the act.

It is further found that good cause exists for not postponing the effective time of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that: (1) This action does not impose any restrictions upon handlers and gives them flexibility in meeting market needs; (2) the relevant provisions of said marketing agreement and this part require that free and restricted percentages and withholding factors established for a particular crop year shall be applicable during the entire crop year to all marketable dates; and (3) the current crop year began October 1, 1975, and the percentages and withholding factors hereinafter established will apply to all such dates beginning with that date.

The free percentages, restricted percentages, and withholding factors for the 1975–76 crop year are as follows:

§ 987.223 Free and restricted percentages and withholding factors.

The various free percentages, restricted percentages, and withholding factors applicable to marketable dates of each variety shall be, for the crop year beginning October 1, 1975, and ending September 30, 1976, as follows:

(a) Deglet Noor variety dates: Free percentage, 100 percent; restricted percentage, 0 percent; and withholding factor, 0 percent; (b) Zahidi variety dates: Free percentage, 100 percent; restricted percentage, 0 percent; and withholding factor, 0 percent; (c) Halawy variety dates: Free percentage, 100 percent; restricted percentage, 0 percent; and withholding factor, 0 percent; (d) Khadrawy variety dates: Free percentage, 100 percent; restricted percentage; 0 percent; and withholding factor, 0 percent.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 19, 1975.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 78—BRUCELLOSIS

Subpart D—Designation of Brucellosis Areas, Specifically Approved Stockyards, and Slaughtering Establishments

BRUCELLOSIS AREA

Correction

In FR Doc. 75-33805, appearing at page 58281, in the issue for Tuesday, December 16, 1975, in the third column, the heading reading "§ 78.20 Movement of bison for purposes other than slaughter" should read "§ 78.20 Certified brucellosis-free areas".

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75-EA-76; Amdt. 39-2481]

PART 39—AIRWORTHINESS DIRECTIVE

Piper Aircraft

The Federal Aviation Administration is amending § 39.13 of Part 39 of the Federal Aviation Regulations so as to issue an airworthiness directive applicable to Piper PA-24, PA-30, PA-39 type airplanes.

There have been reports that the horizontal and vertical drilled holes in the stabilator torque tube bearing support fitting to accommodate the blind rivets for fuselage skin attachment and high shear rivets, respectively, conflicted. Thus, some of the high shear rivets had been cut.

Since this deficiency can exist or develop in airplanes of similar type design, an airworthiness directive is being issued which will require an inspection and replacement where necessary.

In view of the foregoing and because the deficiency is one which affects air safety, notice and public procedure hereon are impractical and good cause exists for making the amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 [31 FR 13697] § 39.13 of Part 39 of the Federal Aviation Regulations is amended by issuing a new Airworthiness Directive as follows:

PIPER: Applies to Models PA-24, PA-24-250 and PA-24-260, Serial Nos. 24-1 through 24-5047; PA-24-400, Serial Nos. 26-2 through 26-148; PA-30, Serial Nos. 30-1 through 30-2000; PA-39, Serial Numbers 39-1 through 39-155, certificated in all categories.

Compliance required as indicated.

To prevent possible hazards in flight associated with damaged rivets which attach the stabilator torque tube bearing support fittings P/Ns 20420-00, -01 and 20419-00, 01 to the aft fuselage, accomplish the following:

(a) Within the next 50 hours in service from the effective date of this AD unless previously accomplished, inspect in accordance with paragraph (b).

(b) Inspect each of the four stabilator torque tube bearing block attachment fittings that do not have Piper Kit 760835 or equivalent incorporated, as follows:

(1) Remove the right rear aft fuselage access door.

(2) Using a light and mirror (with extension), view through the access opening to determine if any of the horizontally positioned rivets through the skin align with any of the vertically positioned rivets through the support fittings.

(c) If more than one rivet is aligned among the five forward rivets in each bearing support fitting, Piper Kit 760835 or equivalent shall be installed in the affected fitting before further flight, except that the airplane may be flown in accordance with FAR 21.197 to a base where a repair can be made.

(d) Equivalent repairs must be approved by the Chief, Engineering and Manufacturing

V40I250 DEC 30 75 XUM

Branch, FAA, Eastern Region. (Piper Service Bulletin No. 464, refers to this subject.)

This amendment is effective December 31, 1975.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958 [49 U.S.C. 1354(a), 1421 and 1423]; sec. 6(c), Department of Transportation Act [49 U.S.C. 1655(c)])

Issued in Jamaica, N.Y., on December 17, 1975.

DUANE W. FREER,
Director, Eastern Region.

[FR Doc.75-34944 Filed 12-29-75;8:45 am]

[Docket No. 75-EA-72; Amdt. 39-2480]

PART 39—AIRWORTHINESS DIRECTIVE

Piper Aircraft

The Federal Aviation Administration is amending § 39.13 of Part 39 of the Federal Aviation Regulations so as to amend AD 74-10-01 applicable to Piper PA-23 type airplanes.

Since promulgation of this AD, it has been determined that the part numbers 17104-68 and -69 require continued inspection. This amendment deletes reference to such part numbers but permits incorporation of a Piper kit to terminate the airworthiness directive and also update the service bulletin.

In view of the foregoing, notice and public procedure hereon are impractical and good cause exists for making the amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 [31 FR 13697] § 39.13 of Part 39 of the Federal Aviation Regulations is amended by amending AD 74-10-01 as follows:

PIPER: Amend AD 74-10-01, Amendment 39-1830, as follows:

1. Delete the paragraph commencing "Upon incorporation" to "not required" and insert "Compliance with this AD is not required upon incorporation of Piper Kits 760 861 (right flap) and 760 817 (left flap) or equivalent parts approved by the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region."

2. Delete "Service Bulletin 408" and insert "Service Bulletin 408B" where it appears.

This amendment is effective December 31, 1975.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958 [49 U.S.C. 1354(a), 1421 and 1423]; sec. 6(c), Department of Transportation Act [49 U.S.C. 1655(c)])

Issued in Jamaica, N.Y., on December 17, 1975.

LOUIS J. CARDINALI,
Acting Director, Eastern Region.

[Airspace Docket No. 75-WA-18]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Federal Airway and Controlled Airspace; Correction

In FR Doc. 75-33003 appearing on page 57353 in the FEDERAL REGISTER of December 9, 1975, the third line of the paragraph that begins "In V-453," is corrected by deleting "INT King Salmon 272°" and substituting "INT King Salmon 271°" therefor.

Issued in Washington, D.C., on December 19, 1975.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.75-34942 Filed 12-29-75;8:45 am]

[Airspace Docket No. 75-NW-24]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Additional Control Area

On October 20, 1975, a Notice of Proposed Rule Making (NPRM) was published in the FEDERAL REGISTER (40 FR 48939) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would designate an additional control area over the Olympic Peninsula, Wash.

Interested persons were afforded an oppportunity to participate in the proposed rule making through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, March 25, 1976, as hereinafter set forth.

In § 71.163 (41 FR 348) the following is added:

OLYMPIC PENINSULA, WASH.

That airspace extending upward from 5500 feet MSL beginning at Lat. 48°14' N., Long. 124°45' W., to Lat. 48°00' N., Long. 124° 07' W., to Lat. 47°38' N., Long. 123°40' W., to Lat. 47°15' N., Long., 123°40' W., to Lat. 47°07' N., Long. 124°11' W., to Lat. 47°30' N., Long. 124°21' W., to Lat. 48°00' N., Long. 124°45' W., to point of beginning. That airspace below 1200 feet AGL is excluded.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Washington, D.C. on December 19, 1975.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.75-34943 Filed 12-29-75;8:45 am]

[Airspace Docket No. 75-GL-43]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On page 26043 of the FEDERAL REGISTER dated June 20, 1975, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend Section 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Pittsfield, Illinois.

Interested persons were given 30 days to submit written comments, suggestions or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby adopted without change and is set forth below.

This amendment shall be effective 0901 GMT, March 25, 1976.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Des Plaines, Illinois on December 8, 1975.

R. O. ZIEGLER,
Acting Director, Great Lakes Region.

§ 71.181 [Amended]

In Section 71.181 (40 FR 441), the following transition area is added:

PITTSFIELD, ILLINOIS

That airspace extending upward from 700 feet above the surface within a 5.5-mile radius of the Pittsfield Penstone Airport (Latitude 39°38'22" N., Longitude 90°46'51" W.); and within 3 miles each side of the 124 degree bearing from the Pittsfield Penstone Airport extending from the 5.5-mile radius area to 8 miles southeast of the airport.

[FR Doc.75-34751 Filed 12-29-75;8:45 am]

[Airspace Docket No. 75-GL-32]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On page 20293 of the FEDERAL REGISTER dated May 9, 1975, the Federal Aviation Administration published a notice of proposed rule making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Shelbyville, Illinois.

Interested persons were given 30 days to submit written comments, suggestions or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby adopted without change and is set forth below.

This amendment shall be effective 0901 GMT, March 25, 1976.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Des Plaines, Illinois on December 8, 1975.

R. O. ZIEGLER,
Acting Director, Great Lakes Region.

In § 71.181 (40 FR 441), the following transition area is added:

SHELBYVILLE, ILL.

That airspace extending upward from 700 feet above the surface within a 5.5-mile radius of the Shelby County Airport (Latitude 39°24'30" N., Longitude 88°50'45" W.); and within 3 miles either side of the 186° bearing from the Shelby County Airport extending from the 5.5-mile radius area to 8 miles south of the airport.

[Airspace Docket No. 75-GL-10]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On page 11893 of the FEDERAL REGISTER dated March 14, 1975, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Casey, Illinois.

Interested persons were given 30 days to submit written comments, suggestions or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby adopted without change and is set forth below.

This amendment shall be effective 0901 GMT, March 25, 1976.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Des Plaines, Illinois on December 8, 1975.

R. O. ZIEGLER,
Acting Director, Great Lakes Region.

In § 71.181 (40 FR 441), the following transition area is added:

CASEY, ILLINOIS

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Casey Municipal Airport (Latitude 39°18'00" N., Longitude 88°00'15" W.); and within 3 miles each side of the 211° bearing from the airport extending from the 5-mile radius area to 8 miles southwest of the airport.

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On page 20291 of the FEDERAL REGISTER dated May 9, 1975, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Carmi, Illinois.

Interested persons were given 30 days to submit written comments, suggestions or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby adopted without change and is set forth below.

This amendment shall be effective 0901 GMT, March 25, 1976.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Des Plaines, Illinois on December 8, 1975.

R. O. ZIEGLER,
Acting Director, Great Lakes Region.

In § 71.181 (40 FR 441), the following transition area is added:

CARMI, ILL.

That airspace extending upward from 700 feet above the surface within a 5.5 mile radius of the Carmi Municipal Airport (Latitude 38°06'00" N., Longitude 88°09'00" W.); and within 3 miles either side of the 177° bearing from the airport extending from the 5.5 mile radius area to 8 miles from the airport.

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On page 20292 of the FEDERAL REGISTER dated May 9, 1975, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Paris, Illinois.

Interested persons were given 30 days to submit written comments, suggestions or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby adopted without change and is set forth below.

This amendment shall be effective 0901 GMT, March 25, 1976.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Des Plaines, Illinois on December 8, 1975.

R. O. ZIEGLER,
Acting Director, Great Lakes Region.

In § 71.181 (40 FR 441), the following transition area is added:

PARIS, ILL.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Edgar County Airport (Latitude 39°-42'09" N., Longitude 87°39'57" W.); and within 3 miles either side of the 072° bearing from the airport extending from the 5-mile-radius area to 8 miles from the airport.

[Airspace Docket No. 75-GL-29]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On page 20292 of the FEDERAL REGISTER dated May 9, 1975, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend Section 71.181 of Part 71 of the Federal Aviation Regulations so as to alter the transition area at Lincoln, Illinois.

Interested persons were given thirty days to submit written comments, suggestions, or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby adopted without change and is set forth below.

This amendment shall be effective 0901 GMT, March 25, 1976.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Des Plaines, Illinois on December 8, 1975.

R. O. ZIEGLER,
Acting Director, Great Lakes Region.

In § 71.181 (40 FR 441), the following transition area is amended to read:

LINCOLN, ILL.

That airspace extending upward from 700 feet above the surface within a five-mile radius of the Logan County Airport (Latitude 40°09'38" N., Longitude 89°20'07" W.); within 2½ miles each side of the Capitol, Illinois VORTAC 040° radial extending from the five-mile radius area to 17 miles northeast of the VORTAC; within 3 miles each side of the 047° bearing from the airport extending from the 5-mile radius area to 8 miles northeast of the airport.

[FR Doc.75-34756 Filed 12-29-75;8:45 am]

[Airspace Docket No. 75-NW-23]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Additional Control Area

On October 21, 1975, a Notice of Proposed Rule Making (NPRM) was published in the Federal Register (40 FR 49100) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would designate an additional control area over southeastern Oreg.

Interested persons were afforded an opportunity to participate in the proposed rule making through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, March 25, 1976, as hereinafter set forth.

§ 71.163 [Amended]

In § 71.163 (41 FR 348) the following is added:

LAKEVIEW, OREG.

That airspace extending upward from 10,500 feet MSL bounded on the north by Latitude 44°00" N., on the east by a line extending from Latitude 44°00" N., Longitude 120°00" W., to the north edge of V-122 at Longitude 119°00" W., on the south by the

V40250 DEC 30 75 XUM

north edge of V-122, and on the west by the east edge of V-165.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Washington, D.C., on December 18, 1975.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.75-34757 Filed 12-29-75;8:45 am]

[Docket No. 15257; Amdt. No. 1000]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Recent Changes and Additions

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAPs) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAPs for the changes and additions covered by this amendment are described in FAA Forms 8260-3, 8260-4, or 8260-5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97-696 (35 F.R. 5609).

SIAPs are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591. Copies of SIAPs adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAPs may be purchased from the FAA Public Information Center, AIS-230, 800 Independence Avenue, SW., Washington, D.C. 20591 or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft, or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150.00 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30.00 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

§ 97.23 [Amended]

1. Section 97.23 is amended by originating, amending, or cancelling the following VOR-VOR/DME SIAPs, *effective February 12, 1976.*

Issued in Washington, D.C., on December 18, 1975.

NOTE: Incorporation by reference provisions in §§ 97.10 and 97.20 approved by the Director of the Federal Register on May 12, 1969, (35 FR 5610).

JAMES M. VINES,
Chief, Aircraft Programs Division.

[FR Doc.75-34758 Filed 12-29-75;8:45 am]

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE PRACTICES

PART 4—MISCELLANEOUS RULES

Requirements for Printed Documents

Section 4.2 sets forth the requirements as to form and filing of documents other than correspondence. Section 4.2(d)(3) pertains to printed documents, designating paper size of seven inches by ten inches with the printed line not to exceed four and three-quarter inches in length. The section does not designate the width of the left or right margin. A printed line of four and three-quarters inches on seven inch paper leaves two and one-quarter inches for margins. Section 4.2(d)(5) applies to all dcouments and designates one and one-half inches for the left margin and one inch for the right margin, totalling two and one-half inches for margins. Applying the margin designations of § 4.2(d)(5) to printed documents would require that the printed line not exceed four and one-half inches. To correct this inconsistency, the Federal Trade Commission announces the following amendment of § 4.2(d)(5) of Part 4, Subchapter A of Chapter I of Title 16 of the Code of Federal Regulations to read as follows:

§ 4.2 Requirements as to form and filing of documents other than correspondence.

* * * * *

(d) *Form.* * * *

(5) All documents must be mound on the left side. Except for printed documents, the left margin of each page must be at least one and one-half (1½) inches and the right margin at least one (1) inch.

* * * * *

(Section 6(g), 38 Stat. 721; (15 U.S.C. 46, sec. (a)(1)) 80 Stat. 383, (5 U.S.C. 552.))

By direction of the Commission dated December 19, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

[FR Doc.75-34957 Filed 12-29-75;8:45 am]

[Docket C-2370]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Illinois Central Industries, Inc., et al.

Codification under 16 CFR Part 13 appears at 38 FR 10701, May 1, 1973.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 45, 18)

In the Matter of Illinois Central Industries, Inc., a corporation; and Midas-International Corporation, a corporation.

Order modifying an earlier order dated Mar. 26, 1973, 82 F.T.C. 1097, 38 FR 10707, by changing the compliance reporting requirements for paragraphs IIE and IIF from 30-day intervals to semi-annual reports on Dec. 15, 1975, and on June 15, 1976, after which only annual reports will be required in lieu of monthly reports with respect to the divestiture order.

The order reopening and modifying order to cease and desist, including further order requiring report of compliance therewith, is as follows: [1]

Respondent, by letter dated September 12, 1975, which will be treated as a petition to reopen this proceeding, has requested that the requirement that it file compliance reports at 30-day intervals for Paragraphs IIE and IIF, contained in the order to cease and desist issued March 26, 1973 [82 F.T.C. 1097], be modified so as to require semiannual reports on December 15, 1975, and on June 15, 1976, and each calendar year thereafter.

The Commission has duly considered respondent's request and has determined that it should be granted.

It is ordered, That the proceeding be, and it hereby is, reopened.

It is further ordered, That the order to cease and desist be, and it hereby is, modified by requiring that the compliance reporting for Paragraphs IIE and IIF of the order be changed to a semiannual basis by submitting such reports on December 15, 1975, and on June 15, 1976, and thereafter for each calendar year in lieu of the monthly reports heretofore required with respect to the divestiture provisions of the order.

The order reopening and modifying order to cease and desist was issued by the Commission November 24, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

[FR Doc.75-35003 Filed 12-29-75;8:45 am]

[1] Copies of the Order Reopening and Modifying Order to Cease and Desist, filed with the original document.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE

[T.D. 76-1]

PART 145—MAIL IMPORTATIONS

Mail Examination

Section 145.2 of the Customs Regulations (19 CFR 145.2) provides that, with certain stated exceptions, all mail originating outside the Customs territory of the United States, whether sealed or unsealed, is subject to Customs examination. In part, section 145.2(c) of the Customs Regulations (19 CFR 145.2(c)) excepts from Customs examination letter mail known or believed to contain only correspondence or documents addressed to diplomatic missions or the officers thereof. No such exception is provided for similar mail addressed to consular posts.

Inasmuch as the Vienna Convention on Consular Relations, to which the United States is a signatory, clearly provides in paragraph 2 of Article 35 that the official correspondence of consular posts shall be inviolable, it is considered desirable to amend the Customs Regulations to reflect that the same exception from Customs examination that is currently granted to letter mail addressed to diplomatic missions or the officers thereof, shall be granted to letter mail addressed to consular posts or the officers thereof.

Accordingly, the first sentence of paragraph (c) of § 145.2 of the Customs Regulations (19 CFR 145.2(c)) is revised to read as follows:

§ 145.2 Mail subject to Customs examination.

* * * * *

(c) Letter mail known or believed to contain only correspondence or documents addressed to diplomatic missions, consular posts, or the officers thereof, or to international organizations designated by the President as public international organizations pursuant to the International Organizations Act (see section 148.87(b) of this chapter). * * *

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624))

Because this amendment merely conforms the Customs Regulations to the terms of the Vienna Convention on Consular Relations, to which the United States is a signatory, notice and public procedure thereon is found to be unnecessary and good cause exists for dispensing with a delayed effective date under the provisions of 5 U.S.C. 553.

Effective date. This amendment shall become effective, December 30, 1975.

Approved: December 16, 1975.

VERNON D. ACREE,
Commissioner of Customs.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

[Docket No. 75N-0368]

PART 20—FROZEN DESSERTS

Mellorine; Stay of Standard of Identity

Notice is given that the regulation (21 CFR 20.8) establishing a definition and standard of identity for "mellorine" frozen dessert products, published in the FEDERAL REGISTER of July 25, 1974 (39 FR 27128), was stayed pursuant to section 701(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 371(e)) by the filing of objections and requests for a hearing.

The Commissioner advises that he will rule on the objections and requests for hearing in the near future; the ruling will be published in the FEDERAL REGISTER. Accordingly, the definition and standard of identity for mellorine is stayed until the Food and Drug Administration completes all further action necessitated by the objections and requests for hearing and sets a new effective date to be published in the FEDERAL REGISTER.

(Sec. 701(e), 70 Stat. 919 (21 U.S.C. 371(e).))

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 556—TOLERANCES FOR RESIDUES OF NEW ANIMAL DRUGS IN FOOD

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Bambermycins

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (44-759V) filed by Hoechst-Roussel Pharmaceuticals, Inc., Route 202-206 North, Somerville, NJ 08876, proposing that the safe and effective use of bambermycins in the feed of broiler chickens does not require a tolerance for residues of the drug in the uncooked edible tissues of the animal. The data contained in the original submission show that no residues are reflected from the conditions of its use or any foreseeable conditions of misuse. Therefore, in accordance with § 556.1(a)(4) (21 CFR 556.1(a)(4)), a tolerance is deemed unnecessary pursuant to use of this drug in broiler chicken feed. The supplemental application is approved, effective December 30, 1975.

The Commissioner is amending Parts 556 and 558 (21 CFR Parts 556 and 558) respectively by deleting §§ 556.80 and 558.95(d) to reflect this approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), and under authority delegated to the Commissioner (21 CFR 2.120), Parts 556 and 558 are amended as follows:

§ 556.80 [Removed]

1. Part 556 is amended by deleting § 556.80 *Bambermycins.*

§ 558.95 [Amended]

2. Part 558 is amended in § 558.95 by deleting paragraph (d) and marking it "Reserved."

Effective date. This amendment shall be effective December 30, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: December 19, 1975.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

[FR Doc.75-34980 Filed 12-29-75;8:45 am]

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Tylosin and Sulfamethazine

The Commissioner of Food and Drugs has evaluated a new animal drug application (97-615V) filed by Golden Sun Feeds, Inc., Estherville, IA 51334, proposing safe and effective use of tylosin and sulfamethazine premix used in manufacturing swine feeds. The application is approved, effective December 30, 1975.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), and under authority delegated to the Commissioner (21 CFR 2.120), Part 558 (formerly Part 135e, prior to recodification published in the FEDERAL REGISTER of March 27, 1975 (40 FR 13802)) is amended in § 558.630 (formerly § 135e.36) by adding paragraph (b)(4), to read as follows:

§ 558.630 Tylosin and sulfamethazine.

* * * * *

(b) * * *

(4) To 021780: 2 grams per pound each, paragraph (f)(2)(ii) of this section.

* * * * *

Effective date. This order shall be effective on December 30, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: December 19, 1975.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

Title 29—Labor

CHAPTER I—NATIONAL LABOR RELATIONS BOARD

SUBTITLE A—OFFICE OF THE SECRETARY OF LABOR

PART 8—PREFERENCE IN FEDERAL PROCUREMENT UNDER DEFENSE MANPOWER POLICY NO. 4 AND EXECUTIVE ORDER 10582

On October 7, 1975 at 40 FR 46316 the Department of Labor proposed to amend 29 CFR 8.2 *Definitions.* by deleting the definition of "disadvantaged individual" at 29 CFR 8.2(d) and by substituting therefor a definition of "economically disadvantaged individual". The Department also proposed to substitute the term "economically disadvantaged individual" throughout 29 CFR Part 8 wherever the term "disadvantaged individual" appeared. The purpose of the proposal was to standardize this definition for all employment and training programs. Interested persons were invited to submit data, views and arguments on the proposal until November 6, 1975. Only one comment was received. The comment suggested that the word "family" in the proposed definition of "economically disadvantaged individual" also be defined to indicate that a "family" will be considered to be a group of individuals in which the members are actually providing economic support to each other or contributing services to the household. The Department has not accepted this suggestion because the suggested language is too vague and imprecise, and because, if it were adopted, it would defeat the effort towards standardization upon which the proposal was based.

On October 31, 1974 at 39 FR 38387 the Department proposed to amend 29 CFR 8.3 and 29 CFR 8.4 by substituting for the term "work force", used in both of those sections, the term "labor force". The purpose of the proposed change was to bring the terminology in those sections in line with the terminology which has been used by the Bureau of Labor Statistics since March of 1974. Interested persons were invited to submit comments on the proposal by December 2, 1974. No comments, however, were received.

In consideration of the foregoing the proposals of October 7, 1975 and October 31, 1974 are hereby adopted and 29 CFR Part 8, effective December 30, 1975, is amended to read as follows:

Sec.
8.1 Purpose.
8.2 Definitions.
8.3 Criteria for areas of substantial unemployment.
8.4 Criteria for areas of persistent unemployment.
8.5 Termination of classification.
8.6 Publication or certification.
8.7 Classification of sections of concentrated unemployment or underemployment and certification of eligible firms.
8.8 Order of preference.
8.9 Certificate of eligibility.

AUTHORITY: The provisions of this Part 8 issued under 47 Stat. 1520, 63 Stat. 1024; 41 U.S.C. 10a-10d, E.O. 10582, 3 CFR, 1954-1958 Comp., p. 230; E.O. 10480, E.O. 10773, 32A CFR Ch. I. DMP 4.

§ 8.1 Purpose.

(a) This part implements the responsibilities of the Secretary of Labor in determining sections of concentrated unemployment or underemployment, and areas of persistent or substantial labor surplus in accordance with Defense Manpower Policy No. 4 of the Office of Emergency Planning (32A CFR Ch. 1, DMP 4), and areas of substantial unemployment, in accordance with Executive Order 10582 (3 CFR 1954-58 Comp., P. 280) issued pursuant to the Buy American Act (41 U.S.C. 10a et seq.).

(b) Defense Manpower Policy No. 4 provides that preference be given in the placement of Federal Government contracts and facilities to sections of concentrated unemployment or underemployment, and areas of persistent or substantial labor surplus with preference being given in accordance with regulations prescribed by the Secretary of Labor. The Secretary of Labor is directed to classify sections of concentrated unemployment or underemployment, and areas having a persistent or substantial surplus of labor, under standards to be established by the Secretary, and to certify to the existence of a persistent or substantial labor surplus in areas not meeting the minimum size requirements for classification. The Secretary of Labor is also directed to certify employing establishments which comply with regulations of the Secretary for the employment of economically disadvantaged individuals.

(c) Section 3(c) of Executive Order 10582 issued pursuant to the Buy American Act permits rejection by executive agencies of any foreign bid or offered price for materials in any situation in which the domestic low bidder would produce substantially all of the materials in areas of substantial unemployment, as determined by the Secretary of Labor, during such period as the President determines that such preference would be in the national interest.

§ 8.2 Definitions.

As used in this part:

(a) "Labor area" means a geographical area consisting of a central city or cities and surrounding territory within commuting distance in which there is a concentration of economic activity or labor demand, and workers can generally change jobs without changing their residences.

(b) "Substantial labor surplus." An area is one of substantial labor surplus for purposes of Defense Manpower Policy No. 4 if it has substantial unemployment in accordance with criteria specified in § 8.3.

(c) "Persistent labor surplus." An area is one of persistent labor surplus under Defense Manpower Policy No. 4 if it has persistent unemployment in accordance with the criteria specified in § 8.4.

(d) "Economically Disadvantaged Individual." An individual shall be considered as economically disadvantaged is a member of a family (1) which receives cash welfare payments, or (2) whose annual income in relation to family size and location does not exceed the most recently established poverty levels determined in accordance with criteria established by the Office of Management and Budget (OMB)."

(e) "Employing Establishment." An employing establishment is an individual, industrial facility, plant, mill, mine, or other business operation located at a single physical site, where production, manufacturing, or other industrial operations are performed. Each branch or subsidiary unit of a large corporate entity may be considered an individual establishment, except that all such units in the same physical location shall be considered a single establishment.

§ 8.3 Criteria for areas of substantial unemployment.

(a) The Secretary will classify a labor area as one of substantial unemployment if (1) he finds that its rate of unemployment is 6 percent or more of the area labor force, discounting temporary or seasonal factors, and (2) he anticipates that the rate of unemployment during the next two months will remain at 6 percent or more, discounting temporary or seasonal factors.

(b) For purposes of Executive Order 10582, any area which has been determined to be one of persistent unemployment in accordance with § 8.4 will be deemed to be an area of substantial unemployment. Any employing establishment certified in accordance with § 8.7(b) will be deemed to be located in an area of substantial unemployment.

§ 8.4 Criteria for areas of persistent unemployment.

The Secretary will classify as an area of persistent unemployment any labor area, municipality of 250,000 or more population according to the latest available Census data, or county in which he finds the rate of unemployment during the most recent calendar year is 6 percent or more of its labor force and that the rate of unemployment in such area has:

(a) Averaged 6 percent or more and been at least 50 percent above the national average for 3 of the preceding 4 calendar years, or

(b) Averaged 6 percent or more and been at least 75 percent above the national average for 2 of the preceding 3 calendar years, or

(c) Averaged 6 percent or more, and been at least 100 percent above the national average for 1 of the preceding 2 calendar years.

§ 8.5 Termination of classification.

(a) The Secretary of Labor will terminate the classification of an area of substantial unemployment after any month in which he finds (1) it no longer has an unemployment rate of 6 percent, discounting temporary or seasonal factors, and (2) that the rate of unemployment anticipated during the next 2 months is less than 6 percent, discounting temporary or seasonal factors.

(b) During the first quarter of each calendar year the Secretary of Labor will review the annual average rate of unemployment during the previous calendar years in areas which were classified as areas of persistent unemployment, and shall terminate not later than June 30 of that year the classification of those areas which no longer meet the criteria set forth in § 8.4.

(c) The Secretary of Labor shall terminate the designation of a section of concentrated unemployment or underemployment whenever he finds that the conditions of unemployment or underemployment have improved to the extent that the designation is no longer warranted.

§ 8.6 Publication or certification.

The Secretary of Labor will publish at regular intervals a list of establishments certified in accordance with § 8.7 and the list of sections of concentrated unemployment or underemployment and areas of persistent or substantial unemployment: *Provided, however,* That in the case of an area of less than 1,500 population, he will not publish but on request will authorize the appropriate State Employment Security Agency to certify that such area is one of substantial or persistent unemployment if it meets the qualifying conditions set forth in § 8.3 or § 8.4 of this part.

§ 8.7 Classification of sections of concentrated unemployment or underemployment and certification of eligible establishments.

(a) The Secretary of Labor will classify as sections of concentrated unemployment or underemployment appropriate sections of States or "labor areas."

(b) Employing establishments in or near such classified sections of concentrated unemployment or underemployment and employing establishments in areas of persistent or substantial unemployment shall be certified by the Secretary as eligible for preference in the placement of Federal Government contracts or subcontracts under Defense Manpower Policy No. 4 provided that such establishments have agreed to employ, in accordance with plans approved by the Secretary of Labor, a proportionate number of economically disadvantaged individuals, residing within the classified sections or areas, who have been identified and referred to the employing establishments by the local State Employment Service Office, the local Concentrated Employment Program Sponsor or by other authorized community agencies. Employing establishments so certified which will perform a substantial portion of a Federal Government contract, or other firms which will place a substantial portion of the Federal Government contract with employing establishments certified pursuant to this paragraph (b), shall obtain preference in accordance with § 8.8.

(c) Employing establishments located in any area shall be certified by the Secretary as eligible for preference in the placement of Federal Government contracts or subcontracts under Defense Manpower Policy No. 4 provided that such establishments have agreed to employ, in accordance with plans approved by the Secretary of Labor, a proportionate number of economically disadvantaged individuals who have been identified and referred to the employing establishments by the local State Employment Service Office, the local Concentrated Employment Program Sponsor or by other authorized community agencies. Employing establishments so certified which will perform a substantial portion of a Federal Government contract, or other firms which will place a substantial portion of the Federal Government contract with employing establishments certified pursuant to this paragraph (c), shall obtain preference in accordance with § 8.8.

§ 8.8 Order of preference.

The order of preference for the placement of contracts under Defense Manpower Policy No. 4 is as follows:

(a) Employing establishments or other firms eligible for preference in accordance with paragraph (b) of § 8.7;

(b) Employing establishments or other firms eligible for preference in accordance with paragraph (c) of § 8.7;

(c) Employing establishments or other firms which will perform or cause to be

[1] 36 FR 2367, Feb. 8, 1970.

V 40 250 DEC 30 75 XUM

performed a substantial portion of a Federal Government contract in an area of persistent or substantial unemployment.

§ 8.9 **Certificates of eligibility.**

(a) The Secretary of Labor's approval of an establishment's plan to employ economically disadvantaged individuals shall be evidenced by a certificate issued to the employing establishment by the appropriate local office of the State Employment Security Agency. This local office will determine whether the establishment qualifies for the certificate and issue it where appropriate. The Secretary of Labor, or his authorized representative, may, in all cases, review and, if necessary, change the determination made by the local State Employment Security Agency either granting or denying a certificate of eligibility. Any establishment which is denied a certificate may request a reconsideration or review by the Secretary, or his authorized representative, by writing to the Secretary of Labor, U.S. Department of Labor, Washington, D.C. 20210, and setting forth reasonable grounds therefor.

(b) Certificates of eligibility shall be valid for a period of 6 months, or until recalled by the State Employment Security Agency, or surrendered by the Employer, whichever is earliest.

(c) No certificate which would afford an employing establishment first preference under § 8.8 shall be issued to any establishment whose plans for the employment of economically disadvantaged individuals do not provide that at least 25 percent of the total number of new hires each month beginning with the date of certification and continuing until the expiration of the validity period or completion of an awarded contract or subcontract whichever is later shall be economically disadvantaged individuals identified and referred to the employing establishment pursuant to § 8.7 (b).

(d) No certificate which would afford an employing establishment second preference under § 8.8 shall be issued to any establishment whose plans for the employment of economically disadvantaged individuals do not provide that at least 15 percent of the total number of new hires each month beginning with the date of certification and continuing until the expiration of the validity period or completion of an awarded contract or subcontract whichever is later shall be economically disadvantaged individuals identified and referred to the employing establishment pursuant to § 8.7(c).

Signed at Washington, D.C. this 23d day of Dec., 1975.

WILLIAM H. KOLBERG,
Assistant Secretary for Employment and Training.

[FR Doc.75-35053 Filed 12-29-75;8:45 am]

PART 102—RULES AND REGULATIONS, SERIES 8

Subpart R—Advisory Committees

By virtue of the authority vested in it by the National Labor Relations Act approved July 5, 1935, and by section 8 of the Federal Advisory Committee Act approved October 6, 1972, the National Labor Relations Board hereby promulgates the following rule which it finds necessary to carry out the provisions of said Acts.

Subpart R, containing § 102.136 is added to 29 CFR Part 102 as follows:

Subpart R—Advisory Committees

§ 102.136 Establishment and utilization of advisory committees.

Advisory committees may from time to time be established or utilized by the agency in the interest of obtaining advice or recommendations on issues of concern to the agency. The establishment, utilization, and functioning of such committees shall be in accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. app. I, sections 1–15, and Office of Management and Budget Circular A–63 (rev. March 27, 1975), Advisory Committee Management Guidance, 39 FR 12389–12391, to the extent applicable.

(49 Stat. 449 (29 U.S.C. 151–166, as amended by act of June 23, 1947) 61 Stat. 136 (29 U.S.C. Supp. 151–167), act of October 22, 1951, 65 Stat. 601 (29 U.S.C. 158, 159, 168), and act of September 14, 1959 73 Stat. 519; 29 U.S.C. 141–168); 86 Stat. 770; (5 U.S.C. appendix I, section 1 et seq.))

Dated, Washington, D.C., December 22, 1975.

By direction of the Board.

JOHN C. TRUESDALE,
Executive Secretary.

CHAPTER XXV—OFFICE OF EMPLOYEE BENEFITS SECURITY, DEPARTMENT OF LABOR

[ERISA IB RD 75-1]

PART 2556—INTERPRETIVE BULLETINS RELATING TO REPORTING AND DISCLOSURE

Independence of Accountant Retained by Employee Benefit Plan

In FR Doc. 75-31318, appearing at pages 53998–99 in the FEDERAL REGISTER of November 20, 1975, subparagraph (3) appearing on page 53999 is corrected by deleting the word "or" immediately after the word "member" in the first line and inserting the word "of" in its place.

Also, the first full paragraph appearing on page 53999 is corrected in the 23rd and 24th lines by eliminating the remainder of the sentence after the word "accounting" and inserting in its place the words "firm shall not impair the accountant's or accounting firm's independence."

NOTE: The text of FR Doc. 75-31318 was not codified for the Code of Federal Regulations.

Signed at Washington, D.C. this 22nd day of December, 1975.

JAMES D. HUTCHINGON,
Administrator of Pension and Welfare Benefit Programs.

Title 36—Parks, Forests, and Public Property

CHAPTER I—NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SERVICE

Sequoia and Kings Canyon National Parks, California; Camper Food Storage

A proposal was published on page 45845 of the FEDERAL REGISTER of October 3, 1975, to amend § 7.8 of the Code of Federal Regulations. The purpose of this amendment is to require bear resistant storage of food stuffs in camp areas.

Interested persons were given 30 days within which to submit written comments, suggestions, or objections with respect to the proposed amendment. One comment, generally supporting the proposed amendment, has been received. No objections have been received and the proposed amendment is hereby adopted without change and is set forth below. This amendment shall take effect January 29, 1976.

(5 U.S.C. 553; 39 Stat. 535; 16 U.S.C. 3; 41 Stat. 732; 16 U.S.C. 61, 54 Stat. 41; 16 U.S.C. 80(d))

Section 7.8 is amended to add paragraph (e)(1) to read as follows:

§ 7.8 Sequoia and Kings Canyon National Parks.

* * * * *

(e) *Camping.* (1) All food or similar organic material, must be kept completely sealed in a vehicle or camping unit that is constructed of solid, nonpliable material, or must be suspended at least 10 feet above the ground and 4 feet horizontally from any post or tree trunk. This restriction does not apply to food that is being eaten or is being prepared for eating.

GENE V. DAUGHERTY,
Acting Superintendent, Sequoia and Kings Canyon National Parks.

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 473-3]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Maintenance of National Ambient Air Quality Standards; Corrections

In the FEDERAL REGISTER of Tuesday, September 9, 1975, the following changes are made:

1. On page 41948, under "Subpart F—California", action number 5, that part of the geographical composition of the Sacramento Valley Air Quality Maintenance Area which reads, "That portion of Placer County lying in the Sacramento Valley Air Basin as defined in the plan," is changed to read, "The Valley Area of Placer County. This is all the area in Placer County which lies west of the easterly line of Range 7 East, Mount Diablo Base and Meridian, and all of the area in Placer County which lies south of the northerly line of Township 11 North, Mount Diablo Base and Meridian."

2. On page 41951, under "Subpart HH—New York," in § 52.1688, the following changes are made:

a. In paragraph (a)(1)(ii), relating to the geographical composition of the Binghamton Air Quality Maintenance Area, under "Broome County (part)," add "Town of Maine" and "Town of Dickinson."

b. In paragraph (a)(6)(ii), relating to the geographical composition of the Rochester Air Quality Maintenance Area, under Ontario County (part), "Town of Formington" is changed to read, "Town of Farmington."

Dated: December 19, 1975.

ROGER STRELOW,
Assistant Administrator for Air and Waste Management.

[FR Doc.75-34939 Filed 12-29-75;8:45 am]

SUBCHAPTER C—AIR PROGRAMS

[FRL 474-3]

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCE

Delegation of Authority to State of Maine

Pursuant to the delegation of authority for the standards of performance for new stationary sources (NSPS) to the State of Maine on November 3, 1975, EPA is today amending 40 CFR 60.4, *Address*, to reflect this delegation. A Notice announcing this delegation is published today in the FEDERAL REGISTER.[1] The amended § 60.4, which adds the address of the Maine Department of Environmental Protection to which all reports, requests, applications, submittals, and communications to the Administrator pursuant to this part must also be addressed, is set forth below.

The Administrator finds good cause for foregoing prior public notice and for making this rulemaking effective immediately in that it is an administrative change and not one of substantive content. No additional substantive burdens are imposed on the parties affected. The delegation which is reflected by this administrative amendment was effective on October 7, 1975, and it serves no purpose to delay the technical change of this addition to the State address to the Code of Federal Regulations.

This rulemaking is effective immediately, and is issued under the authority of Section 111 of the Clean Air Act, as amended.

(42 U.S.C. 1857c-6)

Dated: December 22, 1975.

STANLEY W. LEGRO,
Assistant Administrator for Enforcement.

[1] See FR Doc. 75-35063 appearing elsewhere in the Notices section of today's FEDERAL REGISTER.

Part 60 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

1. In § 60.4 paragraph (b) is amended by revising subparagraph (U) to read as follows:

§ 60.4 Address.

* * * * *

(b) * * *

(U) State of Maine, Department of Environmental Protection, State House, Augusta, Maine 04330.

* * * * *

[FRL 474-2]

PART 61—NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS

Delegation of Authority to State of Maine

Pursuant to the delegation of authority for National Emission Standards for Hazardous Air Pollutants (NESHAPS) to the State of Maine on November 3, 1975, EPA is today amending 40 CFR 61.04, *Address*, to reflect this delegation. A Notice announcing this delegation is published today in the FEDERAL REGISTER.[1] The amended § 61.04, which adds the address of the Maine Department of Environmental Protection to which all reports, requests, applications, submittals, and communications to the Administrator pursuant to this part must also be addressed, is set forth below.

The Administrator finds good cause for foregoing prior public notice and for making this rulemaking effective immediately in that it is an administrative change and not one of substantive content. No additional substantive burdens are imposed on the parties affected. The delegation which is reflected by this administrative amendment was effective on October 7, 1975, and it serves no purpose to delay the technical change of this addition of the State address to the Code of Federal Regulations.

This rulemaking is effective immediately, and is issued under the authority of Section 112 of the Clean Air Act, as amended.

(42 U.S.C. 1857c-7)

Dated: December 22, 1975.

STANLEY W. LEGRO,
Assistant Administrator for Enforcement.

Part 61 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

In § 61.04 paragraph (b) is amended by revising subparagraph (U) to read as follows:

§ 61.04 Address.

* * * * *

(b) * * *

(U) State of Maine, Department of Environmental Protection, State House, Augusta, Maine 04330.

* * * * *

SUBCHAPTER E—PESTICIDE PROGRAMS

[PP6F1652 & PP6F1607/R72; FRL 474-7]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

3,5-Dimethyl-4-(methylthio)phenyl methylcarbamate

On May 8, 1975, notice was given (40 FR 20129) that Mobay Chemical Corp., Chemagro Agricultural Division, PO Box 4913, Hawthorn Rd., Kansas City MO 64120, had filed a pesticide petition (PP 6F1607) with the Environmental Protection Agency (EPA). This petition proposed the establishment of tolerances for residues of the insecticide 4-(methylthio)-3,5-xylyl methylcarbamate in or on the raw agricultural commodities cherries at 15 parts per million (ppm); apples and peaches at 10 ppm; pears at 6 ppm; the meat, fat, and meat byproducts of cattle, sheep, goats, swine, and horses at 0.05 ppm; and milk at 0.005 ppm. Mobay subsequently amended the petition by increasing the tolerances for cherries from 15 to 25 ppm and for peaches from 10 to 15 ppm and by withdrawing the requested tolerance proposals for apples, pears, and milk, and the meat, fat, and meat byproducts of cattle, sheep, goats, swine, and horses.

Mobay Chemical Corp. also submitted a petition (FAP 5H5083) which proposed the establishment of a food additive regulation (21 CFR 123) permitting the use of the insecticide on apples with a food additive tolerance of 12.5 ppm in apple juice (40 FR 20129). This petition was withdrawn without prejudice in accordance with the regulations pertaining to section 409 of the Federal Food Drug, and Cosmetic Act (40 FR 51081).

On August 22, 1975, the EPA gave notice (40 FR 36748) that Mobay Chemical Corp. had filed another pesticide petition (PP 6F1652) which proposed the establishment of additional tolerances for this pesticide or on the raw agricultural commodities corn (field, pop, and sweet) and corn forage and fodder at 0.03 ppm when the pesticide is used as a bird repellent. No comments were received by the EPA in response to these notices of filing.

The data submitted in the petitions and other relevant material have been evaluated. The pesticide is considered useful for the purposes for which the tolerances are sought, and there is no reasonable expectation of residues in milk, meat, eggs, and poultry as delineated in 40 CFR 180.6(a)(3). It has, therefore, been determined that tolerances should be established for the pesticide in 40 CFR 180 under Section 180.320 using the acceptable chemical name for this pesticide 3,5-dimethyl-4-(methylthio)phenyl methylcarbamate. Tolerances for this pesticide and its cholinesterase-inhibiting metabolites established by amending 40 CFR 180 as follows will protect the public health.

Any person adversely affected by this regulation may, on or before January 28, 1976, file written objections with the Hearing Clerk, Environmental Protection Agency, 401 M St. SW, East Tower, Room 1019, Washington DC 20460. Such

V 40250 DEC 30 75 XUM

objections should be submitted in quintuplicate and specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requsted, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on December 29, 1975, Part 180, Subpart C, is amended by adding § 180.320.

(Section 408(d) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346(a)(d)))

Dated: December 23, 1976.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

Part 180, Subpart C, is amended by adding the § 180.320 as follows. (NOTE: K+CWHR=Kernels plus cob with husk removed.)

§ 180.320 3,5-Dimethyl-4-(methylthio) phenyl methylcarbamate; tolerances for residues.

Tolerances are established for residues of the pesticide 3,5-dimethyl-4-(methylthio)phenyl methylcarbamate and its cholinesterase-inhibiting metabolites in or on raw agricultural commodities as follows:

Commodity:	*Parts per million*
Cherries	25.
Corn, fodder	.03
Corn, forage	.03
Corn, fresh (including sweet) (K+CWHR)	.03
Corn, grain, field	.03
Corn, grain, pop	.03
Peaches	15.

[FR Doc.75-35070 Filed 12-29-75;8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER 60—OFFICE OF FEDERAL CONTRACT COMPLIANCE, EQUAL EMPLOYMENT OPPORTUNITY, DEPARTMENT OF LABOR

PART 60-7—ST. LOUIS PLAN

Notice of Extension

On July 10, 1971, the Department of Labor published the St. Louis Plan (36 FR 12978). The St. Louis Plan is intended to implement the provisions of Executive Order 11246, as amended, and the rules and regulations issued pursuant thereto, requiring a program of equal employment opportunity by Federal contractors and subcontractors in the St. Louis area, which includes the city of St. Louis, and St. Louis County, Missouri. The present St. Louis Plan expires on December 31, 1975. Therefore, in order to ensure positive efforts toward the elimination of minority underutilization in the St. Louis area construction industry, the establishment of a Revised St. Louis Plan will be proposed and, such a proposal will be published in the FEDERAL REGISTER prior to its effective date. Due to the requirement that the proposed Revised St. Louis Plan be published for comment for at least 30 days prior to promulgation as a final rule it is necessary that the current St. Louis Plan be extended until the proposed Revised St. Louis Plan becomes effective.

For the reason stated above, I find that it is contrary to the public interest to publish this extension for comment, and for the same reason I find there is good cause for this amendment to become effective December 30, 1975.

To effectuate the extension of the St. Louis Plan Part 60-7 is revised as follows:

1. Section 60-7.14(b) is revised as follows:

§ 60-7.14 The impact of the plan upon the existing labor force.

* * * * *

(b) *Timetable.* The original goals of the St. Louis Plan were developed in an effort to provide an affirmative action program and ranges for utilization of minority manpower which employers can meet by hiring productive, trained minority craftsmen. Accordingly the St. Louis Plan was developed to cover five years. Upon the expiration of the fifth year on December 31, 1975 it is found and determined that in order to effect equal employment opportunity to the fullest extent, the standards of minority utilization contained in the St. Louis Plan, including the goals for the year ending December 31, 1975 shall be applicable until a new Revised St. Louis Plan is promulgated.

* * * * *

2. Section 60-7.30—Appendix A is amended in the table for Jan. 1 through Dec. 31, 1975 under paragraph 2 of "Requirements, Terms and Conditions" by deleting the headings "From Jan. 1, 1975" and "Until Dec. 31, 1975" and substituting "From Jan 1, 1975 until a new Revised St. Louis Plan is promulgated." as follows:

§ 60-7.30 Appendix A.

* * * * *

From Jan. 1, 1975 until a revised St. Louis plan is promulgated		
Asbestos Workers	5.2	5.7

* * * * *

3. The first portion of Appendix A, Section 60-7.30, wherein the bidder submits its goals for the trades listed therein, as amended by deleting the phrase "from January 1, 1975, until December 31, 1975" and substituting "from January 1, 1976 until a Revised St. Louis Plan is promulgated."

* * * * *

Effective date: This amendment shall be effective December 30, 1975.

Signed at Washington, D.C. this 23rd day of December, 1975.

ROBERT C. CHASE,
Acting Assistant Secretary for Employment Standards.

GEORGE F. TRAVERS,
Acting Director, Office of Federal Contract Compliance Programs.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20495; FCC 75-1359]

PART 1—PRACTICE AND PROCEDURE

Agreements Between Broadcast Licensees and the Public

1. On June 10, 1975, the Commission released a "Proposed Policy Statement and Notice of Proposed Rulemaking Re: Agreements Between Broadcast Licensees and the Public." Docket 20495, FCC 75-633, 40 FR 25689. Twenty comments and four reply comments were filed by a variety of licensees and public interest groups.[1] The background of this proceeding is sketched below, followed by a summary of the comments received and a statement of policy.

BACKGROUND

2. For many years the Commission has encouraged affirmative dialogue between broadcast licensees and the public they serve, for "[t]he principal ingredient of [the licensee's obligation to serve the public interest, convenience, and necessity] consists of a diligent, positive and continuing effort by the licensee to discover and fulfill the tastes, needs and desires of his service area." Report and Statement of Policy Re: Commission En Banc Programming Inquiry, 25 FR 7291, 7294 (1960). More recently, we observed that the increase in petitions to deny broadcast applications—based on the alleged failure of licensees to respond adequately to the problems and needs of significant portions of the public—"re-emphasized the need both to ensure that licensees remain conversant with and attentive to community problems throughout the license period, and citizens are encouraged to engaged in more continuous dialogue with licensees in order to promote local resolutions of complaints as they arise." "Final Report and Order," Docket 19153, 43 FCC 2d 1, 8 (1973).

3. One outgrowth of increased contact between licensees and their audiences has been informal negotiations and, in some cases, formal agreements about aspects of station operations of concern to the community. However, we have found that some agreements attempt to yield licensee control to essentially private interests, contrary to the scheme of the Communications Act, which requires that the licensee alone must assume responsibility for ensuring that its station operates in the public interest. In order to clarify licensee and citizen obligations respecting agreements, we opened this proceeding.

THE COMMISSION PROPOSAL

4. The agreements policy we proposed[2] was based on an assumption that licensees and members of the public proceed from good faith in their discussions, and on the principles of (a) the value of local dialogue, (b) the purely voluntary nature of agreements, (c) the preservation of the licensee's nondelegable responsibility to serve the public, and (d) the advantage of minimal government presence in local discussion. Recognizing that our oversight was required, but should be limited, we proposed to take cognizance of citizen agreements only to the following extent:

(a) If asked to determine whether the agreement is contrary to applicable statutes, rules, or policies, we would review it in conformity with the policies expressed in our policy statement.

(b) Substantive agreement terms incorporated in a broadcast application would assume the status of representations to the Commission, and would be treated as are all promises of future performance.

5. We proposed not to take cognizance of oral agreements, because of likely difficulties in establishing their terms. We proposed amending Section 1.526 of our rules to require local filing of agreements. And we advised that the policies we proposed would apply on an interim basis to any agreements entered into or submitted for Commission review after issuance of the Proposed Policy Statement, that earlier agreements would be interpreted consistent with these polices, and that the policies would apply to any pending complaint concerning a licensee's implementation of a previously filed agreement. Since the chief ground on which we proposed to reject agreements was the delegation of nondelegable licensee discretion, we set out a few examples of such improper agreement terms.

SUMMARY OF COMMENTS

6. *Local dialogue.* The commenters (fully identified in Appendix A) unanimously endorse the importance of dialogue between broadcasters and local citizens, and most see value in citizen agreements. None would ban them. However, CBS complains that "more often than not the 'citizens' group' is neither representative of the public at large, nor even typical of the needs and desires of the very minority interest which the group purports to represent," and that demands of some groups are often contrary to the public interest. Mrs. Donnelly opposes the proliferation of agreements with activist groups "who represent no one but themselves." And Worldivision suggests that an agreement "should not bind the licensee to present programming to satisfy only a vocal, nonrepresentative group."

7. Several broadcasters urge a clear statement that licensees are not under any obligation or duty to negotiate toward or conclude an agreement. Storer also suggests a statement "that the areas of non-delegable duties which may not be restricted * * * may also not be negotiated." Orion asks us to state that licensees "have no duty to respond to citizen group demands to 'negotiate' or 'consummate an agreement.'" The National Black Media Coalition (NBMC) contends that "a broadcaster's refusal to meet [citizen groups] without explanation * * * should raise an issue of an inadequate ascertainment," and that "the failure to engage meaningfully in discussions of station performance should be an issue cognizable by [the] Commission."

8. *Filing of agreements.* There was no dispute with the proposed amendment of Section 1.526 of our rules to require local filing of citizen agreements, but considerable comment about what additional measures, if any, should be required. NBMC would require that all "agreements with commercial parties that have any substantial effect on the broadcaster's public service obligations" also be made public. The United Church of Christ (UCC) would include contracts with "networks, program syndicators, advertisers, management and programming consultants and others who provide program matter or otherwise control program content," and union agreements. ABC feels citizen agreements should be filed with the Commission (as well as locally) "for orderliness and convenience of reference." The National Organization for Women (NOW) proposes that "all citizens agreement[s] constitute representations upon which the Commission can rely and should be made part of the most recent license application." No commenter objects to filing agreements with the Commission. CBS and Worldvision oppose the suggestion that we require local publication of citizen agreements, CBS claiming that such a requirement is "burdensome and unnecessary." On the other hand, Mrs. Donnelly asks for wide disclosure of citizen agreements, and an obligation "to seek out opposing groups if [a licensee is] considering the signing of an exclusive contract with a particular group."

9. *Terms of agreements.* Several commenters object to limitations on a licensees' voluntary delegation of discretion in citizen agreements. The National Citizens Committee for Broadcasting (NCCB) distinguishes responsibility for making operating decisions from accountability for them; points to the common practice of delegating responsibility to employees, program suppliers, and others; and concludes the Commission "must either attempt to prevent broadcaster delegation at all levels * * * or * * * abandon this view as unworkable" and permit delegation of responsibility by means of citizen agreements. NBMC submits that "the Commission's policies and interpretation cannot discriminate in favor of commercial contracts and against citizen agreements," claiming that various common trade agreements (network affiliation and syndication contracts, for example) "give much of the discretion of station operation and programming content in fact to parties other than the licensee." Several commenters argue that any proposal that would be acceptable in a broadcast application should not be offensive simply because it is based on a citizen agreement. The Public Interest Research Group (PIRG) urges adoption of a policy permitting extensive licensee discretion to "bind its discretion," but with flexibility to deviate from commitments "where compliance with the agreement would be commercially impracticable or no longer in the public interest," or under other circumstances expressly stated in the agreement. UCC says that "the licensee should be free to make changes in its programming which are necessary to keep abreast of changing community needs and problems," and commends agreement terms requiring "advance [licensee] consultation with the affected groups in the service area and advance notice to the Federal Communications Commission stating the reasons for the departure," as a means of making agreements meaningful to the parties.

10. Five of the broadcast commenters call for requirement of an express agreement term reserving to the licensee flexibility to deviate from agreement commitments when in its judgment the public interest requires, with several stating that such provisions are the practice in trade agreements. Some would apply such a provision to any existing agreements which do not so provide. NCCB prefers that such a savings clause be an implicit part of every agreement, rather than a required express term. A number of commenters request a fuller explanation of what would constitute a "fixed determination, binding and unchangeable," contrary to the proposed policy. Several encourage us to provide additional, more specific examples than those set out in paragraph 15 of the Proposed Policy Statement. NOW contends that, "con-

[1] See Appendix A. The period for comments expired July 25, 1975, and for reply comments August 11, 1975. We accept the late-filed comments of Mrs. Elaine Donnelly, NAACP Legal Defense and Educational Fund, Inc., National Black Media Coalition, National Citizens Committee for Broadcasting, Office of Communication of the United Church of Christ, and the St. Louis Broadcast Coalition.

[2] We decided to state policies about citizen agreements rather than adopt specific rules because of the licensee's inherent discretion to agree or not, as it chooses, and to change an agreement, once made. Moreover, we were concerned that any rules which might be devised would be so detailed and cumbersome as to distract the parties from focusing their efforts on resolving their legitimate differences.

V 401250 DEC 30 75 XUM

trary to the Commission's implication, specificity in a citizen agreement is not to be condemned as an impermissible delegation of responsibility." Metromedia objects to our proposal to interpret "existing agreements in a manner consistent with . . . the fundamental principle that the licensee has a non-delegable responsibility over the programming and operation of its station," in light of our note elsewhere in the Proposed Policy Statement that "in cases where the licensee improperly has abdicated its responsibility, it will be our obligation to consider the licensee's fitness to serve as a public trustee."

11. Metromedia asks us to require that agreements indicate expressly how they are consistent with the public interest, either by a showing that the citizen group is reasonably representative of the station's service area, or by a statement "that the racial, sexual or interest group involved was entitled to privileged treatment (for specifically enumerated reasons) and that such special treatment would not disadvantage the other elements of the community (again listing specific reasons)." Metromedia also would require that the subject matter of the agreement relate to the grievances of the group involved. Worldvision asks us to state that licensees cannot inflexibly bind themselves not to present certain programs. Orion contends that EEOC conciliation agreements can inflexibly limit a licensee's operating discretion (by a hiring schedule, for example), just as citizen agreements can, and should be subject to the same Commission restrictions recognizing final licensee discretion. NOW argues that the Commission "does not have the authority to dictate to the EEOC the contents of its conciliation agreements with licensees."

12. *Review and enforcement.* There was little reaction to our proposal to take cognizance of citizen agreements only when incorporated in a licensee's renewal or other application (see paragraph 4, above). Three commenters agree that the Commission should not review every citizen agreement. The National Association of Broadcasters (NAB) observes that the proposal may not effectively limit the number of agreements considered, since review occurs under conditions determined by the parties, but it suggests no method for limiting their submission for review.

13. Our proposal not to take cognizance of oral agreements also received little comment. NBC says:

> [T]here is the problem of identifying from among the totality of licensee-community dialogue, those discussions which constitute "agreements" which have to be filed. A licensee may talk to an individual or group and state it expects to continue to carry a particular program or series, thereby satisfying the group. Or a group may request a licensee to carry a new series or adjust its employment recruiting procedures and the licensee may agree to do so or to explore that possibility, thereby satisfying the group. The Notice itself recognizes that these discussions and exchanges are often not precisely recorded in writing.

NBC believes that any rules adopted by the Commission should not be worded in terms of requiring the filing of all such agreements, but rather in terms of not giving recognition to agreements except insofar as they or their substantive provisions to which the station is committed have been filed with the Commission and placed in the sation's public information file. This approach will take care of the more usual situation where the group's request or complaint has been accommodated in the application itself or in an amendment thereto.

Mrs. Donnelly opposes "allowing unwritten agreements, which cannot be scrutinized by the general public • • • The F.C.C. has an affirmative duty to prevent such secrecy and undisclosed bias in a society where the free and unfettered transmission of ideas is a necessity."

14. Many more comments were received on the subject of enforcement of the policy statement and terms of any agreements. With respect to the former, most commenters urge us to defer as much as possible to the discretion of licensees as to what agreement terms are in the public interest. PIRG would reject an agreement "only if its terms are clearly not in the public interest." Worldvision suggests the following standards for evaluating agreements:

(1) Whether [agreement terms affecting programming constitute] an egregious abdication of the licensee's responsibility to make continuing program judgments; and

(2) Whether the licensee has taken reasonably sufficient steps to assure that the programming proposed pursuant to the agreement will serve the needs and interests of a citizens group that is representative of a substantial segment of the public within the licensee's service area.

15. With respect to Commission enforcement of the terms of citizen agreements, CBS suggests "a procedure whereby a 'citizens' group' would be prohibited from bringing an alleged breach of an agreement to the Commission for resolution before making a good faith effort to resolve the group's differences with the licensee." Once a complaint is before the Commission, CBS urges us to "limit review, as in fairness doctrine complaints, to the reasonableness of a licensee's judgment in implementing programming or other activities pursuant to agreements and • • • not substitute [our] judgment for that of the licensee as to the appropriateness or relevance of specific programming," thus not making "a qualitative program judgment." A more rigorous standard, CBS argues, "would constitute an encroachment on the licensee's First Amendment rights and would be tantamount to censorship • • •" NBMC urges application of the same promise-versus-performance standard used in reviewing other licensee representations to the Commission.

16. On the question of sanctions in the event of violation of the terms of an agreement, NBMC says the same action should be taken as in other cases of breach of promises: "designation for hearing and the possible denial of the license renewal." PIRG suggests using forfeiture proceedings based on misrepresentations to the Commission in the case of a licensee "whose breach is intentional or whose rationale for nonperformance is so transparent that it indicates bad faith." Says PIRG: "Less severe penalties are more likely to be meted out than drastic ones and thus become realistic deterrents to bad faith conduct."

17. *Procedural matters.* The impact of citizen agreements on the Commission's procedures for handling challenged applications generated considerable comment. Several broadcasters contend that the threat of delayed application processing is sometimes used to wring unreasonable concessions from licensees, contrary to the public interest. They urge speedier Commission processing of challenged applications to minimize this danger, especially in the case of applications for transfer of control or assignment of license. Some suggest that the problems of delay in transfer and assignment applications be considered in a separate proceeding. NOW counters that a separate proceeding is unnecessary because the same public interest determination must be made in transfer and assignment applications as others, and because the danger of improper agreements is minimized by Commission review of them. With respect to petitions to deny, Storer urges strict enforcement of present procedural rules, and Metromedia asks for a revision of Commission policies for considering petitions to deny, which would tend to limit them. ABC and KBOX propose restricting consideration of informal objections by establishing time deadlines for their submission. NOW opposes any change in present procedures. CBS would bar citizens from filing petitions to deny applications of stations with which they have signed agreements. NBC would permit agreements to contain clauses barring petitions to deny. NOW would not have the signing of an agreement bar the filing of a petition to deny, since "the agreement may cover only certain of the issues with which the group is concerned • • •" Both NBC and NAACP suggest the free withdrawal of petitions to deny.

Discussion and Statement of Policy

18. *Basic Considerations.* In accordance with the legislative design for broadcasting set out in the Communications Act, licensees alone must assume and bear ultimate responsibility for the planning, execution, and supervision of programming and station operation. This responsibility cannot be delegated, and a licensee cannot (even unilaterally) foreclose its discretion and continuous duty to determine the public interest and to operate in accordance with that determination.

19. We have long held that it is responsibility, and not just accountability, that is nondelegable. In "United States Broadcasting Corporation," 2 FCC 208, 225 (1935), we said:

> Complete supervision of and control over programs, including careful examination of their content, directly affects the rendition of a public service. The right to determine, select, supervise, and control programs is inherently incident to the privilege of holding a station license. In fact, the right becomes a responsibility of a licensee, as he must be held to strict accountability for the service rendered.

In "National Broadcasting Co., Inc., v. United States," 319 U.S. 190 (1943), the Court noted with approval the following statements in our 1941 "Report on Chain Broadcasting":

> It is the station, not the network, which is licensed to serve the public interest. The licensee has the duty of determining what programs shall be broadcast over his station's facilities, and cannot lawfully delegate this duty or transfer the control of his station directly to the network or indirectly to an advertising agency. He cannot lawfully bind himself to accept programs in every case where he cannot sustain the burden of proof that he has a better program. The licensee is obliged to reserve to himself the final decision as to what programs will best serve the public interest. We conclude that a licensee is not fulfilling his obligations to operate in the public interest, and is not operating in accordance with the express requirements of the Communications Act, if he agrees to accept programs on any basis other than his own reasonable decision that the programs are satisfactory. [*Ibid.*, at 205–6]
>
> • • • • •
>
> If a licensee enters into a contract with a network organization which limits his ability to make the best use of the radio facility assigned him, he is not serving the public interest. [*Ibid.*, at 218]

We have thus uniformly rejected agreements which would operate to restrict the right of a licensee to make and implement decisions respecting station operations.[2] It is on this foundation, then, that we adopt the following policies.

20. *Local dialogue.* We can state a licensee's obligations with respect to local dialogue simply. We require community

[2] For example, we have proscribed network agreements which unduly restrict the carriage of programs of other networks [Section 73.658(a) and (b)], and trade agreements which impair a licensee's obligation to retain control over program matter at all times [Filing of Agreements, 33 FCC 2d 653 (1972); "WGOK, Inc.," 2 FCC 2d 245 (1965); and "United Broadcasting Company of New York, Inc.," 40 FCC 224 (1965)]. We have also pointed out that "private agreements cannot be construed to limit a broadcaster's responsibilities and obligations imposed by the Communications Act • • •" "Golden West Broadcasters," 8 FCC 2d 987, 988 (1967). We have acted to prevent the possible improper delegation of licensee responsibility in connection with subscription agreements between radio stations and musical format service companies. "Report and Policy Statement," FCC 75–1234, released November 7, 1975. See also "Report and Statement of Policy Re: Commission En Banc Programming Inquiry," 25 FR 7291, 7295, 20 RR 1901, 1912–3 (1960); and "Fairness Report" in Docket 19260, 48 FCC 2d 1, 10 (1974). There is, of course, no rule of law or policy which prohibits a licensee, in the exercise of its discretion, from determining not to broadcast certain programs or to broadcast other programs which it believes better serve the public interest. It is the fixed determination, binding and unchangeable, which runs afoul of the requirement of licensee responsibility.

ascertainment, and we evaluate thereby the adequacy of a licensee's operating proposals to serve the public interest. Beyond this, a licensee is not obliged to negotiate toward or conclude an agreement.[4] Thus, while we encourage extensive local dialogue, we leave determination of whether or not to discuss or to enter agreements to the discretion of each licensee. We therefore reject NBMC's contention that the Commission should penalize a licensee for failing to meet with a particular group or to discuss station performance.

21. If a licensee is presented with proposals by any group that it feels are not in the public interest, it should reject the proposals. On the other hand, even a group whose individual membership appears nonrepresentative may raise views, concerns, or problems that should be dealt with.[5] It is the proposals themselves—rather than their proponents—which the licensee ought to consider in relation to its public interest duties. We repeat, though, that "consideration" need not take the form of "negotiation" or "agreement."

22. *Filing of agreements.* The significance of and public interest in citizen agreements require that they be placed in the public files of broadcast stations that enter them, and we will so amend § 1.526 of our rules. We believe that the public interest is fully served by local filing, and will not require that agreements be published locally or filed with the Commission. Should parties desire to file an agreement with us, we suggest its submission as an amendment to the station's most recent renewal or other broadcast application.[6] However, we are not prepared to require local filing of routine commercial contracts as suggested by some commenters, for that lies outside the scope of this proceeding.

23. *Terms of agreements.* We believe suggestions that we permit licensees to delegate responsibility conflict with basic requirements of the Communications Act, as we discussed in paragraphs 18 and 19, above. Commenters' examples of alleged delegations of responsibility are not persuasive. The employer-employee relationship contains ample opportunity for the direction of employees and the supervision of their work, and the employer retains flexibility to change or end the warrant of authority to act in its behalf.[7] Attempted delegations to other commercial interests would consitute unlawful transfers of control of the stations involved, in violation of Section 310(b) of the Communications Act, just as attempted delegations to networks were held improper in the "Report on Chain Broadcasting".

24. Some of the comments indicate that our examples of agreements that inflexibly bind licensees confused rather than clarified the thrust of our proposed policy. The principle underlying this aspect of the policy is that in areas where licensees have public interest duties cognizable by the Commission—for example, programming and employment practices[8]—a licensee is obliged to modify any prior practice or proposal when in the reasonable exercise of its good faith judgment it believes that the public interest so requires. The consequence of this principle is that no proposal in such an area can be immutable, whether presented unilaterally in an application or undertaken pursuant to a commercial or citizen agreement.

25. Wherever possible, we will construe the provisions of citizen agreements in a manner favorable to their implementation. Even where understandings are susceptible to different interpretations, we generally will decline to have parties redraft their agreements. We do not wish, by dispelling ambiguities in language, to inhibit development of the local discussion process. We cannot, however, approve agreements which contain "fixed determinations, binding and unchangeable," in areas where flexibility to serve the public interest is required. To the extent that any agreement surrenders this discretion to others, it cannot be considered by this Commission as having any force or effect. We agree with NOW that specificity per se is not improper,[9] but caution that detail may give rise to expectations of inflexibility which, if imposed, would be improper.

[4] See "Great Western Broadcasting Corp.", 53 FCC 2d 1147 (1975).

[5] Of course a licensee should not feel compelled to yield to demands from one interest group to the extent of disregarding other legitimate interests which must be served. Part of the licensee's function of addressing community needs with responsive practices consists of reasonably balancing those responses.

[6] If parties so request, we will place an agreement in the station file maintained at the Commission for public reference. This alone would not constitute an incorporation of the agreement into an application, however, and would not affect its review or enforcement by the Commission. (See paragraph 29, below.) However, we would not generally expect agreements to be filed with us unless incorporated in an application or submitted with a complaint or other request for specific and formal action.

[7] We recognized these differences in "International Good Music", FCC 60–1340 (1960) and "WSKP, Incorporated", 2 RR 2d 1103 (1964). In the latter case we said arrangements where station operators were not station employees presented a "fundamental question • • • as to whether such relationships lead to abdication of licensee responsibility, in violation of the control requirements of the Communications Act • • •"

[8] As we have pointed out elsewhere, there are activities which are clearly extraneous to the Commission's regulatory function. See "Black Identity Association," FCC 71–378, 21 RR 2d 746 (1971). However laudable such activities may be, we prefer neither to approve nor to disapprove agreement terms about them.

[9] In the "Proposed Policy Statement" we did not intend to imply that specificity is improper. The examples given in paragraph 15 were intended to illustrate improper binding of the licensee rather than improper content of those hypothetical agreements. As we stated immediately thereafter, in paragraph 16, "we have specifically declined to limit these accords by defining the *matters* that can be discussed and assented to by licensees and members of the public." (Emphasis supplied.)

V40250 DEC 30 75 XUM

26. With respect to suggestions for specific agreement terms, we are not willing to specify how citizen agreements should ensure that licensee responsibilities are not abridged, preferring to leave citizens and licensees free to work out whatever arrangements they believe appropriate in their circumstances. We will therefore not require express savings clauses, nor will we imply a "blanket" savings clause. We will not strain the plain language of agreements to construe away provisions inflexibly binding licensees, nor to strengthen inadequate savings clauses, since these are matters for the parties.[10] We cannot allow ourselves to be cast in the role of a local mediator, resolving differences and recommending agreement terms. We have neither the staff nor the financial resources to assume such a burden, and are neither authorized nor willing to become a censor with respect to program disputes. We reject Metromedia's suggestions (paragraph 11, above) which would unnecessarily limit the scope of possible agreements, since we intend to avoid any nonessential restrictions on citizen agreements. We agree with NOW that it would not be appropriate for us to attempt any limitation of the EEOC conciliation process. See "National Broadcasting Company, Inc." (WRC-TV), 52 FCC 2d 273, 293 (1975).

27. Metromedia's fears that we will use our newly stated policies to punish licensees who entered improper agreements in the past is unfounded. With respect to agreements made prior to release of our Proposed Policy Statement (June 10, 1975) we said:

> [P]ending agreements which have been submitted as the *quid pro quo* for the withdrawal of an unresolved petition to deny will • • • be evaluated in accordance with [the policies and practices expressed here]. Agreements, heretofore either implicitly accepted or explicitly considered by the Commission in disposing of a petition to deny or similar protest, need not be revised by the parties or re-examined by the Commission. Instead, we will interpret these existing agreements in a manner consistent with our announced role and with the fundamental principle that the licensee has a non-delegable responsibility over the programming and operation of its station. Of course, provisions of existing agreements which may operate to improperly curtail this fundamental responsibility, will have no force or effect before this Commission. Finally, we believe that our announced course of action can and should be applied to any pending complaint concerning the licensee's implementation of a previously filed agreement.

Our consistent policy has been to call attention to deficiencies so that parties can take whatever remedial steps they believe appropriate. We do not believe that application of these policies to existing agreements as described above will "punish" any licensee. As to agreements entered into after release of this Report and Order, we would expect to continue an essentially remedial approach, but feel we must reserve the right to question the basic fitness of a licensee who—being fully on notice of our policy—engages in conduct clearly antithetical to that policy.

28. To reiterate, final responsibility (as well as accountability) for operating decisions of the type we are concerned with must remain with the licensee. We intend to give considerable weight to licensee determinations of what serves the public interest, just as we always have. We believe these standards are clear, and that examples of their application are unnecessary. We think the continued examination of agreements in accord with these standards offers the greatest promise of a reasonable balance between maximum licensee-citizen flexibility and effective performance of our duty to ensure compliance with applicable statutes, rules, and policies.

29. *Review and enforcement.* Balancing our concern for preserving the broadcaster's nondelegable accountability to the whole public against our determination not to cast the shadow of government over the process of local discussion—and in light of the Commission's limited resources—we will take cognizance of citizen agreements only to the following extent:

(a) If asked to determine whether an agreement is contrary to applicable statutes, rules, or policies, we will review it in conformity with the policies expressed here.

(b) Substantive agreement terms incorporated in an application will assume the status of representations to the Commission, and will be treated as are all promises of future performance.[11] We prefer not to impose any restrictions on the submission of agreements to us under these terms unless experience indicates we must.

30. We think NBC correctly states that oral agreements present unusual difficulties calling for different treatment than written agreements. As noted, a licensee may have difficulty drawing a line between formal oral "agreements" and those informal status reports or comments to listeners which are essential to efficient station operations. Extending filing and other requirements to oral agreements, therefore, may inhibit informal dialogue, contrary to our policy of encouraging it. Further, we continue to believe that we should not become embroiled in disputes as to the existence or terms of oral agreements, and will give no consideration whatever to those understandings. As we said in our Proposed Policy Statement, "the best evidence of any commitments alleged to rest upon a broadcaster-citizen agreement will be the licensee's understanding of that accord as reflected in his application representing it to the Commission." Nor will we require licensees to place notations or summaries of oral agreements in their public files. As for Mrs. Donnelly's fear of secret agreements: We believe, first, that citizen groups and licensees will generally prefer the certainty of written agreements to the vagueness of oral ones; and, second, that violations of a licensee's duty to serve the public interest are determined by its performance, not necessarily by the mere existence of a particular agreement. Since we believe the advantages of oral agreements far outweigh their possible disadvantages, we will not prohibit them. We will not, however, take cognizance of oral agreements.

31. In reviewing complaints that a licensee has breached promises made in a citizen agreement, we will judge its performance with our promise-versus-performance test—whether the licensee has made reasonable and good faith efforts to effectuate its proposals.[12] We strongly disagree with the CBS suggestion that alleged breaches of agreement terms incorporated in a broadcast application should be treated differently than deviations from other application proposals. We concur with CBS that aggrieved citizen groups should try to work out their differences with licensees before bringing their complaints to the Commission. This is consistent with our philosophy of encouraging local dialogue, and lessens our burden by resolving at least some disputes locally. Then too, since on receiving a complaint we generally ask for licensee comment, bringing a complaint to the Commission before discussing it with the station may only delay its resolution. However, we are not inclined to foreclose the possibility of direct complaints to us, and we decline to adopt any rigid complaint procedure absent a strong showing that one is necessary.

32. The appropriate remedy for specific allegations raising substantial questions of unsatisfactory performance is that mandated by Section 309(e) of the Communications Act: designation for hearing of the station's application for license renewal. 47 U.S.C. 309(e). PIRG's suggestion that we enforce agreements with forfeitures cannot be implemented, since forfeitures cannot be imposed for violations of Commission policy alone. 47 U.S.C. 503(b).

[10] It was our unwillingness to elevate a subordinate savings clause that led to our disapproval of the citizen agreement in the case of WAUD, "Letter to Ellen S. Agress," FCC 75-781, adopted July 1, 1975. There, we found that the savings clause was overridden by "the apparent binding nature of the terms of the agreement in light of the specific and clear language regarding the licensee's intention to be bound by the commitments set forth in the agreement." Indeed, even if a savings clause could be read as "coordinate" with a binding clause—rather than subordinate—we do not feel it is our place to choose which shall govern. That is for the parties to make plain.

[11] As with other representations, the licensee would be free to modify them, though we would ask to be informed if the modifications are significant. Upon our own motion, we may ask for explanation of any deviations that appear to be substantial.

[12] We will not enforce agreement terms not incorporatedin an application. And of course we will not enforce agreement terms in areas not cognizable by the Commission (see note 8, above), even if incorporated in an application.

33. *Procedural matters.* We recognize licensees' concerns that delay in disposing of applications is unfair to all parties. For that reason we are working to speed the processing of all applications, both contested and uncontested. However, the dramatic procedural changes some suggest would not facilitate determination of whether grant of an application would be in the public interest, and we believe their adoption would not be appropriate in the limited context of this proceeding. However, it is appropriate for us to consider the relationship between citizen agreements and petitions to deny. We do not believe we can, consistent with our own public interest obligation, restrict the right of any individual or group to file a petition to deny, as some commenters suggest. An agreement properly should be based on an honest acceptance of the merits of a proposal and not on any desire on the part of the licensee to further his own private interests or to avoid Commission scrutiny of his trusteeship. Thus, clauses in agreements barring petitions to deny would be improper, though we would accept a statement that the agreement satisfies objections which otherwise might have generated a petition to deny. We therefore caution parties against viewing an agreement as protection or insulation against future challenge. For the same public interest reasons, we also believe we must consider the allegations of petitions to deny, once filed, even if the petitioners request their withdrawal.[13] Allegations of past misconduct would of course receive close scrutiny. On the other hand, complaints that a licensee's operating proposals are inadequate might well be mooted by agreement undertakings, and could be resolved more easily.

34. Finally, the key assumption in successful dialogue and possible agreement is the good faith of the parties. We reiterate our recognition of the danger that "broadcasters may feel compelled to yield to organized pressure groups without regard to the merits of their complaints." "Final Report and Order," Docket 19153, 38 Fed. Reg. 28762, 28764. There is no way for the government to eliminate such threats entirely, without becoming so heavily involved in the business and the freedoms of broadcaster and citizen as to constitute, itself, a greater threat. However, on a showing that either party has abused the process of community dialogue, we will seek to ascertain whether Commission action would be appropriate.[14]

SUMMARY OF POLICY

35. Our consideration of the comments in this docket, as well as examples of citizen agreements that have come before us, has led us to the following conclusions. Citizens in a station's service area can make valuable contributions to broadcasting by communicating to the station licensee their perceptions of what the public interest requires. Licensees, for their part, have an obligation to seek out citizens' views, weigh them, and propose programming and operating practices to serve the public interest. The Commission's role is to establish procedures to facilitate these processes, and to determine whether licensees have, in fact, reasonably served the public.

36. One recent result of the dialogue between citizens and broadcasters has been more or less formal agreements, in which licensees undertake to operate in certain ways perceived by the parties to the agreement as serving the public interest. While we encourage community dialogue, a licensee is not obliged to undertake negotiations or agreements. However, if a licensee does enter an agreement, the following policies will apply.

37. The obligation to determine how to serve the public interest is personal to each licensee and may not be delegated, even if the licensee wishes to. Therefore, agreements must not take responsibility for making public interest decisions out of the hands of a licensee. Nor may they prevent it from changing the way the station serves the public interest as the licensee's perceptions change. The Commission, however, does not want to intrude unnecessarily into the processes of local dialogue and the exercise of licensee discretion. Therefore, considerable deference will be given a licensee's determinations of how to serve the public interest, and the Commission will not prescribe or prohibit any particular agreement terms, so long as they are not unlawful or violative of particular Commission rules.

38. To avoid unnecessary government interference, we will examine only written agreements, which either are incorporated in the licensee's renewal or other application, or which come to us upon complaint or request for formal ruling or review. Such agreements will be considered to the following extent:

(a) We will review them to determine whether they improperly delegate nondelegable licensee responsibilities, whether they improperly bind future exercise of the licensee's nondelegable discretion, and whether they otherwise comply with applicable statutes, rules, and policies.

(b) Substantive agreement terms constituting proposals of future performance will assume the status of representations to the Commission, if made in an application submitted to us, and will be treated by the Commission as are all promises of future performance. The licensee will be free to modify the representations later, but we would ask to be informed if the changes are significant. We may ask for explanation of any deviations that appear to be substantial.

39. If the Commission finds an agreement improper, it will so advise the parties, who may wish to correct the defects. Provisions of any agreement that rely on invalid terms will have no force and effect before the Commission. Serious abdications of licensee responsibility will raise a question about the licensee's basic fitness.

40. The success of the dialogue and agreement processes depends on the good faith of citizens and licensees. The Commission will consider appropriate action if there is evidence any party abused the processes or acted in bad faith.

41. Because citizen agreements may be of interest to members of the public in the station's service area, written citizen agreements must be placed in the station's public file, as specified by the amendment to Section 1.526 set forth in Appendix B.

42. The Commission recognizes that oral understandings and agreements may be a common practice. However, because of inherent problems in establishing the existence and terms of such agreements, the Commission will not consider them. (Of course, if an oral agreement is the basis for a license application representation, the Commission would treat that representation like any other, without reaching the underlying agreement.) The Commission, likewise, will not require that station public files contain information about oral agreements.

43. Finally, the Commission will accept a statement that an agreement satisfies objections which otherwise might have generated a petition to deny, but we cannot give effect to an agreement purporting to preclude the filing of a petition to deny. The parties' basis for their agreement should be a good faith determination that it promises to serve the public interest.

44. Once a petition to deny is filed, the Commission is bound to consider its merits, even if the petitioner requests its dismissal. A petitioner is free to withdraw his challenge at any time, but such an action would necessarily dispose of the issues raised.

45. For the foregoing reasons, the policy set forth above is adopted; and § 1.526 of our Rules is amended as shown below. Authority for these actions is found in Sections 4(i), 303 and 307 of the Communications Act of 1934, as amended, effective January 22, 1976.

46. *It is further ordered,* That the proceedings in Docket 20495 are terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083 (47 U.S.C. 154, 303, 307).)

Adopted: December 10, 1975.

Released: December 19, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

Part I of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

In § 1.526(a)(1) a sentence is added, the present Note designated as Note 1, and a new Note 2 added; and in paragraph (e)(2) a sentence is added to read as follows:

§ 1.526 Records to be maintained locally for public inspection by applicants, permittees, and licensees.

(a) * * *
(1) * * * The file shall also contain a copy of every written citizen agreement.
* * * * *

NOTE 2: For purposes of this section, a citizen agreement is a written agreement between a broadcast applicant, permittee, or licensee, and one or more citizens or citizen groups, entered for primarily noncommercial purposes. This definition includes those agreements that deal with goals or proposed practices directly or indirectly affecting station operation in the public interest, in areas such as—but not limited to—community ascertainment, programming, and employment. It excludes common commercial agreements such as advertising contracts; union, employment, and personal services contracts; network affiliation, syndication, and program supply contracts; and so on. However, the mere inclusion of commercial terms in a primarily noncommercial agreement—such as a provision for payment of fees for future services of the citizen-parties [see "Report and Order," Docket 19518, —— FCC 2d —— (1975)]—would not cause the agreement to be considered commercial for purposes of this section.

* * * * *

(e) * * *
(2) * * * If a written agreement is not incorporated in an application tendered for filing with the Commission, the starting date of the retention period for that agreement is the date the agreement is executed.

[Docket No. 19861; FCC 75-1360]

PART 73—RADIO BROADCAST SERVICES

Noncommercial Educational Broadcast Stations; Retention of Audio Recordings

In the matter of amendment of Part 73 of the Commission's rules and regulations to require noncommercial educational broadcast stations to retain audio recording under certain circumstances.

1. The Commission has under consideration its notice of proposed rulemaking, adopted November 7, 1973 (38 FR 31456), and the responsive pleadings filed by interested parties.[1]

2. This proceeding was instituted by the Commission following the enactment of Public Law 93–84[2] which added new subsection (b) to Section 399 of the Communications Act of 1934, as amended. The new subsection reads as follows:

"(b)(1) Except as provided in paragraph (2), each licensee which receives assistance under this part after the date of the enactment of this subsection shall retain an audio recording of each of its broadcasts of any program in which any issue of public importance is discussed. Each such recording shall be retained for the sixty-day period beginning on the date on which the licensee broadcasts such program.

(2) The requirements of paragraph (1) shall not apply with respect to a licensee's broadcast of a program if an entity designated by the licensee retains an audio recording of each of the licensee's broadcasts of such a program for the period prescribed by paragraph (1).

(3) Each licensee and entity designated by a licensee under paragraph (2) which retains a recording under paragraph (1) or (2) shall, in the period during which such recording is required under such paragraph to be retained, make a copy of such recording available—

(A) to the Commission upon its request, and

(B) to any other person upon payment to the licensee or designated entity (as the case may be) of its reasonable cost of making such copy.

(4) The Commission shall by rule prescribe—

(A) the manner in which recordings required by this subsection shall be kept and

(B) the conditions under which they shall be available to persons other than the Commission, giving due regard to the goals of eliminating unnecessary expense and effort and minimizing administrative burdens."

3. In our notice, we emphasized a desire to adopt rules creating a workable system which adheres to the Congressional mandate to retain audio recordings while also responding to the clear intent that administrative and financial burdens placed upon the noncommercial, educational broadcaster be minimized. The notice declined to issue a formal proposal, requesting, instead, that educational stations and associated organizations respond by suggesting appropriate methods to accomplish the requirements of the statute.

4. Legislation requiring the audio recording and retention by noncommercial, educational broadcasters of programs in which issues of public importance are discussed (hereinafter referred to as "recording and retention") was introduced on three separate occasions prior to its passage by the Ninety-third Congress. In the second session of the Ninety-first Congress, an amendment requiring noncommercial, educational broadcasters to record and retain public affairs programs[3] was added to pending public broadcasting financing legislation during the course of committee deliberations.[4]

[1] A listing of the parties filing comments or replies is found in Appendix A.

[2] 47 U.S.C. 399(b), 87 Stat. 219, approved August 6, 1973.

[3] The amendment would have added new Section 399(b) to the Communications Act to read as follows:
"Sec. 399(a) * * *
(b) In order to assure compliance with this section and with other provisions of this Act requiring fair treatment of matters in the public interest, the Commission shall prescribe such regulations as may be appropriate to require that broadcast stations which receive assistance under this title (1) keep records, including audio recordings, for a reasonable period of time of each program broadcast which involves an issue of public importance, and (2) furnish such records to the Commission at its request. The Commission shall make such records available to the public at the requesting party's cost under such circumstances and conditions as may be reasonable and appropriate."

[4] The Senate Commerce Committee report, S. Rept. No. 91–869, May 14, 1970, explained that, under the amendment, public broadcasters would be required to "keep adequate records, including audio recordings of programs they broadcast that involve public affairs". The report said the requirements were necessary to assure that public broadcasters would not be subjected to political pressure and influence from outside sources. The Committee report also emphasized that the amendment applied only to programs involving issues of public importance, such as public affairs and news type programs and not to programs such as Sesame Street and Misterogers' Neighborhood.

Though the amended measure was approved in the Senate (S. 3558), the recording and retention requirement was subsequently deleted in a Senate-House conference after it was disclosed that the amendment had not been the subject of hearings in either house.[5] In the Ninety-second Congress, despite the urging of Senator Robert P. Griffin,[6] neither house would agree to the amending of pending public broadcasting financing legislation so as to require recording and retention by public broadcasters. In the Ninety-third Congress, the Senate, after extensive committee hearings on public broadcasting[7] which included some discussion on recording and retention,[8] passed and sent to the House the Public Broadcasting Act of 1973 (S. 1090). As approved, the measure included an amendment to Sec. 399 which would require recording and retention by public broadcasters. The House counterpart (H.R. 8538), as it was introduced, contained verbatim the language of the Sec. 399 amendment in the Senate bill. In committee, however, that language was substantially revised and clarified,[9] the result of which is the statute we are now directed to implement.

5. The intent of Congress, as manifested in the legislative histories discussed above, strongly suggests that the meanings attached by Congress to the phrases "public affairs" and "issues of public importance" favorably comport with the definitions of those phrases as contained within the Commission's rules and policy reports.[10] The general acceptance and understanding of these terms within the broadcast industry merits their adoption in this proceeding. Thus, we believe that compliance with the provisions of Section 399(b) will be achieved by the recording and retention of those programs which consist of talks, commentaries, discussions, speeches, editorials, political programs, documentaries, forums, panels, roundtables, and similar programs primarily concerning local, national, and international public affairs where the licensee, on the basis of a subjective, good faith judgment, determines that the program in question involves an issue or issues that are likely to have an impact upon the community at large, society, or its institutions.[11]

6. The comments of the parties raise the following questions which we shall consider seriatum:

(a) What constitutes an audio recording?

(b) What is an entity and what is its purpose?

(c) What audio recordings may an entity retain?

(d) What audio recordings must a licensee retain?

(e) What is a licensee's responsibility for the acts of an entity?

(f) May a licensee be reimbursed for the costs of complying with the statute, and, if so, to what extent?

(g) What procedural requirements may be imposed upon a party submitting a request that a program recording be made available (hereinafter referred to as "access" or an "access request")?

(h) Related miscellaneous matters.

7. *What constitutes an audio recording?* The intent of Congress that public affairs programs aired by noncommercial, educational broadcasters be retained through the use of audio recordings is unmistakably clear. Further, testimony before the Communications Subcommittee[12] leaves no doubt that "audio recording" was the medium to be used in complying with the Act. Previous versions of the proposed recording and retention amendments required that "records" as well as "audio recordings" be retained, raising questions of whether or not "records" meant written scripts and logs or electrical transcriptions. Any ambiguities that may have existed in the previous legislation were removed by the deletion of "records" and the exclusive use of "audio recording" in the present law. Consequently, we reject the contention offered in one comment that an "audio recording" means a written transcript. We do not believe that Congress intended educational broadcasters to incur added expense by employing additional personnel simply to transcribe and produce written transcripts for possible future public review.

8. An array of methods exists for obtaining both audio recordings and copies of those retained recordings. WSWP, WBUR, Jack Straw, and PBS suggest the use of slow-speed, continuous-logging tape recorders, but Jack Straw, EB, and APRS assert that such equipment will cost each public broadcaster anywhere from $1,500 to $6,000, an expense which, if required, would imperil the very existence of many small public broadcasting stations. We do not think Congress intended such a result. Moreover, we think the suggestion by PBS that consideration be given to cassettes, cartridges, and small reel to reel recorders as recording modes represents a more prudent and practical approach.

9. The only regulation we adopt with regard to the nature of the audio recording and the requested copies requires that such recordings and copies of recordings, regardless of the method used, be accurate, complete, and intelligible. Further, we believe that a member of the general public who seeks access to a particular program recording should be provided a copy[13] of the program in a form that allows for listening on playback devices commonly available to the general public.[14] Finally, in response to an inquiry from WSWP, we see no reason why the recording provided pursuant to a statutory request should be of "broadcast quality", for it is not intended, and indeed, it cannot be used for rebroadcast purposes without the express authority of the originating station.[15]

10. *What is an entity and what is its function? What audio recordings may an entity retain?* The utilization of the entity concept by Congress seems to have arisen from an awareness[16] that a vast amount of expensive and unnecessary

[5] Conf. Rpt. No. 91–1466, Sept. 23, 1970. It should be noted that the House version of the Public Broadcasting Act (H.R. 17982) did not, either as it was introduced or as it was passed, contain any recording and retention provisions.

[6] Hearings before the Subcommittee on Communications and Power of the House Committee on Interstate and Foreign Commerce on Public Broadcasting," 92nd Cong., 2nd Sess., Serial No. 92–62, February 1–3, 1972, at p. 241. The Senator's stated purpose for appearing was to urge adoption of an amendment which would insure objectivity and balance in "public affairs" programming. Concurrent with his appearance before the House committee, Senator Griffin also introduced S. 3227 in the Senate. The proposal which was identical in both language and content to the proposed House amendment and the original proposal before the Ninety-first Congress (see Note 3) was referred to the Commerce Committee where it received no further consideration.

[7] See "Hearings before the Subcommittee on Communications of the Senate Commerce Committee on S. 1090, The Public Broadcasting Act of 1973, 93rd Cong., 1st Sess., Serial No. 93–10, March 28–30, 1973."

[8] Id. at pp. 111–117.

[9] H. Rpt. No. 93–931, June 26, 1973.

[10] "Public affairs" is defined at § 73.112 (a)(1)(iii), Note 1.(d)—AM; Section 73.262 (a)(1)(iii), Note 1.(d)—FM; Section 73.670 (a)(1)(iii), Note 1.(d)—TV. "Issue of public importance" is discussed and defined in the *Fairness Report*, 48 F.C.C. 2d 1 (1974) at p. 12.

[11] It should be noted that our adoption of the standard set forth in para. 5 represents a departure from the preliminary statement we made in the notice equating "any issue of public importance" with a "controversial issue of public importance". Reconsideration of our position was prompted in part by the receipt of correspondence from Senator Griffin (which we are considering as an informal comment) which strongly disputed the determination announced in our notice. Weighing the statements in our notice, the comments, and the legislative history, we now believe, upon further consideration, that our initial determination equating "any issue of public importance" with "controversial issue of public importance" was incorrect. The word "any" in the phrase "any issue of public importance" is, in our opinion, plain and unambiguous language which we are bound to effectuate in the rules we are adopting in this proceeding. Significance is also attached to the action of the House Committee in specifically revising the Senate-approved language by adding the word "any" to the statute.

[12] See note 7, *supra*.

[13] For purposes of this rule, "copy" is defined as a mechanical or magnetic reproduction of sound transcribed upon reel to reel tapes, cassettes, cartridges, dictabelts, recording discs, or other similar devices. For the reasons discussed in the concluding portion of paragraph seven, the definition of "copy" does not include written transcripts.

[14] In those instances where a program is either filmed or video-taped, the rule would be satisfied by making a recording of the sound track available.

[15] 47 U.S.C. 326(a).

[16] In the committee hearings on S. 1090 (see Note 7), Senator Pastore, with Hartford N. Gunn, president of PBS, as a witness, stated:
"Mr. Gunn brings up a good point. In order to avoid duplication by having 238 stations make tapes on a program that has national circulation, that the service ought to do it. I think that is the answer to the problem. Maybe we ought to refine this about who ought to have it."

V 40 N 250 DEC 30 75 XUM

duplication would result should each and every noncommercial broadcaster be required to retain an audio recording of a program already being retained elsewhere. Thus, the role of the entity is to eliminate duplication by performing, for one or more licensees, the duties required of the licensee by Sec. 399(b). At the national level, organizations such as PBS and NPR (National Public Radio) could serve as entities for all public affairs programs involving issues of public importance which they originate or distribute over their interconnection facilities. The same would presumably be the case with the regionally interconnected educational networks. In fact, though the committee testimony examined the use of entities at the national level only, we believe the entity concept may be used at any level and should be used wherever duplication and redundancy can be avoided.[12]

11. *Which audio recordings must a licensee record and retain?* Sec. 399(b) allows licensees the opportunity of designating entities to whom it may delegate the responsibility of recording and retaining public affairs programs in which issues of public importance are discussed. As we noted in the previous paragraph, the services of an entity may be utilized from the local level to the national level. In some cases, however, a licensee may find that an entity is unavailable, or decide that designation of an entity is unnecessary. In those instances, the statute requires that the licensee itself record and retain the programming regardless of the source of production or origination. Our rules will require that licensees record and retain all public affairs programming when any issue of public importance is discussed where the responsibility for the recording and retention of that program material has not been delegated to an entity.

12. *What is a licensee's responsibility for the acts or omissions of an entity?* PBS asserts that a licensee, having taken reasonable steps to insure that a designated entity can and will comply with the Act, should not be held responsible and therefore subject to forfeiture as the result of the entity's failure to act in a prescribed manner. PBS argues that to hold otherwise will require licensees to continue recording their public affairs programming in order to protect themselves. WGBH urges the Commission to extend maximum flexibility to licensees in designating entities, but adds that the licensee itself must remain responsible for compliance with the rules.

[12] For example, educational institutions that produce pre-recorded public affairs programming which is distributed to subscribers by mail or freight could serve as entities for those programs. Jack Straw urges the creation of taping centers in areas where several noncommercial, educational stations have overlapping signals. According to Jack Straw, these centers would record the necessary public affairs programs and then serve as an entity for the licensees in the area. Both of the above proposals are consistent with the entity concept and demonstrate the innovation and flexibility that may be utilized by licensees.

13. Requiring the licensee to assume responsibility for compliance with the rules where it is involved in the processing of the access request, is not, in our view, unreasonable or overly-burdensome. The rule will be satisfied if the licensee, using reasonable diligence, attempts to insure that there will be compliance with the rules by the entity. Where there is a complaint alleging a failure to comply with the rules, we will inquire of the licensee's efforts to insure compliance and prevent violation. If it should appear that reasonable precautions were observed, the licensee may be absolved. If, however, reasonable precautions were not observed by the licensee, then sanctions may be imposed. The standard to be used in these matters is no greater than that already imposed elsewhere in the Commission's regulations. It goes without saying that a licensee cannot be held responsible for the errors and omissions of an entity where it has no knowledge of, involvement in, or control over a particular access request.

14. In our Notice, we requested interested parties to submit specific proposals on the various aspects of access. The comments and replies focused on two subtopics: (a) reimbursement to the licensee or entity of costs involved in producing a copy of a particular program; and (b) methods of granting access to an interested party.

15. *May a licensee be reimbursed for the costs of complying with the statute, and, if so, to what extent?* A reading of the statute clearly indicates that a licensee or entity is entitled to receive, from the party making the request, reimbursement of the reasonable costs of making a copy of a program.[13] Various parties have suggested items they believe should be included in a "reasonable cost" computation. We do not think it necessary to embark on an extended, detailed, and possibly futile discussion of each potential cost item. We believe the question of what constitutes "reasonable costs" can be ascertained on a case-by-case basis utilizing generally accepted cost accounting principals.[14]

16. *Methods of granting access to an interested party.* Many of the licensees and educational broadcasting organizations urge the Commission to adopt rules requiring persons seeking access to identify themselves as a condition precedent to access. WGBH suggests that in addition to personal identification, persons seeking access should be required to disclose organizational affiliation and the purpose for the request, as in the case of public access to television program logs.[15] WGBH suggests that such information is necessary to maintain building security, "proof of access" records, and a continuing dialogue with the general public.

17. We believe the identification requirements governing access to a station's local public file [16] are more appropriate than the TV program log inspection rules for purposes of a Sec. 399(b) access request. Keeping in mind the spirit and intent of the statute, there appears to be a need for nothing more than minimal identification. The rules we adopt will allow a licensee or entity to require identification from the party seeking access but only to the extent of ascertaining the name and address of the party.

18. Various parties urge that all requests for copies of program recordings be made in writing. This, they say, will reduce errors and possible misunderstandings. We agree. As in a contract, for instance, a writing adds certainty. It specifically describes the performances required of the parties. Moreover, the writing itself is frequently used as a means of resolving disputes. Whether or not the written request is sufficiently clear will depend upon whether or not the program requested is capable of being identified with reasonable certainty. A satisfactory request will be expected to include the title of the program, the identity of the speaker(s) (if known), and the time and date of airing. Further, we would expect both licensees and entities, for administrative reasons and for possible future use, to retain either the request or a copy of the request along with a brief notation of the disposition of the request.[17]

19. We are adopting rules which require the party seeking access to a particular program to make payment in advance of the production of a copy of the requested program. The reason for such a rule seems obvious. A noncommercial, educational licensee needs some assurance, at the time the request is made, that its efforts in assigning manpower, expending materials, and utilizing equipment will not be made in vain. It may be argued, though not persuasively in our opinion, that advance payment will act as a deterrent to access. We do not agree. The party who would be unable to make advance payment would, more likely than not, be unable to make payment at all. Payment of reasonable cost is contemplated by the statute and we think payment in advance does nothing more than assure the licensee that the request is legitimate.

20. In requiring payment in advance, we think it not unreasonable or overly burdensome to require that a licensee provide a person seeking access with a written, clearly-stated itemization of the charges made as the result of the request. Such a requirement seems basic and we would not expect noncommercial, educational broadcasters to find it objectionable.

21. Only one party offered comments on the question of where access should be consummated as between a licensee or entity and the person requesting a program recording. WGBH suggested that the copy of the recording be made available at the main studios of the licensee. We think a more flexible approach is required. For instance, many radio and television listeners and viewers are either temporarily or permanently incapacitated and therefore unable to present an access request at the main studio. Were we to require that all access requests be tendered in person at the main studio of a licensee, we would be effectively denying a substantial segment of the population an opportunity to review and examine the recorded programming. Our rules, therefore, will provide that an access request under the provisions of Sec. 399 (b) may be made either by presenting a written request in person at the licensee's main studio (or entity's principal place of business), or by mailing a written request to the licensee or entity at the main studio or principal place of business. While it can be argued that such a provision will operate as an additional administrative burden upon the licensee or entity, we think such an objection is overshadowed by the greater public interest in attempting to make access available to all members of a community.[18]

22. On the question of whether licensees or entities should be required to provide playback equipment for the use of parties making access requests, WGBH admits that leaving members of the public to fare for themselves may make access more difficult, but asserts that requiring stations to provide such equipment would be extremely burdensome financially. WGBH says the four classes of prospective users, the Commission, members of Congress, community groups, and individuals, already have access to some form of recording and playback equipment at their offices, schools, public libraries, or homes. PBS adds that since the Act enjoins the Commission to consider the burdens of compliance, no basis exists for requiring licensees to provide playback capabilities for use by the public.

23. The act makes no specific mention of a duty on the part of public broadcasters to provide equipment on which a recording may be reviewed. Further there is no apparent direction by implication that such facilities be provided.[19]

24. Neither the Act, its legislative history, nor the comments of the parties reveal what type of time frame is to be utilized in satisfying an access request. Our primary intent is to insure that access requests be granted with promptness, allowing for varying circumstances that may arise with regard to the location of the retained recordings. Accordingly, in those instances where a public affairs program dealing with issues of public importance has been produced, originated, and subsequently retained by either a local entity or the licensee itself, we think the licensee or entity should be accorded a reasonable time not to exceed seven days, commencing upon receipt of the written request and advance payment, in which to furnish the party seeking access a copy of the requested program.[20] Where a designated entity is not located within the licensee's community of license, the licensee or entity will be accorded a reasonable time, not to exceed twenty-one days, commencing upon receipt of the written request and advance payment, in which to furnish the party seeking access a copy of the requested program.[21] For the purpose of construing our rules, an access request will not be considered as having been "actually received" until such time as both a written request and advance payment have been received by the licensee or entity.

25. *Related miscellaneous matters.* Rowley urges the Commission to include a procedure for the handling of disputes which he alleges may arise between licensees' entities, and the parties seeking access. He suggests that any complaints arising as the result of disputes involving actions required by Sec. 399(b) and the rules we are adopting, be filed with the Commission within five days after the dispute arises. The Commission, under the Rowley proposal, would be required to act within ten days after receipt of the complaint. While the Commission solicits innovative suggestions which will expedite the administrative process, we see little merit in adopting proposals which sacrifice informed consideration solely for the sake of hurried disposition. Moreover, we see little sense in creating yet another system to handle matters already being resolved by our present procedures, particularly in light of recent public criticism directed at the proliferation of government regulation. For these reasons, we decline to adopt the Rowley proposal, preferring, instead, that all disputes arising under the rules implementing Sec. 399(b) be resolved through the use of the established complaint procedure used by the Commission.

26. APRS and PBS suggest that licensees and entities be allowed to protect themselves against possible future claims of copyright infringement, defamation, or violations of privacy by requiring parties seeking access to execute release agreements. We think the provisions of the Communications Act of 1934, as amended, and the judicial interpretation of those provisions are sufficient to deal with the potential problems. For instance, Section 325(a) of the Communications Act of 1934, as amended,[22] would preclude the rebroadcasting of recordings prepared in accordance with the requirements of Sec. 399(b) where no "rebroadcast" permission was granted by the originating licensee. Further, a licensee or entity required by this act to make a recording available to a requesting party would presumably receive immunity from claims alleging defamation[23] or copyright infringement where it had no recourse but to comply with the statutory requirement.

27. For purposes of interpreting and complying with the statute, we think it is both necessary and appropriate to define the word "assistance" which appears in Section 399(b)(1). Any person, association, corporation, State or political subdivision thereof, who is either licensed to operate or holds a permit to construct a public, noncommercial, educational broadcast facility and who receives from federally-funded sources (a) matching grants for construction of broadcast facilities as provided for under the Communications Act of 1934, as amended,[24] (b) grants for the production of educational television or radio programs for national or regional distribution,[25] or (c) payments to aid in the financing of either local programming or operational costs incurred by the noncommercial, educational broadcast facility,[26] will be deemed to have received "assistance" for purposes of complying with the rules adopted in this proceeding.

28. Neither the rules we are adopting nor the foregoing discussion of those

[13] 47 U.S.C. 399(b)(3)(B).

[14] We would not expect a licensee to include the original program production costs as part of the "reasonable costs." There is clearly no intent that the provisions of the statute be used to provide licensees with an indirect program production subsidy. It is not contemplated, for example, that the cost of the tape used to prerecord a program for airing at a later time or to record a program presented on a "live" basis would be included within a "reasonable cost" computation. In the former case, the tape cost is part of the program production cost. In the latter example the licensee or entity is required by the statute to retain a copy of any public affairs program in which an issue of public importance is discussed. "Reasonable costs" are limited to the cost of making a copy of the retailed recording and do not include the cost of the retained recording itself. Further, we would not expect revenue derived from duties required by Sec. 399 to be used for purposes of underwriting other portions of the station operation.

[15] Section 73.674 of the Commission's Rules and Regulations.

[16] See interpretation of Section 1.526(d) in *WAPA-TV*, 32 F.C.C. 2d 729 (1971), which states that a person requesting access to the local public inspection file may be required to give his or her name and address but not more.

[17] The requests or copies of the requests should be retained for a period of three years from date of receipt as in the case of comments and suggestions received from the public though, at this time, we see no reason why such requests should be required to be kept in the licensee's public inspection file.

[18] We do not construe "available" to mean that playback facilities must be provided, only that a copy of requested recording itself be made available. Moreover, none of the parties who submitted comments specifically argued that a licensee has an obligation under the statute to provide such equipment. Absent a showing that the public interest would be benefitted by requiring licensees and entities to provide playback equipment, we refrain at this time from adopting rules to that effect. This decision, however, should not be construed as prohibiting licensees and entities from making such playback equipment available should they wish to do so.

[19] This provision would also extend to programs not produced locally which the licensee is required to record and retain, where, for one reason or another, an entity is not designated to record and retain the program for the licensee.

[20] Our reason for allowing seven days in one instance and twenty-one days in the other is relatively simple. We contemplate that there will be little delay attributable to mailing and delivery where only a local entity or licensee is involved. In cases where the entity may be located a substantial distance from the licensee, or from the party making the request, the amount of time for mailing and delivery would be significant.

V40N250 DEC 30 75 XUM

rules represents an attempt to resolve all conceivable problems which may arise. We have, instead, left many of these matters to the resourcefulness of the parties, preferring that they mutually agree on the resolution of questions concerning, for example, whether advance payment may be made in cash or by check, or whether an itemized statement of charges must be presented at the time of advance payment or at the time the requested recording is tendered to the party seeking access. Finally, it is our intention, and we would expect both licensees and entities to assume a similar view, that the rule of reasonableness prevail in the application of the sixty-day retention provision. Receipt of an access request by a licensee or entity at any time prior to the end of business hours on the sixtieth day should be interpreted as extending the retention period until the matter is finalized. We expect that any procedures adopted by the licensees will be consistent with the intent of the statute and will not deter members of the general public from availing themselves of access opportunities.

29. Authority for the adoption of the rules herein is contained in 47 U.S.C. 399 (b)(4), 4(i), 303(j) and (r).

30. *Accordingly, it is ordered*, That the rules set forth below are adopted, effective January 26, 1976.

31. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1088, 1082; (47 U.S.C. 154, 303))

Adopted: December 10, 1975.

Released: December 19, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

1. Section 73.127 is added to read as follows:

§ 73.127 Retention of audio recordings.

(a) Except as provided in paragraph (b) of this section, each licensee of a standard broadcast station which, after August 6, 1973, receives assistance pursuant to Part IV of the Communications Act of 1934, as amended, shall retain an audio recording of each of its broadcasts of any public affairs program in which any issue of public importance is discussed. Each such recording shall be retained for a period of sixty days commencing from the date on which the program was last broadcast.

(1) As used in this regulation, "assistance" is defined to mean receipt from federally-funded sources of (i) matching grants for the construction of noncommercial, educational broadcast facilities as provided for under Title III, Part IV of the Communications Act of 1934, as amended, (ii) grants for the production of educational television or radio programs for national or regional distribution as provided for under Title III, Part IV of the Communications Act of 1934, as amended, or (iii) payments to aid in the financing of either local programming or operational costs incurred by noncommercial, educational broadcast stations as provided for under Title III, Part IV of the Communications Act of 1934, as amended.

(b) The requirements of paragraph (a) of this section shall not apply with respect to a licensee's broadcast of a program if an entity designated by the licensee retains an audio recording of each of the licensee's broadcasts of such a program for the period prescribed by paragraph (a) of this section. *Provided*, That nothing within this paragraph shall be construed as absolving the licensee from responsibility for compliance with these rules in the event of an error or omission by a designated entity where the licensee has been involved in the access request and has failed to discharge that responsibility with reasonable diligence. A licensee shall record and retain audio recordings of all programs required to be retained by this regulation where an entity has not been delegated by the licensee to perform the requirements specified in paragraph (a) of this section.

(c) Each licensee or entity designated by a licensee under paragraph (b) of this section which retains an audio recording pursuant to paragraphs (a) and (b) of this section shall, in the period during which the recordings are required under paragraph (a) of this section to be retained, make a copy of such recording available:

(1) To the Commission upon its request, and

(2) To any other person who requests such a copy and makes advance payment to the licensee or designated entity (as the case may be) of its reasonable costs of making such a copy.

(d) All requests for copies of audio recordings made pursuant to this section shall be made within sixty days of the date on which the program was last broadcast, and shall be in written form containing detail sufficient to identify the requested program with reasonable certainty. Requests may be made either to the licensee, for its action, or if the designated entity is known to the requesting party, to the designated entity. The written request, which shall be retained for a period of three years by the licensee or entity to whom it is addressed, may be tendered in person or by correspondence at the licensee's main studio or principal place of business, or at the principal place of business of the designated entity. The licensee or designated entity shall be accorded a reasonable time commencing upon receipt of both the request and the payment in which to satisfy the request: *Provided*, That:

(1) Where there is recording and retention by either a licensee or designated entity located within the licensee's community of license, a reasonable time shall not exceed seven days from the date on which the request is actually received, and

(2) Where there has been recording and retention by a designated entity not located within the licensee's community of license, a reasonable time shall not exceed twenty-one days, commencing from the date the request is actually received.

NOTE 1: For purposes of this rule, "copy" is defined as a mechanical or magnetic reproduction of sound transcribed upon reel to reel tapes, cassettes, cartridges, dictabelts, recording discs, or other similar devices. The definition "copy" does not include written transcripts.

NOTE 2: A request is not actually received until such time as both a written request and advance payment have been received by the licensee or entity.

(e) A licensee or designated entity which provides a copy of an audio recording to a member of the general public pursuant to a request made under these rules may, as a condition precedent, require the party making the request to disclose his or her name and address.

(f) Revenues derived by a licensee or designated entity from fees charged pursuant to paragraph (c)(2) of this section shall not

(1) Exceed the reasonable costs of complying with paragraph (c) of this section,

(2) Nor shall the revenue be used to subsidize other facets of the licensee's or entity's business operations.

(g) A party who requests the production of a recording pursuant to the provisions of paragraph (c) of this section may require the licensee or designated entity to

(1) Provide a copy of an audio recording that is accurate, complete, intelligible, and capable of being audibly reviewed on playback devices commonly available to the general public, and

(2) Provide an itemized statement of the reasonable costs of making a copy of the requested program.

2. Section 73.600 is added to read as follows:

§ 73.600 Retention of audio recordings.

(a) Except as provided in paragraph (b) of this section, each licensee of a noncommercial, educational FM broadcast station which, after August 6, 1973, receives assistance pursuant to Part IV of the Communications Act of 1934, as amended, shall retain an audio recording of each of its broadcasts of any public affairs program in which any issue of public importance is discussed. Each such recording shall be retained for a period of sixty days commencing from the date on which the program was last broadcast.

(1) As used in this regulation, "assistance" is defined to mean receipt from federally-funded sources of (i) matching grants for the construction of noncommercial, educational broadcast facilities as provided for until Title III, Part IV of the Communications Act of 1934, as amended, (ii) grants for the production of educational television or radio programs for national or regional distribution as provided for under Title III, Part IV of the Communications Act of 1934, as amended, or (iii) payments to aid in the financing of either local programming or operational costs incurred by noncommercial, educational broadcast stations as provided for under Title III, Part IV of the Communications Act of 1934, as amended.

(b) The requirements of paragraph (a) of this section shall not apply with respect to a licensee's broadcast of a program if an entity designated by the licensee retains an audio recording of each of the licensee's broadcasts of such a program for the period prescribed by paragraph (a) of this section: *Provided*, That nothing within this paragraph shall be construed as absolving the licensee from responsibility for compliance with these rules in the event of an error or omission by a designated entity where the licensee has been involved in the access request and has failed to discharge that responsibility with reasonable diligence. A licensee shall record and retain audio recordings of all programs required to be retained by this regulation where an entity has not been delegated by the licensee to perform the requirements specified in paragraph (a) of this section.

(c) Each licensee or entity designated by a licensee under paragraph (b) which retains an audio recording pursuant to paragraphs (a) and (b) of this section shall, in the period during which the recordings are required under paragraph (a) of this section to be retained, make a copy of such recording available:

(1) To the Commission upon its request, and

(2) To any other person who requests such a copy and makes advance payment to the licensee or designated entity (as the case may be) of its reasonable costs of making such a copy.

(d) All requests for copies of audio recordings made pursuant to this Section shall be made within sixty days of the date on which the program was last broadcast, and shall be in written form containing detail sufficient to identify the requested program with reasonable certainty. Requests may be made either to the licensee, for its action, or if the designated entity is known to the requesting party, to the designated entity. The written request, which shall be retained for a period of three years by the licensee or entity to whom it is addressed, may be tendered in person or by correspondence at the licensee's main studio location or principal place of business, or at the principal place of business of the designated entity. The licensee or designated entity shall be accorded a reasonable time commencing upon receipt of both the request and the payment in which to satisfy the request: *Provided*, That:

(1) Where there is recording and retention by either a licensee or designated entity located within the licensee's community of license, a reasonable time shall not exceed seven days from the date on which the request is actually received, and

(2) Where there has been recording and retention by a designated entity not located within the licensee's community of license, a reasonable time shall not exceed twenty-one days, commencing from the date the request is actually received.

NOTE 1: For purposes of this rule, "copy" is defined as a mechanical or magnetic reproduction of sound transcribed upon reel to reel tapes, cassettes, cartridges, dictabelts, recording discs, or other similar devices. The definition of "copy" does not include written transcripts.

NOTE 2: A request is not actually received until such time as both a written request and advance payment have been received by the licensee or entity.

(e) A licensee or designated entity which provides a copy of an audio recording to a member of the general public pursuant to a request made under these rules may, as a condition precedent, require the party making the request to disclose his or her name and address.

(f) Revenues derived by a licensee or designated entity from fees charged pursuant to paragraph (c)(2) of this section shall not

(1) Exceed the reasonable costs of complying with paragraph (c) of this section,

(2) Nor shall the revenue be used to subsidize other facets of the licensee's or entity's business operations.

(g) A party who requests the production of a recording pursuant to the provisions of paragraph (c) of this section may require the licensee or designated entity to

(1) Provide a copy of an audio recording that is accurate, complete, intelligible, and capable of being audibly reviewed on playback devices commonly available to the general public, and

(2) Provide an itemized statement of the reasonable costs of making a copy of the requested program.

§§ 73.623, 73.624 [Redesignated]

3. Part 73 of the Commission's Rules and Regulations is revised by redesignating § 73.622, *Applications for sharing of television channels*, and § 73.623, *Notification of filing of applications*, as § 73.623 and § 73.624 respectively, and by adding new § 73.622 to read as follows:

§ 73.622 Retention of audio recordings.

(a) Except as provided in paragraph (b) of this section, each licensee of a television broadcast station which, after August 6, 1973, receives assistance pursuant to Part IV of the Communications Act of 1934, as amended, shall retain an audio recording of each of its broadcasts of any public affairs program in which any issue of public importance is discussed. Each such recording shall be retained for a period of sixty days commencing from the date on which the program was last broadcast.

(1) As used in this regulation, "assistance" is defined to mean receipt from federally-funded sources of (i) matching grants for the construction of noncommercial, educational broadcast facilities as provided for under Title III, Part IV of the Communications Act of 1934, as amended, (ii) grants for the production of educational television or radio programs for national or regional distribution as provided for under Title III, Part IV of the Communications Act of 1934, as amended, or (iii) payments to aid in the financing of either local programming or operational costs incurred by noncommercial, educational broadcast stations as provided for under Title III, Part IV of the Communications Act of 1934, as amended.

(b) The requirements of paragraph (a) of this section shall not apply with respect to a licensee's broadcast of a program if an entity designated by the licensee retains an audio recording of each of the licensee's broadcasts of such a program for the period prescribed by paragraph (a) of this section: *Provided*, That nothing within this paragraph shall be construed as absolving the licensee from responsibility for compliance with these rules in the event of an error or omission by a designated entity where the licensee has been involved in the access request and has failed to discharge that responsibility with reasonable diligence. A licensee shall record and retain audio recordings of all programs required to be retained by this regulation where an entity has not been delegated by the licensee to perform the requirements specified in paragraph (a) of this section.

(c) Each licensee or entity designated by a licensee under paragraph (b) which retains an audio recording pursuant to paragraph (a) and (b) of this section shall, in the period during which the recordings are required under paragraph (a) of this section to be retained, make a copy of such recording available:

(1) To the Commission upon its request, and

(2) To any other person who requests such a copy and makes advance payment to the licensee or designated entity (as the case may be) of its reasonable costs of making such a copy.

(d) All requests for copies of audio recordings made pursuant to this Section shall be made within sixty days of

V 40 N 250 DEC 30 75 XUM

the date on which the program was last broadcast, and shall be in written form containing detail sufficient to identify the requested program with reasonable certainty. Requests may be made either to the licensee, for its action, or if the designated entity is known to the requesting party, to the designated entity. The written request, which shall be retained for a period of three years by the licensee or entity to which it is addressed, may be tendered in person or by correspondence at the licensee's main studio location or principal place of business, or at the principal place of business of the designated entity. The licensee or designated entity shall be accorded a reasonable time commencing upon receipt of both the request and the payment in which to satisfy the request: *Provided*, That:

(1) Where there is recording and retention by either a licensee or designated entity located within the licensee's community of license, a reasonable time shall not exceed seven days from the date on which the request is actually received, and

(2) Where there has been recording and retention by a designated entity not located within the licensee's community of license, a reasonable time shall not exceed twenty-one days, commencing from the date the request is actually received.

NOTE 1: For purposes of this rule, "copy" is defined as a mechanical or magnetic reproduction of sound transcribed upon reel to reel tapes, cassettes, cartridges, dictabelts, recording discs, or other similar devices. The definition of "copy" does not include written transcripts. Where the requested program is retained on film or video tape, a copy of the audio or sound track will suffice for purposes of this regulation.

NOTE 2: A request is not actually received until such time as both a written request and advance payment have been received by the licensee or entity.

(e) A licensee or designated entity which provides a copy of an audio recording to a member of the general public pursuant to a request made under these rules may, as a condition precedent, require the party making the request to disclose his or her name and address.

(f) Revenues derived by a licensee or designated entity from fees charged pursuant to paragraph (c) (2) of this section shall not,

(1) Exceed the reasonable costs of complying with paragraph (c) of this section,

(2) Nor shall the revenue be used to subsidize other facets of the licensee's or entity's business operations.

(g) A party who requests the production of a recording pursuant to the provisions of paragraph (c) of this section may require the licensee or designated entity to

(1) Provide a copy of an audio recording that is accurate, complete, intelligible, and capable of being audibly reviewed on playback devices commonly available to the general public, and

(2) Provide an itemized statement of the reasonable costs of making a copy of the requested program.

[FR Doc.75-34900 Filed 12-29-75;8:45 am]

[Docket No. 19790; RM-1680; FCC 75-1338]

PART 91—INDUSTRIAL RADIO SERVICES

Petroleum Radio Service; Expanded Use of Tone and Impulse Signalling

In the matter of amendment of Part 91 of the Commission's Rules to Permit Expanded Use of Tone and Impulse Signalling in the Petroleum Radio Service.

1. On July 23, 1973, the Commission released a Notice of Inquiry and Notice of Proposed Rule Making in the above entitled matter. The Notice was published in the FEDERAL REGISTER on July 30, 1973. (38 FR 20278)

2. In the Notice of Inquiry and Proposed Rule Making, we sought comments on our proposal first, to revise the rules to expand the permissible scope of secondary, point-to-point tone and impulse signalling operations on mobile service frequencies in the Power and more particularly in the Petroleum Radio Service.[1] Secondly, we proposed to implement state-of-the-art digital techniques by reducing the message length permitted from six to two seconds (including any redundancy desired) for new systems, and to provide for signalling techniques, which are not included within the A1, A2, F1, and F2 emission designators, by adding the A9 and F9 designators. In addition, it appeared that this secondary tone and impulse signalling capability could be extended to other land mobile radio services governed by Parts 89,[2] 91, and 93, and our Notice of Inquiry requested information regarding possible adoption of rules to permit secondary point-to-point tone signalling on mobile service frequencies in other services.

3. Comments were filed by Utilities Telecommunications Council (UTC), Central Committee on Communications Facilities of the American Petroleum Institute (API), National Association of Business and Educational Radio, Inc. (NABER), National Association of Manufacturers (NAM), Special Industrial Radio Service Association, Inc. (SIRSA), and the Central Station Electrical Protection Association. Reply comments were filed by Motorola, Inc.

4. We believe that the inquiry phase of the Notice relating to adoption of rules to permit secondary tone and impulse signalling in other radio services requires further study and will be considered at a later date. Therefore, the decisions herein deal with our proposal to revise the existing rules governing the use of tone and impulse signalling in the Power and Petroleum Radio Services.

5. The comments uniformally supported our proposal which would expand the permissible scope of secondary tone and impulse signalling as well as the proposal to add the A9 and F9 emission designators. The comments, however, were divided on our proposal to reduce the permissible message length from six to two seconds.

6. API agreed with our proposal to reduce the transmission length from six to two seconds, but suggested that we allow the message to be repeated a maximum of three times. SIRSA went along with the API comments on this issue. UTC argued, however, that the two-second message length limitation may not be appropriate in the utilities industry. Motorola, Inc., in reply comments, supported UTC's position, but added that this limitation would be appropriate in other services, such as the Business Radio Service. We have considered this issue carefully in light of the arguments presented in the comments, information that has come to our attention since the filing of the comments, and in light of our decisions in the rule making proceeding in Docket 19662[3] based on the comments and information submitted in that proceeding. We have determined that reduction of the message length is appropriate. We reached this conclusion because we believe that the state-of-the-art permits the development of radio equipment capable of performing the functions contemplated within the two-second restriction. Also, we believe that the tighter technical requirements are not only appropriate but necessary in view of our decisions to allow considerable increase in the permissible uses of tone and impulse signalling. Further, a uniform message length limitation across the board would encourage the production of equipment for use in many applications, thereby increasing the availability of equipment, at, hopefully, lower cost. Finally, we want to encourage the development of more efficient equipment for non-voice communications in the land mobile radio services for the more effective and efficient use of land mobile frequencies. Accordingly, the proposal to reduce the transmission length from six to two seconds will be adopted. This decision is consistent with our decision on this issue in Docket 19662 where we considered similar rules for the Public Safety Radio Services.

7. We agree, however, with the comments that the rules should allow these messages to be repeated and we have adopted the suggestion that three repetitions should be allowed. We have also agreed to permit automatic interrogation of outlying stations in view of the extensive use of computerized supervisory and control systems, but we have placed limits suggested in the comments to prevent abuse of this provision. Finally, we have recognized, as we did in Docket 19662, the extensive use of mobile relay systems, particularly on frequencies above 450 MHz, and have included provisions which will allow relay of tone and impulse signals through the higher power mobile relay station of such systems.

[1] The rule changes proposed would permit licensees in the two services to verify status of equipment, adjust operating conditions, correct abnormal conditions, and provide confirmation that the correction has been accomplished.

[2] Docket 19662 covered the expansion of secondary signalling operations under Part 89. Therefore, Part 89 is no longer involved in this proceeding.

[3] "Amendment of Part 89 to Permit Expanded Use of Tone and Impulse Signalling in the Public Safety Radio Services," Report and Order, Docket 19662, released May 14, 1975, 53 FCC 2d 134.

8. In addition, we agree with the comments that the new restrictions should apply to new systems, so as to avoid disruption of existing operations. Accordingly, "grandfather" provisions have been included in the rules which will allow continued operations and expansion of existing systems.

9. In brief, we believe that the rules we are adopting are timely and appropriate and should result in more efficient and effective use of mobile radio systems for tone and impulse signalling purposes. In reaching this conclusion we are not unmindful of the fears expressed by members of the utilities industry that the technical restrictions, particularly the two-second limitations, may inhibit the industry's plans for expanded use of the tone and impulse signalling capability. While nothing has been shown to substantiate those fears, if it is shown by experience that the two-second rule presents that industry with unusual problems, the matters can always be reexamined at a later date. We believe, however, that the anticipated problems can be resolved through technological improvements in equipment and techniques.

10. Finally, as proposed in the Notice, we are deleting the part of § 91.253(b) which says that authorization for F3 emission will be construed to include authority for the transmission of secondary tone and impulse signals. This is being done in order for the Commission to know whether a licensee is using a mobile frequency for a "fixed" operation. New applicants planning to use mobile frequencies secondarily for "fixed" operations will be required to so state on their application. The license issued will reflect this mode of operation by classifying the remote station (alarm site) as operational fixed with a 50 watt power limit and a non-voice emission designator, when appropriate. Licensees requesting renewal will also be required to supply the same information with their renewal application.

11. We have postponed the effective date of the "two second" rule to June 1, 1976, in order to provide manufacturers a reasonable opportunity to dispose of their inventories of non-complying equipment and to allow users to obtain authorizations for planned systems. However, authorizations for non-complying systems will be granted during the interim period only for the type of systems and for the purposes permitted under the previous rules.

12. Accordingly, pursuant to authority contained in Section 4(i) and 303 of the Communications Act of 1934, as amended, *It is ordered*, That effective January 22, 1976, Part 91 of the Commission's Rules is amended, as shown below.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; (47 U.S.C. 154, 303))

Adopted: December 9, 1975.

Released: December 19, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

The introductory text of § 91.252(f) and paragraphs (f) (1) and (2) are revised and paragraphs (f) (6) through (10) are added as follows:

§ 91.252 Availability and use of service.

* * * * *

(f) In the Power Radio Service, fixed (point-to-point) operations may be authorized for tone and impulse signalling on mobile service frequencies above 25 MHz within the area normally covered by the licensee's mobile system subject to the condition that harmful interference is not caused to the primary mobile service operation of any other licensee subject to the following limitations:

(1) The only purposes for which such secondary signalling may be used are:

(i) Indication of failure of equipment or service used in the production, transmission or distribution facilities of the licensee.

(ii) Indication of an abnormal condition in the production, transmission, or distribution facilities of the licensee, which if not promptly corrected would result in failure of the equipment affected.

(iii) Transmission from the point where alarms or other operational data are received as may be necessary to (a) verify status of equipment or processes (b) verify or adjust operating conditions (c) restore lost service (d) place standby equipment in operation or (e) to correct any abnormal conditions which would otherwise result in the immediate or continued failure in the production, transmission, or distribution facilities of the licensee.

(iv) Confirmation of status, or operating conditions, or that an operation or correction intended to be accomplished in paragraph (f) (1) (iii) of this section has occurred.

(2) For systems authorized after June 1, 1976, each transmission for any one alarm, warning, corrective action or requirement, positive confirmation, check-back, or other purpose set forth in paragraph (f) (1) of this section, shall be limited to a maximum duration of two seconds and shall not be repeated more than five times. For systems authorized prior to June 1, 1976, any one alarm or warning may be transmitted a maximum of five times and each transmission may not exceed six seconds.

* * * * *

(6) Systems employing automatic interrogation techniques shall not be activated for this purpose more than ten seconds out of any sixty second period. This 10 second time frame includes both transmit and response time.

(7) The plate power input to the final radio frequency stage of the remote transmitter (operational fixed) shall not exceed 50 watts.

(8) Only A1, A2, A9, F1, F2, or F9 emissions will be authorized.

(9) Operational fixed stations licensed under the provisions of this paragraph are exempt from the requirements of §§ 91.54(e) (2), 91.107(c) and § 91.152.

(10) Any operational fixed station authorized under the provisions of this paragraph shall be equipped with a device which will automatically de-activate the transmitter and require manual reset in the event the carrier of such transmitter remains on for a period in excess of three minutes.

2. Section 91.253(b) is revised and paragraph (c) is reserved as follows:

* * * * *

§ 91.253 Station limitations.

(b) Base, mobile relay, or mobile stations licensed in this service on frequencies above 25 MHz may transmit secondary tone or impulse signals to receivers at fixed locations subject to the conditions, and for the purposes set forth in Section 91.252(f).

(c) [Reserved]

* * * * *

3. Section 91.302 (d), (d) (1) and (2) are revised, and subparagraphs (6), (7), (8), (9) and (10) are added to read as follows:

§ 91.302 Availability and use of service.

* * * * *

(d) In the Petroleum Radio Service fixed (point-to-point) operations may be authorized for tone and impuse signalling on mobile service frequencies above 25 MHz within the area normally covered by the licensee's mobile system subject to the condition that harmful interference is not caused to the primary mobile service operation of any other licensee subject to the following conditions:

(1) The only purposes for which each secondary signalling may be used are:

(i) Indication of failure of equipment or service in the production, collection, refinery, or transportation facilities of the licensee.

(ii) Indication of an abnormal condition in the production, collection, refinery, or transportation facilities of the licensee which if not promptly corrected would result in failure of the equipment affected.

(iii) Transmission from the point where alarms or other operational data are received as may be necessary to (a) verify status of equipment or processes (b) verify or adjust operating conditions or (c) to correct any abnormal conditions which would otherwise result in the immediate or continued failure in the production, collection, refinery, or transporting facilities of the licensee.

(iv) Confirmation of status, or operating conditions, or that an operation or correction intended to be accomplished in paragraph (d) (1) (iii) of this section has occurred.

(2) For systems authorized after June 1, 1976, to be used for the purposes outlined in paragraph (d) (1) of this section, the maximum duration of any one transmission may not exceed two seconds and shall not be transmitted more than three times. For systems authorized prior to this date, any one alarm or warning may be transmitted a maximum of five times and each transmission may not exceed six seconds.

* * * * *

V40250 DEC 30 75 XUM V

(6) Systems employing automatic interrogation techniques shall not be activated for this purpose more than ten seconds out of any sixty second period. This 10 second time frame includes both the transmit and response times.

(7) The plate power input to the final radio frequency stage of the remote transmitter (operational fixed) shall not exceed 50 watts.

(8) Only A1, A2, A9, F1, F2, or F9 emissions will be authorized.

(9) Operational fixed stations licensed under the provisions of this paragraph are exempt from the requirements of §§ 91.54(e)(2), 91.107(c), and § 91.152.

(10) Any operational fixed station authorized under the provisions of this paragraph shall be equipped with a device which will automatically de-activate the transmitter and require manual reset in the event the carrier of such transmitter remains on for a period in excess of three minutes.

4. Section 91.303(b) is revised to read as follows:

§ 91.303 Station limitations.

* * * * *

(b) Base, mobile relay, or mobile stations licensed in this service on frequencies above 25 MHz may transmit secondary tone or impulse signals to receivers at fixed locations subject to the conditions and for the purposes set forth in § 91.302(d).

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

[Amdt. No. 6 to Revised Service Order No. 995]

PART 1033—CAR SERVICE

Appointment of Embargo Agents

DECEMBER 23, 1975.

At a Session of the INTERSTATE COMMERCE COMMISSION, Division 3, held in Washington, D.C., on the 19th day of December, 1975.

Upon further consideration of Revised Service Order No. 995 (35 F.R. 7016; 36 F.R. 23726; 37 F.R. 28301; 38 F.R. 35002; and 39 F.R. 44011), and good cause appearing therefor:

It is ordered, That:

Revised Service Order No. 995 be, and it is hereby amended by revising paragraph (f) as follows:

§ 1033.995 Appointment of Embargo Agents.

* * * * *

(f) *Expiration date.* This order shall expire at 11:59 p.m., December 31, 1976, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., December 31, 1975.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That copies of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Division 3.

[SEAL] ROBERT L. OSWALD, *Secretary.*

PART 1033—CAR SERVICE

CAR DISTRIBUTION DIRECTIONS

Appointment of Agents

DECEMBER 23, 1975.

At a Session of the Interstate Commerce Commission, Division 3, held in Washington, D.C., on the 19th day of December, 1975.

Upon further consideration of Revised Service Order No. 1002 (35 F.R. 7016; 36 F.R. 23803; 37 F.R. 28301; 38 F.R. 35002; and 39 F.R. 44011), and good cause appearing therefor:

It is ordered, That:

Revised Service Order No. 1002 be, and it is hereby amended by revising paragraph (d) as follows:

§ 1033.1002 Car Distribution Directions—Appointment of Agents.

* * * * *

(d) *Expiration date.* This order shall expire at 11:59 p.m., December 31, 1976, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., December 31, 1975.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That copies of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Division 3.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Customs Service

[19 CFR Part 1]

CUSTOMS FIELD ORGANIZATION

Notice of Proposed Changes in Customs Region IX

A survey of the Customs activity at Mackinac Island, Michigan, in the Detroit, Michigan, Customs district (Region IX), indicates that the volume of traffic no longer justifies its retention as a Customs station.

Accordingly, notice is hereby given that, by virtue of the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR Ch. II), and pursuant to the authority provided by Treasury Department Order No. 165, Revised (T.D. 53654, 19 FR 7241), as amended, it is proposed to revoke the designation of Mackinac Island, Michigan, in the Detroit, Michigan, Customs district (Region IX), as a Customs station.

Prior to the adoption of the foregoing proposal, consideration will be given to any relevant data, views, or arguments which are submitted to the Commissioner of Customs, Attention: Regulations Division, Washington, D.C. 20229, and received not later than January 29, 1976.

Written material or suggestions submitted will be available for public inspection in accordance with section 103.8 (b) of the Customs Regulations (19 CFR 103.8(b)), at the Regulations Division, Headquarters, United States Customs Service, Washington, D.C., during regular business hours.

LEONARD LEHMAN, *Acting Commissioner of Customs.*

Approved: December 17, 1975.

DAVID R. MACDONALD, *Assistant Secretary of the Treasury.*

[19 CFR Part 12]

SPECIAL CLASSES OF MERCHANDISE

Importation of Motor Vehicles and Motor Vehicle Equipment; Extension of Time

DECEMBER 22, 1975.

Notice of proposed amendments to Part 12 of the Customs Regulations (19 CFR Part 12), to make certain substantive changes in the procedures established for the entry of motor vehicles and motor vehicle equipment subject to the Federal motor vehicle safety standards, was published in the FEDERAL REGISTER on November 20, 1975 (40 FR 54002). Pursuant to that notice, the public was given until December 22, 1975, to submit data, views or arguments pertaining to the proposed amendments.

Requests have been received for an extension of the time for the submission to submit data, views, or arguments persubmission of data, views, or arguments with respect to the cited amendments is extended to January 22, 1976.

G. R. DICKERSON, *Acting Commissioner of Customs.*

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[25 CFR Part 221]

OPERATION AND MAINTENANCE CHARGES

Wind River Irrigation Project, Wyoming

Basis and Purpose. Notice is hereby given that pursuant to the authority contained in the Acts of Congress approved August 1, 1914 (38 Stat. 583), and March 7, 1928 (45 Stat. 210), and by virtue of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs (Order No. 2508; 14 FR 258), and virtue of the authority delegated by the Commissioner of Indian Affairs to the Area Director 14 IAM 3.1 (34 FR 637, January 16, 1969), and by authority delegated to the Project Engineer and to the Superintendent by the Area Director June 1, 1969, Release 10–2, 10 IAM 7.2, § 2.70, notice is hereby given of the intention to modify § 221.95 of Title 25, Code of Federal Regulations, dealing with the irrigable lands of the Wind River Irrigation Project, Wyoming.

The purpose of this amendment is to raise the operation and maintenance assessment charges of the Diminished Wind River Irrigation Project for the 1976 irrigation season and subsequent seasons until further notice.

It is also the purpose of this amendment to eliminate all reference to the Big Bend Drainage District and the annual assessment per acre due this District. A court order dated October 3, 1975, to dissolve this District has been issued with the result that all expenses hereafter necessary to maintain the facilities of the Big Bend Drainage District, which are within the Ceded Wind River Irrigation Project, also known as the LeClair Irrigation District, will be borne by the Ceded Wind River Irrigation District.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rule making process. Accordingly, interested persons may submit written comments, suggestions or objections with respect to the proposed amendment to the Superintendent, Bureau of Indian Affairs, Fort Washakie, Wyoming 82514, on or before January 29, 1976.

Section 221.95 is amended to read as follows:

§ 221.95 Charges.

In compliance with the provisions of the acts of August 1, 1914, and March 7, 1928 (38 Stat. 583, 25 U.S.C. 385; 45 Stat. 210, 25 U.S.C. 387), the operation and maintenance charges for the lands under the Wind River Irrigation Project, Wyoming, for the calendar year 1976 and subsequent years until further notice, are hereby fixed at $5.60 per acre for the assessable area under the constructed works on the Diminished Wind River Project and at $4.20 per acre for all irrigable trust patent Indian Land which lies within the Ceded Wind River Project.

CLYDE W. HOBBS, *Superintendent, Wind River Agency.*

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Parts 91, 121, 123, 135]

[Docket No. 9481; Reference Notice No. 72-17]

LANDING MINIMUMS

Withdrawal of Notice of Proposed Rule Making

The purpose of this notice is to withdraw Notice 72-17 (37 FR 14406; July 20, 1972) in which the FAA solicited comments on proposed amendments to Parts 91, 121, and 135 of the Federal Aviation Regulations that would establish criteria for the commencement of instrument approaches and update and clarify the requirements applicable to the instrument landing procedures.

The FAA received 159 public comments in response to Notice 72-17. One hundred and eleven commentators expressed opposition to some or all of the proposals.

A large number of commentators objected to the prohibition in proposed § 91.116(b) against making a "look-see" approach when the reported visibility is less than the prescribed minimum. The reasons given were numerous.

Several commentators found it inconsistent to permit the pilot to make an approach at airports which have no weather reports (and normally also have fewer approach aids) but, on the other hand, to deny him this privilege at airports which have official weather reports and which in many cases have more approach aids. Others contended that it would encourage the use of airports with less sophisticated equipment.

Many commentators felt that the proposal would be an unnecessary restriction on qualified pilots. A number contended that the unsafe pilot cannot be legislated against and that the answer is education.

One commentator asserted that, in light of the serious deficiencies in present weather observing and reporting facilities and services, instrument-rated pilots operating under Part 91 should be permitted to make an approach to the minimum descent altitude (MDA) or decision height (DH), regardless of the presence or absence of official weather observations. A number of commentators challenged the validity of weather reports by ground observers. Among other things, they expressed the opinion that flight visibility as observed from the cockpit during an approach is more representative of actual conditions in the runway approach area than that of a ground observer.

For similar reasons, objections were also raised to not allowing a "look-see" approach for aircraft operated under Part 135. Some commentators contended that this would be especially burdensome in Alaska where the alternate airport may be a considerable distance from the airport of intended landing.

Several commentators recommended that the list of visual cues referred to in the proposed revision of §§ 91.6 and 91.116, the sighting of one of which would allow the pilot to descend below authorized DH or MDA, should be expanded.

Other commentators recommended that an exception be made to the prohibition against a "look-see" to allow training flights to be conducted to MDA or DH when the reported weather is below minimums but there is no intent to land.

In the light of all the comments received in response to Notice 72-17, it is clear that the proposed amendments require further study before any further rulemaking action can be initiated. Accordingly, the FAA has determined that rulemaking action on the proposed amendments would not be appropriate at this time, and that Notice 72-17 should be withdrawn.

Withdrawal of this notice constitutes only such action and does not preclude the FAA from issuing other notices in the future or commit the FAA to any course of action in the future.

This withdrawal is issued under the authority of sections 313(a) and 601 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a) and 1421), and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, the notice of proposed rule making published in the FEDERAL REGISTER June 20, 1972 (37 FR 14406), and circulated as Notice No. 72-17 entitled "Landing Minimums" is hereby withdrawn.

Issued in Washington, D.C., on December 19, 1975.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

CIVIL AERONAUTICS BOARD

[14 CFR Part 241]

[EDR-291A; Docket 28517]

UNIFORM SYSTEM OF ACCOUNTS AND REPORTS FOR CERTIFICATED AIR CARRIERS

Updating the Accounting Provisions; Supplemental Notice of Proposed Rulemaking

DECEMBER 23, 1975.

The Board, by circulation of Notice of Proposed Rulemaking, EDR-291, dated November 19, 1975, published at 40 FR 54813, November 26, 1975, gave notice that it has under consideration an amendment of Part 241 of its Economic Regulations (14 CFR 241). The amendment would update the accounting provisions to recognize changes in accounting principles and developments in air transportation. Interested persons were invited to participate by submission of twelve (12) copies of written data, views or arguments to the Docket Section of the Board on or before December 26, 1975.

United Air Lines, Inc., by telephone request on December 22, 1975 (confirmed by written request on December 23, 1975), has requested a two week extension of the time within which to file comments, on the grounds that, because of its recent strike, it has now become apparent that United will be unable to file its comments by the due date.

The undersigned finds that good cause has been shown for an extension of the time for filing comments.

Accordingly, pursuant to the authority delegated in Section 385.21(d) of the Board's Organization Regulations (14 CFR Part 385), the undersigned hereby extends the time for submitting comments to January 5, 1976. (Sec. 204(a) of the Federal Aviation Act, as amended, 72 Stat. 743, 49 U.S.C. 1324.)

[SEAL] SIMON J. EILENBERG,
Acting Associate General Counsel,
Rules Division.

[FR Doc.75-35059 Filed 12-29-75;8:45 am]

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

[29 CFR Part 1601]

706 AGENCIES

Proposed Designation

Pursuant to § 1601.12(i), Title 29, Chapter 14 to the Code of Federal Regulations as revised and published in the FEDERAL REGISTER, 40 FR 3210M, March 7, 1975, the Equal Employment Opportunity Commission (hereinafter referred to as the Commission) proposes that the agencies listed below be designated as "706 Agencies" (§ 1601.12(c)). There are three (3) purposes for such designation: first, that the agencies receive charges deferred by the Commission pursuant to section 706 (c) and (d) of Title VII of the Civil Rights Act of 1964, as amended; second, that the Commission accord "substantial weight" to the final findings and orders of those agencies pursuant to § 1601.19b(e); and third, to commence the 15-day period within which any person or organization may file written comments as provided for under § 1601.12(i)(1). At the expiration of the 15-day period, the Commission may effect designation of each of the agencies by publishing the list of them as an amendment to § 1601.12(m). Additions to the list may be made by the Commission by similar notice and publication. The proposed "706 Agencies" are as follows:

Allentown (Pennsylvania) Human Relations Commission
Charleston (West Virginia) Human Rights Commission
Fairfax County (Virginia) Human Rights Commission
Montgomery County (Maryland) Human Relations Commission
Pittsburgh (Pennsylvania) Commission on Human Relations
Wheeling (West Virginia) Human Rights Commission

(Sec. 713(a), 78 Stat. 265 (42 U.S.C. 2000e-12(a)))

Written comments pursuant to this notice must be filed with the Commission on or before January 23, 1976.

Signed at Washington, D.C. this 22nd day of December 1975.

LOWELL W. PERRY,
Chairman, Equal Employment Opportunity Commission.

[FR Doc.75-35030 Filed 12-29-75;8:45 am]

FEDERAL TRADE COMMISSION

[16 CFR Part 440]

HEARING AID INDUSTRY

Final Notice Regarding Proposed Trade Regulation Rule

On June 24, 1975, the Commission published in the FEDERAL REGISTER (40 FR 26646) an Initial Notice of a proposed trade regulation rule for the hearing aid industry pursuant to the Federal Trade Commission Act, as amended, 15 U.S.C. 41, et seq., the provisions of Part 1, Subpart B of the Commission's Procedures and Rules of Practice, 16 CFR 1.7, et seq., and § 553 of Subchapter II, Chapter 5, Title 5 of the U.S. Code (Administrative Procedure).

Now, pursuant to the same authority and more specifically to the authority of § 1.12 of the Commission's Procedures and Rules of Practice, the undersigned duly appointed Presiding Officer for this proceeding hereby gives Final Notice of proposed rulemaking, incorporating by reference the contents of the Initial Notice described above, including the proposed rule contained therein.

Written Comments. All interested persons are hereby notified that they may submit written data, views or arguments on any issue of fact, law, policy or discretion which may have some bearing upon the proposed rule. Such comments should be addressed to G. Martin Shepherd, Presiding Officer, Federal Trade Commission, Washington, D.C. 20580 no later than February 27, 1976. To assure prompt consideration comments should be identified as "HEARING AID INDUSTRY COMMENT" and submitted, if at all possible, in five copies.

Public hearing dates and places. Notice is also given that public hearings on the proposed rule will be held at the locations set forth below commencing on the dates and times specified at each location:

1. Public hearings will commence on April 12, 1976 at 9:45 a.m. in Washington, D.C.:

Room 332, Federal Trade Commission Building, 6th and Pennsylvania Avenue, N.W., Washington, D.C.

Persons desiring to present their views orally in Washington, D.C., should so inform the Commission representative listed below not later than March 22, 1976:

Mr. Steven D. Newburg-Rinn [(202) 724-1483)], Bureau of Consumer Protection, Division of National Advertising, Federal Trade Commission, Washington, D.C. 20580.

2. Public hearings will be held commencing on June 7, 1976 at 9:45 a.m. in Chicago, Illinois:

Room 347 A-B, John C. Kluczynski Federal Building, 230 South Dearborn Street, Chicago, Illinois.

Persons desiring to present their views orally in Chicago should so inform the Commission representative listed below not later than May 17, 1976:

Mr. Richard J. Toman [(312) 353-4430], Federal Trade Commission, Suite 1437, 55 East Monroe Street, Chicago, Illinois 60603.

3. Public hearings will be held commencing on August 2, 1976 at 9:45 a.m. in San Francisco, California:

Room 12138, Federal Building, 450 Golden Gate Avenue, San Francisco, California.

Persons desiring to present their views orally in San Francisco should so inform the Commission representative listed below not later than July 12, 1976:

Mr. Fred Austin [(415) 556-1270], Federal Trade Commission, 450 Golden Gate Avenue, San Francisco, California 94102.

INSTRUCTIONS TO WITNESSES

All prospective witnesses are advised that reasonable limitations on the time allotted to any person may be imposed and that these time periods may vary from witness to witness depending upon all the circumstances, including the needs of each witness, the complexity of the expected testimony, the number of parties represented by each witness and the cumulative nature of expected testimony. Witnesses will be expected to stay within the time allotted for their remarks and the Presiding Officer may allocate additional time for questioning. To the extent that individual views are not unduly suppressed, individual members of interested groups are encouraged to make their views known through group representatives. As a general rule, witnesses are expected to confine their prepared remarks to twenty minutes or less, unless an exception has been made, and to develop their testimony at greater length through their written submissions. Witnesses are entitled to testify only at one hearing site.

Persons wishing to deliver prepared statements are required to file such statements with the appropriate Commission representative listed above no later than March 22, 1976 for those witnesses appearing in Washington, D.C.; no later than May 17, 1976 for those witnesses appearing in Chicago, Illinois; and no later than July 12, 1976 for those witnesses appearing in San Francisco. If at all possible, witnesses should furnish ten copies of their statements. Any witness not intending to deliver a statement fully prepared in advance is required to file with the designated Commission representative (by the same date set forth above for the filing of written statements at the location where he expects to appear) a written detailed and comprehensive outline explaining the nature of his expected testimony including, but not limited to, a statement of each important fact, observation, conclusion, or opinion he anticipates presenting.

Advance submittal of statements and exhibits is required to apprise other interested parties of expected testimony so they may determine on the need for examination, including cross-examination, or rebuttal submissions. Such submittals will be made available for viewing by the Commission representatives designated above at the location where the witness intends to appear.

The Presiding Officer retains the discretion to require that any oral presentation be submitted in writing in advance of presentation and to deny the right to present oral testimony to any person who fails to file appropriate statements or comply with the advance notification requirements of this Notice.

Prospective witnesses who plan to introduce documents or other written evidence as exhibits to their statements must furnish such documents or written evidence, properly identified with the witness' name and sequential number (i.e., Jackson Exhibit-1), by the same dates set out above for the filing of expected testimony, depending on the location at which the witness intends to appear, unless for good cause shown they can demonstrate why this could not have been done at that time.

All prospective witnesses may and, indeed, are encouraged to direct their statements towards any question of fact, law, policy or discretion relevant to the proposed rule, and, in this regard, the usual rules of evidence applicable to litigated proceedings will not apply. However, all prospective witnesses are advised that to the extent their statements may bear upon any of the designated issues set forth below, or to be later designated, they may be subject to limited cross-examination as to those issues by representatives of other interested parties, as designated by the Presiding Officer, or to cross-examination by the Presiding Officer on behalf of such representatives, or to direct rebuttal submissions. All witnesses will be subject to direct examination by the Presiding Officer and, subject to his control, to examination by such interested parties as he may within his discretion permit. Oral presentations will not be under oath unless the Presiding Officer expressly so provides.

DESIGNATED ISSUES

Set forth below are the issues which the Presiding Officer has determined to designate under § 1.13(d)(1) of the Commission's procedures and rules of practice as issues to be considered in accordance with § 1.13(d)(5) and (6) of said Procedures and Rules of Practice. Pursuant to statute and the Commission's rules of practice, testimony with respect to these issues may entitle designated representatives of other interested parties to conduct or have conducted such cross-examination as the Presiding Officer may determine to be appropriate and required for a full and true disclosure with respect to any issue so designated. In the alternative, the Presiding Officer may determine that full and true disclosure as to any issue may be achieved through rebuttal submissions or the presentation of additional oral or written statements.

The Presiding Officer may at any time on his own motion or pursuant to a written petition by interested persons, add to or modify any issues listed. No such petition shall be considered unless good cause is shown why such issue was not proposed during the time specified in the Initial Notice.

Interested persons who desire to avail themselves of the procedures described above with respect to designated issues must, by January 26, 1976, notify the Presiding Officer in writing of their particular interest with respect to each issue designated, including a general statement of their position with respect to such issues. In the event new issues are added interested persons must promptly notify the Presiding Officer to their particular interest with respect to each such issue in the same manner. Request to examine, including cross-examine, or to present rebuttal submissions, shall be accompanied by a specific justification therefor.

Before the hearings commence, the Presiding Officer will identify groups of persons with the same or similar interests in the proceeding. Such groups will be required to select a single representative for the purpose of examination, including cross-examination, and, if unable to agree, the Presiding Officer may select a representative of each such group. Any member of a group who is unable to agree upon group representation after a good faith effort to do so, and who seeks to present substantial and relevant issues which will not be adequately presented by the group representative, may be allowed to conduct or have conducted any

2. All written comments: February 27,

V 40 250 DEC 30 75 XUM

examination, including cross-examination, or rebuttal submissions, to which he is entitled on issues designated for consideration in accordance with this Notice.

GENERAL ISSUES

1. As relevant to the Proposed Rule, what are the sales techniques employed by sellers (at any and/or all levels of distribution) in connection with the offering for sale and/or sale of hearing aids? In what respects could such techniques have the capacity or tendency to deceive consumers, and how might such techniques be unfair to consumers? How prevalent are such techniques?

2. How are hearing aid sellers trained, motivated, and controlled? How does that training, motivation, and control bear on whether consumers are subjected to selling abuses or whether consumers purchase hearing aids that provide no significant benefit?

3. In connection with the offering for sale and sale of hearing aids, are existing consumer protection measures (including, but not limited to those relating to cooling off periods) adequate to protect purchasers?

4. What will be the economic effect of the Rule, taking into account the effects on small business and consumers?

BUYER'S RIGHT TO CANCEL (§ 440.4)

5. Do a significant number of consumers buy hearing aids from which they receive no significant benefit (or no significant additional benefit if they are current hearing aid users buying a second hearing aid or a "better" hearing aid)?

6. Is it necessary for a significant number of prospective hearing aid buyers to wear the selected hearing aid in a representative variety of actual use situations before it can be determined whether a significant benefit (or a significant additional benefit) will in fact be received?

7. Are there a significant number of prospective hearing aid buyers who cannot determine the relative importance to themselves of the advantages and limitations of a hearing aid without wearing the selected hearing aid in a representative variety of actual use situations?

8. Are the "cancellation charges" permitted by § 440.4(g)(1) high enough to effectively discourage casual or frivolous cancellations?

9. What would be an appropriate 30 day cancellation charge in situations where the sale of two hearing aids (one for each ear) is involved?

SELLING TECHNIQUES (§ 440.7)

10. Do "master hearing aids" or similar devices perform in a materially different manner from the actual performance (in actual use situations) of the hearing aids sold to consumers? To what extent are "master hearing aids" or similar devices utilized to demonstrate the performance a consumer can expect from a hearing aid? (§ 440.7(a))

11. Will the requirement that a seller obtain express written consent from prospective hearing air buyers, prior to making visits to their homes or places of business (for the purpose of selling hearing aids) enhance the ability of such buyers to protect themselves against deceptive or unfair acts or practices (including high pressure sales tactics) which might be used by the seller? (§ 440.7(b))

12. Does failure to disclose previous use of a hearing aid have the capacity or tendency to mislead consumers as to a fact material to them in making their decision as to whether to purchase the particular hearing aid? (§ 440.7(c))

13. Does the offering of a hearing test, without disclosure at the outset that the tester is a seller of hearing aids and may attempt to sell a hearing aid to the person being tested, have the capacity or tendency to mislead consumers as to (a) the status of the person doing the testing and/or (b) the true nature or purpose of the offer and test? (§ 440.7(d))

14. Does an advertisement which is not readily recognizable as an advertisement by the audience to whom it is addressed have the capacity or tendency to mislead consumers as to the nature and/or purpose of the communication? (§ 440.7(e))

PROHIBITED REPRESENTATIONS CONCERNING HEARING AID SELLERS (§ 440.8)

15. Does a representation by a seller of hearing aids (concerning hearing or hearing aids), without disclosure that such person is in fact a seller, have the capacity or tendency to lead consumers to believe (a) that such representation is not designed to effect the sale of a hearing aid, or (b) that the person making such representation is financially disinterested with respect to the matters covered in the representation? (§ 440.8(a))

16. Does the use of the terms set forth by way of example in § 440.8(b) have the capacity or tendency to lead consumers to believe that the organization being described is something other than a retail sales outlet (i.e., a governmental or other public service organization or a nonprofit medical, educational, or research institution)? (§ 440.8(b))

17. Does the representation that a seller of hearing aids (or the seller's employee, agent, salesperson, representative, or associate) is a physician or audiologist, when such is not the fact, have the capacity or tendency to mislead consumers as to (a) the training, skill, knowledge, specialty, and/or experience of such person, or (b) the nature of the enterprise engaged in by any such person? (§ 440.8(c) and (d))

18. Do the terms "counselor" and/or "consultant" have the capacity or tendency to lead consumers to believe that the individual so described can be relied upon to provide an expert and financially disinterested recommendation as to what should be done to deal with the consumer's perceived hearing problem? (§440.8(e))

PROHIBITED REPRESENTATIONS CONCERNING HEARING AIDS (§ 440.9)

19. Will any hearing aid restore or help restore normal or natural hearing, or enable wearers to hear sounds normally or naturally? (§ 440.9(a))

20. Do the expressions set forth by way of example in § 440.9(b) have the capacity or tendency to lead consumers to believe that any hearing aid will reverse, halt or retard the progression of hearing loss, or will help to do so? (§ 440.9(b))

21. Does the word "new", when used to describe hearing aid models, or features thereof, which have been on the market for more than one year, have the capacity or tendency to mislead consumers? (§ 440.9(c))

22. Do representations that a hearing aid possesses a general or specific feature or characteristic, or that it embodies any particular concept or principle, have the capacity or tendency to lead consumers to believe that (with respect to such feature, characteristic, concept, or principle) the advertised hearing aid will (a) provide some significant benefit(s) to the wearer (b) regardless of the wearer's particular type of hearing impairment? (§ 440.9(e))

23. Do representations in which a particular hearing aid is being compared to any other hearing aid(s) have the capacity or tendency to (a) mislead consumers as to what hearing aid(s) the particular hearing aid is being compared to when the representation is in the form of a dangling (incomplete) comparison; or (b) lead consumers to believe that the particular hearing aid is superior with respect to any characteristic being compared? (§ 440.9(e)(6))

24. Do representations that a hearing aid model is unique, special, or revolutionary, with respect to some particular characteristic, have the capacity or tendency to lead consumers to believe that the advertised model is being compared to all other hearing aid models with respect to such characteristic? (§ 440.9(f))

25. When a hearing aid is represented as being "smaller" than other hearing aids, would the fact that it produces sound of less quality and range than those with which it is being compared be a material fact which might influence the potential purchaser's decision of whether to purchase it? (§ 440.9(g))

26. Do the terms "prescribe" and "prescription" when used in connection with hearing aids, have the capacity or tendency to mislead consumers as to the extent to which hearing aids can correct hearing loss? (§ 440.9(h))

27. Do the words and phrases set forth by way of example in § 440.9(j), when used to describe a hearing aid or part thereof, have the capacity or tendency to lead consumers to believe that the hearing aid, or part thereof, so described is hidden or cannot be seen? (§ 440.9(j))

28. Do the words and phrases set forth by way of example in § 440.9(k) have the capacity or tendency to lead consumers to believe that the hearing aid so described can be worn without any visible cord or wire? (§ 440.9(k))

29. Do the words and phrases set forth by way of example in § 440.9(l) have the capacity or tendency to lead consumers to believe that the hearing aid so described can be worn without any button or other receiver in the ear? (§ 440.9(l))

30. Can any hearing aid or feature thereof enable the wearer to eliminate all or most unwanted noises? (§ 440.9(m))

31. What effect does a representation that a hearing aid can operate without batteries have on consumer beliefs or perceptions as to the operation of the particular hearing aid? (§ 440.9(n))

ADVERTISING REPRESENTATIONS THAT MUST BE QUALIFIED (§ 440.10)

32. Would many of those who think they have a hearing problem (and, therefore, might buy a hearing aid) not be able to receive any significant benefit from the use of any hearing aid? (§ 440.10(a))

33. Would many of those who can benefit from the use of a hearing aid still have difficulty understanding conversation in noisy situations? (§ 440.10(b))

34. Would many of those who can benefit from the use of a hearing aid still have difficulty understanding conversation in group situations? (§ 440.10(c))

35. Would many persons with a hearing loss in both ears fail to receive greater benefits from the use of two hearing aids, one in each ear, than from the use of one hearing aid? (§ 440.10(d))

SUMMARY OF CLOSING DATES

1. Notification of interest; January 26, 1976.

2. All written comments; February 27, 1976.

3. Witnesses' prepared statements (or comprehensive summaries) and exhibits for:

(a) Washington, D.C. hearing; March 22, 1976;

(b) Chicago hearing; May 17, 1976;

(c) San Francisco hearing; July 12, 1976.

SUMMARY OF HEARING DATES

1. Washington, D.C.; April 12, 1976.
2. Chicago, Illinois; June 7, 1976.
3. San Francisco, California; August 2, 1976.

Issued: December 23, 1975.

G. MARTIN SHEPHERD,
Presiding Officer.

EUROTIME

Application for Recordation of Trade Name

Application has been filed pursuant to section 133.12, Customs Regulations (19 CFR 133.12), for recordation under section 12 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name EUROTIME used by Eurotime Corporation, a corporation organized under the laws of the State of New York, located at 212 Fifth Avenue, New York, New York 10010.

The application states that the trade name is applied to watches and clocks and components for each, manufactured in Switzerland, West Germany, France and Hong Kong. The application states further that no foreign person, partnership, association or corporation is authorized to use the trade name sought to be recorded. Appropriate accompanying papers were submitted with the application.

Before final action is taken on the application, consideration will be given to any relevant data, views, or arguments submitted in writing by any person in opposition to the recordation of this trade name. Any such submission should be addressed to the Commissioner of Customs, Washington, D.C. 20229, in time to be received not later than January 28, 1976.

Notice of the action taken on the application for recordation of the trade name will be published in the FEDERAL REGISTER.

LEONARD LEHMAN,
Assistant Commissioner, Regulations and Rulings.

Internal Revenue Service

[Order No. 112 (Rev. 3)]

DISTRICT DIRECTORS OF REVENUE

Authority To Issue Determination Letters Relating to Employee Plans Matters

Pursuant to authority vested in the Commissioner of Internal Revenue by Treasury Department Order No. 150-37, dated March 17, 1955, there is hereby delegated to the District Director of Internal Revenue for each of the Key Districts for Employee Plans and Exempt Organizations matters the authority to:

(1) Issue determination letters involving the provisions of sections 401, 405, and 501(a) of the Internal Revenue Code of 1954 with respect to:

(a) Initial qualification of stock bonus, pension, profit-sharing, annuity, and bond purchase plans;

(b) Initial exemption from Federal income tax under section 501(a) of trusts forming a part of such plans, provided that the determination does not involve application of section 502 (feeder organizations) or section 511 (unrelated business income), or the question of whether a proposed transaction will be a prohibited transaction under section 503;

(c) Compliance with the applicable requirements of foreign situs trusts as to taxability of beneficiaries (section 402(c)) and deductions for employer contributions (section 404(a)(4)); and

(d) Amendments, curtailments, or terminations of such plans and trusts.

(2) Issue determination letters involving the provisions of section 408(c) of the Internal Revenue Code of 1954 with respect to exemption from Federal income tax under section 408(e) of trusts creating individual retirement accounts.

(3) Issue determination letters with respect to whether a plan consitutes and employee stock ownership plan as contemplated in section 46(a)(1)(B) of the Internal Revenue Code of 1954.

(4) Issue modifications or revocations of determination letters described above.

(5) Redelegate this authority as follows:

(a) With respect to issuance and modification of determination letters, not below Internal Revenue Agent and Tax Law Specialist, GS-12, provided such individual is a person other than the initiator.

(b) With respect to revocation of determination letters, not below Chief, Employee Plans and Exempt Organizations Division.

Delegation Order No. 112 (Rev. 2) issued June 9, 1975, is hereby superseded.

Effective: November 19, 1975.

DONALD C. ALEXANDER,
Commissioner.

Office of the Secretary of Defense

DEFENSE SCIENCE BOARD TASK FORCE ON NET TECHNICAL ASSESSMENT

Advisory Committee Meeting

The Defense Science Board Task Force on "Net Technical Assessment" will meet in closed session on 28-29 January 1976 at the Central Intelligence Agency, Langley, Virginia.

The overall mission of this Task Force is to advise the Secretary of Defense and the Director of Defense Research and Engineering on US/USSR overall research and engineering technology programs and to provide guidance for US technology exploitation in these areas to the Department of Defense.

The Task Force will examine in detail the important problem of determining critical intelligence technical requirements of the Department of Defense, the ways in which answers to these requirements would influence future US R&D/operational actions, any time urgency associated with the requirements and collection methods for satisfying these requirements.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Task Force meeting concerns matters listed in Section 552(b) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

Dated: December 23, 1975.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Serial No. F-21416]

ALASKA

State of Alaska Department of Public Works Application for Airport Lease

Notice is hereby given that pursuant to the Act of May 24, 1928 (49 U.S.C. 211-214) the State of Alaska, Department of Public Works, Division of Aviation, has applied for an airport lease for the following land:

T. 4 N., R. 9 W., Fairbanks Meridian, Alaska

Sections 22, 27, and 28: Protracted.

Commencing at corner No. 3 of U.S. Survey No. 4469, Alaska, proceed N. 58°45'00" W. along survey line 1-2 of U.S. Survey No. 4455D, Alaska, a distance of 955.30 feet to a point, being monumented with an ADA ½ inch aluminum capped rebar, proceed S. 42°06'10" W. a distance of 1,134.33 feet to the TRUE POINT OF BEGINNING, monumented with an ADA 2 inch brass capped galvanized pipe, identified as Station 80+00 of the New Minto Airport runway centerline; thence S. 47°53'50" E. a distance of 750.00 feet to a point; thence S. 42°06'10" W. a distance of 4,368.29 feet more or less, to a point of intersection with the northeasterly right-of-way boundary line of the proposed New Minto Road according to BLM Right-of-Way F-19404.

Thence around a curve to the right, with a center angle of 118°36'28", a tangent of 2,244.36 feet, a radius of 1,332.40 feet and a deflection angle of 04°00'00"; an arc distance of 1,268.30 feet to a point; thence continuing N. 26°43'44" W. along the northeasterly right-of-way boundary line of the said proposed New Minto Road a distance of 306.65 feet to a point; thence N. 42°06'10" E. a distance of 4,368.29 feet, more or less, to a point; thence S. 47°53'50" E. a distance of 750.00 feet to the TRUE POINT OF BEGINNING.

This parcel having an area of 155.52 acres, more or less.

(The parcel described above is designated as Tract I on the State of Alaska, Department of Public Works, Division of Aviation New Minto Airport Property Plan, dated June 13, 1974.)

The purpose of this notice is to inform the public that the filing of this application segregates the described land from all other forms of use or disposal under the public land laws.

Interested persons desiring to express their views should promptly send their name and address to District Manager, Bureau of Land Management, P.O. Box 1150, Fairbanks, Alaska 99707.

HAROLD E. WALDO,
Chief, Division of Land Office.

NEW MEXICO

Applications

DECEMBER 18, 1975.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for an evaporation pond site and

two 4½ inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN
NEW MEXICO

T. 27 N., R. 8 W.,
Sec. 22, NE¼NW¼.
T. 27 N., R. 10 W.,
Sec. 8, E½SE¼NW¼NE¼.
T. 31 N., R. 10 W.,
Sec. 21, lots 12 and 13.

The pond site will occupy 5.0 acres and the pipelines will convey natural gas across .063 miles of national resource lands in San Juan County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, 3550 Pan American Freeway, NE, Albuquerque, NM 87107.

FRED E. PADILLA,
Chief, Branch of Lands and Mineral Operations.

[Wyoming 53437]

WYOMING

Notice of Application

DECEMBER 18, 1975.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), Mountain Fuel Supply Company has applied for a natural gas pipeline right-of-way across the following lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 28 N., R. 114 W.,
Sec. 32;
Sec. 33;
Sec. 34.

The pipeline will convey natural gas from the Fogarty Creek well in sec. 32 to the Dry Piney unit well in sec. 34 to tie into an existing pipeline, all in T. 28 N., R. 114 W., Sublette County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1869, Rock Springs, Wyoming 82901.

PHILIP C. HAMILTON,
Chief, Branch of Lands and Minerals Operations.

[Wyoming 53431]

WYOMING

Notice of Application

DECEMBER 18, 1975.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), Colorado Interstate Corporation has applied for a natural gas pipeline right-of-way across the following lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 17 N., R. 94 W.,
Sec. 6;
Sec. 18.
T. 18 N., R. 94 W.,
Sec. 6;
Sec. 18;
Sec. 30;
Sec. 32.

The pipeline will convey nautral gas from three wells in sec. 18, T. 17 N., R. 94 W., and secs. 6 and 32, T. 18 N., R. 94 W., to a proposed pipeline in sec. 6, T. 18 N., R. 94 W., to connect to gathering facilities in Sweetwater County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should send their name and address to the District Manager, Bureau of Land Management, P.O. Box 670, Rawlins, WY 82301.

SALT LAKE DISTRICT MULTIPLE USE ADVISORY BOARD, UTAH

Meeting

Notice is hereby given in accordance with P.L. 92-463 that a meeting of the Salt Lake District Multiple Use Advisory Board will be held January 22 and 23, 1976, commencing at 9:00 a.m. in the Conference Room of the District Office at 2370 South 2300 West in Salt Lake City, Utah. The subject Advisory Board was established to advise the District Manager on matters pertaining to multiple use management in the Salt Lake District.

The first day of the two day meeting will be devoted to introductory and orientation items including a review of the Charter, organizing the Board, status of District planning efforts, and a review of items "in progress" prior to formation of the Board. Topics will include the District oil and gas leasing program, wild horse management, District programs relating to the NRDC lawsuit, administration and management of the Bonneville Salt Flats, and management of the Deep Creek Mountains.

The second day will include consideration of current decision making, including military uses of NRL, various matters pertaining to Utah Lake, Onaqui-Oquirrh Planning Unit, Park City area land classifications, predator control plans, Woodruff area grazing administration, private exchange proposals, homesteading and desert land entries, forest product disposition, fire management, recreation area planning, and utility corridors.

The meeting is open to the public. Interested persons can make oral presentations to the Board or file written statements; however, requests for oral presentations before this Board should be made to the official listed below at least two days prior to the meeting. The Chairman or Authorized Federal Official may limit public attendance to the extent that available facilities and time require limitation.

Further information concerning this meeting may be obtained from Gerald E. Hillier, District Manager, Bureau of Land Management, 2370 South 2300 West, Salt Lake City, Utah 84119, telephone number (801) 524-5348. Minutes of the meeting will be available for public inspection and copy two weeks after the meeting at the Salt Lake District Office, 2370 South 2300 West, Salt Lake City, Utah.

Dated: December 19, 1975.

GERALD E. HILLIER,
District Manager.

OUTER CONTINENTAL SHELF PROPOSED OCS ORDERS

Extension of Time for Comments

The Geological Survey hereby extends the time to submit written comments and suggestions concerning proposed revision of two Gulf of Mexico OCS Orders to February 15, 1975. The following OCS Orders were published in Volume 40, FEDERAL REGISTER No. 238, on December 10, 1975:

OCS Order No. 7, Pollution and Waste Disposal.
OCS Order No. 8, Platforms, Structures, and Associated Equipment.

Comments should be sent to the Director, U.S. Geological Survey, National Center, Mail Stop 101, 12201 Sunrise Valley Drive, Reston, Virginia 22092.

W. A. RADLINSKI,
Acting Director.

[F RDoc.75-35007 Filed 12-29-75;8:45 am]

OUTER CONTINENTAL SHELF

Procedures for the Development of OCS Standards

Pursuant to Supplement No. 2, November 1974, to the Geological Survey, "Report of the Work Group on OCS Safety and Pollution Control," May 1973, the Geological Survey hereby gives notice that the following procedures have been established for the development of specific safety and pollution-prevention standards for equipment and procedures used during drilling and producing operations on oil and gas leases issued on the Outer Continental Shelf:

1. Identify needs for new or modified standards and establish priorities.

2. Publish a notice in the FEDERAL REGISTER of intent to prepare specific standards requesting input and assistance.

3. Prepare drafts of new, updated, and revised standards by one or a combination of the following methods:

A. By use of input derived from step 2 above.

B. By use of available in-house expertise.

C. By arrangement with ANSI, ASME, ASTM, API, or other organizations who prepare standards.

4. Publish draft standards in the FEDERAL REGISTER for comments.

5. Consider the comments received, publish the final standards in the FEDERAL REGISTER, and incorporate them in an appropriate OCS Order by reference.

Specific environmental hazards and problems that are characteristic of different areas of the OCS shall be taken into account when incorporating standards into OCS Orders.

W. A. RADLINSKI,
Acting Director.

Office of Hearings and Appeals

[Docket No. M 76-35]

ALABAMA BY-PRODUCTS CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Albama By-Products Corporation has filed a petition to modify the application of 30 CFR 75.902 to the following mines in Alabama:

Mine	Location
Maxine	Jefferson County.
Mary Lee No. 1	Walker County.
Gorgas No. 7	Do.
Mary Lee No. 2	Do.
Segco No. 1	Do.

30 CFR 75.902 provides:

On or before September 30, 1970, low and medium-voltage resistance grounded systems shall include a fail-safe ground check circuit to monitor continuously the grounding circuit to assure continuity which ground check circuit shall cause the circuit breaker to open when either the ground or pilot check wire is broken, or other no less effective device approved by the Secretary or his authorized representative to assure such continuity, except that an extension of time, not in excess of 12 months, may be permitted by the Secretary on a mine-by-mine basis if he determines that such equipment is not available. Cable couplers shall be constructed so that the ground check continuity conducted shall be broken first and the ground conductor shall be broken last when the coupler is being uncoupled.

In support of its position, Petitioner states: (1) Petitioner is actively engaged in the mining of bituminous coal at all of the above-captioned mines except Mary Lee No. 2 Mine which is in the process of being opened and will be in operation very soon. All of the above-named mines are underground mines. Mining is accomplished by the use of continuous miners as well as by the use of conventional equipment (cutting machines, loading machines, shuttle cars, rock and coal drills, etc.).

V 40 250
DEC 30 75
XUM

(2) Petitioner has tried 10 of these fail safe ground check monitors circuits which vary from small relays to complicated electronic devices and it has yet to find one which will satisfy the requirements of the Act or the Federal Regulations or withstand the high (week-end) and low (operating conditions) voltages which we have in the coal industry.

(3) The ground check monitor circuit referred to in 30 CFR 75.902 must cause the circuit breaker to open when either the ground or pilot check wire is broken. The main objective is to be assured that a continuous grounding circuit be maintained. Petitioner sincerely believes it has an alternate method which will provide at least the same degree of safety and will maintain a continuous grounding circuit.

(4) Alternate Method: Petitioner requests that in lieu of the mandatory requirements of the Act and regulations the following installations and procedures be followed:

(a) A bare (non-insulated) copper conductor equal in size to the power conductor be installed as a safety ground conductor. The ground conductor suggested by Petitioner will satisfy the requirements under 30 CFR 75.514.

(b) This bare conductor shall be inspected in accordance with 30 CFR 75.512 and shall at all times meet the requirement under 30 CFR 75.512.

(c) It is understood that this alternate method shall only be approved on the condition that the safety ground (bare, non-insulated conductor) will be adequately protected from exposure to physical damage and also that the safety ground conductor shall be visible for the entire length of the conductor.

(5) Petitioner's safety records disclose no history of accidents resulting from the lack of a safety ground to stationary equipment. As stated above, some form of safety ground is absolutely essential for the safety of miners. However, Petitioner believes the alternate method of using a non-insulated visible safety ground conductor will at all times guarantee no less than the same measure of protection as that guaranteed under 30 CFR 75.902. Also 30 CFR 75.901 will be complied with because a ground conductor one-half the size of the power conductor will be utilized in addition to the proposed bare grounding conductor. To support its statement of the same degree of safety, Petitioner points out that the visible examination of the safety ground conductor for its entire length assures that there are no physical defects in the conductor. Thus we are assured that the proper size (ampacity) of the ground conductor is maintained. In cases where the pilot monitoring device is used—unless the safety ground wire is visible—one has no such assurance. Due to the unreliability of the ground pilot monitoring circuits, more trouble shooting is required. In electrical trouble shooting there is a certain exposure to electrical shock hazards. This alternate method would reduce this exposure considerably.

(6) In the proposed alternate method, all connections are external and visible. Therefore, Petitioner has full assurance of positive connection under its alternate method. Under the requirements of the Act and regulations, internal—not always visible—connections are allowed. Petitioner feels this further demonstrates that its alternate method provides at least the same degree, if not a greater degree, of safety.

(7) It must be remembered that Petitioner requests the use of this alternate method only in areas where the conductor is visible, can be inspected, and is not subjected to physical damage.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before January 29, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

DECEMBER 19, 1975.

[FR Doc.75-35009 Filed 12-29-75;8:45 am]

[Docket No. M 75-32]

BETTY B. COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Betty B. Coal Company has filed a petition to modify the application of 30 CFR 75.1405 to its Nos. 1, 2 and 4 Mines, Clintwood, Virginia.

30 CFR 75.1405 provides:

All haulage equipment acquired by an operator of a coal mine on or after March 30, 1971, shall be equipped with automatic couplers which couple by impact and uncouple without the necessity of persons going between the ends of such equipment. All haulage equipment without automatic couplers in use in a mine on March 30, 1970, shall also be so equipped within 4 years after March 30, 1970.

Petitioner's alternate coupling method consists of a cut lever mounted at rear of the mine car which permits a pin to drop into the coupling pin and automatically lock in. Where necessary a long-handled hook can be used to align the link with the coupling pin without requiring the brakeman to go between the cars.

This method of coupling provides a greater amount of safety for a number of reasons; it prevents, for example, the accidental uncoupling of cars which occurs when track levels are uneven.

Petitioner believes that its alternate method will at all times guarantee no less than the same measure of protection afforded the miners by the mandatory standard.

The petition is supported by schematic diagrams detailing the alternate method.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before January 29, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that time.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

DECEMBER 19, 1975.

[FR Doc.75-35010 Filed 12-29-75;8:45 am]

[Docket No. M 76-39]

JEWELL SMOKELESS COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Jewell Smokeless Coal Corp. has filed a petition to modify the application of 30 CFR 77.1607(bb) to its Cornet Plant No. 2, Vansant, Virginia.

30 CFR 77.1607(bb) provides:

When the entire length of a conveyor is visible from the starting switch, the operator shall visually check to make certain that all persons are in the clear before starting the conveyor. When the entire length of the conveyor is not visible from the starting switch, a positive audible or visible warning system shall be installed and operated to warn persons that the conveyor will be started.

In support of its petition, Petitioner states: (I) Petitioner incorporates the use of many belts and conveyors within its coal preparation plant to transfer raw coal and refuse in their various states of preparation from one location to another as is necessitated by a predetermined material flow pattern. These belts and conveyors are covered by the mandatory standard as set forth in 30 CFR 77.1607(bb).

(II) Petitioner's preparation plant is provided with a central control station fed from two separate motor control centers. The control station is located in a totally enclosed and insulated room to provide a controlled atmosphere for greater efficiency and durability of its electrical components. Therefore, the operator cannot visually check any conveyor before starting it.

(III) Petitioner's preparation plant is provided with an audible warning system to warn personnel when any piece of electrical equipment is to be started. There are approximately 150 motors throughout the plant. Of this number only 25 motors are used to provide drive-power to conveyors. The aforementioned warning system is used in conjunction with all the motors, including the conveyor drive motors in the following ways:

(1) At the start of each shift, the warning siren is sounded to warn personnel that equipment will be started.

(a) Two pushbuttons have been installed on the control console, one on the extreme right and near the intercom station and one in the center, which are manually engaged to energize the sirens.

(b) The following start-up instructions are boldly displayed on the console at each pushbutton and are followed by all operators:

SOUND SIREN THREE BLASTS, PAUSE 20 SECONDS, START EQUIPMENT

(2) During the production shift (after all major motors have been started), when it is necessary to start any auxiliary motor or to shut down and restart a motor, the above procedure is precisely followed.

(IV) The warning system described has been in operation since the plant was rewired in 1971. During this time there have been no difficulties encountered with its effectiveness. Also, during this period there have been numerous inspections made by both Federal and State inspectors without any notices being issued concerning the permissibility of the warning system.

(V) To effectively use an automatic timing device the use of "jog-stop" buttons would have to be provided to accommodate the repair and maintenance worker. Frequently, the repairman is required to "jog" a motor to check for proper rotation, to change position of a belt conveyor, or various other reasons. To do this without a "jog-stop" button would require waiting for the automatic timing device to complete its cycle, thus starting the motor. This time lag would be a nuisance and danger to the repairman.

(VI) Alternate Method (1) Petitioner feels, considering its current warning system, safety hazards would actually be increased by application of 30 CFR 77.1607(bb) as an "automatic" warning system.

(2) Petitioner feels that the warning system used in this plant meets the requirements of a "positive" warning device and is safer than an "automatic" system would be for the following reasons:

(a) This system includes all electrical equipment and is not limited to belts and conveyors.

(b) The electrical equipment can be started from the operator's station only. (There are no "jog-stop" buttons as previously mentioned.)

(c) Repair and maintenance require motors to be "jogged" for various reasons. This is accomplished by use of an intercom system wherein the mechanic can communicate directly with the operator as to his exact needs. This method prevents a repairman in an isolated section of the plant from "jog-starting" a piece of equipment without giving proper warning to other plant personnel.

(d) When repair is necessary, the electricians use the following procedures:

(1) The equipment to be repaired is identified.

(2) The circuit breaker feeding that piece of equipment is opened.

(3) With locks provided in each motor control room the circuit breaker is locked out and the one key provided is kept by the repairman who locked out the breaker.

(4) An appropriate danger tag is attached to that piece of equipment.

(5) Upon completion of repairs the repairman, with the key, shall unlock the circuit breaker, remove the danger tag, reinstall the power and inform the operator that the repairs have been completed.

(6) The operator will use the aforementioned start-up procedure in restoring the repaired piece of equipment into service.

(3) The foregoing alternate method is a method which has been developed with the assistance of technical experts of Petitioner and addresses itself to not only the safety objectives sought by 30 CFR 77.1607(bb) but also to the particular hazards that would be created if application of such standard were required.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before January 29, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

DECEMBER 19, 1975.

[Docket No. M 76-27]

PENN ALLEIGH COAL CO., INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Penn Alleigh Coal Co., Inc., has filed an amendment to its petition [1] to modify the application of 30 CFR 75.-1710-1(a) to its Allegheny No. 2 Mine located in Allegheny and Butler Counties, Pennsylvania.

30 CFR 75.1710-1(a) provides:

(a) Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches.

In support of its amendment, petitioner states: (1) Subsequent to the filing of its original petition, Petitioner was served with a Notice to Provide Safeguards requiring the installation of canopies on all rubber-tired haulage equipment and battery tractors in Petitioner's mine.

(2) Petitioner avers that all of the reasons for diminution of safety cited by it in its original petition with respect to the use of canopies relating to face equipment apply as well to the use of canopies on rubber-tired haulage equipment and battery tractors.

(3) Petitioner further avers that in addition to the reasons cited in paragraph 4 of its original petition for modification of the aforesaid safety standard, the use of canopies on haulage equipment and battery tractors would involve the following additional hazards:

(a) The greater speeds of haulage equiment accentuate the possibility of severe damage to equipment and permanent roof supports or injury to operators in the event the canopy becomes wedged against the roof of the coal seam; and the variable roof heights make this type of impact more probable when equipment is moving more rapidly.

(b) Haulage equipment must traverse more distances than face equipment and thus must encounter more surface unevenness, making collision between canopy and roof more likely.

(4) Petitioner avers that, as in the case of canopies for face equipment, there are no manufacturers presently building canopies suitable for use on rubber-tired haulage equipment and battery tractors.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before January 29, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

DEPARTMENT OF AGRICULTURE

V40250 DEC 30 75 XUM V

[Docket No. M 76-33]

SOUTH-EAST COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), South-East Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its Polly No. 4 Mine, Whitesburg, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

In support of its petition, Petitioner states: (1) Petitioner's haulage equipment consists of National Mine Service Torkars, type 48A-512-36AL, over-all height 43 inches, and 6S/C Joy shuttle cars 36 inches high. This equipment has been in service for several years, and when manufactured was not designed for the installation of canopies. Attempts by Petitioner to construct or purchase suitable canopies have not been successful.

(2) The Polly Mine is in the Elkhorn No. 3 seam ranging from 46 to 60 inches in height. Petitioner is constantly encountering irregularities in this seam resulting in severe dips in the coalbed.

(3) There have been no serious injuries to shuttle car operators due to roof falls since production started in 1957. However, due to the reduced visibility, awkward body positions, e.g., operator having to hang his head outside of canopy to operate the machinery, possible dislodgment of roof support, and entrapment of personnel in disabled equipment, installing canopies on the haulage equipment will create more of a hazard to the operator and other employees on the section than the possibility of a roof fall.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before January 29, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

[Docket No. M 76-36]

TENN-TEX COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Tenn-Tex Coal Corporation has filed a petition to modify the application of 30 CFR 77.1605(k) to its Frances No. 1 Mine, Middlesboro, Kentucky.

30 CFR 77.1605(k) provides:

Berms or guards shall be provided on the outer bank of elevated roadways.

In support of its petition Petitioner states: (1) The subject haulage road is only 3 miles in length, very wide, and well-maintained. Petitioner's traffic system has worked extremely well in the avoidance of all accidents. In sum, Petitioner has an excellent safety record in its hauling operations due to careful maintenance of rolling stock, supervised traffic system and extra wide roads.

(2) Installation of berms on the side of the road would interfere with drainage, and water, resulting from snow, would collect on the road. Thus, the berms would create a hazard to rather than a protection of the drivers.

(3) Petitioner believes that the safety precautions presently taken on the haulage road will guarantee a greater measure of protection to the truck drivers than will be afforded by the installation of berms or guardrails.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before January 29, 1975. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

[INT DES 75-65]

CORDERO MINE, CAMPBELL COUNTY, WYOMING

Notice of Availability of Draft Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental impact statement on proposed coal mining operations at Sun Oil Company's Cordero Mine, Campbell County, Wyoming. The draft statement assesses the environmental impacts of the lessee's plan for the strip mining of federally owned coal and the concurrent reclamation and revegetation of surface lands.

The proposed mining and reclamation plan assessed in this statement is on Federal coal lease Wyoming 3385, Tr. 46 and 47 N., R. 71 W., 6th Prin. Mer. and was one of the mining proposals identified in the preparation of the regional analysis (Part I) of the Department's final environmental statement, FES 74-55, entitled "Proposed Development of Coal Resources in the Eastern Powder River Coal Basin of Wyoming," which was filed with the Council on Environmental Quality on October 18, 1974. Public hearings on the draft of that statement were held as follows: June 24-25, 1974 at Cheyenne, Wyoming; June 26, 1974 at Casper, Wyoming; and June 27-28, 1974 at Gillette, Wyoming. The draft environmental statement is available for public review in the U.S. Geological Survey Public Inquiries Office, Room 1012, Federal Building, Denver, Colorado 80202; the U.S. Geological Survey Library, Building 25, Denver Federal Center, Denver, Colorado 80225; the U.S. Geological Survey Library, Room 4A100, USGS National Center, Reston, Virginia, 22092; the U.S. Department of Interior Library, Interior Building, Washington, D.C. 20240; the Converse County Library, 300 Walnut Street, Douglas, Wyoming 82633; the George Amos Memorial Library, 412 South Gillette Avenue, Gillette, Wyoming 82716; the Library of Natrona County, 307 East Second, Casper, Wyoming 82601; and the State Library, State of Wyoming, Supreme Court Building, Cheyenne, Wyoming 82002.

A limited number of copies are available to the public upon request from the following United States Geological Survey Offices:

Public Inquiries Office, 1012 Federal Building, 1961 Stout Street, Denver, Colorado 80202.

Public Inquiries Office, 8102 Federal Building, 125 South State Street, Salt Lake City, Utah 84138.

Environmental Impact Analysis Program, Preparation Unit, National Center, Mail-stop 760, Reston, Virginia 22092.

The Department will accept written comments on the draft statement for a period of 45 days subsequent to the date of this notice, and will consider any comments received in preparing the final environmental statement on this proposal. Written comments should be addressed to Director, United States Geological Survey, National Center (Mailstop 108) Reston, Virginia 22092.

STANLEY D. DORESUS,
Deputy Assistant Secretary of Interior.

OIL SHALE ENVIRONMENTAL ADVISORY PANEL

Meeting

Notice is hereby given in accordance with Public Law 92-463 that a meeting of the Oil Shale Environmental Advisory Panel will be held on January 21 and 22, 1976, at the Denver Downtown Holiday Inn, 15th Street and Glenarm Place, in Denver, Colorado. The meeting will begin at 1:00 p.m. on Wednesday, January 21 in the Molly Gibson and Gold Links rooms and conclude at 5:00 p.m. on Thursday, January 22.

The Panel was established to assist the Department of the Interior in the performance of its functions in connection with the supervision of oil shale leases issued under the Prototype Oil Shale Leasing Program. The purpose of this meeting is to review an outline and draft material for the Detailed Development Plan for lease tract C-a, an outline for a Social and Economic Growth Management Impact Statement for tract C-a, review fourth quarterly summary data reports for lease tracts C-a, C-b, and U-a and U-b (combined) and to receive reports from Interior officials.

The meeting is open to the public. It is expected that space will permit at least 150 persons to attend the meeting in addition to the panel members. Interested persons may make brief presentations to the panel or file written statements. Requests should be made to Mr. William L. Rogers, Chairman, Office of the Secretary, Department of the Interior, Room 638, Building 67, Denver Federal Center, Denver, Colorado 80225.

Further information concerning this meeting may be obtained from Mr. Henry O. Ash, Office of the Oil Shale Environmental Advisory Panel, Room 690, Building 67, Denver Federal Center, Denver, Colorado 80225, Telephone No. (303) 234-3275. Minutes of the meeting will be available for public inspection 30 days after the meeting at the Panel office.

Dated: December 17, 1975.

JACK O. HORTON,
Assistant Secretary of the Interior.

OUTER CONTINENTAL SHELF ADVISORY BOARD—SOUTH ATLANTIC REGION

Notice and Agenda for Meeting

This notice is issued in accordance with the provisions of the Federal Advisory Committee Act, Public Law No. 92-643, 5 U.S.C. App. I and the Office of Management and Budget's Circular No. A-63, Revised.

The South Atlantic Regional Board will meet during the period 10:00 a.m. to 3:00 p.m., January 14, 1976, in the Marine Resources Center, South Carolina Wildlife and Marine Resources Department, 217 Fort Johnson Road, Charleston, South Carolina.

The Board plans to discuss the agenda items for the next national meeting which will be held in February. In addition, States will present and discuss local concerns.

The meeting is open to the public. Interested persons may make oral or written presentations to the Board. Such requests should be made by January 7 to the South Atlantic Board Chairman:

Dr. James I. Jones, Special Projects Officer, Division of State Planning, 660 Apalachele Parkway, Tallahassee, Florida 32304. 904/488-1115.

Minutes of the meeting will be available for public inspection and copying three weeks after the meeting at the Office of OCS Program Coordination, Room 4126, Department of the Interior, 18th and C Streets, N.W., Washington, D.C.

ROYSTON C. HUGHES,
Assistant Secretary, Program Development and Budget.

ADVISORY COMMITTEES

Renewal

This notice is published in accordance with the provisions of section 7(a) of the Office of Management and Budget Circular A-63, which was published in the FEDERAL REGISTER on April 5, 1974 (39 FR 12389). Pursuant to the authority contained in section 14(a) of the Federal Advisory Committee Act (Public Law 92-463), I have determined that renewal of the advisory committees listed below is necessary and in the public interest.

Oil Shale Environmental Advisory Panel
Outer Continental Shelf Environmental Studies Advisory Committee (formerly the Outer Continental Shelf Research Management Advisory Board)
Regional Advisory Committee, Mid-Atlantic Region, National Park Service
Regional Advisory Committee, North Atlantic Region, National Park Service
Regional Advisory Committee, Rocky Mountain Region, National Park Service

The Office of Management and Budget has concurred in the renewal of these committees.

Further information regarding these renewals may be obtained from the Committee Management Officer, Office of the Secretary, U.S. Department of the Interior, Washington, D.C. 20240, telephone 202-343-8401.

Dated: December 19, 1975.

THOMAS S. KLEPPE,
Secretary of the Interior.

[Notice of Designation Number A278]

NEW YORK

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following New York Counties as a result of drought May 1 through August 31, 1975:

Clinton; Essex; Franklin; Jefferson; St. Lawrence.

Therefore, the Secretary has designated these areas as eligible for Emergency loans, pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 94-68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Hugh L. Carey that such designation be made.

V 40 N 250 DEC 30 75 XUM

Applications for Emergency loans must be received by this Department no later than February 11, 1976, for physical losses and September 13, 1976, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated areas makes it impracticable and contrary to the public interest to give advance notice of proposed rule making and invite public participation.

Done at Washington, D.C., this 18th day of December 1975.

FRANK B. ELLIOTT,
Administrator,
Farmers Home Administration.

[FR Doc.75-34972 Filed 12-29-75;8:45 am]

[Notice of Designation Number A277]

SOUTH DAKOTA

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Davison County, South Dakota, as a result of drought June 1 to September 4, 1975.

Therefore, the Secretary has designated this area as eligible for Emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 94-68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Richard F. Kneip that such designation be made.

Applications for Emergency loans must be received by this Department no later than February 10, 1976, for physical losses and September 13, 1976, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rule making and invite public participation.

Done at Washington, D.C., this 18th day of December, 1975.

FRANK B. ELLIOTT,
Administrator,
Farmers Home Administration.

[FR Doc.75-34973 Filed 12-29-75;8:45 am]

[Notice of Designation Number A276]

TEXAS

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Caldwell County, Texas, as a result of excessive rainfall beginning April 10 through July 30, 1975.

Therefore, the Secretary has designated this area as eligible for Emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 94-68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Dolph Briscoe that such designation be made.

Applications for Emergency loans must be received by this Department no later than February 10, 1976, for physical losses and February 13, 1976, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rule making and invite public participation.

Done at Washington, D.C., this 18th day of December, 1975.

Forest Service

BLACKTAIL LAND USE PLAN

Availability of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for management of the Blacktail Unit. The Forest Service Report Number is USDA-FS-R2-DES (Adm) FY-76-06.

The environmental statement concerns a proposed land use plan for the Blacktail Unit on the Routt National Forest in Routt and Grand Counties, Colorado. The management proposal emphasizes both non-consumptive values and the production of tangible products on 23,475 acres. The plan will permit a mixture of needed land uses and activities that are environmentally acceptable and compatible with the Area's economic and social potential. The initial activities would consist of constructing four miles of road and harvesting five million board feet of timber. Specific guidance is given to retaining scenic qualities and maintaining a dispersed recreation atmosphere. The proposed Plan does not retain any of the 15,655 acres of Inventoried Roadless Areas DL & DM (Rock Creek and Blacktail) in a designated roadless status.

This draft environmental statement was transmitted to CEQ on December 19, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. & Independence Ave., S.W., Washington, D.C. 20250.
USDA Forest Service, 137-10th Street, Steamboat Springs, Colorado 80477.
USDA Forest Service, 11177 West Eight Avenue, Lakewood, Colorado 80225.
USDA Forest Service, 300 Roselawn, Yampa, Colorado 80483.

A limited number of single copies are available upon request to: J. MERLE PRINCE, Forest Supervisor, Routt National Forest, P.O. Box 1198, Steamboat Springs, Colorado 80477.

Copies of the environmental statement have been sent to various Federal, state, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact included for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to J. Merle Prince, Forest Supervisor, Routt National Forest, P.O. Box 1198, Steamboat Springs, Colorado 80477. Comments must be received by February 19, 1976, in order to be considered in the preparation of the final environmental statement.

Dated: December 19, 1975.

J. MERLE PRINCE,
Forest Supervisor.

BOGUS BASIN PROPOSED SKI AREA EXPANSION

Availability of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Bogus Basin Proposed Ski Area Expansion, Boise National Forest, Idaho. The Forest Service report number is USDA-FS-DES (Adm) R4-76-7.

This environmental statement reviews the expansion proposal for the Bogus Basin Ski Area. The expansion would take place on the Boise National Forest in Boise County, Idaho. The expansion area development would be supported by base facilities located on private land. The proposal calls for the addition of 1,370 acres to this use upon which two double chairlifts, a warming lodge, and several ski runs will be developed. The expansion will bring the Bogus Basin ski slope capacity from 2,367 to 3,793 skiers at one time.

This draft environmental statement was transmitted to CEQ on December 19, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. & Independence Ave., S.W., Washington, D.C. 20250.
Regional Planning Office, USDA, Forest Service Federal Bulding, Room 4403, 324—25th Street, Ogden, Utah 84401.
Forest Supervisor, Boise National Forest, 1075 Park Boulevard, Boise, Idaho 83706.

A limited number of single copies are available upon request to Forest Supervisor Edward C. Maw, Boise, National Forest, 1075 Park Boulevard, Boise, Idaho 83706.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor Edward C. Maw, Boise National Forest, 1075 Park Boulevard, Boise, Idaho 83706. Comments must be received by February 17, 1976, in order to be considered in the preparation of the final environmental statement.

Dated: December 19, 1975.

P. M. REES,
Director,
Regional Planning and Budget.

RYAN PARK WINTER SPORTS SITE MEDICINE BOW NATIONAL FOREST

Availability of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for Ryan Park Winter Sports Site. The Forest Service Report Number is USDA-FS-R2-DES (Adm) FY-76-05.

This environmental statement concerns a proposal to allocate 280 acres of National Forest land adjacent to Ryan Park, Wyoming for a winter sports site within the Travel Influence Zone pursuant to the Forest Multiple-Use Plan approved in January, 1972. The current allocation of 67 acres for a winter sports site at the nearby Ryan Park Ski Village would be terminated.

This draft environmental statement was transmitted to CEQ on December 19, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. & Independence Ave., SW., Washington, D.C. 20250.
USDA, Forest Service, 11177 West Eight Avenue, Lakewood, Colorado 80225.
USDA, Forest Service, 605 Skyline Drive, Laramie, Wyoming 82070.

A limited number of single copies are available upon request to: Alan Duhnkrack, Forest Supervisor, Medicine Bow National Forest, 605 Skyline Drive, Laramie, Wyoming 82070.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact included for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Alan Duhnkrack, Forest Supervisor, Medicine Bow National Forest, 605 Skyline Drive, Laramie, Wyoming 82070. Comments must be received by February 18, 1976, in order to be considered in the preparation of the final environmental statement.

Dated: December 19, 1975.

CLAYTON B. PIERCE,
Director, Multiple Use and Environmental Quality Coordination.

SNAKE RIVER BASIN

Availability of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Snake River Basin. The Forest Service Report Number is USDA-FS-R2-DES(Adm) FY-76-04.

This environmental statement concerns a proposal to update the existing Multiple Use Management Guide and intensify management actions for lands in the Snake River Basin, Dillon Ranger District, Arapaho National Forest, in the County of Summit.

This draft environmental statement was transmitted to CEQ on December 19, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. & Independence Ave., S.W., Washington, D.C. 20250.
USDA, Forest Service, 11177 West Eight Avenue, Lakewood, Colorado 80225.
USDA, Forest Service, P.O. Box 948, Glenwood Springs, Colorado 81601.

A limited number of single copies are available upon request to: Thomas C. Evans, Forest Supervisor, White River National Forest, P.O. Box 948, Glenwood Springs, Colorado 81601.

Copies of the environmental statement have been sent to various Federal, state, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact included for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Thomas C. Evans, Forest Supervisor, White River National Forest, P.O. Box 948, Glenwood Springs, Colorado 81601. Comments must be received by February 18, 1976, in order to be considered in the preparation of the final environmental statement.

Dated: December 19, 1975.

BOISE NATIONAL FOREST GRAZING ADVISORY BOARD

Meeting

The Boise National Forest Grazing Advisory Board will meet at 1:30 p.m., February 10, 1976, at the Boise National Forest Supervisor's Office, 1075 Park Boulevard, Boise, Idaho.

The purpose of the meeting is to explain the purpose and function of the Advisory Board, review of and suggestions for revising the constitution and by-laws, to comment on the revision of the 2200 Range Management section of the Forest Service Manual, and to explain briefly Forest Service appeal procedures.

The meeting will be open to the public. Persons who wish to attend should notify Mr. Tom Nicholson, President, Boise National Forest Grazing Advisory Board, 10322 Estate Drive, Boise, Idaho 83705, Telephone: Area Code 208 375-5255. Written statements may be filed with the committee before or after the meeting.

Dated: December 15, 1975.

EDWARD C. MAW,
Forest Supervisor.

NATIONAL ADVISORY COMMITTEE ON SAFETY IN AGRICULTURE

Public Meeting

The National Advisory Committee on Safety in Agriculture will be held January 27-28, in Washington, D.C.

The meetings which will begin each day at 9:00 A.M., will be held in room 218-A at the U.S. Department of Agriculture's Administration Building, 12th and Independence Avenue, SW., Washington, D.C. 20250, and will be open to the public.

The meeting is structured to provide members of the committee ample time for discussion. Key issues to be included are: status of recommendations made by the committee at its last meeting held February 26-27, 1975; statistics on farm accidents; research and education programs related to farm safety; review of impacts of existing health and safety regulations on the agricultural sector; and possible impacts of any proposed health and safety regulations affecting farmers, farm workers and agricultural communities.

V40250 DEC 30 75 XUM

Written comments concerning this meeting should be addressed to Dr. R. B. Wilson, Assistant to the Secretary for Intergovernmental Affairs, Office of the Secretary, U.S. Department of Agriculture, Washington, D.C. 20250.

Dated: December 22, 1975.

R. B. WILSON,
Executive Secretary.

CHAMBERLAIN BRANCH WATERSHED PROJECT, KENTUCKY

Availability of Negative Declaration

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; Part 1500.6(e) of the Council on Environmental Quality Guidelines (38 FR 20550, August 1, 1973); and Part 650.8(b)(3) of the Soil Conservation Service Guidelines (39 FR 19651, June 3, 1974); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for floodwater retarding structure No. 1 of the Chamberlain Branch Watershed Project, Estill County, Kentucky.

The environmental assessment of this federal action indicates that the structure will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with the structure. As a result of these findings, Mr. Glen E. Murray, State Conservationist, Soil Conservation Service, USDA, 333 Waller Avenue, Lexington, Kentucky 40504, has determined that the preparation and review of an environmental impact statement is not needed for this structure.

The planned works of improvement as described in the negative declaration consist of one single-purpose floodwater retarding structure constructed across a natural stream with intermittent flow.

Chamberlain Branch Watershed, Kentucky, Notice of Availability of Negative Declaration.

The environmental assessment file is available for inspection during regular working hours and a limited supply of the negative declaration is available to fill single copy requests at the following location:

Soil Conservation Service, USDA, 333 Waller Avenue, Lexington, Kentucky 40504.

Request for the negative declaration should be sent to the above address.

No administrative action on implementation of the proposal will be taken until 15 days after the date of this publication.

(Catalog of Federal Domestic Assistance Program No. 10.904, National Archives Reference Services.)

Dated: December 18, 1975.

JAMES W. MITCHELL,
Acting Deputy Administrator for Water Resources, Soil Conservation Service.

CRABTREE CREEK WATERSHED PROJECT, NORTH CAROLINA

Availability of Draft Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; Part 1500 of the Council on Environmental Quality Guidelines (38 FR 20550, August 1, 1973); and Part 650.7(e) of the Soil Conservation Service Guidelines (39 FR 19650, June 3, 1974); the Soil Conservation Service, U.S. Department of Agriculture, has prepared a draft environmental impact statement for the Crabtree Creek Watershed Project, Wake and Durham Counties, North Carolina, USDA – SCS – EIS – WS – (ADM) – 76 – 01–(D)–NC.

The environmental impact statement concerns a plan for watershed protection and flood prevention. The planned works of improvement include conservation land treatment supplemented by five floodwater retarding structures.

A limited supply of copies is available at the following location to fill single copy requests:

Soil Conservation Service, USDA, P.O. Box 27307, Raleigh, North Carolina 27611.

Copies of the draft environmental impact statement have been sent for comment to various federal, state, and local agencies as outlined in the Council on Environmental Quality Guidelines. Comments are also invited from others having knowledge of or special expertise on environmental impacts.

Crabtree Creek Watershed Project, North Carolina, Notice of Availability of Draft Environmental Impact Statement.

Comments concerning the proposed action or requests for additional information should be addressed to Jesse L. Hicks, State Conservationist, Soil Conservation Service, P.O. Box 27307, Raleigh, North Carolina 27611.

Comments must be received on or before February 5, 1976, in order to be considered in the preparation of the final environmental impact statement.

(Catalog of Federal Domestic Assistance Program No. 10.904, National Archives Reference Services.)

Dated: December 18, 1975.

JAMES W. MITCHELL,
Acting Deputy Administrator for Water Resources, Soil Conservation Service.

EAST BRANCH STURGEON RIVER WATERSHED, MICHIGAN

Availability of Negative Declaration

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; part 1500.6(e) of the Council on Environmental Quality Guidelines (38 FR 20550) August 1, 1973; and part 650.8(b)(3) of the Soil Conservation Service Guidelines (39 FR 19651) June 3, 1974; the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the East Branch Sturgeon River Watershed Project, Dickinson County, Michigan.

The environmental assessment of this federal action indicates that the project will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with the project. As a result of these findings, Mr. Arthur H. Cratty, State Conservationist, Soil Conservation Service, USDA, 1405 South Harrison Road, East Lansing, Michigan 48823, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns a plan for watershed protection, flood prevention, recreation, and irrigation.

The remaining works of improvement to be constructed, as described in the negative declaration, is a multiple-purpose structure for storage of water for irrigation and recreation.

The environmental assessment file is available for inspection during regular working hours at the following location:

Soil Conservation Service, USDA, 1405 South Harrison Road, East Lansing, Michigan 48823.

Requests for copies of the negative declaration should be sent to this address.

No administrative action on implementation of the proposal will be taken until 15 days after the date of this publication.

(Catalog of Federal Domestic Assistance Program No. 10,904, National Archives Reference Services.)

Dated: December 18, 1975.

JAMES MITCHELL,
Acting Deputy Administrator for Water Resources, Soil Conservation Service.

NESHAMINY CREEK WATERSHED PROJECT, PENNSYLVANIA

Availability of Draft Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; Part 1500 of the Council on Environmental Quality Guidelines (38 FR 20550, August 1, 1973); and Part 650.7(e) of the Soil Conservation Service Guidelines (39 FR 19650, June 3, 1974); the Soil Conservation Service, U.S. Department of Agriculture, has prepared a draft environmental impact statement for the Neshaminy Creek Watershed Project, Bucks and Montgomery Counties, Pennsylvania, USDA–SCS–EIS–WS–(ADM)–76–1–(D)–PA.

The environmental impact statement concerns a partially completed project for watershed protection, flood prevention and recreation that was authorized in 1966. The planned works of improvement included conservation land treatment, eight floodwater retarding structures, two multiple purpose structures (municipal water supply, recreation and flood prevention) and two sets of recreation facilities. Part of the conservation land treatment, three floodwater retarding structures and two multiple purpose structures have been installed. The environmental impact statement describes the five floodwater retarding structures, recreation facilities which are located at the multiple purpose structures, and the balance of the conservation land treatment which will be installed. These elements when combined with other local and watershed sponsors' program provide a comprehensive approach to flood plain management for the watershed. The recreational development will provide 330,000 visitor-days of recreation annually.

Neshaminy Creek Watershed Project, Pennsylvania, Notice of Availability of Draft Environmental Impact Statement.

A limited supply of copies is available at the following location to fill single copy requests:

Soil Conservation Service, USDA, Third and Walnut Streets, Box 985 Federal Square Station, Harrisburg, Pennsylvania 17108.

Copies of the draft environmental impact statement have been sent for comment to various federal, state, and local agencies as outlined in the Council on Environmental Quality Guidelines. Comments are also invited from others having knowledge of or special expertise on environmental impacts.

Comments concerning the proposed action or requests for additional information should be addressed to Benny Martin, State Conservationist, Soil Conservation Service, Box 985 Federal Square Station, Harrisburg, Pennsylvania 17108.

Comments must be received on or before February 18, 1976, in order to be considered in the preparation of the final environmental impact statement.

Dated: December 18, 1975.

LOWER BAYOU WATERSHED, OKLAHOMA

Availability of Negative Declaration

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; part 1500.6(e) of the Council on Environmental Quality Guidelines (38 FR 20550) August 1, 1973; and part 650.8(b)(3) of the Soil Conservation Service Guidelines (39 FR 19651) June 3, 1974; the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for an independent portion of the Lower Bayou Watershed Project, Carter and Love Counties, Oklahoma.

The environmental assessment of the federal action indicates that this portion of the project will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with this portion of the project. As a result of these findings, Mr. Hampton Burns, State Conservationist, Soil Conservation Service, USDA Building, Farm Road and Brumley Street, Stillwater, Oklahoma, has determined that the preparation and review of an environmental impact statement is not needed for this portion of the project.

The project concerns a plan for watershed protection and flood prevention. The planned works of improvement covered by this negative declaration include conservation land treatment, 5 floodwater retarding structures, 6.33 miles of channel work, and appurtenances on a natural channel with intermittent flow, all of which are located on the Simon Creek tributary to Walnut Bayou.

The environmental assessment file is available for inspection during regular working hours and the negative declaration is available for single copy requests at the following location:

Soil Conservation Service, USDA Building, Farm Road and Brumley Street, Stillwater, Oklahoma 74074.

No administrative action on implementation of the proposal will be taken until 15 days after the date of this publication.

(Catalog of Federal Domestic Assistance Program No. 10.904, National Archives Reference Service).

Dated: December 18, 1975.

JAMES W. MITCHELL,
Acting Deputy Administrator for Water Resources Soil Conservation Service.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

[46-3]

BUREAU OF EAST-WEST TRADE

Organization and Function Order

This order effective November 17, 1975 supersedes the material appearing at 38 FR 9329 of April 13, 1973; 38 FR 19059 of July 17, 1973; 39 FR 26924 of July 24, 1974; and 39 FR 41756 of December 2, 1974.

SECTION 1. PURPOSE

This order prescribes the organization and assignment of functions within the Bureau of East-West Trade.

SECTION 2. ORGANIZATION AND STRUCTURE

The organization structure and line of authority of the Bureau of East-West Trade (the "Bureau") shall be as depicted in the attached organization chart. A copy of the chart is on file with the original of this document in the Office of the Federal Register.

SECTION 3. DELEGATIONS OF AUTHORITY

.01 The Director, Office of Export Administration, is delegated authority to exercise and perform all powers and functions provided by the Export Administration Act of 1969 (50 U.S.C. app. 2401 et seq.), as amended and extended by the Equal Export Opportunity Act (Public Law 92-412, 86 Stat. 644), and the Export Administration Amendments of 1974 (Public Law 93-500, 88 Stat. 1552), the administration of which was delegated to the Secretary of Commerce by Executive Order 11533 of June 4, 1970, as continued in effect by Executive Orders 11683 of August 29, 1972, 11798 of August 14, 1974 and 11818 of November 5, 1974, except that the determinations required by Section 7(c) with respect to the publication or disclosure of confidential information obtained under the provisions of the Act, and the submission of reports to the President and to the Congress required by Section 10 of the Act, are reserved to the Secretary of Commerce. This delegation specifically includes the authority:

a. To issue rules and regulations to carry out the purpose of the aforesaid Act, including rules and regulations applicable to the financing, transporting, and other servicing of exports and the participations therein by any person;

b. To sign and issue subpoenas requiring any person to appear and testify or to appear and produce books, records, and other writings or both, to any designated place, in connection with any investigation or proceeding necessary or appropriate to the enforcement of said export administration authority;

c. To require reports and the keeping of records by any person to the extent necessary or appropriate to the enforcement of said export administration authority, and to require any person to permit the inspection of books, records, and other writings or property; and

d. To take any other action necessary or appropriate to achieve effective enforcement of the Act in connection with actual or potential export control violations, including the issuance of denial and probation orders.

.02 The Director, Office of Export Administration, is authorized to redelegate any power or function conferred by this delegation and may authorize successive redelegations, except as otherwise provided and limited in paragraphs .03, .04, and .05 of this section with respect to inspections, subpoenas, oaths, and affirmations, and other enforcement authority.

.03 The Director, Office of Export Administration is delegated authority under Executive Order 11322 of January 5, 1967 and Executive Order 11419 of July 29, 1968 as relates to the exportation from the United States of commodities and products to or on behalf of Southern Rhodesia.

.04 In addition to the Director, at all times the Deputy Director, Office of Export Administration, the Director of Compliance Division, and the Agent-in-Charge, New York Field Office, Compliance Division, are each authorized to require any person to permit the investigation of books, records, and other writings, premises, or property, and to sign and issue subpoenas requiring any person to appear and testify or appear and produce books, records and other writings, or both, to any designated place, in connection with any investigation or

V40250 DEC 30 75 XUM

proceeding necessary or appropriate to the enforcement of said export administration authority.

.05 The Hearing Commissioner is authorized, in any proceeding relating to the denial of export privileges or the imposition of civil penalties under the Export Administration Act of 1969, as amended, to administer oaths and affirmations, and to sign and issue subpoenas, requiring any person to appear and testify or to appear and produce books, records, and other writings, or both.

.06 Any special agent employed in the Compliance Division of the Office of Export Administration and any attorney in the Office of the General Counsel assigned to export control enforcement duties, who is specifically designated as a special agent of the Bureau of East-West Trade, is hereby authorized to make investigations, obtain information, inspect books, records, and other writings, premises, or property of, and take the sworn testimony of, any person, and to administer oaths and affirmations for the purpose of procuring or receiving from any person sworn statements or other sworn testimony, concerning any matter under investigations necessary or appropriate to the enforcement of the export administration authority.

.07 This supersedes delegations of authority previously made and confirmed with respect to export administration, except that all outstanding rules, regulations, orders, licenses, designations, and other forms of administrative action shall, until amended or revoked, remain in full force and effect.

SECTION 4. OFFICE OF THE DEPUTY ASSISTANT SECRETARY

.01 The *Deputy Assistant Secretary for East-West Trade*, (the Deputy Assistant Secretary) shall be responsible to the Assistant Secretary for Domestic and International Business and shall determine the objectives of the Bureau, formulate the policies and programs for achieving those objectives and direct the execution of the programs. The objectives, policies and programs of the Bureau shall relate to the U.S.S.R., People's Republic of China, Poland, Romania, Czechoslovakia, Hungary, Bulgaria, Albania and the German Democratic Republic, Cuba, Mongolia and certain other areas of the world with similar economic/political structures, and, where necessary for export administration purposes, other countries.

.02 The *Deputy Director* shall assist in the direction of the Bureau and perform the functions of the Deputy Assistant Secretary in the latter's absence.

.03 The Deputy Assistant Secretary shall supervise and direct the following organizational components:

a. Office of the Deputy Assistant Secretary.
b. Office of East-West Trade Development.
c. Office of East-West Country Affairs.
d. Office of East-West Policy and Planning.
e. Office of Export Administration.

.04 *The Office of the Deputy Assistant Secretary* shall provide the *Executive Secretary* support to the Export Administration Review Board (EARB—at the Cabinet level), the Chairman of which is the Secretary of Commerce, and to the Advisory Committee on Export Policy (ACEP—at the Assistant Secretary level), the Chairman of which is the Assistant Secretary for Domestic and International Business. The EARB, the ACEP and the Operating Committee (OC), the Chairman of which is a part of the Office of the Director of the Office of Export Administration, constitute the formal interagency committee structure which addresses policy issues associated with the administration of the Export Administration Act. The Chairman of the OC shall serve as Executive Secretary for the EARB and ACEP, and in this capacity shall report to the Deputy Assistant Secretary for East-West Trade.

.05 The Office of the Deputy Assistant Secretary shall include a *Hearing Commissioner* who shall conduct hearings and perform other duties with respect to administrative compliance proceedings involving export control violation cases, in accordance with the rules set forth in the export regulations and shall act as Appeals Advisor to the Assistant Secretary for Domestic and International Business for those appeals filed pursuant to Section 389 of the Export Administration Regulations.

SECTION 5. OFFICE OF EAST-WEST TRADE DEVELOPMENT

.01 The *Office of the Director* includes: The *Director* who shall plan and direct the execution of policies and programs of the Office. The Office shall also include the *Deputy Director* who shall assist in the direction of the Office and perform the functions of the Director in his absence. The Office of the Director shall prepare appropriate market assessments on the centrally planned economy countries to provide both general and specific guidance for the activities of the Trade Promotion and Trade Development Assistance Divisions; for use by U.S. firms in the further development of their own market surveys; and to stimulate U.S. firms' interest in new market areas for detailed study. The primary emphasis of this effort shall address East-West trade from the perspective of U.S. industry. Other offices of the Bureau shall provide appropriate input for such studies which shall be basically guided by the Director of the Office. The Office of the Director shall exercise supervision and direction over such overseas East-West Trade Development Centers and Offices as now exist in Moscow, Warsaw, and Vienna. The Director shall supervise and direct the following organizational components:

.02 *The Trade Promotion Division* shall be responsible for the formulation of promotional programs responsive to the needs of U.S. firms interested in initiating or expanding commercial relationships with the countries and areas specified in Section 4.01 above. The Division shall:

a. Plan and procure commercial trade fair exhibitions for the specified countries and areas, identify qualified U.S. firms and arrange for their participation, and undertake appropriate follow-up activities to facilitate the establishment and/or development of permanent and productive trade relationships by participants;

b. Plan and conduct, where appropriate, U.S. trade missions, seminars, exhibits and other events to promote international trade and investment and encourage and facilitate private utilization of these trade promotion techniques by U.S. business with sponsorship of the Department;

c. Establish Business Information Offices and Business Development Offices at selected international trade fairs and at other appropriate locations in these countries and areas; the plan and conduct appropriate technical seminars and symposia and other useful trade promotional techniques;

d. In conjunction with other DIBA organizational components, as appropriate, test new trade promotion techniques, such as reverse trade missions and single company-sponsored catalog and product shows, and recommend appropriate action for Bureau consideration; and

e. Maintain and disseminate market data and project information pertaining to fairs and exhibits in these countries and areas which can be used by U.S. firms to promote the international trade interests of the United States.

.03 *The Trade Development Assistance Division* shall facilitate trade between the United States and the specified countries and areas by acquiring information on how trade is actually conducted, counseling the U.S. business community on how to go about such trade, and assisting U.S. firms to pursue business transactions. Specifically the Division shall:

a. Obtain, from U.S. businessmen who have had personal experience in doing business with specified countries, detailed information on how such business is conducted, including contract terms and conditions, the roles played by foreign government trade and ministerial organizations, methods of financing, problems to be anticipated and pitfalls to be avoided in doing business;

b. Advise U.S. firms wishing to do business with the specified countries on methods used to conduct such trade, names of decision makers and channels of access to them, contract clauses required, negotiating factors likely to be used, alternative methods of financing, and other specific information;

c. Assist U.S. firms on a case-by-case basis to compete for business transactions with these countries by calling the attention of U.S. firms to specific sales, joint-venture, barter and other opportunities, arranging contacts between U.S. businessmen and officials of these countries and when needed participating in business discussion, suggesting methods for obtaining U.S. Government approvals and clearances, and in general making every effort to advance trade between the United States and these countries without actually becoming a part to transactions;

d. Develop and provide appropriate guidance and information on business related issues for official meetings between U.S. Government and Socialist country officials; and

e. Maintain broad East-West trade contacts and two-way information flow with trade and industry associations and the DIBA Office of Field Operations District Offices.

SECTION 6. OFFICE OF EAST-WEST COUNTRY AFFAIRS

.01 The *Office of the Director* includes: The *Director* who shall plan and direct the execution of policies and programs of the Office and the *Deputy Director* who shall assist in the direction of the Office and perform the functions of the Director in his absence. The Office shall also include the *Joint Commission Secretariat* which shall, in conjunction with the appropriate geographic divisions, provide executive secretariat services to U.S. joint commissions with the U.S.S.R., Poland, Romania, and others as may be established with other countries and to official meetings between high level government representatives of the Centrally Planned Economies (CPEs) and officials of the Bureau and Department; and coordinate all aspects of the preparation for meetings of such commissions and their follow-up. The Director shall supervise and direct the following organizational components:

.02 The geographic divisions as listed below shall maintain full familiarity with the economy and the economic and political policies of the country and area for which each is responsible, and with U.S. trade and other commercial relations involved:

U.S.S.R. Affairs Division
Eastern European Affairs Division
People's Republic of China Division

In carrying out this responsibility, each division shall: a. Assemble, analyze and disseminate information on foreign economic conditions, tariffs, laws, and regulations, including support to the Office of East-West Trade Development market assessment effort and responsibility by furnishing analytical surveys on individual country markets, as well as information on specific industries. Materials shall be disseminated to the U.S. business community primarily through the Office of East-West Trade Development and also made available for use by other Government agencies and other interested parties;

b. Develop recommendations with respect to the positions of the Department on policy and legislative matters regarding bilateral problems of international trade and investment with Socialist countries, and on international economic integration activities in the region, e.g., Council for Economic Mutual Assistance (CEMA), and inter-governmental organizations involving those countries or regions;

c. Develop and provide appropriate country-oriented information and advice for use by the U.S. co-chairmen of joint trade commissions, and participate appropriately in their deliberations and activities;

d. Provide appropriate liaison with and/or participation in private sector bilateral joint commissions or groups with these countries, the U.S. Chamber of Commerce as it relates thereto, and develop and provide relevant country oriented information and advice reflecting the Bureau's interests;

e. Initiate and pursue, directly or through the Foreign Service of the United States and other channels, representation on behalf of U.S. business interests for the maintenance of full rights under terms of treaties and international agreements of the United States, and identify and evaluate foreign impediments to U.S. commercial interests and take action to eliminate or alleviate their adverse impact;

f. Maintain centralized contacts and communications control on country and regional economic and trade matters with foreign government representatives in the United States and in various economic and commercial organizations in each CPE, the Department of State, U.S. Foreign Service Posts abroad and other U.S. Government agencies, and intergovernmental organizations;

g. Develop and provide country and regional information and guidance (1) to the Office of Policy Planning and Coordination on relevant policy studies and projects; (2) to the Office of East-West Trade Development for use in determining which CPE markets should be addressed by the Bureau's Trade Promotion efforts; and (3) to the Office of Export Administration on relevant export control policy issues and licensing problems;

h. Develop appropriate guidance on matters under their jurisdiction for Departmental and Bureau officials for use at meetings of the East-West Foreign Trade Board and its Working Groups and other inter-agency groups concerned with such matters; and

i. Participate in seminars, conferences, and briefing sessions arranged by the Office of East-West Trade Development for businessmen or country/regional specialists to provide relevant information on the area involved and on the activities of the Bureau with respect thereto.

SECTION 7. OFFICE OF EAST-WEST POLICY AND PLANNING

.01 The *Office of the Director* includes: the *Director* who shall plan and direct the activities of policy and programs of the Office and the *Deputy Director* who shall assist in the direction of the Office and perform the functions of the Director in his absence.

.02 The Office shall: a. Coordinate for the Bureau the formulation and analysis of overall policy issues (with the exception of those policy issues associated with administering the Export Administration Act of 1969, as amended, which shall be the primary responsibility of the Office of Export Administration) arising in East-West trade activities, the development of policy options, objectives, goals, benefits and costs relating thereto and the formulation of recommendations thereon;

b. Coordinate the Bureau's review of recommendations on existing and proposed East-West trade related legislation;

c. Coordinate overall East-West trade policy review with international trade, monetary, finance, research and technical organizations. Maintain liaison with international organizations concered with the making of special analyses on overall East-West matters;

d. Monitor East-West trade activities of national and international organizations such as the Economic Commission for Europe, the General Agreement on Tariff and Trade (GATT), the International Monetary Fund (IMF) and the International Energy Program (IEP). Advise interested parts of the Department (including the principal liaison function with IEPR) in policy development regarding international organizations and programs concerned with the countries and areas involved;

e. Carry out macro-analytic studies in support of the policy group and for use by other Bureau offices on such topics as trade projections, balance of payments, econometric modeling of trading economies, U.S. policy regarding government and/or private financing of East-West trade, and the determination of the economic and social impact of East-West trade on the U.S., its trading partners, and relevant third countries.

f. Coordinate for the Bureau and the Department the development of analyses and recommendations on matters for consideration by the East-West Foreign Trade Board (and its Working Group), the Council on International Economic Policy and the National Security Council and their sub-groups in matters of concern to the Bureau and provide support to other interagency working groups and task forces concerned with East-West trade, other than individual CPE countries and U.S.-CPE bilateral issues which are the primary responsibility of the Office of Regional Economic Affairs.

g. Develop statistical data resources on East-West trade and make them available to the Office of East-West Trade Development for distribution to U.S. businessmen together with appropriate analysis; provide the statistic support for analyses, publications, general studies and market assessments by the relevant Offices of the Bureau; and

h. Maintain broad East-West trade contacts and two-way information flow with academic institutions and cultural organizations, and provide necessary support for the Advisory Committee on East-West Trade.

i. Organize and coordinate in cooperation with the Department of State and other offices of the Bureau periodic meetings abroad between Washington agency representatives and economic/commercial officers from U.S. Missions in the Socialist countries and in other Western countries with important interests in Socialist country economic/commercial affairs for the purpose of improving communications, reviewing existing or new policy approaches and reviewing the Bureau's trade development and other programs existing or proposed.

V 40 250 DEC 30 75 XUM

SECTION 8. OFFICE OF EXPORT ADMINISTRATION

.01 The *Office of the Director* includes: The *Director* who shall plan and direct the formulation and execution of policies and programs of the Office in implementation of the Export Administration Act of 1969, as amended; the *Deputy Director* who shall assist in the direction of the Office and perform the functions of the Director in his absence; and the *Operating Committee (OC) Chairman*, who shall direct the OC, the Commerce Department's interagency senior staff level working committee through which information, advice and policy positions from other departments and agencies concerned with controls over exports are sought and obtained by the Department. The OC is an integral part of the interagency committee structure addressing policy issues associated with export controls and includes the Advisory Committee on Export Policy (ACEP—at the Assistant Secretary level) and the Export Administration Review Board (EARB—at the Cabinet level). The Office of the Deputy Assistant Secretary for East-West Trade is responsible for providing the Executive Secretary function to the ACEP and the EARB. The Chairman of the OC shall serve in this capacity. The Director or his designees shall administer and, in conjunction with the Department's Office of the General Counsel, enforce the export control regulations and programs required to carry out Departmental responsibilities under the Export Administration Act of 1969, as amended. The Director shall supervise and direct the following organizational components:

.02 The *Policy Planning Division* shall develop recommendations for export control policies to be applied to specific countries and commodities and technical data; recommend the disposition of certain license applications which present special policy or security problems; represent the Department on certain committees and working groups of the Department of State's Economic Defense Advisory Committee (EDAC) and coordinate Department policies and programs concerning United States and international export controls and U.S. economic defense; and represent the Department on national security and foreign policy matters involving export controls before the Operating Committee of the Advisory Committee on Export Policy (ACEP).

.03 The *Operations Division* shall process license applications; develop internal operating procedures; conduct public contact activities; issue U.S. import certificates; prepare analytical and statistical reports on export control activities; develop and publish export control regulations and procedures as well as instructions for Foreign Service Officers; provide staff support to the Export Administration Technical Advisory Committees; carry out Bureau emergency readiness and planning functions; collect and disseminate statistics on requests made to U.S. exporters to cooperate in restrictive trade practices or boycotts; and prepare the semi-annual report of the Secretary of Commerce on Export Administration to the President and the Congress, and prepare all other OEA publications and reports.

.04 The *Compliance Division* shall ensure compliance with the export administration regulations, develop intelligence, information regarding areas of possible export administration violations, investigate suspected violations, and prepare cases on violations for referral to the Hearing Commissioner through the Office of the General Counsel or to the Office of the General Counsel for other legal guidance or action; promote compliance with export administration clearance regulations; develop and coordinate methods and systems to reduce paperwork and simplify export documentation and clearance procedures; and maintain liaison with the Bureau of Customs, U.S. Postal Service, and other Government and private organizations on export administration compliance and facilitation matters.

.05 The *Technical Data Division* shall administer export controls over technical data in accordance with the provisions set forth in the Export Administration Act of 1969, as amended, and the policies and procedures established by the Office of Export Administration; act on export license applications for technical data; conduct studies of technology to establish a basis for recommendations on export administration policies, criteria and regulations; provide assistance to industry and other Government agencies on export control problems involving technical data; and represent the Department on committees dealing with East-West exchanges.

.06 The *Short Supply Division* shall administer short supply commodity control programs and monitor exports and contracts for exports when commodities are in present or potential short supply or likely to have an inflationary impact. In addition, the division shall coordinate the preparation of weekly and/or monthly reports of monitoring results, and the analysis of short supply activities in the semi-annual report to the Congress. Further, the division shall be responsible for the advance planning and proper programming necessary for a continued smooth and effective implementation of current and new short supply programs including monitoring activities. This division also has clearance responsibility within DIBA for all short supply activities.

.07 The product/licensing divisions as stated below: *Capital Goods and Production Materials Division, Scientific and Electronic Equipment Division.* Each of these divisions shall for the products under its jurisdiction, administer controls over exports in accordance with the Export Administration Act, as amended, and the policies and procedures established by the Office of Export Administration; determine and take appropriate action on export license applications; conduct technical analyses of products, including potential end-use applications, to determine and recommend the extent of controls to be applied; and render assistance to industry and other Government agencies on export administration problems within its jurisdiction.

SECTION 9. ADMINISTRATIVE, PUBLIC AFFAIRS AND FIELD SERVICES

.01 The Office of Public Affairs, DIBA shall furnish public affairs and information services to Bureau of East-West Trade organization units.

.02 The *Directorate of Administrative Management, DIBA* shall furnish management, budget, personnel, travel, and administrative services. The Directorate will also serve as liaison with Departmental elements providing other administrative services.

.03 Field support necessary to Bureau of East-West Trade activities will be provided by the field offices of the *Office of Field Operations* and by an *Export Administration Field Compliance Office* located in New York, N.Y., which investigates possible violations of export administration regulations.

SECTION 10. EFFECT ON OTHER ORDERS

This Order supersedes DIBA organization and Function Order 46–2 of December 4, 1972, as amended.

ARTHUR T. DOWNEY,
Deputy Assistant Secretary for East-West Trade.

DONALD E. JOHNSON,
Deputy Assistant Secretary for Domestic and International Business.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

[46–1]

BUREAU OF EAST-WEST TRADE

Organization and Function Order

This order effective November 17, 1975 supersedes the material appearing at 38 FR 9328 of April 13, 1973.

SECTION 1. PURPOSE

This order delegates authority to the Deputy Assistant Secretary for East-West Trade, and prescribes the organization and functions of the Bureau.

SECTION 2. DELEGATION OF AUTHORITY

.01 Pursuant to Department Organization Order 10–3, the following authorities delegated to the Assistant Secretary for Domestic and International Business by the Secretary of Commerce are hereby delegated to the Deputy Assistant Secretary for East-West Trade:

a. Such provisions of the Act of February 14, 1903, (15 U.S.C. 1512 et seq.; 15 U.S.C. 171 et seq.) as amended, to foster, promote, and develop the foreign commerce of the United States, as are necessary to the performance of the Bureau's functions;

b. The Export Administration Act of 1969 (50 U.S.C. App. 2401 et seq.), as amended and extended by the Equal Export Opportunity Act (Public Law 92–412, 86 Stat. 644), and the Export Administration Amendments of 1974 (Public Law 93–500, 88 Stat. 1552), the administration

of which was delegated to the Secretary of Commerce by Executive Order 11533 of June 4, 1970 as continued in effect by Executive Orders 11683 of August 29, 1972, 11798 of August 14, 1974, and 11818 of November 5, 1974, except that the following power, authority, and discretion shall be reserved to the Secretary:

(1) The determinations required by Section 7(c) with respect to the publication or disclosure of confidential information obtained under the provisions of the Act, and

(2) The submission of reports to the President and to the Congress required by Section 10 of the Act;

c. Executive Order 11490 of October 28, 1969, as it relates to the development of national emergency preparedness plans and programs concerning the regulation and control of exports and imports, under the jurisdiction of the Department, in support of national security, foreign policy, and economic stabilization objectives;

d. Executive Order 11322 of January 5, 1967 and Executive Order 11419 of July 29, 1968, relating to the exportation from the United States of commodities or products to or on behalf of Southern Rhodesia;

e. Such portions as are necessary to the performance of the Bureau's functions of the delegations of authority, dated June 25, 1962, from the United States Information Agency under Section 5(e) of Executive Order 11034 of June 25, 1962, as amended by Executive Order 11380 of November 8, 1967, insofar as said delegation pertains to U.S. participation in trade missions abroad under the Mutual Educational and Cultural Exchange Act of 1961, as amended (22 U.S.C. 2451 et seq.); and

f. Other authorities of the Assistant Secretary applicable to performing the functions assigned in this Order.

.02 The Deputy Assistant Secretary may redelegate his authority to any employee of the Bureau of East-West Trade or to any other appropriate officer or agency of the Government, subject to such conditions in the exercise of such authority as he may prescribe.

SECTION 3. ORGANIZATION AND LINE OF AUTHORITY

.01 The Bureau of East West Trade shall be headed by the Deputy Assistant Secretary for East-West Trade, who shall report and be responsible to the Assistant Secretary for Domestic and International Business. The Deputy Assistant Secretary shall be assisted by a Deputy Director who shall perform the functions of the Deputy Assistant Secretary during the latter's absence.

.02 The Bureau of East-West Trade shall consist of the following principal organizational elements:

Office of East-West Trade Development.
Office of East-West Country Affairs.
Office of East-West Policy and Planning.
Office of Export Administration.

SECTION 4. FUNCTIONS

The Bureau of East-West Trade shall be the principal point of contact within the Department on:

.01 Policies and programs with regard to trade promotion and other commercial relations with the socialist nations; peculiar to East-West trade; studies of

.02 Economic analyses of problems market potential for U.S. trade with the socialist nations; and analytic support for the development of trade policy and the conduct of trade negotiations;

.03 The interchange of information concerning East-West trade among U.S. and foreign industry groups, trade associations, universities, and other interested organizations;

.04 Export administration and related responsibilities under the Export Administration Act of 1969, as amended; and

.05 Executive secretariat services to U.S. joint commercial commissions with socialist nations.

SECTION 5. EFFECT ON OTHER ISSUANCES

This Order supersedes DIBA Organization and Function Order 46–1 of November 17, 1972.

TRAVIS E. REED,
Assistant Secretary for Domestic and International Business.

[FR Doc.75–34997 Filed 12–29–75;8:45 am]

Economic Development Administration

JOB OPPORTUNITIES PROGRAM

Terms and Conditions for Title X Projects

The Economic Development Administration hereby publishes the terms and conditions which apply to all projects receiving assistance pursuant to Title X of the Public Works and Economic Development Act of 1965, as amended. This material is not subject to the provisions of the Administrative Procedure Act (5 U.S.C. 553) because publication of the following document does not constitute agency rulemaking. However, because requests for the Title X terms and conditions have been received by EDA, it was determined that this information should be made available to the public by promulgation in the FEDERAL REGISTER.

TITLE X REQUIREMENTS

The following requirements will apply to funds provided by the Department of Commerce (hereinafter referred to as "Department") and the ---------- (hereinafter referred to as "Transferee, including any grantee or contractor to whom such funds are made available by Transferee pursuant to any grant or contract for activities, programs or projects entered into as a result of the transfer of funds pursuant to Title X of the Public Works and Economic Development Act, as amended:

1. Transferee will provide assurance through rules, regulations and or grant or contract conditions that:

On any program, project, activity, or work performed pursuant to any grant or contract, for which financial assistance is provided under Title X employers shall hire unemployed persons, subject to the provisions of subsection (a) infra, who reside in the eligible area as set forth in section 1002 of the Public Works and Economic Development Act of 1965, as amended, in which the project is located. Preferred consideration, to the maximum extent feasible, will be given to persons who have exhausted unemployment benefits, to unemployed persons who are not eligible for unemployment benefits (except for persons lacking work experience) and to unemployed persons who have been unemployed for fifteen or more weeks.

Employers, when recruiting unemployed persons shall utilize services of the State Employment Service, Comprehensive Employment and Training Act (CETA) prime sponsors, or other appropriate local job-referral agencies or methods.

(a) When an employer is unable to recruit a qualified unemployed person who resides within the area in which the project is located:

(i) The employer may seek an unemployed person to fill the job from outside of the eligible area;

(ii) If the employer is still unable to recruit such unemployed person from outside of the area, a person who is not unemployed and who resides within the area may be hired;

(iii) In either (i) or (ii), memoranda must be maintained in the employer's project records of efforts to hire the unemployed.

2. Transferee will obligate all funds received under Title X not later than December 31, 1975. If it is determined that funds cannot be obligated by December 31, 1975, they should be returned to Department of Commerce for transfer to another agency.

3. Employment resulting from the transfer of funds under Title X will begin not later than 120 days from the date of transfer unless delayed by climatic conditions, in which case employment will begin as soon as practical. (If employment does not commence at that time, the funds will be deobligated and returned to the Department of Commerce to be transferred to another agency if required by the Department.)

4. At least seventy-five percent (75%) of the programs, projects, or activities funded under this Title X grant will be completed within twelve (12) months from the date of allocation of such funds. If this is not achieved, the Secretary of Commerce may take appropriate action.

5. All programs, projects, or activities funded under Title X shall not be inconsistent with locally approved comprehensive plans for the jurisdiction affected, whenever such plans exist. Such comprehensive plans shall include, but not be limited to, those plans prepared for the Economic Development Administration, the Department of Housing and Urban Development (HUD), or other normally recognized plans within the jurisdiction. Any projects which are inconsistent with such plans will not be approved.

6. No programs, projects, or activities for which funds are made available under this transfer shall be approved until the officials of the appropriate units of general government in the affected area have an adequate oppor-

V 40 250 DEC 30 75 XUM

tunity to comment, within the time constraints imposed by these terms and conditions, on the specific proposal. Applications from local units of Government will be deemed to have met this requirement.

7. No funds provided under this transfer shall be made available for programs, projects, or activities which have more necessary non-labor costs than originally estimated on the SEC–887 unless the program, project, or activity meets one of the following conditions:

(a) The funds are to be used to fund jointly a program authorized under Title II or VI of the Comprehensive Employment and Training Act of 1963, as amended, for necessary non-labor costs such as materials, supplies and equipment, if the overall project will provide a substantial number of jobs in an area of high unemployment;

(b) The funds are to be used to supplement funds of other Federal agencies or from non-Federal sources in order to permit the prompt initiation of projects which will stimulate the creation of jobs for unemployed persons in eligible areas, and where these supplemental funds provide not more than 20 percent (20%) of the total project costs. Grantees or contractors shall certify in the project records that other funding sources are not otherwise available and they shall estimate and document the number of jobs which are projected to result from this financial assistance; or

(c) The program, project, or activity funded will directly result in the creation of a significant number of permanent jobs in the private sector of the economy. Grantees or contractors shall certify in the project records that other funding sources are not otherwise available and estimate and document the number of jobs which are projected to result in the private sector from this financial assistance.

8. All programs, projects, or activities funded pursuant to Title X shall be located and operated in an eligible area. An eligible area is:

(a) Any area, which the Secretary of Labor designates as an area which has a rate of unemployment equal to or in excess of 6.5 percent for three consecutive months;

(b) Any area which is designated by the Secretary of Labor pursuant to Section 204(c) of CETA; and

(c) Any area which is designated by the Secretary of Commerce pursuant to Section 401 of the Public Works and Economic Development Act of 1965 as a redevelopment area.

9. Requirements for Financial Reports to be submitted by Transferee are as follows:

(a) Monthly report to be submitted by the 15th of the succeeding month showing transactions to include transfers, obligations, accrued expenditures, and disbursements. Estimated amounts may be reported for accrued expenditures, but actual amounts must be reported for all other changes or transactions. These reports must show changes and transactions by appropriation and then by project number. A sample monthly report is shown on page 3 of this attachment.

(b) Quarterly report on SF–133, "Report on Budget Execution", to be submitted by the 15th day of the succeeding quarter. The SF–133 must have detailed support for all projects showing cumulative totals, by appropriation and by project thereunder, of obligations, accrued expenditures, and cash disbursements. Estimated amounts may be reported for accrued expenditures, but actual amounts which agree with SF–224, "Statement of Transactions", must be reported for disbursements. (A sample of the required detail support for the SF–133 is attached.) The three monthly reports required in paragraph A must support the quarterly transactions reported on the SF–133. Differences must be identified with a detailed reconciliation by project.

(c) Annual Reports on SF–220 as required by Treasury Circular 966 and on Treasury Form 2108 as required by Treasury Circular No. 965.

(d) Annual Report on Federal Grants-in-Aid to States and Payments to Individuals, etc., as required by Treasury Circular No. 1014.

(e) SF–1151 returning all funds not obligated after the transfer from EDA in accordance with paragraph 2(a), Title X Terms and Conditions. This SF–1151 must be supported by a schedule showing unobligated funds by projects and is due whenever it can be determined projects will not be obligated and funds are being returned for reallocation. Subsequent deobligations, before the appropriation terminates, should be transferred back to EDA using Form SF–1151. Funds returned to EDA, before the appropriation terminates, will be reallocated to other agencies or projects.

The reports should be mailed to the following address:

Chief, Accounting Division, U.S. Department of Commerce, Economic Development Administration, Office of Administration and Program Analysis, Room 7417, Washington, D.C. 20230.

10. Transferee, if funds are used directly by Transferee, or its grantees or contractors, will provide reports, on forms to be supplied (ED–736 and ED–110X), of employment provided, work done and funds expended on each program, project, or activity on which these funds are used. Where possible, reports should be required prior to final disbursement of funds. Data supporting information in the reports must be maintained with information and records required for audit. Where consistent with agency practices, final payment to any contractor or grantee will not be made until a report, on forms to be provided to the Secretary of Commerce has been made.

11. It is the policy of the Department of Commerce that all Transferees give consideration to requiring grantees to use minority contractors and businessment for approved programs, projects, or activities, when such use can reasonably be accomplished.

12. No funds provided under this transfer shall be made available for any programs, projects, or activities when funds directly appropriated for such programs, projects, or activities are subject to an active deferral or rescission within the meaning of the Impoundment Control Act of 1974 (P.L. 93–344).

13. Before any program, project, or activity is approved by the Transferee for use of funds under this transfer, it must have been evaluated for its compliance or adherence to these terms and conditions, and the results of such evaluation reported, or forms to be provided, to the Secretary of Commerce, and the Secretary must have approved the use of these funds for such program, project or activity.

Dated: December 18, 1975.

WILMER D. MIZELL,
Assistant Secretary,
for Economic Development.

Office of the Secretary

ADVISORY COMMITTEE ON FIRE TRAINING AND EDUCATION FOR THE NATIONAL ACADEMY FOR FIRE PREVENTION AND CONTROL

Establishment

In accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I (Supp. III, 1973)) and as authorized by Section 7(k) Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 101 *et seq.*), the Secretary of Commerce shall establish the Advisory Committee on Fire Training and Education for the National Academy For Fire Prevention and Control.

The Committee shall report its findings and recommendations to the Administrator of the National Fire Prevention and Control Administration as to the desirability of establishing a mechanism for accreditation of fire training and education programs and courses. They shall also advise the Administrator as to what role the Academy should play if such an accreditation mechanism is recommended.

The Committee shall consist of nineteen members, the Academy Superintendent as Chairman and eighteen other members. The members of the committee will be appointed in such a manner as to insure a balanced representation of interests on the Committee.

The Committee will function solely as an advisory body, and in compliance with the provisions of the Federal Advisory Committee Act. Its charter will be filed under the Act, on January 13, 1976.

Interested persons are invited to submit comments regarding the establishment of the Advisory Committee on Fire Training and Education for the National Academy For Fire Prevention and Control. Such comments, as well as any inquiries, may be addressed to the Administrator, National Fire Prevention and Control Administration, U.S. Department of Commerce, Washington, D.C. 20230.

GUY CHAMBERLIN, Jr.,
Acting Assistant Secretary
for Administration.

DECEMBER 18, 1975.

WATCHES AND WATCH MOVEMENTS

Rules for Allocation of Quotas for Calendar Year 1976 Among Producers Located in the Virgin Islands, Guam and American Samoa

On November 21, 1975, the Departments of Commerce and the Interior published a joint Notice of Proposed Rule Making under Public Law 89–805, setting out the proposed formula for allocation of 1976 watch quotas among producers located in the Virgin Islands, Guam and American Samoa (40 Fed. Reg. 54274 et seq.). Interested parties were invited to participate in proposed rule making by submitting their written views on or before December 11, 1975.

One written comment was received by the Departments regarding the proposed rules which stated that utilization of actual income taxes paid during the prior year was a welcome change but that the previous allocation formula for the Virgin Islands (an equal weight of 40 percent assigned to production and shipment history and to wages subject to FICA taxes and a weight of 20 percent assigned to the total net dollar amount of income taxes) should be retained in the 1976 rules in order not to reward the "most inefficient operations" with additional quota.

With respect to the comment on the change in the Virgin Islands allocation formula, the Departments do not believe a sufficient case has been advanced to justify retention of the previous allocation formula. The Departments are convinced that, rather than encouraging inefficient operations, additional emphasis on wages will provide positive incentives for more firms to do complete assembly on their Virgin Islands movements and to expand production of more complex movements requiring greater labor imput. Conversely, firms will be dissuaded under the new formula from assembling movements requiring minimum labor, which would have the effect of reducing the total economic contribution accruing to the territory from the Headnote 3(a) watch assembly industry. The Departments have found that the amount of wages paid by firms in the territory is basically contingent upon the number of assembly operations performed and the complexity of movements assembled rather than a function of the relative efficiencies of the quota recipients.

Watch producers located in the Virgin Islands, Guam and American Samoa must receive their initial quota allocations for calendar year 1976 to avoid any interruption in their assembly operations and to enable these producers to contract for their inventory requirements and to accept and fill purchase orders for their 1976 quota allocations. Accordingly, good cause exists for making the following rules effective January 2, 1976.

SECTION 1. Upon effective date of these rules, or as soon thereafter as practicable, each producer located in the Virgin Islands, Guam, and American Samoa which received a duty-free watch quota allocation for calendar year 1975, will receive an initial quota allocation for calendar year 1976 equal to 50 percent of the number of watch units assembled by such producer in the particular territory and entered duty-free into the customs territory of the United States during the first ten months of calendar year 1975.

SECTION 2. Each producer to which an initial quota has been allocated pursuant to Section 1 hereof must, on or before April 1, 1976, have assembled and entered duty-free into the customs territory of the United States at least 30 percent of its initial quota allocation. Any producer failing to enter duty-free into the customs territory of the United States on or before April 1, 1976, a number of watch units assembled by it in a particular territory equal to, or greater than, 30 percent of the number of units initially allocated to such producer for duty-free entry from that territory will, upon receipt of a show cause order from the Departments, be given an opportunity, within 30 days from such receipt, to show cause why the duty-free quota which it would otherwise be entitled to receive should not be cancelled or reduced by the Departments. Such a show cause order may also be issued whenever there is reason to believe that shipments through December 31, 1976, by any producer under the quota allocated to it for calendar year 1976 will be less than 90 percent of the number of units allocated to it. Upon failure of any such producer to show good cause, deemed satisfactory by the Departments, why the remaining, unused portion of the quota to which it would otherwise be entitled should not be cancelled or reduced, said remaining, unused portion of its quota shall be either cancelled or reduced, whichever is appropriate under the show cause order. The Departments may also issue a show cause order to any producer which, for a period of two or more consecutive calendar years, has failed through its Headnote 3(a) watch assembly operation to make a meaningful contribution to the economy of the territory and to the continued development of the duty-free watch assembly industry in the territory, when compared with the performance of the territorial duty-free watch assembly industry as a whole. Among the factors the Departments may consider in taking this action are the producer's utilization of quota, amount of direct labor involved in the assembly of watches and watch movements shipped duty-free into the customs territory of the United States, and the net amount of corporate income taxes paid to the government of the territory. Upon failure of the producer to show cause, deemed satisfactory by the Departments, why such action should not be taken, the firm's quota shall be cancelled and the eligibility of the firm for further allocations terminated. In the event of any quota cancellation or reduction under this section, or in the event a firm voluntarily relinquishes a part of its quota, the Departments will reallocate the quota involved, in a manner best suited to contribute to the economy of the territories, among the remaining producers: Provided however, That if in the judgment of the Departments it is appropriate, applications from new firms may, in lieu of such reallocation, be invited for any part or all of any unused portions of quotas remaining unallocated as a result of cancellation or reduction hereunder or any quota voluntarily relinquished. Every producer to which a quota is granted is required to file a report on April 15, July 15 and October 15, of each year covering the periods January 1 to March 31, April 1 to June 30 and July 1 to September 30 respectively via registered mail on Form DIB–321P, copies of which will be forwarded to each producer at its territorial address of record at least 15 days prior to the required reporting date. Copies of this form may also be obtained from the Special Import Programs Division, Office of Import Programs, U.S. Department of Commerce, Washington, D.C. 20230. Form DIB–321P will provide the Departments with information regarding the producer's watch movement assembly operation in the insular possessions. Such information may include the status of beginning and ending inventories of finished watch movements and component parts, scheduled delivery dates and number of watch movement parts and

the Act may be obtained from the Special

V40N250 DEC 30 75 XUM

components ordered, number of watch movements assembled, number of watch movements entered into the customs territory of the United States, and a list of confirmed orders for shipment of finished watch movements into the customs territory of the United States, prior to December 31, 1976. Each producer to which a quota is granted will also report on Form DIB–321P any change in ownership and control which has occurred subsequent to the filing of an application for a watch quota on Form DIB–334P (see Section 9, below).

SECTION 3. Application forms will be mailed to recipients of initial quota allocations as soon as practicable and must be filed with the Departments on or before January 31, 1976. All data required must be supplied as a condition for annual allocation and are subject to verification by the Departments. In order to accomplish this verification it will be necessary for representatives of the Departments to meet with appropriate officials of quota recipients in the insular possessions in order to have access to company records. Representatives of the Departments plan to perform this verification beginning on or about February 15, 1976, in Guam and American Samoa and beginning on or about March 1, 1976, in the Virgin Islands, and will contact each producer locally regarding the verification of its data.

SECTION 4. (Virgin Islands only). The annual quotas for calendar year 1976 for the Virgin Islands will be allocated as soon as practicable after April 1, 1976, on the basis of (1) the number of units assembled by each producer in the territory and entered by it duty-free into the customs territory of the United States during calendar year 1975, (2) the dollar amount of wages, up to a maximum of $13,200 per person, paid by such producer in the territory during calendar year 1975 to persons residing in the territory whose pay was attributable to its Headnote 3(a) watch assembly operation, and (3) the total dollar amount of income taxes paid by such producer in the territory during calendar year 1975 attributable to its Headnote 3(a) watch assembly operations, excluding penalty payments and less any income tax refunds and subsidies paid to such producer during calendar year 1975. In making allocations under this formula, a weight of 35 percent will be assigned to Headnote 3(a) production and shipment history, a weight of 50 percent will be assigned to wages paid as specified above, and a weight of 15 percent will be assigned to the total dollar amount of income taxes paid during calendar year 1975 and attributable to Headnote 3(a) watch assembly operations, with the exclusions and deductions specified above.

SECTION 5. (Guam only) The annual quotas for calendar year 1976 for Guam will be allocated as soon as practicable after April 1, 1976, on the basis of the number of units assembled by each producer in the territory and entered by it duty-free into the customs territory of the United States during calendar year 1975, and the dollar amount of wages, up to a maximum of $13,200 per person, paid by such producer in the territory during calendar year 1975 to persons residing in the territory whose pay was attributable to its Headnote 3(a) watch assembly operation. In making allocations under this formula, 40 percent will be assigned to production and shipment history and 60 percent to wages as specified above.

SECTION 6. (American Samoa only) The annual quota for calendar year 1976 will be allocated to the producer in the territory as soon as practicable after April 1, 1976. Policies relative to the allocation of quota in American Samoa are set forth in the Departments' notice of June 9, 1967 (32 FR 8316 et seq.).

SECTION 7. (Virgin Islands and Guam) For purposes of allocating watch quotas for calendar year 1976 under Sections 4 and 5 above, any watches or watch movements shipped from the Virgin Islands or Guam during calendar year 1975 for duty-free entry into the customs territory of the United States against a producer's 1975 watch quota, and which were lost prior to entry into the customs territory of the United States, shall nevertheless be considered as having been entered into the customs territory for purposes of quota fulfillment: Provided, that the Departments have been satisfied that shipment was in fact made but lost prior to entry into the customs territory.

SECTION 8. (Virgin Islands and Guam) With respect to the Virgin Islands and Guam quotas, after taking into account the Headnote 3(a) shipments through March 31, 1976, of the 1976 quota recipients, the Departments may set aside 200,000 and 70,000 units respectively of the calendar year 1976 Virgin Islands and Guam quotas for new firms and invite quota applications from new firms on Form DIB–334P. The Departments may also require new firms to provide information regarding the applicant's experience in watch movement assembly and distribution; anticipated employment of local workers and proposed wage rates; watch movement assembly operations to be performed and types of movements to be assembled in the territories; estimated direct labor costs; anticipated capital investment in the territories; proposed source of financing; and plans for marketing movements assembled in the territories. (By "new firm" is meant an entity which has not heretofore been allocated a quota under Public Law 89–805 and which is completely separate from and unassociated with any present or previous producer in terms of ownership and control.) Based on the Departments' evaluation of the information submitted by applicants, the Departments may allocate a part or all of the set aside portion of the calendar year 1976 Virgin Islands and Guam quotas among those applicants whose proposals, in the judgment of the Departments, offer the likelihood of the greatest contribution to the economy of the territories, and in such a manner as, in the judgment of the Departments, will best serve the interests of the territories. Any part or all of the set aside quotas not allocated under this provision shall be reallocated among the 1976 quota recipients in the appropriate territories in a manner best suited to contribute to the economies of the territories.

SECTION 9. The rules restricting transfers of duty-free quotas issued on January 29, 1968, and published in the FEDERAL REGISTER on January 31, 1968 (33 F.R. 2399), are hereby incorporated by reference as applicable to transfers of quotas issued during calendar year 1976 except that detailed reporting of ownership and control will be reported on an annual basis on Form DIB–334P at the time the producer applies for an annual duty-free watch quota for calendar year 1976. Subsequent changes in ownership and control will be reported on April 15, July 15, and October 15, 1976, on Form DIB–321P required in Section 2 above.

Any interested party has the right to petition for the amendment or repeal of the foregoing rules and may seek relief from the application of any of their provisions upon a showing of good cause under the procedures relating to reviews by the Secretaries of Commerce and the Interior (15 CFR 13; 32 F.R. 15818, November 17, 1967).

Dated: December 23, 1975.

FRED M. ZEDER,
Director, Office of Territorial Affairs, Department of the Interior.

ALAN POLANSKY,
Deputy Assistant Secretary for Resources and Trade Assistance, Department of Commerce.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

EMERGENCY SCHOOL AID

Notice of Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in the Emergency School Aid Act, Title VII of P.L. 92–318, as amended by P.L. 93–380 (20 U.S.C. 1601–1619) applications for assistance are being accepted from local educational agencies and from other public and private nonprofit organizations for basic grants under section 706 (a) of the Act, pilot projects under section 706(b) of the Act, projects to be carried out by public or nonprofit private organizations under section 708(b) of the Act, bilingual projects under section 708(c) of the Act, and special arts projects, special mathematics projects, special student concerns projects, and other special projects (including projects in Guam, the Trust Territory of the Pacific Islands, Puerto Rico, American Samoa, and the Virgin Islands) under section 708(a) of the Act.

A. *Closing date for receipt of applications.* Applications for special projects under section 708(a) of the Act must be received by the U.S. Office of Education Application Control Center in Washington, D.C., on or before February 13, 1976.

Applications for basic grants, pilot projects, nonprofit organizaiton projects, and bilingual projects under sections 706(a), 706(b), 708(b), and 708(c) of the Act, respectively, must be received by the Application Control Center of the U.S. Office of Education Regional Office serving the area in which the applicant is located on or before February 13, 1976.

B. *Applications sent by mail.* All applications for special project grants under section 708(a) of the Act sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, 400 Maryland Avenue SW., Washington, D.C. 20202. The address for such applications should be marked: Attention: 13.532C (for other special projects); Attention: 13.532D (for special arts projects); Attention: 13.532E (for special mathematics projects); or Attention: 13.532F (for special student concerns projects).

All applicaitons for grants under sections 706(a), 760(b), 708(b), and 708(c) of the Act sent by mail should be addressed to the appropriate U.S. Office of Education Regional Office listed below:

OFFICE OF EDUCATION REGIONAL OFFICES

Deadline for Submission (local time) 4:00 p.m.

Region I—(Boston)—Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont. U.S. Office of Education Application Control Center, Room 2303, John Fitzgerald Kennedy Federal Bldg., Government Center, Boston, Massachusetts 02203.

Region II—(New York City)—New York and New Jersey. U.S. Office of Education Application Control Center, Room 3947, Federal Bldg., 26 Federal Plaza, New York 10007.

Region III — (Philadelphia) — Delaware, District of Columbia, Maryland, Pennsylvania, Virginia and West Virginia. U.S. Office of Education Application Control Center, Room 16200, 3535 Market Street, P.O. Box 13716, Philadelphia, Pennsylvania 19101.

Region IV—(Atlanta)—Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina and Tennessee. U.S. Office of Education Application Control Center, Room 555, 50 Seventh Street NE., Atlanta, Georgia 30323.

Region V—(Chicago)—Illinois, Indiana, Minnesota, Michigan, Ohio and Wisconsin. U.S. Office of Education Application Control Center, 32nd Floor, 300 South Wacker Drive, Chicago, Illinois 60606.

Region VI—(Dallas)—Arkansas, Louisiana, New Mexico, Oklahoma and Texas. U.S. Office of Education Application Control Center, Room 1440, 1200 Main Tower Bldg., Dallas, Texas 75202.

Region VII—(Kansas City)—Iowa, Kansas, Missouri and Nebraska. U.S. Office of Education Application Control Center, Room 360, 601 East 12th Street, Kansas City, Missouri 64106.

Region VIII — (Denver) — Colorado, Montana, North Dakota, South Dakota, Utah and Wyoming. U.S. Office of Education Application Control Center, Room 11037, Federal Office Bldg., 1961 Stout Street, Denver, Colorado 80202.

Region IX—(San Francisco)—Arizona, California, Hawaii and Nevada. U.S. Office of Education Application Control Center, Room 211, 50 Fulton Street, San Francisco, California 94102.

Region X—(Seattle)—Alaska, Idaho, Oregon and Washington, U.S. Office of Education Application Control Center, Room 508, Arcade Plaza Bldg., M/S 1505, 1321 Second Avenue, Seattle, Washington 98101.

An application sent by mail will be considered to have been received on time if: (1) The application was sent to the appropriate office by registered or certified mail not later than February 9, 1976, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by the appropriate U.S. Office of Education mail room. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, the U.S. Office of Education, or the appropriate Regional Office.

C. *Hand delivered applications.* Hand delivered applications for special project grants under section 708(a) of the Act must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time, except Saturdays, Sundays, and Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

Hand delivered applications for grants under section 706(a), 706(b), 708(b) or 708(c) of the Act must be taken to the appropriate U.S. Office of Education Regional Office at the address listed in Part B of this notice. Hand delivered applications will be accepted daily between the hours of 8:30 a.m. and 4:00 p.m. No applications will be accepted after 4:00 p.m. local time on the closing date.

D. *Project periods.* Grant awards will be made pursuant to this notice for projects commencing no earlier than July 1, 1976, and terminating no later than June 30, 1977, except that awards for special student concerns projects will be made for a period commencing no earlier than July 1, 1976, and terminating no later than June 30, 1978.

E. *Applicable regulations.* Grant awards made pursuant to this notice will be subject to the regulations in 45 CFR Part 185, relating to the Emergency School Aid Act and, except where inconsistent with Part 185, to the Office of Education general provisions regulations in 45 CFR Parts 100 and 100a, relating to direct project assistance programs.

F. *Program information and forms.* Information and application forms for special projects under section 708(a) of the Act may be obtained from the Special Projects Branch, Equal Educational Opportunity Programs, U.S. Office of Education, Room 2017, 400 Maryland Avenue SW., Washington, D.C. 20202.

Information and application forms for projects under sections 706(a), 706(b), 708(b), and 708(c) of the Act may be obtained from the appropriate U.S. Office of Education Regional Office.

(Catalog of Federal Domestic Assistance numbers 13.525 (Basic Grants), 13.526 (Pilot Projects), 13.528 (Bilingual Projects), 13.529 (Projects to be carried out by Public or Private Nonprofit Organizations), and 13.532 (Special Projects)

Dated: December 22, 1975.

T. H. BELL,
U.S. Commissioner of Education.

Food and Drug Administration

PANEL ON REVIEW OF OBSTETRICAL-GYNECOLOGICAL DEVICES

Availability of Panel Report

In accordance with the provisions of a notice to manufacturers concerning obstetrical-gynecological classification procedures, published in the FEDERAL REGISTER of May 19, 1975 (40 FR 21843), the Food and Drug Administration announces the availability of the report of the Obstetrical-Gynecological Panel's classification results. This report contains the tentative classification conclusions of the Obstetrical-Gynecological Panel and includes a list of the devices reviewed, the answers to the classification logic scheme questions, and the recommended classification for each device.

Copies of this report are available upon request from the office of the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852. In addition, this report has been placed on public display at the office of the Hearing Clerk and may be viewed at that office during working hours, Monday through Friday.

Dated: December 16, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

REGULATORY INVESTIGATIONS OF DRUG, PESTICIDE, AND INDUSTRIAL CHEMICAL RESIDUES IN ANIMAL FEEDS AND IN MEAT AND POULTRY

Memorandum of Understanding With the Animal and Plant Health Inspection Service and Various State Agencies

Pursuant to the notice published in the FEDERAL REGISTER of October 3, 1974 (39 FR 35697) stating that future agreements or memoranda of understanding between the Food and Drug Administration and others would be published in the FEDERAL REGISTER, the Commissioner of Food and Drugs issues the following notice:

DEC 30 75 XUM V40250 DEC 30 75 XUM

A Memorandum of Understanding between the Food and Drug Administration, Region III, the Delaware Dept. of Agriculture, Maryland Dept. of Agriculture, Pennsylvania Dept. of Agriculture, Virginia Dept. of Agriculture and Commerce, and the U.S. Dept. of Agriculture Regional Office/Animal and Plant Health Inspection Service was executed on November 12, 1975. The purpose of the memorandum is to establish a coordinated program among the participating agencies to determine the cause of illegal residue finding and, where warranted, to initiate appropriate corrective action. The memorandum sets forth a "working-sharing" program. It reads as follows:

MEMORANDUM OF UNDERSTANDING

Between

DELAWARE DEPARTMENT OF AGRICULTURE, MARYLAND DEPARTMENT OF AGRICULTURE, PENNSYLVANIA DEPARTMENT OF AGRICULTURE, VIRGINIA DEPARTMENT OF AGRICULTURE AND COMMERCE, U.S. DEPARTMENT OF AGRICULTURE REGIONAL OFFICE/ANIMAL AND PLANT HEALTH INSPECTION SERVICE

And

FOOD AND DRUG ADMINISTRATION, REGION III

Relative to Regulatory Investigations Involving Drug, Pesticide and Industrial Chemical Residues in Animal Feeds and in Meat and Poultry.

The Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA), under the authority of the Federal Meat Inspection Act and the Poultry Products Inspection Act, is responsible for the wholesomeness and safety of meat and poultry intended for human consumption. This is accomplished by continuous inspection at slaughtering and processing establishments and by sampling and analyzing edible tissues derived from livestock and poultry at the time of slaughter to assure, among other things, that meat and poultry do not contain illegal residues of drugs, pesticides, and industrial chemicals.

The Food and Drug Administration (FDA) of the Department of Health, Education, and Welfare is charged with the enforcement of the Federal Food, Drug, and Cosmetic Act. In fulfilling its responsibilities under the act, FDA directs its activities toward the protection of the public health of the nation by ensuring that foods for humans and animals are safe and wholesome and that animal feeds are free of illegal drug, pesticide, and industrial chemical residues. This is accomplished by inspecting the processing and distribution of animal feeds and examining samples thereof to assure compliance with the act.

The Delaware, Maryland, and Pennsylvania Departments of Agriculture and the Virginia Department of Agriculture and Commerce, under their respective State authorities, conduct investigations and related activities to assure the safety and wholesomeness of foods and feeds.

Meat and poultry may become contaminated with illegal drug, pesticide, or industrial chemical residues from several sources, including the misuse of animal drugs, the use of animal feeds containing illegal drugs, pesticides, and industrial chemicals, or from the environment. As a result, the State agencies, APHIS, and FDA have certain related objectives in carrying out their respective regulatory and service activities. Therefore, it is desirable from the standpoint of public interest to set forth in this Memorandum of Understanding, the work-sharing program being adopted to enable each agency to discharge, as effectively as possible, its responsibilities relative to the problem of illegal drug, pesticide, and industrial chemical residues in meat, poultry, and in feeds for food-producing animals. This Memorandum of Understanding will also augment the agreement between FDA and APHIS relative to their regulatory programs involving residues in animal feeds and in meat and poultry, which was published in the FEDERAL REGISTER of April 10, 1975 (40 FR 16228).

I. *Purpose.* It is the purpose of this understanding to establish a coordinated effort among the participating agencies to promote efficient and prompt investigations of APHIS findings of illegal drug, pesticide and industrial chemical residues in edible tissue samples of meat or poultry in order to determine the cause of the illegal residue finding and, where warranted, to initiate appropriate corrective action.

II. *Objectives.* A. To reduce the potential for the disposition of illegal residues in human food stemming from the misuse of animal drugs and medicated feeds, pesticides, and industrial chemicals at the livestock producer level.

B. To provide a uniform investigational format, reporting system, and regulatory procedure for State and/or FDA responses to APHIS assay reports of tissue residue samples.

C. To develop a system to coordinate residue investigations and thus achieve a more efficient utilization of all available State and Federal manpower.

III. *Work-Sharing Program.* A. Goals and responsibilities: The parties to this understanding will share the responsibility for the investigation of APHIS reports of illegal residues found in edible tissue samples of meat or poultry originating in Region III of FDA. Close liaison and communication will be maintained to assure that manpower is efficiently utilized and regulatory efforts are properly coordinated to achieve a high level of industry compliance.

B. The Animal and Plant Health Inspection Service will:

1. Immediately notify the Food and Drug Administration, Region III, of findings of illegal drug, pesticide, or industrial chemical residues in edible tissue samples of meat or poultry and promptly transmit to FDA all other information relative to these actionable findings in Region III obtained by APHIS subsequent to such notification.

2. Make available to FDA any reports, documents, and samples necessary to support a regulatory action under the Federal Food, Drug, and Cosmetic Act involving illegal residues in meat and poultry.

C. The Food and Drug Administration, Region III, will:

1. Designate a coordinator to accomplish the goals of this memorandum of understanding.

2. Receive from APHIS copies of all USDA assay reports of illegal residues found in edible tissue samples of meat or poultry originating in the Region III area.

3. Provide guidance to State agencies for the performance of investigations.

4. Determine and initiate the appropriate course of action to be followed with respect to APHIS reports.

5. Monitor progress of investigations or other courses of action initiated to assure appropriate and timely completion.

6. Keep all parties to this understanding informed of the progress being made on actionable items and other relevant information.

D. The State agencies (Delaware Department of Agriculture, Maryland Department of Agriculture, Pennsylvania Department of Agriculture, and Virginia Department of Agriculture and Commerce) will:

1. Investigate all illegal residue reports submitted by the FDA coordinator to determine the cause of illegal residues and, where appropriate, to establish who is the culpable individual. Investigation will include documentation of all relevant facts by records, photographs, affidavits, and physical samples if appropriate. Investigational reports, including recommendations for corrective action, will be prepared by the investigator, endorsed by his supervisor, and forwarded to the FDA coordinator.

2. Attempt to achieve compliance during the course of an investigation by means appropriate to the particular situation.

3. Upon completion of the investigation, the director of the State agency will, in writing, advise the producer, shipper or other responsible individual of the findings of that investigation.

4. Refer requests for investigations that cannot be accomplished because of restrictive State laws or for other purposes back to the FDA coordinator for reassignment.

5. Provide for followup investigation where continuing operational deficiencies of the livestock producer are noted, so that appropriate regulatory action may be initiated under State statutes where applicable.

6. Notify the FDA coordinator of regulatory actions being initiated and final results.

7. Keep the FDA coordinator fully informed of pertinent details relating to this program, including copies of correspondence to producers, shippers, etc.

IV. *General Provisions.* A. *Planning sessions.* 1. Meetings of representatives from the participating agencies will be conducted periodically to review working arrangements, evaluate accomplishments, maintain program uniformity, plan future program operations, and if necessary, recommend revisions of the understanding for the next term.

2. Meetings will be conducted on the fourth and tenth month after the effective date of this understanding, and on an annual basis thereafter.

3. The meetings will be conducted on an alphabetical rotational basis in the offices of the participating State agencies. The program coordinator will be responsible for preparation of the agenda. The host agency will be responsible for preparation of minutes of proceedings to be distributed to participants.

B. *Term of understanding.* 1. The provisions of this understanding become effective on the first day of the month following the latest signature date. It will expire on the last day of the twelfth effective month.

2. To be renewed it must be reviewed by all participating agencies, and an addendum stating its extension for another twelve-month period must be signed by the agencies.

3. Any agency may terminate its participation in this program upon thirty days' written notice to its partner agencies.

Approved and accepted:

M. Martin Isaacs, Secretary, Delaware Department of Agriculture. Dated: October 3, 1975.

James A. McHale, Secretary, Pennsylvania Department of Agriculture. Dated: October 2, 1975.

T. C. Maraviglia, Regional Food and Drug Director, Region III, FDA. Dated: September 30, 1975.

Young D. Hance, Secretary, Maryland Department of Agriculture. Dated: October 3, 1975.

S. Mason Carbaugh, Commissioner, Virginia Department of Agriculture and Commerce. Dated: October 2, 1975.

Melvin C. Hatter, D.V.M., Acting Administrator, USDA, Animal and Plant Health Inspection Service. Dated: November 12, 1975.

Effective date. This Memorandum of Understanding became effective November 12, 1975.

Dated: December 22, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

NATIONAL ADVISORY COUNCIL ON THE EDUCATION OF DISADVANTAGED CHILDREN

EFFECTIVENESS OF COMPENSATORY EDUCATION

Meeting

Notice is hereby given, pursuant to Pub. L. 92-463, that the next meeting of the National Advisory Council on the Education of Disadvantaged Children will be held on January 30, 1976 from 9 a.m.–5 p.m., and on January 31, from 9 a.m.–5 p.m. The meeting will be held in Boca Raton, Florida.

The National Advisory Council on the Education of Disadvantaged children is established under section 148 of the Elementary and Secondary Act (20 U.S.C. 2411) to advise the President and the Congress on the effectiveness of compensatory education to improve the educational attainment of disadvantaged children.

The meeting will be held to review 1976 Annual Report materials and, to participate in a site visit at the Florence Fuller School in Boca Raton, Florida.

Because of limited space, all persons wishing to attend should call for reservations by January 5, 1976, Area Code 202/382-6945.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on the Education of Disadvantaged Children, located at 425 Thirteenth Street, NW., Suite 1012, Washington, D.C.

Signed at Washington, D.C., on December, 22, 1975.

ROBERTA LOVENHEIM,
Executive Director.

Office of the Secretary

PRESIDENT'S BIOMEDICAL RESEARCH PANEL

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the President's Biomedical Research Panel on January 26 and 27, 1976, in Suite 3100, 2401 E Street, NW., Washington, D.C. 20506.

The meeting will be open to the public from 9 a.m. to 5 p.m. on January 26 and from 9 a.m. to 5 p.m. on January 27. Attendance by the public will be limited to space available. The agenda will address issues pertaining to the studies previously identified by the Panel as being germane to its Congressional mandate.

Substantive program information will be provided by Dr. Charles Lowe, Executive Director or the Panel (202-634-1907), Suite 3100, 2401 E Street, NW., Washington, D.C. 20506.

All requests for information should be directed to Ms. Rosemarie Lazo, at the above address.

Dated: December 16, 1975.

CHARLES U. LOWE,
Executive Director.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 75 243]

NATIONAL BOATING SAFETY ADVISORY COUNCIL

Open Meeting

This is to give notice in accordance with section 10(a) of the Federal Advisory Committee Act (P.L. 92-463; 5 U.S.C. App. 1) of October 6, 1972 that the National Boating Safety Advisory Council (the Council) will conduct an open meeting on Wednesday, 4 February 1976, in Room 2230, Department of Transportation, NASSIF Building, 7th and D Streets SW., Washington, D.C. The meeting is scheduled to begin at 9 a.m.

The agenda for the Thirteenth Meeting of the Council is as follows:

1. Introduction of newly appointed Council members.
2. Review of action taken at the Twelfth Meeting of the Council.
3. Executive Director's Report.
4. Vote on concurrence to discontinue rulemaking procedures which would require recreational boats to carry a dewatering device (bailer) and a means of secondary propulsion (paddle).
5. Vote on need for shielding of 32 point stern navigation lights for recreational boats.
6. Discussion on Personal Flotation Device (P.F.D.) reliability.
7. Discussion of proposal by the National Association of State Boating Law Administrators (NASBLA) to discontinue acceptance of Type IV P.F.D.'s (buoyant cushions) in lieu of wearable devices, on boats less than 16 feet in length.
8. Briefing on the Coast Guard Research and Development efforts in support of the Boating Safety Program.
9. Report on European international standards.
10. Vote on concurrence of proposed Final Rulemaking action on the Exception to P.F.D. requirements for white water canoes and kayaks.
11. Review of boating education symposium.
12. Report on "Termination of Use" as associated with the Hazardous Bars Regulation.
13. Report by Visual Distress Signal Subcommittee.
14. Member items.
15. Chairman's session.
16. Discussion on date, place and thrust of next meeting.

The National Boating Safety Advisory Council was established in 1971 pursuant to Section 33 of the Federal Boat Safety Act of 1971 (P.L. 92-75, 46 U.S.C. 1451 et seq.). The Coast Guard is required to consult with the Council in determining the need for, and in prescribing, regulations and standards for boats and associated equipment. In addition, the Coast Guard is required to consult with the Council on any other major boating safety matters related to the Act.

Any member of the public who wishes to do so may file a written statement with the Council before or after the meeting, or may present an oral statement with advance notice to the Chairman.

Interested persons may seek additional information or the summary minutes of the meeting by writing to: Captain Merrill K. Wood, USCG, U.S. Coast Guard (G-BA/62 TRPT), Washington, D.C. 20590 or by calling (202) 426-1060.

Dated: December 15, 1975.

D. F. LAUTH,
Rear Admiral, U.S. Coast Guard, Chief, Office of Boating Safety.

Federal Aviation Administration

FEDERAL AVIATION ADMINISTRATION AIR TRAFFIC PROCEDURES ADVISORY COMMITTEE

Meeting

Notice is hereby given that the Fereral Aviation Administration Air Traffic Procedures Advisory Committee will hold a meeting at 9 a.m. e.s.t., January 27 through 12 p.m. January 30, 1976, at Federal Aviation Administration Headquarters, 800 Independence Avenue, SW., Washington, D.C.

The meeting will be in conference rooms 5A, B, and C, on January 27, 29, and 30, and in conference rooms 7A, B, and C on January 28. The following agenda items are scheduled for this meeting:

1. Election of a Chairman.
2. Explore alternative methods for disseminating information on the ATC system including the proposed Pilot/Controller Glossary and develop recommendations in this regard.
3. Review the Air Traffic Control Handbook.

The meeting will be open to the public. Interested persons are invited to attend the meeting and participate by making oral or written statements concerning those topics on the agenda. Written statements should be submitted in duplicate to Mr. Edward C. Krupinski, Executive Director, Air Traffic Procedures Advisory Committee, Air Traffic Service, AAT-300, 800 Independence Avenue, SW., Washington, D.C. 20591. Persons wishing to make oral statements at the meeting must notify Mr. Krupinski, by January 20, 1976. Presentations will be scheduled on a first come, first served basis as time permits. Requests for further information should be made to the Executive Director, Air Traffic Procedures Advisory Committee.

Issued in Washington, D.C., on December 16, 1975.

RAYMOND G. BELANGER,
Director, Air Traffic Service.

CIVIL AERONAUTICS BOARD

[Docket 27592 Agreement C.A.B. 25605]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Agreements on Currency Matters

Agreements adopted by the Traffic Conferences of the International Air Transport Association relating to currency matters.

An agreement has been filed with the Board, pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations, between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA). The agreement, adopted by mail vote, has been assigned the above-designated C.A.B. agreement number.

The agreement would amend an existing resolution, which permits any IATA member to rescind currency conversion resolutions 021L and 021LL, by extending the period for such rescission from March 31, 1976 to September 30, 1976, due to the postponement of an IATA conference.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that Resolution 100,200,300 (Mail 993,272,465) 001 mm, incorporated in Agreement C.A.B. 25605, is adverse to the public interest or in violation of the Act.

Accordingly, IT IS ORDERED THAT:

Agreement C.A.B. 25605 be and hereby is approved.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

JAMES L. DEEGAN,
Chief, Passenger and Cargo Rates Division, Bureau of Economics.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.75-35057 Filed 12-29-75;8:45 am]

[Docket 27573; Agreement C.A.B. 25432, R-2 and R-3, Agreement C.A.B. 25433, R-5, Agreement C.A.B. 25437, R-3, Agreement C.A.B. 25509, Agreement C.A.B. 25510, Agreement C.A.B. 25546, R-1 and R-2]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Agreements on Commodity Rates

Agreements adopted by the Traffic Conferences of the International Air Transport Association relating to specific commodity rates. Issued under delegated authority December 19, 1975.

Agreements have been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers, embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA). The agreements, adopted pursuant to the provisions of Resolution 590 dealing with specific commodity rates or by mail vote, have been assigned the above C.A.B. agreement numbers.

Agreements C.A.B. 25432, R-2 and R-3; C.A.B. 25433, R-5; C.A.B. 25437, R-3; and C.A.B. 25546, R-1 and R-2, establish additional specific commodity rates for application between U.S. points and points in the South Pacific. Agreement C.A.B. 25509 in essence would commonrate Kaohsiung with Taipei with respect to specific commodity traffic moving between Kaohsiung and points within the Pacific except that commodity rate traffic to/from Japan, Korea and Guam would remain subject to the present addon for Kaohsiung over Taipei. Finally, Agreement C.A.B. 25510 establishes new add-ons and increases existing add-ons for construction of through specific commodity rates between various points in Brazil and points within the Pacific over Belem and Rio de Janeiro.

We will disapprove the proposed South Pacific specific commodity rates consistent with our actions in Order 75-11-78, dated November 21, 1975, which dealt with the proposed IATA South Pacific cargo rates structure, but will approve the remaining charges as outlined above.

Pursuant to authority duly delegated by the Board in the Board's Regulations 14 CFR 385.14:

1. It is not found that Agreements C.A.B. 25509 and C.A.B. 25510 are adverse to the public interest or in violation of the Act:

2. It is found that the specific commodity rates incorporated in Agreements C.A.B. 25432, R-2 and R-3; C.A.B. 25433, R-5; C.A.B. 25437, R-3; and C.A.B. 25546, R-1 and R-2 are adverse to the public interest and in violation of

Accordingly, IT IS ORDERED THAT:

1. Agreements C.A.B. 25509 and C.A.B. 25510 be and hereby are approved; and

2. Agreements C.A.B. 25432, R-2 and R-3; C.A.B. 25433, R-5; C.A.B. 25437, R-3; and C.A.B. 25546, R-1 and R-2 be and hereby are disapproved.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

JAMES L. DEEGAN,
Chief, Passenger and Cargo Rates Division, Bureau of Economics.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

CIVIL RIGHTS COMMISSION

CONNECTICUT ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Connecticut Advisory Committee (SAC) to this Commission will convene at 5:30 p.m. on January 22, 1975, at the Gloria Busch's House, 5 Long Lane, Middletown, Connecticut 06457.

Persons wishing to attend this meeting should contact the Committee Chairperson, or the Northeastern Regional Office of the Commission, Room 1639, 26 Federal Plaza, New York, New York 10007.

The purpose of this meeting is to discuss EEO in city government and commission's school desegregation project.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., December 16, 1975.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

CIVIL SERVICE COMMISSION

FEDERAL EMPLOYEES PAY COUNCIL

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that the Federal Employees Pay Council will meet at 2:00 p.m. on Wednesday, January 14, 1976. This meeting will be held in room 5A06A of the U.S. Civil Service Commission building, 1900 E Street, N.W., and will consist of continued discussions on future comparability adjustments for the statutory pay systems of the Federal Government, which are defined in section 5301 of title 5, United States Code.

The Chairman of the U.S. Civil Service Commission is responsible for the making of determinations under section 10(d) of the Federal Advisory Committee Act as to whether or not meetings of the Federal Employees Pay Council shall be open to the public. He has determined that this meeting will consist of exchanges of opinions and information which, if written, would fall within exemptions (2) or (5) of 5 U.S.C. 552(b). Therefore, this meeting will not be open to the public.

For the President's Agent:

RICHARD H. HALL,
Advisory Committee Management Officer for the President's Agent.

COMMISSION ON FEDERAL PAPERWORK

NOTICE OF PUBLIC MEETINGS

Notice is hereby given of two field meetings in Tennessee of the Commission on Federal Paperwork.

The Commission will be holding a public meeting in Nashville, Tennessee, on January 8, 1976, at the United States Federal Courthouse, Room A-440, 801 Broadway Avenue. The meeting will commence at 9:00 a.m. and end at 1:00 p.m. The Commission will receive comments from various individuals in the areas of agri-business, manufacturing, State government, health, housing, and labor about the impact of Federal agency reporting requirements.

The Commission will hold a second public meeting in Knoxville, Tennessee, on January 9, 1976, at the McGhee Tyson Airport in the Skychef Banquet Room. The meeting will commence at 9:00 a.m. and end at 1:00 p.m. The Commission will receive comments from various individuals in the areas of Federal, State, and local government, manufacturing, finance, education, veterans' affairs, and labor about the impact of Federal agency reporting requirements.

Testimony presented at these meetings will be used by the Commission on Federal Paperwork in making recommendations to the Congress and the President on changes which would ease the burden of Federal paperwork.

Persons wishing further information about the meetings should contact the Commission on Federal Paperwork, located at 1111 20th Street NW., Suite 200, Washington, D.C. 20582, telephone (202) 254-6786.

FRANK HORTON,
Chairman.

DEFENSE MANPOWER COMMISSION

MEETING

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that the Commissioners of the Defense Manpower Commission will meet on Janaury 15, 1976 at 1:00 p.m. in the Conference Center, Lower Lobby (LL), of the Gelman Building, 2120 L Street, N.W., Washington, D.C. 20036. The purpose of the meeting will be to conduct a review of the General Level and Structure of Military Compensation. The above issues are subject to change dependent upon staff progress, and other subjects may be substituted.

The meeting will be open to the public. Because of limited space, interested persons wishing to attend should telephone (202) 254-7803 prior to each meeting.

Dated: December 28, 1975.

BRUCE PALMER, JR.,
General, USA (Ret.),
Executive Director.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

SPENT FUELS; CHEMICAL PROCESSING AND CONVERSION

Price Change

Notices entitled "Spent Fuels Chemical Processing and Conversion", 33 FR 30, January 3, 1968; with amendments 35 FR 8715, June 4, 1970, 35 FR 18302, December 1, 1970, and 40 FR 3031, January 17, 1975, issued by the U.S. Atomic Energy Commission and in effect on January 19, 1975, the effective date of the Energy Reorganization Act of 1974, Public Law 93-438, by the terms of Sec. 301 (b) of that Act, continue in effect according to their terms. Those notices set forth the terms of the ERDA's undertaking to receive irradiated reactor fuels and blanket materials, and to make settlement therefor.

The following notice concerning the foregoing constitutes a revision of the ERDA prices for the services of Chemical Processing for certain uranium fuels.

Paragraph 7d of the notice as previously amended by notice of 35 FR 18302, December 1, 1970, is hereby amended to read as follows:

7d. A charge for the conversion to uranium hexafluoride of the purified nitrate salt of uranium (except uranium enriched in the isotope uranium-233) produced by the ERDA in its processing of reactor materials as follows:

1. Conversion of purified low-enrichment uranyl nitrate into UF_6: $60.00 per kilogram contained uranium.

2. Conversion of purified high-enrichment uranyl nitrate into UF_6: $135 per kilogram contained uranium.

As used in this section "low-enrichment uranium" means 5 percent (by weight) and less of U^{235} in total uranium, and "high-enrichment uranium" means more than 5 percent (by weight) of U^{235} in total uranium.

Because this revision involves a matter relating to agency management or personnel or to public property, loans, grants, benefits or contracts, Sec. 553 of Title 5 U.S. Code does not apply, and this notice is effective on the date of

publication without advance notice. This notice is issued under the authority of 42 U.S.C. 2201 and 42 U.S.C. 5815.

Effective date: December 30, 1975.

RICHARD W. ROBERTS,
Assistant Administrator for Nuclear Energy.

ENVIRONMENTAL PROTECTION AGENCY

[OPP—50053; FRL 473-4]

AMERICAN CYANAMID COMPANY

Extension of Experimental Use Permit

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), an extension of an experimental use permit has been issued to the American Cyanamid Company, Princeton, New Jersey 08540. Such permit is in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

This experimental use permit (No. 241-EUP-70) allows the use of 18,300 pounds A.I. of the herbicide difenzoquat methylsulfate (1,2-dimethyl-3,5-diphenyl-1*H*-pyrazolium methyl sulfate) on wheat straw at 20 parts per million (ppm), and on wheat grain, meat, fat, and meat byproducts of cattle, goats, hogs, horses, and sheep at 0.05 ppm. A total of 22,200 acres is involved; the program is authorized only in Arizona, California, Idaho, Kansas, Montana, Oklahoma, Oregon, Texas, and Washington. The extended experimental use permit is effective from December 15, 1975, to December 15, 1976. Temporary tolerances have been established for residues of the active ingredient in or on the raw agricultural commodities noted above (Petition No. PP 5G1576).

Interested parties wishing to review the experimental use permit are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street, SW., Washington, D.C. 20460. It is suggested that such interested persons call 202/755-4851 before visiting the EPA Headquarters office, so that the appropriate permit may be made conveniently available for review purposes .These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: December 22, 1975.

JOHN B. RITCH, JR.,
Director,
Registration Division.

AMERICAN CYANAMID COMPANY

Issuance of Extension of Experimental Use Permit

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), an extension of an experimental use permit has been issued to the American Cyanamid Company, Princeton, New Jersey 08540. Such permit is in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

This experimental use permit (No. 241-EUP-64) allows the use of 3,100 pounds A.I. of the herbicide difenzoquat methylsulfate (1,2-dimethyl-3,5-diphenyl-1*H*-pyrazolium methyl sulfate) on barley straw at 20 parts per million (ppm), on barley grain at 0.2 ppm, and on meat, fat, and meat byproducts of cattle, goats, hogs, horses, and sheep at 0.05 ppm. A total of 3,750 acres is involved; the program is authorized only in Arizona, California, and Oregon. The extended experimental use permit is effective from December 15, 1975, to December 15, 1976. Temporary tolerances have been established for residues of the active ingredient in or on the raw agricultural commodities noted above (petition no. PP 4G1453).

Interested parties wishing to review the experimental use permit are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street, SW., Washington, D.C. 20460. It is suggested that such interested persons call 202/755-4851 before visiting the EPA Headquarters office, so that the appropriate permit may be made conveniently available for review purposes. [PP6G1659 & PP6G1660/T23 FRL 473-6]

U.S. BORAX CORP.

Establishment of a Temporary Tolerance N',N'-di-n-propyl-2,4-dinitro - 6-trifluoromethyl-m-phenylenediamine

U.S. Borax Corp., 412 Crescent Way, Anaheim CA 92801, submitted two petitions (PP 6G1659 and PP 6G1660) to the Environmental Protection Agency (EPA). These petitions requested that a temporary tolerance be established for residues of the herbicide N',N'-di-*n*-propyl- 2, 4- dinitro-6-trifluoromethyl-*m*-phenylenediamine to permit the marketing of certain raw agricultural commodities treated in accordance with an experimental use permit which is being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act. Petition PP 6G1659 requested that a temporary tolerance be established for residues of the herbicide in or on the raw agricultural commodities almond hulls, grapes, nuts, and stone fruit at 0.1 part per million (ppm). Petition PP 6G1660 requested that a temporary tolerance be established for residues of the herbicide in or on soybeans, soybean hay, soybean forage, cottonseed, and cotton forage at 0.1 ppm.

An evaluation of the scientific data reported in the petitions has shown that the requested tolerance is adequate to cover residues resulting from the proposed experimental use, and it has been determined that the tolerance will protect the public health. Therefore, the temporary tolerance is established for this herbicide with the following provisions:

1. The total amount of the herbicide to be used must not exceed the quantity authorized by the experimental use permit.

2. U.S. Borax Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of product, distribution, and performance and on request make such records available to any authorized officer or employee of the EPA or the Food and Drug Aduministration.

The temporary tolerance expires December 22, 1976. Residues not in excess of 0.1 ppm remaining in or on the above raw agricultural commodities after expiration of this temporary tolerance will not be considered actionable if the herbicide has been legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerance. This temporary tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this herbicide indicate such revocation is necessary to protect the public health.

Dated: December 22, 1975.

AMERICAN CYANAMID CO.

Pesticide Petition; Filing

American Cyanamid Co., Agricultural Div., PO Box 400, Princeton, NJ 08540, has submitted a petition (PP 6F1704) to the Environmental Protection Agency which proposes that 40 CFR 180.361 be amended to establish a tolerance for the combined negligible residues of the herbicide *N*-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine and its metabolite 4-[(1-ethylpropyl)amino]-2-methyl-3,5-dinitro benzyl alcohol in or on the raw agricultural commodities soybeans, soybean forage, and soybean hay at 0.1 part per million. The proposed analytical method for determining residues of both the parent compound and its metabolite is a gas chromatographic procedure using an electric capture detector. (PM25)

Notice of this submission is given pursuant to the provisions of section 408(d)(1) of the Federal Food, Drug, and Cosmetic Act. Interested persons are invited to submit written comments on the petition referred to in this notice to the Federal Register Section, Technical Services Division (WH–569), Office of Pesticide Programs, Environmental Protection Agency, Room 401, East Tower, 401 M St. SW, Washington, DC 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and others interested in inspecting them. The comments should be submitted as soon as possible and should bear a notation indicating the petition number "PP 6F1704". Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: December 23, 1975.

[FRL 474–1]

STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES AND NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS

Delegation of Authority to State of Maine

On December 23, 1971, (36 FR 24876), March 8, 1974 (40 FR 43850), pursuant to Section 111 of the Clean Air Act, as amended, the Administrator of the Environmental Protection Agency (EPA) promulgated regulations establishing Standards of Performance for New Stationary Sources (NSPS) for eighteen categories of stationary sources. On April 6, 1973, (38 FR 8820), pursuant to Section 112 of the Clean Air Act, as amended, the Administrator promulgated National Emission Standards for Hazardous Air Pollutants (NESHAPS) for three pollutants. Sections 111(c) and 112(d) direct the Administrator to delegate his authority to implement and enforce NSPS and NESHAPS to any State which has submitted adequate procedures. Nevertheless, the Administrator retains concurrent authority to implement and enforce the standards following delegation of authority to the State.

On August 30, 1973, the Regional Administrator, Region I, EPA, forwarded to the State of Maine, information setting forth the requirements for an adequate procedure for implementing and enforcing the standards for NSPS and NESHAPS. Subsequently, EPA and the State discussed several delegation proposals. On October 7, 1975, the State and EPA agreed upon the wording and contents of the final request during a conference call. At that time, the State was not aware of the NSPS promulgated August 6, 1975, and September 23, 1975; thus these six source categories were not mentioned or intended to be included in the State's request. On October 14, 1975, amendments to the asbestos and mercury standards were promulgated (40 FR 48292). These amendments were not intended to be included in the State's request for delegation. Therefore, the delegation approval is effective as of October 7, 1975, the date of the conference call, and thus excludes these new NESHAPS amendments.

On October 15, 1975, William R. Adams, Jr., Commissioner of the Maine Department of Environmental Protection (DEP) submitted to the EPA Region I Office a request for delegation of authority. The request letter cited the appropriate Maine Statutes and DEP regulations which demonstrated the adequacy of the State's procedures. Appended to the State's request was an opinion from the Maine Attorney General's Office concerning the adequacy of State authority for assuming delegation. Also appended to the State's request was a copy of a change in the Maine Air Emission Licensing Regulation, making Federal NSPS and NESHAPS requirements the standard for defining Best Practical Treatment in order to accommodate delegation of NSPS and NES HAPS. After a thorough review of Maine's request, the Regional Administrator has determined that for the source categories set forth in paragraphs (A) and (B) of the following official letter to William R. Adams, Jr., delegation is appropriate subject to the conditions set forth in items (1) through (10) of that letter:

MR. WILLIAM R. ADAMS, Jr.,
Commissioner, Department of Environmental Protection,
State House, Augusta, Maine

DEAR MR. ADAMS: This is in response to your letter of October 15, 1975, requesting delegation of authority for implementation and enforcement of the New Source Performance Standards (NSPS) and the National Emission Standards for Hazardous Air Pollutants (NESHAPS) to the State of Maine, Department of Environmental Protection (DEP).

The Environmental Protection Agency, Region I, (EPA), has reviewed the pertinent laws of the State of Maine and the rules and regulations of the DEP and has determined that they provide an adequate and effective procedure for implementation and enforcement of the NSPS and NESHAPS by the State of Maine. Therefore, we hereby grant delegation of the NSPS and NESHAPS to the State of Maine Department of Environmental Protection as follows:

A. Authority for all sources located in the State of Maine subject to the following Standards of Performance for New Stationary Sources as promulgated in 40 CFR Part 60 as of October 7, 1975: fossil fuel-fired steam generators; incinerators (except for cone burners serving populations of less than 25,000); portland cement plants; nitric acid plants; sulfuric acid plants; asphalt concrete plants; petroleum refineries; storage vessels for petroleum liquids; secondary lead smelters; secondary brass and bronze ingot production plants; iron and steel plants; and sewage treatment plants.

B. Authority for all sources located in the State of Maine subject to the following National Emission Standards for Hazardous Air Pollutants as promulgated in 40 CFR Part 61 as of October 7, 1975: asbestos with the exception of asbestos resulting from demolition (40 CFR 61.22(d)); beryllium; and mercury.

This delegation is based upon the following conditions:

1. The DEP will continue to submit semi-annual reports as required to EPA.

2. Enforcement of the NSPS and NESHAPS in the State of Maine will be the primary responsibility of the DEP. If the DEP determines that such enforcement is not feasible and so notifies EPA, or where the DEP acts in a manner inconsistent with the terms of this delegation, EPA will exercise its concurrent enforcement authority pursuant to Section 113 of the Clean Air Act, as amended, with respect to sources within the State of Maine subject to the NSPS and NESHAPS.

3. Acceptance of this delegation of enumerated presently promulgated NSPS and NESHAPS does not commit the State of Maine DEP to request or accept delegation of future standards and requirements. A new request for delegation will be required for any standards not included in the State's request of October 15, 1975, and for any standard which is revised subsequent to October 7, 1975.

4. Upon approval of the Regional Administrator of Region I, the Commissioner, Maine DEP, may subdelegate his authority to implement and enforce the NSPS and NES HAPS to air pollution control authorities in the State when such authorities have demonstrated that they have equivalent or more stringent programs in force.

5. The DEP will at no time grant a variance or waiver from compliance with applicable NSPS and NESHAPS (40 CFR Parts 60 and 61). Should the DEP grant such a variance or waiver, EPA will consider the source receiving such relief to be in violation of the applicable Federal regulation and may initiate enforcement action against the source pursuant to Section 113 of the Clean Air Act. The granting of such relief by the DEP shall also constitute grounds for revocation of the delegation by EPA.

6. The delegation to the State of Maine does not include the authority to implement and enforce NSPS and NESHAPS for sources owned or operated by the United States which are located in the State. This condition in no way relieves any Federal Facility from meeting the requirements of 40 CFR Parts 60 and 61.

7. The DEP and EPA will develop a system of communication sufficient to guarantee that each office is always fully informed regarding the current compliance status of subject sources in the State of Maine and regarding interpretation of applicable regulations. EPA will make determinations regarding unique questions of applicability of delegated standards when requested by the DEP or at other times as determined by EPA. EPA will provide technical assistance as necessary to the DEP. The DEP will provide the following information, as a minimum, to EPA: the name and address of each facility, the compliance status of each facility with accompanying explanations of non-compliance where applicable, notice of enforcement actions brought against facilities subject to delegated NSPS and NESHAPS, surveillance actions undertaken for each facility, and the results of all reports relating to emission data.

8. If at any time there is a conflict between a State regulation and a Federal regulation (40 CFR Parts 60 or 61), the Federal regulation must be applied if it is more stringent than that of the State. If the State does not have the authority to enforce the more stringent Federal regulation, this portion of the delegation may be revoked.

9. The DEP will utilize the methods specified in 40 CFR Parts 60 and 61 in performing source tests pursuant to the regulations.

10. If the Regional Administrator determines that a State procedure for enforcing or implementing the NSPS or NESHAPS is inadequate, or is not being effectively carried out, this delegation may be revoked in whole or in part. Any such revocation shall be effective as of the date specified in a Notice of Revocation to the DEP.

A Notice announcing this delegation will be published in the *Federal Register* in the near future. The Notice will state, among other things, that, effective immediately, all reports required pursuant to the Federal NSPS and NESHAPS by sources located in the State of Maine should be submitted to the Department of Environmental Protection Office at the State House, Augusta, Maine 04330. Any such reports which have been or may be received by EPA, Region I, will be promptly transmitted to the Department of Environmental Protection.

Since this delegation is effective immediately, there is no requirement that the State notify EPA of its acceptance. Unless EPA receives from the State written notice of objections within 10 days of the date of receipt of this letter, the State will be deemed to have accepted all of the terms of the delegation.

Sincerely yours,

JOHN A. S. MCGLENNON,
Regional Administrator.

Therefore, pursuant to the authority delegated to him by the Administrator, the Regional Administrator notified Commissioner Adams on November 3, 1975, that authority to implement and enforce specified Standards of Performance for New Stationary Sources and National Emission Standards for Hazardous Air Pollutants was delegated to the State of Maine Department of Environmental Protection.

Copies of the request for delegation of authority are available for public inspection at the Environmental Protection Agency, Region I Office, J. F. Kennedy Federal Building, Boston, Massachusetts 02203.

Effective immediately, all reports required pursuant to the National Emission Standards for Hazardous Air Pollutants and the Standards of Performance for New Stationary Sources listed in the above letter should be submitted to the EPA, Region I Office and should also be submitted to the State Agency at the following address: Maine Department of Environmental Protection, State House, Augusta, Maine 04330.

This notice is issued under the authority of Sections 111 and 112 of the Clean Air Act, as amended, 42 U.S.C. 1857c–6 and 7.

Dated: December 17, 1975.

JOHN A. S. MCGLENNON,
Regional Administrator.

STATE OF NEW JERSEY

Submission of State Plan for Certification of Pesticide Applicators

In accordance with the provisions of Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136) and 40 CFR Part 171 [39 FR 36446 (Oct. 9, 1974) and 40 FR 11698 (March 12, 1975)], the Honorable Brendan T. Byrne, Governor of the State of New Jersey has submitted a State Plan for Certification of Pesticide Applicators to the Environmental Protection Agency (EPA).

Notice is hereby given of the intention of the Regional Administrator, EPA Region II, to approve this plan on a contingency basis pending approval of implementing regulations.

A summary of this plan follows. The entire plan, together with all attached appendices, may be examined during normal business hours at the following locations:

New Jersey Department of Environmental Protection, Division of Environmental Quality, Office of Pesticide Control, 380 Scotch Road, West Trenton, New Jersey 08628, tel. (609) 292–5890.

V 40 250 DEC 30 75 XUM

Environmental Protection Agency, Region II, Environmental Programs Division, Pesticides Branch, Room 907, 26 Federal Plaza, New York, New York 10007, tel. (212) 264–8358.

Federal Register Section, Technical Services Division, (WH–569), Office of Pesticide Programs, Room 401, East Tower, Waterside Mall, 401 M Street, S.W., Washington, D.C. 20460, tel. (202) 755–4854.

SUMMARY OF NEW JERSEY STATE PLAN

The New Jersey Department of Environmental Protection (NJDEP) has been designated as the State lead agency for the administration of the pesticide applicator certification program, with the Office of Pesticide Control in the Division of Environmental Quality responsible for the program's implementation. The New Jersey Cooperative Extension Service (NJCES) is a cooperating agency having overall responsibility for the Statewide pesticide applicator certification training program.

Legal authority for the program is contained in the New Jersey Economic Poison Act N.J.S.A. 4:8A–1 et seq.; New Jersey Pesticide Control Act N.J.S.A. 13:1F–1 et seq.; Emergency Containment and Disposal of Pesticides N.J.A.C. 7:1–2.4; Pesticide Control Regulations N.J.A.C. 7:30–1 and Proposed Pesticide Applicator Regulations.

The plan indicates that the State lead agency and the cooperating agency have or will have sufficient qualified personnel and funds necessary to carry out the proposed program. The Office of Pesticide Control has a budget of $135,000 for fiscal year 1976.

The State lead agency will submit an annual report to EPA in January of each year and special reports to meet specific needs.

The State estimates that 5,000 commercial applicators and 15,000 private applicators will need to be certified. Wallet size identification cards containing all necessary information will be furnished to all certified and registered applicators, to be presented to dealers at the time of restricted use pesticide purchase.

The commercial applicator categories proposed are those which are listed in 40 CFR 171.3. An additional major category is proposed for Aerial Applicators.

The State of New Jersey plans to conduct training programs for commercial applicators covering the Federal standards contained in 40 CFR 171. These standards are set forth in detail in the Northeast Pesticide Coordinators' Pesticide Applicator Core Training Manual to be used for core training, and in specific category/subcategory training materials to be developed by EPA and modified to reflect conditions in New Jersey. Training will be offered by the NJCES county agents and specialists and additionally by trade and professional associations, community colleges, etc. Two written examinations are required: one covering the general or "core" material, and other covering the specific requirements of the category or subcategory. Examinations will be given by the NJDEP within the training module as well as separately at regularly scheduled intervals. Information about the courses and examination times may be obtained from the NJCES county agent or the NJDEP's Office of Pesticide Contol. Commercial applicators must be certified to use both general and restricted use pesticides.

The New Jersey State plan provides for private applicator categories. The categories proposed are as follows:

1. Field and Forage
2. Fruit
3. Vegetable
4. Greenhouse and Florist
5. Nursery, Ornamental and Turf
6. Livestock and Poultry

The State of New Jersey plants to conduct training programs for private applicators covering the Federal standards contained in 40 CFR 171. These standards are set forth in detail in the Northeast Pesticide Coordinators' Pesticide Applicator Core Training Manual to be used in core training, and in NJCES publications for categories. Training will be offered on a county basis conducted by NJCES county agents. A two part written examination is required: the first part covering the general or "core" material, and the second part covering the specific requirements of the category. Examinations will be given within the training module as well as separately at regularly scheduled intervals.

Those persons who wish to be certified as a private pesticide applicator who cannot read or write will be offered specialized training by a recognized training person or a public employee. Certification will be limited to the pesticide products on particular sites for which the individual has demonstrated competency.

While training before initial certification is not mandatory, all commercial and private applicators will be strongly encouraged to attend the sessions. Core study questions for private and commercial applicators to be provided as part of the Northeast Pesticide Coordinators' Pesticide Applicator Core Training Manual are attached to the plan. Study questions on all categories will be developed and submitted at a later date.

The State of New Jersey certification program will require that all commercial applicators attend at least three (3) approved training courses within a five (5) year period or take a recertification examination. Private applicators will be required to attend three (3) approved training courses within a six (6) year period or take a recertification exam.

The New Jersey State Plan also indicates that within sixty (60) days of the final approval of the Government Agency Plan (GAP) by EPA, a statement concerning acceptance of GAP qualified Federal employees will be forwarded for inclusion in the State plan.

Reciprocal agreements may be made with any other States which have substantially the same standards; however, knowledge of applicable New Jersey laws and regulations and registration of the certified applicator will be required.

Other regulatory activities shown in the State plan are State registration of all pesticide products and inspection and sampling of pesticide products. All pesticide dealers of restricted use pesticides are required to be registered by the State. Additionally, pesticides are classified as prohibited and restricted.

Enforcement will be carried out by inspectors who will spot check commercial and private applicators to ensure that they comply with State and Federal laws and regulations. They will perform regular inspections and follow-up reports of suspected violations.

PUBLIC COMMENT

Interested persons are invited to submit written comments on the proposed State plan for the State of New Jersey to the Regional Administrator, Region II, Environmental Protection Agency, 26 Federal Plaza, New York, New York 10007. The comments must be received on or before January 29, 1975, and bear the identifying notation OPP–42012. All written comments filed pursuant to this notice will be available for public inspection at the above mentioned locations from 8:30 a.m. to 3:30 p.m. Monday through Friday.

Dated: November 24, 1975.

GERALD M. HANSLER,
P.E., Regional Administrator, U.S. Environmental Protection Agency, Region II.

FEDERAL COMMUNICATIONS COMMISSION

DOMESTIC LAND MOBILE RADIO ADVISORY COMMITTEE 1979 WORLD ADMINISTRATIVE RADIO CONFERENCE

Meeting

DECEMBER 19, 1975.

The next meeting of the Common Carrier Domestic Land Mobile Radio Advisory Committee in preparation for the 1979 World Administrative Radio Conference will be held on Wednesday, January 21, 1976, at 10:00 a.m. in Room 752, 1919 M Street, N.W., Washington, D.C. The same room will be available in the afternoon for task group meetings.

The meeting will be open to the public and any member of the public is invited to participate and present oral or written statements of relevance to the agenda upon recognition by the Chairman.

The meeting will be conducted in accordance with the following agenda:

1. Committee Chairman's opening remarks.
2. Reports from Chairmen of Fact-Finding Task Groups.
3. Discussion of preliminary draft of spectrum requirements.
4. Establish timetable for submission of work.
5. Set date for next meeting.
6. Further business.
7. Adjournment

No part of this meeting will be concerned with matters which are within the exemptions of the Public Information Act, 5 U.S.C. 55 s(b).

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.75–34834 Filed 12–29–75;8:45 am]

FEDERAL ENERGY ADMINISTRATION

CONSUMER AFFAIRS/SPECIAL IMPACT ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770), notice is hereby given that the Consumer Affairs/Special Impact Advisory Committee will meet Thursday, January 15, 1976, at 9 a.m., Room 5041B, 12th & Pennsylvania Avenue, NW., Washington, D.C.

The Committee was established to provide the Federal Energy Administration with diversified information possessed by a wide range of highly qualified individuals who have been extensively involved in planning, development, and implementation of programs to remedy the problems of the consumer, the poor, the elderly, and the handicapped persons in rural and urban America.

The agenda for the meeting is as follows:

1. Old Business—Procedural Issues.
2. New Business—Utility Issues—Pricing—State and Local Programs to Alleviate Adverse Impacts of High Energy Costs on the Poor—Economics of Nuclear vs. Solar Energy.

Consumer Participation Issues—White House Conference on Consumer Representation

Impact of Energy Policies on the Cities—Energy Conservation

Social Relief Programs—Federal Programs to Alleviate the Adverse Impacts of Rising Energy Costs on Low and Moderate Income Groups

3. Presentations by Top Officials from HUD, HEW, CSA, AOA, ACTION, and Labor

The meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Lois Weeks, Director, Advisory Committee Management (202) 961–7022 at least 5 days before the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

Minutes of the meeting will be made available for public inspection at the Federal Energy Administration, Washington, D.C.

Issued at Washington, D.C. on December 22, 1975.

MICHAEL F. BUTLER,
General Counsel.

[FR Doc.75–34962 Filed 12–23–75;10:23 am]

STATE REGULATORY ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770) notice is hereby given that the State Regulatory Advisory Committee will meet Friday, January 16, 1976, at 10 a.m., Room 5041B, 12th & Pennsylvania Avenue, NW., Washington, D.C.

The Committee was established to provide the Federal Energy Administration with advice and information concerning its plans and programs which are related to the responsibilities of State regulatory commissions.

The agenda for the meeting is as follows:

1. Public Affairs Presentation—Two Years After the Embargo.
2. Status of PIES Modeling and Energy Projections for the Next 10 Years.
3. Environmental Restrictions (Clean Air Act Amendments, etc.).
4. Presentation on the Energy Independence Authority (EIA).
5. Establishment of a Subcommittee to Review Legislation.

The meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Lois Weeks, Director, Advisory Committee Management, (202) 961–7022, at least 5 days before the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

Minutes of the meeting will be made available for public inspection at the Federal Energy Administration, Washington, D.C.

Issued at Washington, D.C., on December 23, 1975.

MICHAEL F. BUTLER,
General Counsel.

[FR Doc.75–34961 Filed 12–23–75;10:24 am]

FEDERAL ELECTION COMMISSION

[Notice 1975–99]

CLEARINGHOUSE ON ELECTION ADMINISTRATION CLEARINGHOUSE ADVISORY COMMITTEE

Hearing

In accordance with the Clearinghouse Advisory Panel Charter approved by the Federal Election Commission on November 25, 1975, and in the spirit of the Federal Advisory Committee Act (Pub. L. 92–463), the Commission announces the following panel meeting:

Name: Federal Election Commission Clearinghouse Advisory Panel.
Date: 6–7 January 1976.
Place: Mount Vernon Room, Sheraton-Carlton Hotel, 16th and K Streets, N.W., Washington, D.C.
Time: 0900–1200; 1400–1630 on 6 January 1976; 0900–1200; 1400–1630 on 7 January 1976.
Proposed Agenda: Discussion sessions addressing research priorities, topics and projects in election administration including: Planning and management; registration; balloting; tabulation and records.
Purpose of the meeting: The Panel will review past Clearinghouse research efforts, discuss present problems in the administration of federal elections, and formulate recommendations to the Federal Election Commission Clearinghouse for its future research program.

The Advisory Panel meeting is open to the public depending on available space. Any member of the public may file a written statement with the Panel before, during, or after the meeting. To the extent that time permits, the Panel Chairman may allow public presentation of oral statements at the meeting.

All communications regarding this Advisory Panel should be addressed to Dr. Gary Greenhalgh, Clearinghouse on Election Administration, Federal Election Commission, 1325 K Street, NW., Washington, D.C. 20463.

Dated: December 22, 1975.

NEIL STAEBLER,
Vice Chairman for the Federal Election Commission.

[FR Doc.75–34955 Filed 12–29–75;8:45 am]

FEDERAL MARITIME COMMISSION

[Agreement No. 10123]

AMERICAN EXPORT LINES, ET AL.

Intention to Conditionally Approve

Agreement No. 10123 (Agreement) has been filed with the Commission for approval by five of the six common carrier members of the Calcutta, East Coast of India and Bangladesh/U.S.A. Conference (Conference). The five participating lines are American Export Lines (AEL), Cunard-Brocklebank Ltd. (CB), the Scindia Steamship Navigation Co. (Scindia), the Shipping Corporation of India, Ltd. (SCI), and Waterman Isthmian (Waterman). Hellenic Lines (Hellenic), the sixth Conference member has protested the Agreement and requested a hearing on the matter.

Essentially, Agreement No. 10123 is a revenue pooling arrangement applicable to revenues earned by the participating lines from the transportation of cargoes from the Calcutta port area (the India Section) and ports of Bangladesh (the Bangladesh Section) to the United States Atlantic and Gulf ports. While a revenue pool, it is the intent of the participants that each of the participating lines shall carry sufficient cargo to earn its pool share or "basic entitlement". There is a prescribed penalty for deliberate over and under carriage, and adjustments in accounts will be made for unintentional over and under carriage. The activities of each of the two Sections is monitored by separate General Committees both of which are domiciled in the Bay of Bengal area and are responsible to the New York Governing Committee. The primary function of the General Committee is to make continuing assessments of trade

V 40 250 DEC 30 75 XUM V

conditions in order to determine whether the services offered by the participating lines are adequate, excessive, or insufficient for the trade's needs, and to insure that each line is meeting its obligations arising from the participation in the pool. In appropriate circumstances, the Committees are authorized to "request" of the individual lines that they adjust their service offerings, schedules and/or itineraries to accommodate the trade or to insure that their cargo liftings approximate their "basic entitlement." While this arrangement falls short of full authority to rationalize services, it is recognized that the scheme of "basic entitlement" serves as an enforcing mechanism of sorts and that any line may ignore the service request of any Committee only at the risk of possible, eventual, disadvantage, particularly if it is determined that the line involved has deliberately over or under carried its pool share.

The "basic entitlements" are set forth in Article 4 of the Agreement. In the India Section, AEL has been allocated a 19.857 percent share; Waterman, 23 percent; Scindia and SCI, 21.4258 percent each; and CB a 14.285 percent share. In the Bengladesh Section, AEL has been allocated a 20.4 percent share; Waterman, 31.2 percent; Scindia and SCI, 9.69 percent each; and CB a 29.02 percent share.

Agreement No. 10123 was filed with the Commission on April 5, 1974. Pursuant to notice appearing in the FEDERAL REGISTER of April 17, 1974, protests and requests for hearing were received of Hellenic, the Tea Association of the U.S.A. and the International Association of Great Lakes Ports (Great Lakes Ports). The protest of the Great Lakes Ports was withdrawn after a reassessment of their position resulted in a determination that they would not be adversely affected by the Agreement. The protest of the Tea Association of the U.S.A. was withdrawn after a negotiation with the pool lines resulted in an agreement that revenues derived with the trades of tea would be excluded from those revenues pooled and shared.

Basically, Hellenic contends (1) that pool shares based solely on national flag interests, as these allegedly are, are discriminatory between carriers within the meaning, and in contravention of, section 15 of the Shipping Act, 1916; (2) that the Agreement is "fatally incomplete" and that the quantum of service to be offered the trade was not clearly set forth, and that the basic entitlement of each line had not been established; (3) that, in certain respects, the pool may be modified without the Commission's approval as is required by section 15 of the Act; (4) that the rationalization authority conferred upon the General Committees would allow a restriction of services to U.S. ports in violation of section 205 of the Merchant Marine Act, 1936; (5) that some of the provisions of the Agreement are impracticable in application thus raising the question as to whether the Agreement is "workable and whether it can fulfill the salutary functions envisaged by section 15"; and (6) that the pool's proponents have failed to demonstrate those serious transportation needs which would serve to justify approval of the Agreement in order to secure important public benefits or to further valid regulatory purposes; and (7) that administrative approval of Agreement No. 10123 is legally impermissible and a full hearing is mandatory.

Agreement No. 10123 was revised on February 2, 1975 by the fixing, for the first time, the percentages of the pool for the members. The proponents then filed with the Commission and served Hellenic with a "Comment and Reply to Protest" and a "Statement of Justification" in support of approval of the pool, both dated June 9, 1975. Subsequently, on August 15, 1975, proponents filed with the Commission and supplied Hellenic, a table of sailings, payable tons and revenues contrasting the figures for the years 1969 and the projected figures for 1975. A letter in argument for approval was also filed by proponents on September 11, 1975.

Hellenic filed a reply to the arguments of the proponents dated September 19, 1975, in which it restated its arguments outlined in the protest and for the first time attempted to specify the nature and potential harm that the pool would have on the service of Hellenic.

The proponents of the Agreement filed, on October 8, 1975, a letter in reply to Hellenic's reply of September 25, 1975. Agreement No. 10123 was also modified on October 8, 1975, by the addition of tea to the excluded commodities list. On October 19, 1975, Hellenic filed the Conference cargo carrying statistics for 1974. On the same day the Conference supplied their cargo carrying statistics for the years 1970–74 and the first 8 months in 1975 (statistics which we assume are also known to Hellenic). The result of the filing of the protest, reply, and numerous cross replies has been to focus the issues and allow the Commission to determine that the objections raised by Hellenic either involve legal issues, which may be disposed of presently, or are in other respects insufficient. We will deal with Hellenic's protests in the order in which they were raised.

Hellenic alleges that the pool shares are based on national flag interests and therefore discriminating. The real point of contention is the pool share offered to Hellenic. The pool has offered Hellenic a 12.5% share of the India Section and a 22.5% share of the Bangladesh Section. Hellenic demands a 18% share of the India Section a 25% share of the Bangladesh Section. The proponents of the pool argue the reasonableness of their offer by pointing to the carrying of Hellenic in the year 1973 when Hellenic carried 9.26% of the India Section and 14.18% of the Bangladesh. Hellenic counters with an argument that 1973 was an unrepresentative year because of widespread rebating and point to 1974 when they carried 19.7% in the India trade and 23.72% in the Bengladesh trade. Reliance, however, on individual years can be misleading. We have therefore looked at the carrying statistics for the past five and two-third years. We find that in 1971 and 1974 Hellenic's carryings exceeded the offer by the proponents but in 1970, 1973, and 1975 they fell below the offer made by the proponents. Averaging the last five and three-quarter years we find that Hellenic has carried 14.7% of the cargo in the India Section and 15.4% of the cargo in the Bangladesh Section. Since the offer made by the pool proponents averages out to a 16.67% share of both trades, we consider the pool line's offer of March 1975 emminently fair. Furthermore, the contention that Hellenic's pool shares are based solely on national flag interests is unsubstantiated since Hellenic's share appears to be based on its past carryings. Accordingly, we would condition approval of Agreement No. 10123 on the pool lines maintaining an offer of a one-sixth share the first two years of the five year period of approval. Additionally, the one-sixth share shall not be subject to reduction during the five year period of approval we are willing to grant here.

Hellenic next contends that Agreement No. 10123 is fatally incomplete and in reality is simply an agreement to agree. Quite to the contrary, Agreement No. 10123 is as complete and certain as is practicable under the circumstances of the trade. The "basic entitlements" have been established, and filed, although they were not at the time of the initial filing and publication. The quantum of service is not set forth because the pool lines do not know, with any precision, what is required. The carryings of jute carpet backing and burlap have declined considerably since 1968 and the proponents are uncertain if this decline will continue. The result is that the pool lines can do no more than establish certain guidelines (as set forth in exhibits A and B appended to the Agreement) for the General Committees as to what they consider the quantum minimum and maximum of adequate service required to meet the trades' requirements. In the interest of operational flexibilities it is only fair that the pool lines be allowed to assess their operational needs on a continuing basis. The Agreement therefore establishes adequate boundaries for delineating the activities which may take place under the Agreement and the Commission will keep constant supervision over those activities. Furthermore, the Commission will require, as a condition of approval, that all modifications of the provisions of the Agreement, which require further agreement of the parties, be submitted to the Commission for approval prior to their implementation. With the imposition of this condition the further argument of Hellenic that the Agreement unlawfully reserves power to amend without subsequent Commission approval is rendered moot.

Hellenic's concern that Agreement No. 10123 would, if approved, violate section 205 of the Merchant Marine Act of 1936, is likewise obviated by the pool lines proposal that their Agreement be modified to specifically provide that any carrier may call at any U.S. port it desires to

without running the risk of being judged a deliberate over or under carrier. Thus, we are imposing such a provision as a condition of approval.

Another contention advanced by Hellenic is that the Agreement is unworkable and impractical in application. In this regard Hellenic specified eight particular objections. However, these objections amount to mere supposition and speculation and none of them involve allegations of any violation of the Shipping Act. Mere speculation and supposition are not probative to the ultimate determination of approvability under section 15 of this Agreement and are clearly insufficient in and of themselves to warrant sending the matter to a possible protracted and expensive hearing.

Hellenic has also alleged that it will suffer harm by virtue of "increased, more effective and virulent competition" stemming primarily from the rationalization aspects of the scheme which will result in Hellenic "competing against a monolithic sailing effort of five carriers geared to loading all cargoes in the trade," or, in the maritime vernacular, a "blanketing of the berth." Hellenic's allegations are therefore speculations of increased competition but do not specify how this increased competition is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or to operate to the detriment of the commerce of the United States, or contrary to the public interest, or to be in violation of the Shipping Act.

The proponents have distinctly outlined the transportation need which they feel justify the approval of the Agreement. They state that the Bay of Bengal trade is very unattractive. Four third-flag carriers have abandoned the trade in the past ten years and a fifth sold its name and good will to Waterman. They site formidable navigational, climatic, and operational difficulties plus socio-economic conditions which have inhibited the introduction of modern shipping technology and techniques. The Bay of Bengal trade is one of the ever diminishing number of trades where relatively obsolete and breakbulk liner vessels can be usefully employed. These factors combined with the length of the voyage make operating efficiencies very difficult to achieve. According to the proponents, approximately 83 percent of the cargo moving in the two trades is jute products for which the average revenue, per measurement ton, amounts to about $40, a return less than the level the conference believes it requires. They argue that the establishment of an adequate rate would be met with strong objections from the shippers of jute products who are constantly concerned with the price competition afforded by synthetic manufacturers in the United States. In this regard, we are advised that the jute market has declined in recent years because of a falling off in demand and if the jute products shippers are not price competitive then the carriers will have still less to carry. Proponents state:

> At the same time costs have been rising at a rapid pace and a point has now been reached where if rates are to be kept anywhere near current levels, some efficiencies have to be achieved. As all of the lines are long-time carriers of these products, they have reached a maximum point of self-efficiency from which little or no progress is possible.

Simply stated, the proponent's assertion is that pooling and sailing coordination is necessary to reduce costs, which are necessary to maintain low rates, which are necessary to maintain jute carryings, which are necessary to keep the lines in business.

Hellenic neither denies the transportation need nor challenges any of the justifying facts. In light of the fact that Hellenic was the original proponent of the pool and that the Commission staff has been advised during a meeting with all the members of the Conference, including Hellenic, that the only reason Hellenic is not participating in the pool is because of a squabble over the amount of the pool shares, Hellenic's protests regarding the transportation need of the pool does not appear to be substantive. Furthermore, we believe a transportation need has been shown which would justify approval of the Agreement in the absence of countervailing facts.

Hellenic has, to date, simply not met the requirements set forth in the Notice of Agreements Filed setting forth the requirements for persons desiring a hearing. Those requirements are:

> Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

Since these requirements were not met, we therefore find that there is presently no justification for hearings on the proposed Agreement and the Commission hereby gives notice of its intention to conditionally approve Agreement No. 10123 unless Hellenic or any other interested person is able to come forward with a clear concise statement of material matters upon which he desires to adduce evidence and a statement of facts which, if so adduced, would result in disapproval.

Furthermore, the Commission intends to condition its approval upon:

(1) The Agreement being modified to reflect that (a) any changes in the list of the categories of cargoes and revenues excluded from pooling and sharing, (b) any reallocations of basic entitlements, (c) any changes in geographical scope of the Agreement, (d) any changes in voting procedures, and (e) any changes in the terms of default and penalty will be filed with the Commission for approval under Section 15 of the Act. Additionally, the Agreement must reflect that the foregoing list does not preclude the Commission from requiring that any other matter agreed upon by the lines must be filed with the Commission for its approval, where so required.

(2) The Agreement being modified to reflect that any carrier may call at any U.S. port it so desires without being adjudged a deliberate over or under-carrier.

(3) The Agreement being modified to reflect that (a) minutes of meetings of the New York Governing Committee be filed with the Commission, and (b) that a copy of the end year accountings circulated to the lines, be furnished the Commission whether approved by the lines or not. If the accounting is in dispute, the Commission shall be furnished with a statement as to the nature and basis of disagreement.

(4) The Agreement being modified to reflect that Hellenic will be offered a one-sixth share of the trade, not subject to reduction during the term of approval, and that this offer is nonrescindable during the first two years of approval.

Any person submitting a statement as to why Agreement No. 10123, as modified as indicated herein, should not be approved, should submit such matter on or before January 15, 1976.

Therefore *it is ordered*, That a copy of this Notice of Intention to Approve be published in the FEDERAL REGISTER and a copy thereof be mailed to all carriers named in the initial paragraph of this notice.

By the Commission, December 18, 1975.

FRANCIS C. HURNEY,
Secretary.

MEDITERRANEAN U.S.A. GREAT LAKES WESTBOUND FREIGHT CONFERENCE

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before January 19, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

[Docket No. 75–60]

RICO LINES, INC.

Proposed ILA Rules on Containers; Order of Investigation and Suspension

On November 19, 1975, Rico Lines, Inc. (RICO) filed Initial tariffs with this Commission which are scheduled to become effective on December 26, 1975. Rico's Tariff FMC–F No. 1 establishes commodity rates and Rico's FMC–F No. 2 is a rules publication. Both tariffs are applicable between the ports of Camden and Norfolk and ports in Puerto Rico. Rules 900, 910 and 920 of FMC–F No. 1 set forth the same International Longshoremen's Association Rules On Containers which are set forth in the tariff of the Puerto Rico Maritime Shipping Authority (PRMSA).

PRMSA's tariff Rules were placed under investigation and suspension by the Commission's Order of September 13, 1974 instituting Docket No. 74–40, Puerto Rico Maritime Shipping Authority-Proposed ILA Rules On Containers and consolidating that proceeding with Docket No. 73–17, Sea-Land Service, Inc. and Gulf Puerto Rico Lines, Inc., Proposed Rules on Containers, wherein the Commission suspended and placed under investigation similar tariff rules.

The rules set forth in Rico's tariff are derived from collective bargaining agreements with the International Longshoremen's Association, (AFL–CIO). Generally, the rules substantially provide that, at Atlantic Coast Ports, consolidators (including Non-Vessel Operating Common Carriers) who operate facilities within 50 miles of a port will be furnished no containers, and that any container which may come from them shall be stripped at the pier and the cargo placed into another container. At all ports, the Rules would permit the carrier to collect from the shipper any fines or liquidated damages assessed against the carrier for violations of the rules on Containers, if the violations were caused by evasion, subterfuge, oversight or other action by the shipper.

Item 15940 of Rico's Tariff FMC–F No. 1 sets forth the rate for (Southbound) Freight-All-Kinds (FAK), a rate which consolidators utilize. Note 7 to Item 15940 provides that when the carrier is required by a collective bargaining agreement to strip and stuff, a shipper may bring his FAK cargo to the pier, in his own trailer, where it will be placed into the carrier's container, or vice versa, for a fee, depending upon the size of the container, and that the shipper will then obtain the FAK rate.

Upon consideration of the tariff matter discussed above, and in view of the action taken by the Commission in Docket No. 73–17, Sea-Land Service, Inc., and Gulf Puerto Rico Lines, Inc., Proposed Rules on Containers and Docket No. 74–40, Puerto Rico Maritime Shipping Authority—Proposed ILA Rules on Containers, the Commission is of the opinion that the tariff matter should be suspended and made the subject of a

public investigation and hearing to determine whether it is unjust, unreasonable or otherwise unlawful under Sections 14 Fourth, 16 First and/or 18(a) of the Shipping Act, 1916, and/or sections 3 and 4 of the Intercoastal Shipping Act, 1933, and good cause appearing;

Therefore, *it is ordered*, That pursuant to sections 18(a) and 22 of the Shipping Act, 1916 and sections 3 and 4 of the Intercoastal Shipping Act, 1933 an investigation is hereby instituted into rules 900, 910 and 920 and Note 7 to Item 15940 of Rico's Tariff FMC–F No. 1 to determine whether the matters set forth therein are unjust, unreasonable or unreasonable or otherwise unlawful within the meaning of those sections. If the matter hereby placed under investigation is further changed, amended, or reissued, such changes are hereby ordered to be made a part of this investigation;

It is further ordered, That pursuant to section 3, Intercoastal Shipping Act, 1933, Rules 900, 910, and 920, and Note 7 to Item 15940 of Rico's Tariff FMC–F No. 1 are hereby suspended and the use thereof deferred to and including April 25, 1976, unless otherwise ordered by the Commission, and that during this period of suspension Rico shall take no action, either directly or indirectly to effectuate these tariff matters.

It is further ordered, That Rico shall immediately file with this Commission a consecutively numbered supplement to its aforementioned Tariff which supplement shall bear no effective date, shall fully reproduce this order, and shall state that the subject tariff matter has been suspended and may not be used until April 26, 1976, unless otherwise ordered by the Commission;

It is further ordered, That pursuant to section 14 Fourth of the Shipping Act, 1916, a determination shall be made as to whether Rule 900 of Rico's Tariff FMC–F No. 1 would permit the carrier to unfairly treat or unjustly discriminate against a class of shippers in the matter of cargo space accommodations or other facilities within the meaning of that section;

It is further ordered, That pursuant to section 16 First of the Shipping Act, 1916, a determination shall be made as to whether Rico either alone, or in conjunction with the International Longshoremen's Association (AFL–CIO) is proposing to subject certain consolidators, or certain consolidated cargo to undue or unreasonable prejudice or disadvantage within the meaning of that section;

It is further ordered, That Rico Lines, Inc. be named as respondent herein;

It is further ordered, That this proceeding be assigned for public hearing before an Administrative Law Judge of this Commission's Office of Administrative Law Judges and that the hearing(s) be held at a date and place to be determined by the Presiding Administrative Law Judge, but in any event, the hearing shall commence no later than March 22, 1976;

It is further ordered, That (I) a copy of this order be served upon the respondent herein, and upon the Commission's Bureau of Hearing Counsel, and published in the FEDERAL REGISTER; and (II) the respondent and Hearing Counsel be duly served with notice of time and place of the hearing.

All persons (including individuals, corporations, associations, firms, partnerships and public bodies) having an interest in this proceeding and desiring to intervene herein should notify the Secretary of the Commission promptly and file petitions for leave to intervene in accordance with Rule 5(1) of the Commission's Rules of Practice and Procedure (46 CFR 502.72) with a copy to all parties of this proceeding.

By the Commission.

V40250 DEC 30 75 XUM

FEDERAL POWER COMMISSION

[CP73-47, CP73-88, CP73-132, CP73-148, CP73-230, and CP74-122]

EASCOGAS LNG, INC., ET AL.

Notice of Availability of Supplement to Final Environmental Impact Statement

DECEMBER 30, 1975.

Notice is hereby given in the above dockets, that on December 30, 1975, as required by Section 2.82(b) of Commission Order No. 415–C, a Supplement to a Final Environmental Impact Statement, prepared by the staff of the Federal Power Commission was made available. The Final Environmental Impact Statement (FEIS), circulated on July 5, 1974, deals with the applications filed by Eascogas LNG, Inc., Distrigas Corporation, Distrigas Pipeline Corporation, and Distrigas of New York Corporation in Docket Nos. CP73–47, CP73–88, CP73–132, CP73–148, CP73–230, and CP74–122 for a certificate of public convenience and necessity under Sections 3 and 7(c) of the Natural Gas Act requesting authorization for the importation of liquefied natural gas (LNG) from Algeria; for the construction and operation of 1) an LNG importation terminal at Staten Island, New York, and 2) approximately 6,000 feet of 24-inch transmission line with a 2,675-foot segment of 30-inch underwater pipeline loop in the Arthur Kill between Staten Island, New York and the shore of New Jersey; and for the sale in interstate commerce of the imported LNG. During the course of FPC hearings concerning the FEIS, the staff became aware of a possible inaccuracy in the report, and advised the record that a Supplement to the FEIS might be required. Also, since the circulation date, additional information has been received by the FPC regarding the proposed project and additional studies concerning possible vapor cloud travel resulting from a massive spill of LNG on water have been completed by the FPC staff, which update the former studies attached in Volume 2 of the FEIS. A Supplement to the FEIS reflecting this additional information and updating of the vapor travel analysis was circulated for comments on July 15, 1975, to Federal, state, and local agencies, and all parties to the proceedings.

At the end of the 45-day comment period for the Supplement to the FEIS, eight letters of comment were received from reivewing agencies. These letters of comment, along with staff responses to each comment, are attached to the Supplement to the FEIS as Appendix 1.

The FEIS and Supplement to the FEIS have been placed in the public files of the Commission, and are available for public inspection both in the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, D.C., 20426 and at its regional office located at 26 Federal Plaza, 22nd Floor, New York, New York 10007. Copies of the Supplement to the FEIS are available in limited quantities from the Federal Power Commission's Office of Public Information, Washington, D.C. 20426.

KENNETH F. PLUMB,
Secretary.

FEDERAL RESERVE SYSTEM

CATOCTIN TRUST CO.

Order Approving Application for Merger of Banks

Before the Federal Reserve Bank of Richmond acting under delegated authority from the Board of Governors of the Federal Reserve System.

Catoctin Trust Company, Thurmont, Maryland (Catoctin), an organizing state bank which has applied for membership in the Federal Reserve System, has applied to the Board of Governors of the Federal Reserve System for prior approval pursuant to the Bank Merger Act (12 U.S.C. 1828(c)) to merge with The Thurmont Bank, Thurmont, Maryland (Thurmont), a member state bank of the Federal Reserve System, the resulting bank to operate under the charter of Catoctin and with the name of The Thurmont Bank. The application is to be acted upon by the Federal Reserve Bank of Richmond (Reserve Bank) under authority delegated by the Board of Governors (12 C.F.R. 265).

As required by the Bank Merger Act, notice of the proposed merger, in form approved by the Board of Governors, has been published and reports on competitive factors have been requested from the Attorney General, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation. The Reserve Bank has considered the application and all comments and reports received in light of the factors set forth in the Act.

On the basis of the record in this case, the application is approved for the reasons summarized in the Reserve Bank's Order of this date relating to the application of Suburban Bancorporation to acquire the successor by merger to The Thurmont Bank. The transaction shall not to be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board of Governors of the Federal Reserve System or by the Federal Reserve Bank of Richmond pursuant to delegated authority.

By order of the Federal Reserve Bank of Richmond, acting pursuant to delegated authority for the Board of Governors of the Federal Reserve System, effective December 18, 1975.

ROBERT P. BLACK,
President.

[FR Doc.75-35031 Filed 12-29-75;8:45 am]

FIRST NATIONAL HOLDING CORP.

Order Approving Acquisition of First Atlanta Life Insurance Company

First National Holding Corp., Atlanta, Georgia, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under Section 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to acquire all of the voting shares of First Atlanta Life Insurance Company ("Company"), Phoenix, Arizona, a company that will engage *de novo* in the activity of underwriting, as reinsurer, credit life and credit disability (accident and health) insurance directly related to extensions of credit by Applicant's consumer finance subsidiary, Gulf Finance Corporation of Mississippi ("Gulf Finance"). Such activity has been determined by the Board to be closely related to banking (12 CFR 225.4(a)(10)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (40 FEDERAL REGISTER 49153 (1975)). The time for filing comments and views has expired, and the Board has considered the application and all comments received, including comments submitted by Sidney L. Moore, Esq., Decatur, Georgia, in the light of the public interest factors set forth in Section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)).

Applicant, the second largest banking organization in Georgia, controls one subsidiary bank with deposits of approximately $1.4 billion, representing about 11.3 percent of the total deposits in commercial banks in the State.[1] Applicant also engages in consumer finance activities through its nonbank subsidiary, Gulf Finance, which operates offices in the States of Alabama, Georgia, Indiana, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee, under the names of its various subsidiary companies.

Company's activities will be limited to acting as reinsurer of credit life and credit disability insurance directly related to extensions of credit by Gulf Finance. Company, which will be formed as an Arizona insurance corporation, will be qualified to underwrite insurance directly only in Arizona. Accordingly, the insurance sold by Applicant's subsidiaries will be directly underwritten by an unaffiliated insurance company qualified to do business in each of the respective States where offices of Applicant's consumer finance subsidiary are located, and will thereafter be assigned or ceded to Company under a reinsurance agreement. Since this proposal involves a *de novo* acquisition, consummation of the transaction would not have any adverse effects on existing or potential competition in any relevant market.

[1] All banking data are as of June 30, 1975.

Credit life and credit disability insurance are generally made available by banks and other lenders and are designed to assure repayment of a loan in the event of death or disability of the borrower. In connection with its addition of the underwriting of such insurance to the list of permissible activities for bank holding companies, the Board stated:

To assure that engaging in the underwriting of credit life and credit accident and health insurance can reasonably be expected to be in the public interest, the Board will only approve applications in which an applicant demonstrates that approval will benefit the consumer or result in other public benefits. Normally, such a showing would be made by a projected reduction in rates or increase in policy benefits due to bank holding company performance of this service. (12 CFR § 225.4(a)(10) n. 7)

Applicant has stated that following consummation of the acquisition, Company will offer at reduced premiums the several types of credit insurance policies that it will reinsure. Since the insurance will be sold in each of the eight States in which Gulf Finance operates, Company's proposed rate reductions vary according to the various maximum rates permitted to be charged in each respective State. Thus, Applicant's proposal involves rate reductions for reducing term credit life insurance at premium rates ranging from 4.6 per cent to 15.0 per cent below the rates presently charged in the respective States, and rate reductions for level term credit life insurance on single payment loans also ranging from 4.6 per cent to 15.0 per cent below the premiums presently charged in the respective States. Applicant further proposes to reduce the premium its lending subsidiary charges for credit disability insurance by 5.0 per cent in each State. The Board is of the view that these reductions in insurance premiums that Applicant proposes to establish are in the public interest.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under Section 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Atlanta pursuant to authority hereby delegated.

By order of the Board of Governors,[2] effective December 19, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

MELLON NATIONAL CORP.

Order Amending Requirement for Divestiture of Ownership of Certain Real Estate in Connection With the Retention of Assets of Allomon Corporation

By Order of December 20, 1974, the Board approved an application of Mellon National Corporation, Pittsburgh, Pennsylvania, a bank holding company within the meaning of the Bank Holding Company Act, to retain the assets of Allomon Corporation, McKees Rocks, Pennsylvania, and its subsidiaries. The Board's Order required divestiture by November 28, 1975, of certain real property held by two of Allomon Corporation's subsidiaries, 3826 Euclid Avenue Corporation and Clark Development Company, both of Cleveland, Ohio. Applicant has divested all the property required to be divested except an office building owned by 3826 Euclid Avenue Corporation.

By letter dated November 7, 1975, Applicant requested that the Board grant an extension during which time the remaining property could be divested. Applicant, since 1972, has endeavored to sell the property.

The Board has concluded that the request should be granted. Accordingly, the Board's Order of December 20, 1974, is hereby amended to authorize retention of the remaining real estate subject to the condition that Applicant divest such real property at the earliest possible date, but in no event later than November 28, 1976.

By order of the Board of Governors,[1] effective December 17, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.75-35033 Filed 12-29-75;8:45 am]

ROXTON BANCSHARES, INC.

Formation of Bank Holding Company

Roxton Bancshares, Inc., Roxton, Texas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 100 percent of the voting shares (less directors' qualifying shares) of First National Bank, Roxton, Texas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received not later than January 15, 1976.

Board of Governors of the Federal Reserve System, December 16, 1975.

[SEAL] GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.75-35034 Filed 12-29-75;8:45 am]

SUBURBAN BANCORP.

Order Approving Acquisition of Bank

Before the Federal Reserve Bank of Richmond acting under delegated authority from the Board of Governors of the Federal Reserve System.

Suburban Bancorporation, Hyattsville, Maryland (Applicant), a bank holding company within the meaning of the Bank Holding Company Act, has applied for approval under Section 3(a)(3) of the Act (12 U.S.C. 1842 (a)(3)) to acquire 100 percent of the voting shares of the successor by merger to The Thurmont Bank, Thurmont, Maryland (Bank). The bank into which Bank is to be merged is an organizing state bank and has no significance expect as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of the shares of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, was given in accordance with Section 3(b) of the Act and the time for filing all comments and views has expired. The Reserve Bank has considered the application and all comments received in the light of the factors set forth in Section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is the fourth largest banking organization in Maryland through its control of Suburban Trust Company. The latter, as of June 30, 1975, operated 55 banking offices and held total deposits of approximately $770 million. The deposits represent 9 percent of the state's total commercial bank deposits. Consummation of the proposed transaction would not alter its relative position in the state or increase Applicant's share of state deposits by any significant amount.

Bank operates three offices in Frederick County, Maryland, and one in the eastern portion of Washington County immediately across the Frederick line. Based on comparative data of June, 1974, it ranked fifth among 12 competing banks in Frederick County (5.4 percent of county deposits) and eleventh among 11 competing banks in Washington County (1.2 percent of county deposits). As of June 30, 1975, Bank had total deposits of approximately $20 million.

Applicant's banking subsidiary, Suburban Trust, has no offices in either Frederick County, Bank's primary banking market, or in Washington County. (Its closest office is in the Ger-

[2] Voting for this action: Vice Chairman Mitchell and Governors Bucher, Holland, Wallich, Coldwell and Jackson. Absent and not voting: Chairman Burns.

[1] Voting for this action: Vice Chairman Mitchell and Governors Bucher, Holland, Coldwell and Jackson. Absent and not voting: Chairman Burns and Governor Wallich.

V 40 250 DEC 30 75 XUM

mantown-Gaithersburg area of Montgomery County approximately 20 miles from Bank's Frederick branch.) Thus, it appears that there is no substantial existing competition between Applicant and Bank, nor does it appear that the proposed acquisition would have an adverse effect on potential competition. Furthermore, population per banking office in Bank's market is substantially less than the state average. Therefore, prospects for *de novo* entry do not seem favorable. Accordingly, the Reserve Bank concludes that consummation of the proposed acquisition would not have an adverse effect on competition in any relevant area.

The financial and managerial resources and future prospects of Applicant, its subsidiary bank and Bank are regarded as satisfactory and these considerations are consistent with approval of the application. Considerations relating to the convenience and needs of the community to be served lend weight toward approval since Applicant's acquisition of Bank will enable it to offer trust services and larger loans through participations. It is the Reserve Bank's judgment that the proposed acquisition would be in the public interest and that the application may be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board of Governors of the Federal Reserve System or by the Federal Reserve Bank of Richmond pursuant to delegated authority.

By order of the Federal Reserve Bank of Richmond, acting pursuant to delegated authority for the Board of Governors of the Federal Reserve System, effective December 18, 1975.

ROBERT P. BLACK,
President.

[FR Doc.75-35035 Filed 12-29-75;8:45 am]

FEDERAL RECURRING PAYMENTS

Delivery to Financial Institutions

On June 10, 1975, the Board of Governors of the Federal Reserve System requested comments regarding use of Federal Reserve facilities for clearing and settling of payment instruments evidenced by information contained in magnetic tape and other media (40 FR 25841). The proposal pertained to the delivery of items to institutions belonging to private associations exchanging such payments instruments as well as the program of the United States Department of the Treasury involving the processing of "Federal recurring payments." (See 40 FR 47492 for an explanation of the Treasury's program.) The Federal Reserve Banks are acting as fiscal agents of the Treasury Department for the recurring payments program and the Board of Governors, after review of all comments received, has adopted interim guidelines for the delivery of such recurring payments under the Treasury Department's program by the Federal Reserve Banks.

The Board believes its interim position is cost-effective operationally feasible, and affords all financial institutions a number of options for receiving payments on an equitable basis. From the comments received and reviewed by the Board regarding its June 10th proposal, a clear majority of each class of all financial institutions favored the proposal on delivery of payments in the form adopted by the Board. Federal Reserve Bank representatives will, of course, be able to discuss features of this proposal further with individual institutions.

The interim guidelines announced today may be modified in the future to conform to the position finally adopted by the Board on sending and receiving commercial payments on magnetic tape. The Federal Reserve is currently in the process of reviewing the comments received on its June 10, 1975, proposal. It should be recognized also that the findings and recommendations of the National Commission on Electronic Fund Transfers could call for some further modification in these interim guidelines.

The guidelines adopted by the Board provide for the delivery of Federal recurring payments by Federal Reserve Banks in the following fashion:

(1) Payments to beneficiaries maintaining accounts at a financial institution offering demand deposit accounts may be delivered directly to that institution in the same manner that checks are presented.

(2) Payments to beneficiaries maintaining accounts at a financial organization not offering demand deposit accounts may be delivered directly to that institution provided such institution receives sufficient volume of such payments to warrant separate delivery and is located on an existing check courier route.

(3) Payments may be delivered to a data processing service bureau provided the service bureau receives sufficient volume of such payments to warrant separate delivery and is located on an existing check courier route.

(4) Any financial organization may pick up payments at the local Federal Reserve office provided that volume is sufficient to warrant the separate sort required.

(5) Any financial organization may have payments delivered to an endpoint that currently receives checks directly from the Federal Reserve office (i.e., the pass-through method).

(6) Payments may be mailed to any financial organization by the Federal Reserve regardless of its location.

Board of Governors of the Federal Reserve System, December 18, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

ARTISTS-IN-SCHOOLS ADVISORY PANEL

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), notice is hereby given that a meeting of the Artists-In-Schools Advisory Panel to the National Council on the Arts will be held on January 21-22, 1975 from 9:00 a.m.-5:00 p.m., in the first floor conference room of the Shoreham Building, 806 15th Street NW., Washington, D.C.

All of this meeting will be open to the public on January 21-22, 1975 from 9:00 a.m.-5:00 p.m. on a space available basis. Accommodations are limited. There will be a discussion of Program and administrative policy questions and of Guidelines.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, Nation Foundation on the Arts and the Humanities.

NATIONAL LABOR RELATIONS BOARD

CHAIRMAN'S TASK FORCE ON THE NATIONAL LABOR RELATIONS BOARD

Meeting

The Chairman's Task Force on the National Labor Relations Board will hold open meetings at 9:00 a.m. on Tuesday, January 6, 1976, and at 9:00 a.m. on Wednesday, January 7, 1976, in the Board hearing room and other offices of the agency located at 1717 Pennsylvania Avenue NW., Washington, D.C.

The Task Force agenda for January 6 will consist of organization of the Task Force and briefings on Agency operations. The agenda for the second day of the meeting will consist of continued briefings on agency operations, subcommittee meetings and reports.

Requests for further information on the meeting should be addressed to Mr. Earl D. Proctor, Secretary for the Task Force. He may be reached by telephone on (202) 254-8047. Any member of the public will be permitted to file a written statement specifically on the National Labor Relations Board Rules and Regulations with the Task Force.

Dated this 22nd day of December 1975 in Washington, D.C.

[SEAL] JOHN C. TRUESDALE,
Executive Secretary.

[FR Doc.75-34954 Filed 12-29-75;8:45 am]

NATIONAL SCIENCE FOUNDATION

ADVISORY GROUP ON ANTICIPATED ADVANCES IN SCIENCE AND TECHNOLOGY

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Group on Anticipated Advances in Science and Technology.
Date: January 14, 1976.
Time: 9 a.m. to 4 p.m.
Place: Rm. 2008, New Executive Office Building, 726 Jackson Place, NW., Washington, D.C.
Type of meeting: Part Open—Closed (9 a.m. to 12 noon). Open (1 p.m. to 4 p.m.).
Contact person: Mr. William Montgomery, Special Assistant, Science and Technology Policy Office, National Science Foundation, Washington, D.C. 20550, telephone 202/632-8914. Anyone who plans to attend the open portion of the meeting should contact Mr. Montgomery by January 10, 1976.
Summary minutes: (Open Portion) May be obtained from the Committee Management Coordination Staff, Management Analysis Office, Rm. 248, National Science Foundation, Washington, D.C. 20550.
Purpose of advisory group: To provide advice on developments that may take place in science and engineering and examine the national policy implications of these developments. This group will consider these subjects in a manner which will facilitate the planning for the proposed Office of Science and Technology Policy.
Tentative agenda: 9 a.m. to 12 noon—Closed. Briefings and discussions of interagency documents which treat possible program and budget initiatives involving several agencies of the Executive Branch.
1 p.m. to 4 p.m.—Open.
1:00—Earthquake and Natural Hazard Prediction and Warning.
2:30—Committee Discussion of Future Agenda Items and Issues.
4:00—Adjourn.
Reason for closing: The Group will be reviewing and discussing interagency documents which treat possible program and budget initiatives involving several agencies in the Executive Branch.
Authority for closing: The Director of the National Science Foundation determined on December 15, 1975, that the portion of the meeting dealing with interagency documents is within exemption 5 of Section 552(b), 5 U.S. Code, and should, therefore, be closed to the public.

GAIL A. MCHENRY,
Acting Committee Management Officer.

DECEMBER 23, 1975.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-247]

CONSOLIDATED EDISON COMPANY OF NEW YORK, INC.

Issuance of Amendment To Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 14 to Facility Operating License No. DPR-26 issued to Consolidated Edison Company of New York, Inc. which revised Technical Specifications for operation of the Indian Point Nuclear Generating Unit No. 2, located in Buchanan, Westchester County, New York. The amendment is effective as of its date of issuance.

In accordance with the licensee's application for a license amendment, dated July 23, 1975, the amendment modifies the Technical Specifications by providing additional conditions for the storage of the spent fuel. The amendment also permits modification of the spent fuel element storage pool in order to provide for additional storage capacity for spent fuel in accordance with the licensee's proposal dated March 4, 1975, as supplemented on May 9, July 23, August 19, September 11, October 1, and October 10, 1975.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Notice of Proposed Issuance of Amendment to Facility Operating License in connection with this action was published in the FEDERAL REGISTER on October 10, 1975 (40 FR 47839). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

For further details with respect to this action, see (1) the application for amendment dated July 23, 1975, and proposal to modify spent fuel pool dated March 4, 1975, as supplemented May 9, July 23, August 19, September 11, October 1, and October 10, 1975, (2) Amendment No. 14 to License No. DPR-26, with Change No. 11, (3) the Commission's related Safety Evaluation, (4) the Commission's Negative Declaration dated December 16, 1975, which is being published concurrently with this notice, and (5) the Commission's associated Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Hendrick Hudson Free Library, 31 Albany Post Road, Montrose, New York.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 16th day of December, 1975.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Reactor Licensing.

[FR Doc.75-34924 Filed 12-29-75;8:45 am]

[Docket No. 50-247; License No. DPR-26]

INDIAN POINT NUCLEAR GENERATING PLANT UNIT NO. 2; CONSOLIDATED EDISON COMPANY OF NEW YORK

Negative Declaration Supporting a Proposed Expansion in Storage Capacity of the Spent Fuel Storage Pool and Associated Change to the Technical Specifications

The U.S. Nuclear Regulatory Commission (the Commission) has reviewed the licensee's proposed modification to the Indian Point Unit No. 2 spent fuel storage pool (SFP) under Operating License No. DPR-26. This modification and associated change to the Technical Specifications would authorize the expansion of the SFP storage capacity 83 percent. This expansion would permit the storage of an additional 218 spent fuel assemblies, increasing the ultimate capacity of the SFP from the 264 to 482 assemblies. The modification will require the replacement of the present 10 fuel storage racks with 10 new racks designed to permit the storage of additional fuel assemblies. It will not involve any SFP external construction nor alter the external physical geometry of the pool or require fuel pool cleanup system modifications.

The Commission's Division of Reactor Licensing has prepared an environmental impact appraisal for this proposed modification to the SFP. Within the context of this appraisal, the Staff applied, weighed, and balanced the five factors specified by the Commission in its issuance of FEDERAL REGISTER notice (FR 42801) dated September 16, 1975, regarding handling and storage of spent fuel from light water power reactors. On the basis of this environmental impact appraisal, the Commission has concluded that an environmental impact statement for this particular action is not warranted because, pursuant to the Commission's regulations in 10 CFR Part 51 and the Council of Environmental Quality's Guidelines, 40 CFR 1500.6, the Commission has determined that this proposed amendment will not significantly affect the quality of the human environment.

The environmental impact appraisal is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Hendrick Hudson Free Library, 31 Albany Post Road, Montrose, New York 10548.

Dated at Rockville, Maryland, this 16th day of December, 1975.

For the Nuclear Regulatory Commission.

GEORGE W. KNIGHTON,
Environmental Projects Branch No. 1, Division of Reactor Licensing.

[FR Doc.75-34925 Filed 12-29-75;8:45 am]

[Docket Nos. 50-3 and 50-247]

INDIAN POINT NUCLEAR GENERATING UNITS NOS. 1 AND 2; CONSOLIDATED EDISON COMPANY OF NEW YORK, INC.

Issuance of License Amendments

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the

V 40 250 DEC 30 75 XUM

Commission) has issued Amendment No. 11 to Provisional Operating License No. DPR–5 for Indian Point Nuclear Generating Unit No. 1, and Amendment No. 15 to Facility Operating License No. DPR–26 for Indian Point Nuclear Generating Unit No. 2, to Consolidated Edison Company of New York, Inc. Both units are located in Westchester County, State of New York. The amendments are effective as of their date of issuance.

The amendments involve administrative changes in reporting requirements to be consistent with NRC guidelines. The reporting requirements in Appendix B have been separated from those required for Appendix A Technical Specifications and involve, in some cases, semi-annual reporting and, in others, annual reporting. Editorial corrections and changes resulting from the reorganization which created the Nuclear Regulatory Commission have also been made.

The application for amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments is not required since the amendments do not involve significant hazards considerations.

Since there will be no change in effluent types or total amounts nor an increase in power level and will not result in any significant impact, we have concluded, pursuant to 10 CFR 51.5(d)(4), that an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with the issuance of these amendments.

For further details with respect to these actions, see: (1) the application for the amendments dated August 29, 1975; (2) Amendment No. 11 to License No. DPR–5 with its attachment, Change No. 67, and (3) Amendment No. 15 to License No. DPR–26 with its attachment, Change No. 12.

All of the above items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Hendrick Hudson Free Library, 31 Albany Post Road, Montrose, New York 10548. Copies are also being made available at the New York State Office of Planning Services, 488 Broadway, Albany, New York 12207, and the Tri-State Regional Planning Commission, 100 Church Street, New York, New York 10007.

A copy of items (2) and (3) may be obtained upon request addressed to the United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Acting Director, Division of Reactor Licensing.

Dated at Rockville, Maryland, this 16th day of December, 1975.

For the Nuclear Regulatory Commission.

GEORGE W. KNIGHTON,
Chief, Environmental Projects Branch No. 1, Division of Reactor Licensing.

[FR Doc.75–34926 Filed 12–29–75;8:45 am]

[Docket No. 50–321]

GEORGIA POWER CO.; OGLETHORPE ELECTRIC MEMBERSHIP CORP.

Issuance of Amendment To Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 25 to Facility Operating License No. DPR–57 issued to Georgia Power Company and Oglethorpe Electric Membership Corporation, which revised Technical Specifications for operation of the Edwin I. Hatch Nuclear Plant, Unit 1, located in Appling County, Georgia. The amendment is effective as of its date of issuance.

The amendment modifies those portions of the license and the Technical Specifications which relate to the receipt, possession and use of byproduct, source, and special nuclear material.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated October 14, 1975, (2) Amendment No. 25 to License No. DPR–57, with Change No. 24 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Appling County Public Library, Parker Street, Baxley, Georgia 31513.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 16 day of December, 1975.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Reactor Licensing.

[FR Doc.75–34927 Filed 12–29–75;8:45 am]

[Docket No. 50–344]

PORTLAND GENERAL ELECTRIC CO.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 3 to Facility Operating License No. NPF–1 issued to Portland General Electric Company, The City of Eugene, Oregon, Pacific Power and Light Company which revised Technical Specifications for operation of the Trojan Nuclear Plant, located on the Columbia River in Columbia County, Oregon. The amendment is effective as of its date of issuance.

This amendment provides for periodic inspection of steam generator tubes using eddy current testing methods, for use of all volatile treatment (AVT) to control secondary water chemistry, additional bases for limitation of primary-to-secondary leakage and a program to develop specific secondary water chemistry operating limits.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact not previously evaluated in the full-power operating license review and that pursuant to 10 CFR 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment, dated December 16, 1975; (2) Amendment No. 3 to License No. NPF–1; and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Columbia County Courthouse, Law Library, Circuit Court Room, St. Helens, Oregon 97501.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 19th day of December, 1975.

For the Nuclear Regulatory Commission.

WALTER R. BUTLER,
Light Water Reactors Branch 1–2, Division of Reactor Licensing.

[Docket No. 50–344]

PORTLAND GENERAL ELECTRIC CO.

Issuance of Amendment To Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 1 to Facility Operating License No. NPF–1 issued to Portland General Electric Company, The City of Eugene, Oregon, Pacific Power and Light Company which revised Technical Specifications for operation of the Trojan Nuclear Plant, located on the west shore of the Columbia River in Columbia County, Oregon. The amendment is effective as of November 26, 1975.

The amendment permits use of the auxiliary hoist on the manipulator crane, in conjunction with a load indicator, for movement of control rods within the reactor pressure vessel in order to enable verification of clearance between the control rods and the control rod guides located in the upper internals.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated November 25, 1975, (2) Amendment No. 1 to License No. NPF–1, with Change No. 1 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the local public document room in the Columbia County Courthouse, Law Library, Circuit Court Room, St. Helens, Oregon 97501.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 17th day of December, 1975.

For the Nuclear Regulatory Commission.

WALTER R. BUTLER,
Chief, Light Water Reactors Branch 1–2, Division of Reactor Licensing

UNION ELECTRIC CO. (CALLAWAY PLANT, UNITS 1 AND 2)

Order For Hearing

The Atomic Safety and Licensing Board has been informed that the parties will be ready to adduce further evidence on January 29 and 30, 1976.

Wherefore, *it is ordered*, In accordance with the Atomic Energy Act, as amended, and the rules of practice of the Nuclear Regulatory Commission, that an evidentiary session in this proceeding shall convene at 9 a.m. on Thursday, January 29, 1976, in Courtroom C, First Floor, U.S. District Court, U.S. Courthouse and Custom House, 1114 Market Street, St. Louis, Missouri 63101.

Issued: December 19, 1975, Bethesda, Maryland.

ATOMIC SAFETY AND LICENSING BOARD,
SAMUEL W. JENSCH,
Chairman.

[FR Doc.75–34930 Filed 12–29–75;8:45 am]

[Docket Nos.: 50–338 and 50–339]

VIRGINIA ELECTRIC AND POWER CO. (NORTH ANNA POWER STATION, UNITS 1 AND 2)

Order Rescinding Suspension of Certain Construction Activities

On February 4, 1972, the Director of Regulation of the Atomic Energy Commission issued an order suspending construction activities involving the offsite portions of the transmission lines from the North Anna Power Station, Units 1 and 2, pending completion of the Commission's review of such activities pursuant to the National Environmental Policy Act of 1969 (NEPA) and the Commission's regulations, 10 CFR Part 50, Appendix D. Three 500–kV transmission lines were proposed as a part of Units 1 and 2 and were affected by this order. They are known as the North Anna-Ladysmith transmission line, the North Anna-Morrisville transmission line, and the North Anna-Midlothian transmission line.

Due to the applicant's need for additional transmission capacity to carry electrical energy to the site for plant construction requirements, the AEC Regulatory staff completed its review of the North Anna-Ladysmith line prior to the remainder of the review of Units 1 and 2. The Director of Regulation then made a determination that offsite construction activities related to this line should no longer be suspended pending completion of the full NEPA review and issued an order to this effect on September 29, 1972. The North Anna-Ladysmith line was then constructed and is now complete. However, suspension of such activities relative to the two other 500–kV transmission lines from Units 1 and 2 remained in effect.

The AEC Directorate of Licensing issued its Final Environmental Statement in April 1973 "relative to the continuation of construction and the operation of Units 1 and 2 and the construction of Units 3 and 4." In this statement the Regulatory staff reviewed and found acceptable these facilities, including all three transmission lines from North Anna Units 1 and 2 and a fourth 500–kV transmission line which is to be constructed from North Anna to Possum Point as a part of Units 3 and 4.

Pursuant to the Commission's Regulations in 10 CFR Part 50, Appendix D, Section B, on December 19, 1972, a Notice of Hearing was published (37 FR 28313, December 22, 1972). The notice provided that a hearing was to be held to determine whether the construction permits for North Anna Units 1 and 2 should be terminated, continued, or modified, or conditioned for the protection of the environment. In response to that Notice, intervention was requested, and granted, respecting the routing of Applicant's proposed North Anna-to-Morrisville line. In August 1974, a hearing was held in accordance with the Notice. By agreement of all parties—the staff, the Applicant, and Intervenors—the presiding Atomic Safety and Licensing Board postponed consideration of the contested North Anna-Morrisville transmission line. The Board did consider the North Anna-Ladysmith line and the North Anna-Midlothian line and concluded that adverse environmental impacts of these two transmission lines "can be expected to be small." The Board issued an order dated October 31, 1974, which authorized the Director of Regulation to rescind his Order of February 4, 1972, suspending work on the Applicant's North Anna-Midlothian line, subject to the conditions set forth in Section VIII of the Board's Partial Initial Decision dated October 31, 1974. The Director of Nuclear Reactor Regulation rescinded the suspension in an order dated August 4, 1975.

On May 15, 1975 the State Corporation Commission of Virginia issued a certificate of public convenience and necessity for the North Anna-Morrisville line. In September 1975 a hearing was held to consider the contested North Anna-Morrisville line. Upon conclusion of the hearing and after consideration of the record, the Board issued its initial Decision dated December 5, 1975. That decision authorized the Director of Nuclear Reactor Regulation to rescind his Order of February 4, 1972 suspending work on the applicant's North Anna-Morrisville line, subject to the conditions set forth in Paragraph 38 of the decision.

It is therefore ordered, that the suspension of construction activities related to the North Anna-Morrisville 500–kV transmission line is lifted, subject to the following conditions:

1. The Applicant's clearance of right-of-way shall be limited to 150 feet, which is the width necessary for construction of a 500–kV line, until such time as construction of the projected 230–kV line has received the necessary State approvals.

2. The Applicant shall maintain the right-of-way through the Rappahannock Wildlife Management Area in such a manner as to optimize the "edge effect," minimize the visual impact of the line, and be satisfactory to the Virginia Commmission of Game and Inland Fisheries.

3. The Applicant shall, in traversing the Rapidan and Rappahannock Rivers, do a minimum of clearing of the right-of-way and utilize such other measures as are practical to minimize the visual impact of the line.

V40I250 DEC 30 75 XUM

It is further ordered, That in accordance with the Atomic Safety and Licensing Board's Partial Initial Decision of October 30, 1974, the following additional conditions shall also apply:

1. The applicant shall endeavor to minimize the impacts of the transmission lines to be constructed from the Station and to include the following procedures.

(i) Retain and augment as necessary the vegetation at road and river crossings, homesites and major water bodies to screen the transmission lines.

(ii) Change the alignment of transmission lines on both sides of major road crossings where vegetation will be inadequate to avoid long views down the right-of-way.

(iii) Place the tower structures along the lower slopes in hilly terrain, rather than on the commonly visible high points, unless a long span is necessary that cannot otherwise be reasonably accomplished.

(iv) Control the application of herbicides to rights-of-way so as to prevent drift and apply no herbicides on rights-of-way over pasture, cropland and irrigation ditches or near water bodies, homes and recreation areas.

2. A control program shall be established by the Applicant to provide a periodic review of all construction activities to assure that those activities conform with the environmental conditions set forth in the construction permit.

3. Before engaging in a construction activity which may result in a significant adverse environmental impact that was not evaluated in the Environmental Statement, the Applicant shall provide written notification to the Division of Reactor Licensing.

4. If unexpected harmful effects or evidence of irreversible damage are detected during facility construction, the Applicant shall provide an acceptable analysis of the problem and a plan of action to eliminate or significantly reduce these harmful effects or this damage.

Dated at Bethesda, Maryland this 19th day of December, 1975.

For the Nuclear Regulatory Commission.

BEN C. RUSCHE,
Director, Office of Nuclear Reactor of Regulation.

PRIVACY PROTECTION STUDY COMMISSION

HEARINGS

The Privacy Protection Study Commission will hold public hearings between 10:00 a.m. and 5:30 p.m. on February 11 and 12, 1976, in Room 305, 26 Federal Plaza, New York, New York. The principal topic of these hearings will be the record-keeping practices of credit-card issuers and other related record-keeping activities, including travel, hotel and entertainment systems, that may have the capacity to generate information about the movements, purchases, associations, and lifestyle of individual consumers. To assist in the development of this topic, the Commission wishes to learn about the experiences and views of interested parties, including members of the public, prior to the hearings. These contributions should be made in writing to the Executive Director, Privacy Protection Study Commission, Suite 424, 2120 L Street, N.W., Washington, D.C. 20506, and should be received in the Commission offices *no later than January 16, 1976.*

The number of credit cards held by consumers, the frequency and varied purposes of their use, and the evolving structure of transaction-based consumer services, make the record-keeping systems that support the use of credit cards a potentially extensive collection of information about identifiable individuals. Under authority of the Privacy Act of 1974, 5 U.S.C. 552a, the Commission will consider whether the principles and requirements of the Privacy Act of 1974 should be extended to these systems.

The Commission is particularly interested in views from the public concerning their experiences with credit-card and reservation systems. In addition, the Commission seeks information, views, comments as to the following: (i) the uses that credit-card and reservation systems make of individually identifiable information about consumers, including the type and form of information collected, the purposes for collection, and the sources from which the information is obtained or verified; (ii) the impact of new services and technologies, including arrangements for point-of-sale debiting of checking and savings accounts; (iii) the organizations to which information on card holders is provided in connection with maintaining accounts and otherwise; (iv) policies and procedures for governmental access and incentives for denial of access or cooperation with governmental agencies and any experiences in this regard; (v) the legal and operational relationships among credit-card issuers, reservation systems, and credit-reporting and consumer investigative agencies; and (vi) the desirability and feasibility of applying the principles and requirements of the Privacy Act of 1974 to credit-card issuers and reservation systems.

The Commission also requests information from and views of governmental agencies which either regulate the activities of card issuers or use the information that card issuers and reservation systems maintain on individual consumers. The Commission intends to examine the experiences of Federal and State regulators in connection with the Fair Credit Billing Act, the Fair Credit Reporting Act, and related statutes. The Commission also seeks to ascertain the practices of governmental agencies as users of credit-card information, which would include the purposes for which such information is obtained, the purposes for which it is used, the methods of access, the appropriateness and feasibility of prior notification to consumers and the effect(s) of denying governmental agencies of access to the records on individuals maintained by credit-card and reservation systems.

CAROLE W. PARSONS,
Executive Director, Privacy Protection Study Commission.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-11937; File No. SR-MSTC-75-4]

MIDWEST SECURITIES TRUST COMPANY

Self-Regulatory Organizations

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on November 24, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Statement of the Terms of Substance of the Proposed Rule Change.

DEPOSITORY INPUT SATELLITE SYSTEM

Midwest Securities Trust Company ("MSTC") proposes to operate a system for the central handling of securities pursuant to which participants may from time-to-time deposit securities with MSTC. As part of its continuing effort to modernize the handling of securities, MSTC has developed a Depository Input Satellite System (DIS). Banks throughout the country would consent via agreement to act as agents of MSTC on the terms and conditions set forth in the agreement between themselves and MSTC in receiving deposits of securities as a custodian bank within the definitions set forth in the Uniform Commercial Code and consistent with the regulations of the Securities and Exchange Commission adopted pursuant to the Securities Exchange Act of 1934, for the securities deposited, for the period during which such securities remain within its custody or control.

The bank shall accept on behalf of MSTC securities tendered for deposit during the banks' regular business hours by Participants of MSTC provided that such securities are accompanied by:

(a) properly prepared delivery tickets in the form prescribed by MSTC; and,

(b) in good deliverable form (in accordance with the Rules of the Midwest Stock Exchange, Inc. and such additional requirements at MSTC may prescribe from time-to-time), with the appointment of Kray & Co. (or such other nominee as MSTC may from time-to-time specify) as attorney for the transfer thereof.

If there are any discrepancies between the securities tendered by the MSTC Participant and the attached delivery tickets, or omissions in the delivery tickets, or if the securities are not in good deliverable form, the bank shall not accept the delivery until the discrepancies, omissions, or defects are corrected.

STATEMENT OF BASIS AND PURPOSE

The DIS arrangement would allow banks to confirm via telecopier to MSTC that a MSTC Participant has in fact delivered securities to it, thereby allowing MSTC, upon receipt of said confirmation, to properly credit the account of the delivering broker, a day in advance of the actual physical delivery of said securities from the custodian bank to MSTC.

The Depository Input Satellite would contain the following procedures and safeguards:

1. MSTC participants may deliver securities during the DIS's normal business hours.

2. MSTC deposits received by the DIS before 11 a.m., Chicago time will be credited to the participant's account on the day of the delivery. Discretion should be used by the DIS, if participant calls and asks for a 5 minute extension of the cut-off for the same day credit.

3. DIS personnel will perform the following verification checks on the delivery ticket:

a. MSTC participant symbol (verification list enclosed).

b. DIS symbol.

c. Delivery date-date received at DIS.

d. Quantity-total shares specified must agree with the total shares submitted. The total share quantity must also correspond to a summation of the individual denominations appearing on the Depository Delivery Ticket.

e. Cusip number—must be compared against MSTC eligible securities list enclosed.

f. Security description-agrees with the description shown on all securities attached.

g. Denominations.

h. Type of delivery.

i. Value-value of deposit.

4. All securities must be verified to insure they constitute "good delivery."

A. Determine if the stock is registered in the name of an individual, partnership, or brokerage firm.

1. If the stock is registered in the name of an individual, the signature (on the back) must be exactly the same as on the front of the certificates and the signature must be guaranteed by a national bank or broker.

i. If the signature is not exactly the same, there must be a valid "one and the same guarantee."

ii. If the signature is not exactly the same, and there is not a valid one and the same guarantee, prepare a reclamation ticket for the certificate(s).

iii. If there is no valid signature guarantee, prepare a reclamation ticket for the certificate(s).

iv. If a small (not nationally recognized) bank has guaranteed the signature, a brokerage firm must reguarantee the signature.

v. If a small (not nationally recognized) bank has guaranteed the signature, and a brokerage firm has not reguaranteed the signature, prepare a reclamation ticket for the certificate(s).

2. If the stock is registered in the name of a partner, any of the partners can sign the certificate, stating that he is a partner. There must be a partnership guarantee by the broker as well as a signature guarantee by a broker or national bank.

i. If there is no valid partnership guarantee, prepare a reclamation ticket for the certificate(s).

ii. If there is no valid signature guarantee, prepare a reclamation ticket for the certificate(s).

iii. If a small (not nationally recognized) bank has guaranteed the signature, a brokerage firm must reguarantee the signature.

iv. If a small (not nationally recognized) bank has reguaranteed the signature and a brokerage firm has not reguaranteed the signature, prepare a reclamation ticket for the certificate(s).

3. If the stock is registered in the name of a brokerage firm, the certificates must be signed by an authorized signature or stamped with a firm stamp. If there is no authorized signature or firm stamp, a reclamation ticket for the certificate(s) is prepared.

B. Check for a power of attorney release. There must be a power of attorney release for each appointment (except Kray & Co.). This can be done manually or by machine. A stapled power of attorney release is acceptable. If there is not a valid power of attorney release for each appointment (except Kray & Co.), a reclamation ticket for the certificate(s) is prepared.

C. Check that the assignment space is blank.

1. If the space is not blank, the information must be crossed out and the erasure guaranteed by the appropriate member.

2. If the space is not blank and the information is not crossed out or the erasure not guaranteed, prepare a reclamation ticket for the certificate(s).

3. If the stock has an individual's name in the assignment space, there must be a stock power signed by the individual instead of an erasure guarantee.

i. If a stock power is used, it must contain the following information:

a. Security denomination.

b. Security name (not mandatory).

c. Certificate number (not mandatory).

d. Signature of individual.

e. Signature of guarantee.

f. Power of attorney release (if needed).

ii. If the stock power does not contain the necessary information in (i), prepare a reclamation ticket for the certificate(s).

iii. If there is more than one certificate per stock power, prepare a reclamation ticket for the certificate(s).

D. Certain legal items are accepted; namely, (1) dated trusts and under agreement and (2) *under the will* of requires a situs stamp. All other legal items should be reclaimed.

5. DIS will receive daily from MSTC a list of securities that will not be processed for dividend protection in the MSTC system. If the security delivered to the DIS is listed on the cut-off date list, then the DIS personnel should reclaim the security to the firm stating MSTC cannot guarantee dividend protection. No delivery can be accepted by the DIS if the delivery date is the MSTC cut-off date because MSTC will not be able to guarantee dividend protection to the MSTC participant.

6. If one of the several certificates are not in "good delivery form," then the DIS clerk should reclaim only the bad certificate and correct the total shares and denominations on the delivery ticket.

7. The delivery ticket broker receipt copy can be receipted by the DIS clerk prior to verification of the delivery ticket and certificates.

8. In the event that such verification indicates uncorrectable discrepancies, then a uniform reclamation form should be completed by DIS personnel and returned to the participant for correction.

9. DIS will post all acceptable input received to the MSTC-DIS Control Sheet and transmit the document via a facsimile reproduction machine during the morning, but no later than 11 a.m. Chicago time to MSTC Controls Department. Transmission to MSTC-Chicago may be made as often as necessary during the morning to avoid skewing the workload. The information must be posted:

a. Date of Tranmission.

b. Satellite Location.

c. Authorized Signature.

d. Transmission Time.

e. Delivery Tape.

f. MSTC Participant's Symbol.

g. Total shares.

h. Cusip Number.

i. Security Description.

j. Satellite Location Symbol.

k. Sequential Control Number (DIS Ignores).

l. Denominations.

m. Deposit Shipment Value.

10. All securities accepted by the DIS on behalf of MSTC shall be retained in safekeeping by the DIS, with delivery tickets used, and segregated from securities held by the DIS for the accounts of others, until forwarded to MSTC in accordance with number 10 of the Safeguards and Procedures. The securities held by the DIS overnight shall be retained in the DIS's vault. DIS acknowledges in its agreement with MSTC that securities placed within its custody or control pursuant to said agreement shall not be subject to any right, charge, security interest, lien or claim of any kind in favor of the DIS or any person claiming through the DIS, and that the DIS shall have no legal or equitable right, claim or interest in or to such securities.

Upon transmission of DIS Control Sheets, MSTC controls clerk batches DIS Control Sheet for keypunch, retaining one copy for the Controls Department files, forwards one copy to MSTC Keypunch Department and forwards one copy to MSTC Distribution Department.

12. Upon receipt of DIS Control Sheet, MSTC Keypunch Department inputs into computer the total number of shares as evidenced by the transmissions deposited by a participant and credited to the account of said participant.

13. Controls Department prepares box updates as to the total number of shares reflected on the DIS Control Sheet.

14. DIS personnel will forward MSTC deposit tickets and certificates, and the MSTC-DIS Control Sheets via Brink's air courier each day. The package will be addressed to MSTC Security Processing Area. MSTC will promptly advise DIS of any discrepancies after receipt.

15. Upon receipt by MSTC, the Distribution Department compares the DIS Control Sheet with the actual physical delivery. Securities received are filmed with deposit tickets, DIS Control Sheets and Brink's delivery packing slips. The MSTC Distribution Department notifies the Controls Department and the Keypunch Department as to the actual physical denominations of the deposited securities, wherein any discrepancies as to total number of shares are noted.

Comments have neither been solicited nor received regarding the proposed rule change.

The Midwest Securities Trust Company believes no burdens have been placed on competition.

Within 35 days of the date of publication of this notice in the Federal Register, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will: (a) by order approve such proposed rule change, or (b) institute proceedings to determine whether

sidiary shall be $10,000. The amendment

GROWTH CAPITAL REQUIREMENT

requirement or some greater percentage as may from time to time be designated by the

V 40 250 DEC 30 75 XUM

the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submission should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before January 20, 1976.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 18, 1975.

[SEAL] GEORGE A. FITZSIMMONS, *Secretary.*

[FR Doc.75-34853 Filed 12-29-75;8:45 am]

[Release No. 34-11909; File No. SR-NYSE-75-11]

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory Organizations

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Act of June 4, 1975, Pub. L. No. 94-29, § 16, 84 Stat. 147, notice is hereby given that on November 6, 1975, the above-mentioned self-regulatory organization ("the Exchange") filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

In order for the Exchange to comply with the Securities Acts Amendments of 1975, which, among other things, require national securities exchanges to enforce compliance by its members and persons associated with its members with all the provisions of the Securities Exchange Act of 1934, the rules thereunder and the rules of the Exchange, the Board has approved proposed amendments to Rules 325, 313.11, 313.12, 313.22, 320(f), 321.34, 322.10, 324.24, 326, 327 (to be rescinded), 420 and 431 which will enable the Exchange to regulate and enforce the capital requirements of members, member organizations and brokers and dealers who are associated with members or member organizations who are subject to Exchange regulation under the Securities Exchange Act of 1934 and particularly Rule 15c3-1 [17 CFR § 240.15c3-1] adopted pursuant to section 15(c)(3) of that Act.

A summary of the terms and substance of the proposed rule changes follows.

RULE 325 CAPITAL REQUIREMENTS

Rescind the existing Rule 325 and adopt a proposed Rule 325 which is entirely new and incorporates the SEC's uniform net capital rule by reference. It does not prescribe higher net capital minimum dollar amount requirements but makes clear (proposed Rule 325(d)) that the Exchange may at any time or from time to time prescribe greater net capital or net worth requirements including more stringent treatment of items in computing net capital or net worth. It also retains a differentiation in capital treatment of long over-the-counter put and call options endorsed by members from those by non-members, and a provision related to the net capital treatment of securities subject to special initial margin requirements. The text of proposed Rule 325 is as follows.

RULE 325

(a) Each member or member organization subject to Rule 15c3-1 promulgated under the Securities Exchange Act of 1934 shall comply with the capital requirements prescribed therein and with the additional requirements of this Rule 325.

(b) Each member or member organization subject to this Rule shall forthwith notify the Exchange if his or its net capital after deduction of all capital withdrawals including maturities, if any scheduled during the next six months, falls below the pertinent percentage indicated below:

1. If the net capital minimum dollar amount requirement is applicable—150 percent thereof or some greater percentage as may from time to time be designated by the Exchange, or

2. If the ratio of aggregate indebtedness to net capital is applicable-10 percent of aggregate indebtedness, or

3. If the specified percentage of the aggregate debit items in the Formula for Determination of Reserve Requirements for Brokers and Dealers under Securities and Exchange Commission Rule 15c3-3 is applicable 7 percent of the aggregate debit items thereunder.

(c)(1) In computing net capital, a long put option or a long call option which is not an obligation of a clearing agency registered under the Securities Exchange Act of 1934 or has not been endorsed or guaranteed by a member organization shall have no value and shall not operate to increase net capital under any provision of this Rule.

(2) In the case of member organizations whose trading shows a pattern of purchasing and selling the same listed stock on the same day, (or all member organizations when so designated by the Exchange), during the period in which any special margin requirement is in effect, any new proprietary transaction of members or member organizations resulting in a long or short position, shall, notwithstanding any other provision of this Rule, be treated as a "contractual commitment" from the trade date to the settlement date and shall be subject to a charge to net capital of the same percentage as specified in the special margin requirement, excepting in the case of the specialist in that stock or of others who at the request of a Floor Official have participated in a difficult market situation.

(d) The Exchange may at any time or from time to time with respect to a particular member or member organization or all members or member organizations or a new member or member organization prescribe greater net capital or net worth requirements than those prescribed under this Rule including more stringent treatment of items in computing net capital or net worth.

RULE 313 (SUBMISSION OF PARTNERSHIP ARTICLES—SUBMISSION OF CORPORATE DOCUMENTS)

.11 Requires that partnership articles include certain provisions relating to the withdrawal of capital and notices to be given the Exchange regarding such withdrawals.

The proposed amendment deletes provisions which will be replaced by Rule 15c3-1 [17 CFR § 240.15c3-1] and adds a reference to Rule 15c3-1 [17 CFR § 240.15c3-1]. In addition, the amendment changes a reference to Rule 325.20(5) which under another part of this proposal will be relocated to Rule 420.50.

.12 The amendment adds a specification of the documentation which will be necessary if a deceased partner's interest is to be considered as capital in a continuing firm. This is a revised version of the discussion in the supplementary material to the present Rule 325.18. It is more appropriate in Rule 313.

.22 Requires that where a stockholder may compel the redemption of his stock the corporate documentation must contain certain conditions and restrictions relating to such redemption. The proposed amendment eliminates the restrictions which are now incumbent upon the corporation pursuant to SEC Rule 15c3-1(e) [17 CFR § 240.15c3-1(e)] and adds reference to SEC Rule 15c3-1 [17 CFR § 240.15c3-1].

RULE 320 (MISCELLANEOUS RESTRICTIONS ON CORPORATE MEMBERS)

(f) Provides conditions and restrictions relating to the redemption or repurchase of stock by a member corporation. The amendment eliminates those restrictions now incorporated in SEC Rule 15c3-1(e) [17 CFR § 240.15c3-1(e)] and adds reference to SEC Rule 15c3-1 [17 CFR § 240.15c3-1].

RULE 321 (FORMATION OF CORPORATE AFFILIATES)

.34 Provides that a member organization may carry a cash or margin account for a corporate affiliate but must charge its capital for any debit balance and may not allow any value for securities positions in the affiliate's account. The amendment to this rule will eliminate these provisions for capital treatment and provide instead that the affiliate's account will be subject to the rules and regulations generally applicable to customers' accounts. This will be consistent with the SEC rule.

RULE 322 (GUARANTEED CORPORATE SUBSIDIARIES)

.10 Requires that the minimum net capital of a guaranteed corporate subsidiary shall be $10,000. The amendment will change this to not less than $10,000, but provids that if the subsidiary is a broker or dealer, the minimum net capital dollar amount under proposed Rule 325 will apply. This assures that the minimum requirement will be consistent with the requirement under proposed Rule 325 and the SEC rule.

RULE 324 (FORMATION OF ASSOCIATED PARTNERSHIPS)

.24 Requires that the minimum net capital of an Associated Partnership shall be $10,000. The amendment will change this to not less than $10,000 but provides that if the Associated Partnership is a broker or dealer, the minimum net capital dollar amount under proposed Rule 325 will apply. This assures that the minimum requirement will be consistent with the requirement under Rule 325 and the SEC rule.

RULE 326

(*Growth Capital Requirement*) (a) Provides that a member organization carrying customer accounts may not expand its business if its capital position does not meet certain enumerated requirements or the member organization has been restricted by the Exchange.

(*Business Reduction Capital Requirement*) (b) Provides that a member organization carrying customer accounts must reduce its business if its capital position fails to meet certain enumerated requirements or the member organization has been restricted by the Exchange.

(*Unsecured Loans and Advances*) (c) Provides that a member organization may not make unsecured or partly secured loans and advances to certain persons or entities having certain relationships with the organization, without approval of the Exchange if after such action the organization's capital position would fall below certain enumerated requirements.

(*Unsecured Loans and Advances*) (d) Provides that a member organization having outstanding any unsecured or partly secured loans, as described under paragraph (c) of the rule, must reduce or eliminate the loans or otherwise restore its capital to the point where it meets the requirements under paragraph (c) of the rule if its capital position fails to meet certain enumerated standards.

(*Distribution of Profits or Dividends*) (e) Prohibits the distribution of profits or declaration of dividends by a member organization if it would cause the organization's capital position to fall below certain enumerated requirements.

Under Rule 15c3-1 [17 CFR § 240.-15c3-1], there is no requirement similar to Rule 326(a), (b) or (d). Rule 15c3-1(e) [17 CFR § 240.15c3-1(e)] restricts the withdrawal of capital through unsecured loans and advances similar to 326(c) but the provision is not as comprehensive. The Rule 15c3-1(e) [17 CFR § 240.15c3-1(e)] contains provisions equivalent to those of Rule 326(e).

The proposed amendments would eliminate paragraph (e) and, with regard to paragraphs (a), (b), (c) and (d), read as follows:

GROWTH CAPITAL REQUIREMENT

Rule 326(a). A member organization which carries customer accounts shall not expand its business during any period in which any of the following conditions exist for more than 15 consecutive business days:

(1) Its net capital is less than 150 percent of its net capital minimum dollar amount requirement or some greater percentage as may from time to time be designated by the Exchange, or

(2) If subject to this requirement, its aggregate indebtedness is more than 1,000 per centum of its net capital, or

(3) If in lieu of (2) above, the specified percentage of the aggregate debit items in the Formula for Determination of Reserve Requirements for Brokers and Dealers under SEC Rule 15c3-3 (the alternative net capital requirement) is applicable, its net capital is less than 7 percent of the aggregate debit items thereunder, or

(4) Capital withdrawals including maturities scheduled during the next six months would result in the condition described in (1), (2) or (3) above, or

(5) The Exchange restricts the member organization.

BUSINESS REDUCTION CAPITAL REQUIREMENT

Rule 326(b). A member organization which carries customer accounts shall forthwith reduce its business to a point enabling its available capital to meet the standards of Rule 326(a) if for more than fifteen (15) consecutive business days:

(1) Its net capital is less than 125 percent of its net capital minimum dollar amount requirement or some greater percentage as may from time to time be designated by the Exchange, or

(2) If subject to this requirement, its aggregate indebtedness is more than 1,200 per centum of its net capital, or

(3) If in lieu of (2) above, the specified percentage of the aggregate debit items in the Formula for Determination of Reserve Requirements for Brokers and Dealers under SEC Rule 15c3-3 (the alternative net capital requirement) is applicable, its net capital is less than 6 percent of the aggregate debit items thereunder, or

(4) Capital withdrawals including maturities scheduled during the next six months would result in the condition described in (1), (2) or (3) above, or

(5) The Exchange restricts the member organization.

UNSECURED LOANS AND ADVANCES

Rule 326(c). No drawings, unsecured or partly secured loans or advances of funds by a member organization to any partner, director, officer, employee, stockholder, subordinated lender, secured demand note contributor or persons or entities related to, controlled by, under common control with such persons or in which such persons are employed, hold office or have a financial interest and no guarantees of obligations of any person shall be made, except with prior written approval of the Exchange, when any of the following conditions exist in a member organization, or if such drawings, loans, advances or guarantees would result in any of the following conditions:

(1) Its net capital is less than 150 percent of its net capital minimum dollar amount requirement or some greater percentage as may from time to time be designated by the Exchange, or

(2) If subject to this requirement, its aggregate indebtedness is more than 1,000 per centum of its net capital, or

(3) If in lieu of (2) above, the specified percentage of the aggregate debit items in the Formula for Determination of Reserve Requirements for Brokers and Dealers under SEC Rule 15c3-3 (the alternative net capital requirement) is applicable, its net capital is less than 7 percent of the aggregate debit items thereunder, or

(4) Capital withdrawals including maturities scheduled during the next six months would result in the condition described in (1), (2) or (3) above.

NOTE.—Applicable state laws should also be reviewed for restrictions on unsecured loans by corporations and partnerships.

Rule 326(d). Except with the prior written approval of the Exchange, a member organization which has outstanding any unsecured or partly secured loans or advances of funds, or guarantees of obligations of the nature described in (c) above, shall forthwith reduce or eliminate such unsecured or partly secured amounts due from such borrowers, or otherwise restore its capital to a point where the conditions described in (c)(1) through (4) did not exist, if any of the following conditions exist at the member organization:

(1) Its net capital is less than 125 percent of its net capital minimum dollar amount requirement, or some greater percentage as may from time to time be designated by the Exchange, or

(2) If subject to this requirement, its aggregate indebtedness is more than 1,200 per centum of its net capital, or

(3) If in lieu of (2) above, the specified percentage of the aggregate debit items in the Formula for Determination of Reserve Requirements for Brokers and Dealers under SEC Rule 15c3-3 (the alternative net capital requirement) is applicable, its net capital is less than 6 percent of the aggregate debit items thereunder, or

(4) Capital withdrawals including maturities scheduled during the next six months would result in the condition described in (1), (2) or (3) above.

RULE 327 (CAPITAL REQUIREMENTS—REGISTERED BROKER-DEALERS)

This rul provides certain minimum capital requirements for members or member organizations which are registered with the Securities and Exchange Commission as broker-dealers but are not subject to NYSE capital requirements or are subject to NYSE requirements which are not as stringent as the Commission's. The uniform net capital rule does away with the need for this rule and it is therefore proposed to rescind Rule 327 in its entirety.

RULE 420 (REPORTS OF LOANS)

This rule provides for reporting and documentation of borrowings for capital and for non-capital purposes. It also requires reports of loans to members, allied members or member organizations. In many respects, it is similar to Rule 325.19 which together with Rule 325.20 and .21 will be eliminated under the proposal to rescind the present Rule 325 and adopt a proposed new rule.

XUM

The proposed amendments to this rule will:

(1) Change the title to "Reports of Borrowings and Loans."

(2) Restructure paragraph .10 to incorporate the first and second paragraphs of Rule 325.19 and eliminate the fourth paragraph, which is covered under the SEC rule.

(3) Paragraphs .20, .21, .22, and .23 have been added to require the use of Exchange printed forms for subordination agreements "to be considered in the computation of net capital" and approval by the Exchange of other subordination agreements not utilizing these Exchange forms.

(4) Paragraph .24 has been transferred from Rule 325.19.

(5) The first paragraph of .30 was transferred from Rule 325.20(5) and the second paragraph added to reflect the need for timely filing with the Exchange and SEC as required by paragraph (c)(6) of Appendix D to Rule 15c3–1 [17 CFR § 240.15c3–1d(c)(6)].

(6) Paragraph .50, requiring the replacement of scheduled capital withdrawals if necessary to meet capital requirements, has been transferred from Rule 325.20(4).

(7) The remaining provisions, .60, .70 and .80 have been renumbered and one part of .70, which required that loans from member organizations to their own members or allied members be reported on the next financial questionnaire required by the Exchange, has been appropriately eliminated.

RULE 431 (MARGIN REQUIREMENTS)

Paragraph (d)(2)(I) provides that a member organization carrying and clearing listed option transactions of specialists, market-makers or traders registered on a national securities exchange may carry the options transactions accounts subject to the requirements of the exchange on which the specialist, market-maker, or trader is registered. The Rule 15c3–1(c)(2)(x) & (xi) [17 CFR § 240.-15c3–1(c)(2)(x) & (xi)] provides certain adjustments to net worth for the carrying broker in these instances. Therefore, it is proposed to amend this rule to permit such accounts to be carried on a margin basis which is satisfactory to the concerned parties since the minimum capital requirements applicable thereto would be uniform under the SEC rule.

PROCEDURES OF SELF-REGULATORY ORGANIZATION

The Board of Directors of the New York Stock Exchange, at its October 16, 1975 meeting, approved the proposed rule amendments. No further Board or membership action is required to complete action on the proposal.

PURPOSE OF THE PROPOSED RULE AMENDMENTS

The proposed amendments will conform the Exchange Capital Rule to the Securities and Exchange Commission Rule 15c3–1 [17 CFR § 240.15c3–1] and will amend parts of other Exchange rules, where necessary, to relate them to the Commission's Rule.

BASIS UNDER THE ACT FOR THE ADOPTION OF THE PROPOSED AMENDMENTS

The proposed amendments to Rules 325, 313.11, 313.12, 320(f), 321.34, 322.10, 324.24, 326, 327, and 431 are based on section 15(c)(3) of the Securities Exchange Act of 1934 which requires the Securities and Exchange Commission to establish minimum financial responsibility requirements for all brokers and dealers. They are also based upon section 6(c)(3) of the Securities Exchange Act of 1934 which permits a national securities exchange to deny or condition membership if a broker or dealer does not meet such standards of financial responsibility as are prescribed by the rules of the exchange.

The NYSE is presently sufficiently well organized and staffed to initiate the necessary steps to regulate and enforce compliance with the Act, the rules and regulations thereunder and its own rules as respects members, member organizations and persons acting as broker or dealers in securities who are associated with a member of the Exchange. Furthermore, the NYSE has both a successful regulatory experience, as well as staff and the economic base to support the necessary regulatory activities.

The proposed amendments will not prevent a broker or dealer or natural person associated with a registered broker or dealer from becoming a member of the Exchange provided they can comply with the minimum capital requirements rules of the Exchange and the Securities and Exchange Commission.

The proposed rule amendments relate to the ability of the Exchange to (A) prevent fraud and manipulative acts and practices; (B) promote just and equitable principles of trade; (C) foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities; (D) remove impediments to and perfect the mechanism of a free and open market and a national market system, and (E) protect investors and the public interest in that (1) it establishes a minimum capital requirement which is designed to assure that each broker or dealer will have sufficient capitalization, according to the type of business engaged in, to conduct his business in accordance with the purposes of the Securities Exchange Act of 1934, the rules and regulations thereunder, and the rules of the Exchange, and (2) it provides the Exchange with the authority to force members, member organizations and brokers and dealers who are associated with members or member organizations who are subject to Exchange regulation under the Securities Exchange Act of 1934 to maintain capitalization within safe limits of the minimum requirements.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OF OTHERS ON PROPOSED RULE

All the proposed amendments are related to the requirements of the Securities and Exchange Commission's Uniform Net Capital Requirement Rule 15c3–1 [17 CFR § 240.15c3–1] which became effective on September 1, 1975. Prior to adoption of this rule, proposals were released for comment on several occasions by the Commission and these were redistributed by the Exchange to its members and member organizations. On each occasion all comment received by the Exchange was forwarded to the Commission. Inasmuch as the proposed amendments do not ordinarily require Exchange distribution for comment and in view of the substantial exposure of the underlying SEC Rule 15c3–1 before adoption, no comment was sought from the Exchange Community in connection with these amendments.

BURDEN ON COMPETITION—INAPPLICABLE

Within 35 days of the date of publication of this notice in the FEDERAL REGISTER, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 02549. Copies of the filing with respect to the foregoing and all written submissions will be available for inspection in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before January 29, 1976.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 9, 1975.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75–34746 Filed 12–29–75;8:45 am]

[Release No. 34–11933; File No. SR–NYSE–75–19]

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory Organizations

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on November 28, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission proposed rule changes as follows:

STATEMENT OF THE PROPOSED RULE CHANGES FEE SCHEDULE FOR MAJOR SERVICES

Deposits	*$0.10 per deposit by issue.*
Deliveries—Miscellaneous Delivery Order (MDO's) including odd-lots, Deliver Balance Order (DBO), Preauthorized Delivery Service (PDQ), [Continuous Net Settlement].	[.52] .58 per instruction on each the receive and deliver side.
Continuous Net Settlement (CNS).	*.40 per instruction on both the Participant-broker and the Participant-Clearing Corporation side.*
Settlement	.16 per settlement item (*not on CNS*).
Withdrawals by Transfer (WT's).	.63 per assignment.
Withdrawal of Nominee Certificates (COD's):	
Regular	[1.56] *1.60* per COD.
Additional certificates beyond first	[.36] *.39* whether or not requested.
Fast Automated Security Transfer (FAST):	
Regular	[1.26] *1.60.*
Additional certificates beyond first	[.36] *.75* only if requested.
Collateral Loans	.42 per line item for each pledge, release or substitution by issue for each Participant.
Long Position (per month)	.42 monthly charge per issue plus price per 100 shares of: [.0026] *.0050* for 0–25MM sh.[1]; .0013 for 25–200MM sh.[1]; .000652 for over 200MM[1]; *zero over 300MM.*
Usage Charge	$260 per month for Participants (including those which are also Pledgee Banks) and non-Participant Pledgee Banks.
Charge for being a Depository Facility.	[$210 per month] *.30 per deposit charged to the Depository Facility with a minimum monthly charge of $100 and a maximum monthly charge of $200.*
Depository Facility Deposit.	*.12 per deposit charged to the Participant into whose account the deposit is made.*

[1] Per 100 shares based on daily average for the month; per issue charge also based on daily average for the month.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule changes is as follows:

3. *Purpose of Proposed Rule Changes.* The purpose of the proposed changes in the Operating Procedures (Procedures) of The Depository Trust Company (DTC), a subsidiary of the New York Stock Exchange, Inc. (Exchange), is to increase, and fairly allocate, the fees imposed upon Participants to cover increases in estimated expenditures and decreases in revenues arising from new variations in DTC services resulting from the introduction by Stock Clearing Corporation (SCC) and American Stock Exchange Clearing Corporation in the middle of 1975 of the CNS system for the settlement of securities transactions and the anticipated inclusion of Exchange odd-lot settlements in the CNS system.

4. *Basis under the Act for Adopting the Proposed Rule Changes.* (a) Not Applicable.

(b) The proposed changes in the Procedures relate to the Exchange's subsidiary, DTC. The changes in Procedures relate to DTC's carrying out the purposes of Section 17A of the Securities Exchange Act of 1934 (Act) by equitably allocating fees among DTC Participants.

(c) Not Applicable.

5. *Comments Received from Members, Participants or Others on Proposed Rule Changes.* Comments regarding a proposed fee schedule (see Exhibit 3) which differs from that referred to in item 1 were solicited from DTC Participants, Pledgee Banks and Depository Facilities by notice dated August 4, 1975. The changes in the schedule in item 1 as compared with the schedule in Exhibit 3 were made in response to the below-described comments. Objections were made in general to any fee increase since DTC earned a substantial profit in the first 6 months of 1975 and objections were made to specific fees as excessive relying, in essence, on the amount of percentage increase as justification for complaint; recommendations were made that DTC operate at cost or below cost rather than returning profits to Participants at year end. Specific objections follow: 1) the impact of inclusion of American Stock Exchange securities in the CNS system was not discussed by DTC; 2) the relationship between the fee schedule and DTC's research and development costs was not discussed by DTC; 3) it is illogical to impose charges with respect to the number of shares rather than with respect to long positions as the cost of handling small long positions is virtually identical to that of handling large long positions; 4) the long position charges result in the smaller user of DTC services paying more per share than a large user of DTC services; 5) the decrease in rate of charges for a greater number of shares creates the illogical result that the addition of the 25 millionth share reduces costs by 75%; 6) if the considerably higher price for COD withdrawal as compared with withdrawal by transfer results from dividend claims, then those excess costs should be borne directly by the Participant initiating the withdrawal; 7) it is unjustifiable to levy a 12¢ per deposit charge with respect to Depository Facility deposits when there is no basic deposit charge for deposits directly into DTC; 8) charges should not be used to force usage of services; 9) certain charges are too low, *i.e.*, there is no charge for a deposit into DTC while the unit cost is $1.24, the charge for a WT is 63¢ while the cost is $1.05, there is no charge for proxy or dividend services; 10) the no per share charge policy for 300 million shares should be applied with respect to shares over 100 million; 11) The proposed increase in COD charges would be onerous for institutions making physical deliveries to non-Participants; 12) the fees will discourage entry of institutional Participants who maintain large securities inventories in DTC; 13) there is a discriminatory bias in the fee schedule in that the impact on 54% of the Participants ranges from a savings of 4% to an increase of 5% or less while the impact on the remaining 46% of the Participants will be increases ranging from 6% to 36%; 14) it is inconsistent to allow deposits in DTC to escape charges in order to attract Participants while at the same time charging still higher fees for COD deliveries which will discourage participation or in other words, it is unfair for broker-dealers to subsidize a system which encourages institutions to join by the lack of deposit fees while being required to bear greater charges for making deliveries to those institutions which are clients of such broker-dealers; 15) a suggestion was made to allow a three month free deposit period for all new Participants with a deposit fee being imposed later; 16) it would be more equitable to defer the recovery of all costs on new systems being developed such as the ID System and the DTC terminal system until such service is made available to all Participants, such costs being passed on to all Participants in the event of the failure to implement the service, as opposed to providing free service to certain users during a pilot period which is subsidized by all Participants; 17) it is disconcerting to learn that the benefits of the CNS system are being dissipated in the DTC system because the CNS system has reduced the units being processed in the DTC system, the fixed charges resulting in increasing the cost for the remaining units in the DTC system; 18) assuming a drop in units being processed, one might conclude that the operating costs not represented by fixed charges should have a significant reduction; 19) the schedule is misleading in that it shows a reduction in CNS delivery charges to brokers by .15¢ whereas the .37¢ charge to the clearing corporation will be passed on to the brokers, thereby resulting in an effective increase; 20) The $1.00 surcharge on transactions via another depository would prevent Participants from acting as clearing agents for accounts who want to "piggy-back" on the Participant through DTC; 21) DTC failed to identify planned purchase of Exchange software as a major cost item; 22) the fee increases will encourage Participants to set up their own inventory of physical securities. Objections to the item 1 fee schedule follow: 1) the 10¢ per deposit fee will discourage Participants from depositing securities in DTC; 2) DTC's statements with respect to the percentage increase resulting from the new fee schedule appears to be too low; 3) the unjustifiable increases contained in the fee schedule proposed on August 4, 1975 are nevertheless preferable to the increases contained in the new schedule which result only in a greater surplus of funds for DTC; 4) the reasons for the rate increase offered by DTC, *i.e.*, payment to the Exchange of DTC's development costs, decrease in income arising from the CNS system, union employee contracts, purchase of a new computer, are not convincing; 5) DTC should trim its budget, the Exchange should be required to forego the repayment of DTC's development costs and any fee increase should be suspended until events in 1976 actually indicate the need for an additional levy.

6. *Burden of Competition.* None.

Within 35 days of the date of publication of this notice in the *Federal Register*, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

V 40 250 DEC 30 75 XUM

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before January 20, 1976.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 17, 1975.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75-34744 Filed 12-29-75;8:45 am]

[Release No. 11941 SR-PSE-75-6]

PACIFIC STOCK EXCHANGE, INCORPORATED

Order Approving Proposed Rule Change

DECEMBER 18, 1975.

On November 3, 1975, the Pacific Stock Exchange, Incorporated ("PSE"), filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b-4 thereunder, copies of a proposed rule change.

The proposed rule change amends Section 5 of Rule XX of PSE to provide procedures dealing with the operations of Pacific Securities Depository Trust Company and Pacific Clearing Corporation and the services provided by the two entities for each other.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 11799, November 7, 1975) and by publication in the FEDERAL REGISTER (40 Fed. Reg. 52774, November 12, 1975).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to PSE.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change filed with the Commission on November 3, 1975, be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75-34851 Filed 12-29-75;8:45 am]

[Release No. 19305; 70-5778]

NATIONAL FUEL GAS COMPANY AND NATIONAL FUEL GAS DISTRIBUTION CORPORATION

Proposed Guarantee By a Holding Company of Notes of a Non-Affiliate; Indemnity Agreement Between Holding Company and a Subsidiary in Connection With Such Guarantee

Notice is hereby given that National Fuel Gas Company ("National Fuel Gas"), a registered holding company, and its wholly-owned subsidiary company, National Fuel Gas Distribution Corporation ("Distribution") have filed a joint declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Section 7, 12(b) and 12(f) of the Act and Rule 45 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

It is proposed that National Fuel Gas will enter into a guarantee agreement ("guarantee agreement") with General Electric Credit Corporation ("GECC") whereby National Fuel Gas will act as guarantor on a loan from GECC to Paragon Resources, Inc. ("Paragon"), a supplier of natural gas to Distribution. National Fuel Gas will guarantee the payment of $6,000,000 in principal plus accrued and unpaid interest persuant to a consolidated loan agreement ("consolidated loan agreement") between GECC and Paragon. Upon execution of the consolidated loan agreement, the amounts outstanding under prior loans from GECC to Paragon totaling not more than $2,000,000 will be consolidated with the additional $6,000,000 being loaned by GECC to Paragon. In no event, however, will National Fuel Gas' obligations to GECC pursuant to the guarantee agreement exceed $6,000,000 plus accrued and unpaid interest. The consolidated principal amount will be repaid in installments over a period of seven years from the date of execution of the consolidated loan agreement. Interest on the loan will be 3⅝% above the higher of the prime rate or the 90 day commercial paper rate. Paragon will repay the installments of principal and interest due GECC under the consolidated loan agreement from revenues received under its supply contract with Distribution.

National Fuel Gas' obligations under the guarantee agreement will be subordinated to its obligations under its presently outstanding debentures and under any additional debentures issued pursuant to indentures substantially similar to those presently in effect.

National Fuel Gas will be obligated, upon the occurrence of an event of default and the declaration by GECC that the outstanding principal amount of the consolidated note is due and payable, to pay upon demand by GECC the lesser of (a) $6,000,000 plus accrued and unpaid interest thereon or (b) the total amount of the guaranteed indebtedness within five days of GECC's demand for such payment. In the alternative, National Fuel Gas will have the right upon such demand by GECC to purchase Paragon's then existing obligations to GECC for a price equal to the full amount of the guaranteed indebtedness. The guarantee agreement provides that upon either (1) the insolvency, reorganization, or liquidation of National Fuel Gas or similar specified event or (2) the occurrence of an event of default under any of National Fuel Gas' indentures and the acceleration of indebtedness outstanding thereunder, the holders of the affected debentures shall be entitled to the payment in full of all principal and accrued interest before National Fuel Gas would be required to make any payment under the guarantee agreement.

Among the other provisions of the guarantee agreement is a requirement that without consent of National Fuel Gas, there will be no additional advances to Paragon or amendments to the manner of calculating interest having the effect of increasing the interest rate.

National Fuel and Gas Distribution further propose to enter into an indemnity agreement under which Distribution will agree to indemnify National Fuel gas against any expenses, liabilities, or damages which may be incurred in connection with the performance of National Fuel Gas of its obligations under the guarantee agreement and the transactions contemplated thereunder. Upon such payment by Distribution, Distribution will be subrogated to the rights of National Fuel Gas against Paragon and all rights and property received by National Fuel Gas by virtue of such performance will, upon performance by Distribution of its obligations under the indemnity agreement, be transferred or assigned to Distribution.

The proceeds of the loan will be used by Paragon to provide funds for (1) payment of Paragon's current accounts payable; (2) the purchase of additional steel pipes for wells drilled or to be drilled by Paragon; (3) payment of Paragon's obligations under unproven leases; and (4) the acquisition of new mineral bases in New York and Pennsylvania.

It is stated that the proposed transactions will promote the best interests of the National Fuel Gas System and its customers. To offset the substantial curtailments currently imposed by interstate gas pipeline suppliers further development of local gas reserves is necessary. Paragon accounts for approximately 80 percent of Distribution's locally produced supply in western New York.

The proposed transactions are therefore supporting a proven supplier whose production is assured to Distribution through contract. The proposed transactions encourage additional production without directly exposing either National Fuel Gas or Distribution to the risks inherent in drilling activities and the necessary large capital requirements associated therewith.

The fees and expenses to be incurred in connection with these transactions are estimated at $7,000, including legal fees of $5,000. It is stated that the Public Service Commission of the State of New York and the Pennsylvania Public Utility Commission has jurisdiction over the proposed transactions. In addition the Public Utilities Commission of Ohio may have jurisdiction over the proposed transactions. No other State commission and no Federal commission other than this Commission has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than January 12, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20 (a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75-34825 Filed 12-29-75;8:45 am]

[Release No. 11940; SR-PSE-75-5]

PACIFC STOCK EXCHANGE, INCORPORATED

Order Approving Proposed Rule Change

DECEMBER 18, 1975.

On November 3, 1975, the Pacific Stock Exchange, Incorporated, ("PSE") filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b-4 thereunder, copies of a proposed rule change.

The proposed rule change amends Section 2(h-a) of Rule XX of PSE relating to buy-in procedures for listed and over-the-counter securities.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 11798, November 7, 1975) and by publication in the FEDERAL REGISTER (40 Fed. Reg. 52774, November 12, 1975).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to PSE.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change filed with the Commission on November 3, 1974, be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

BOSTON STOCK EXCHANGE

Applications for Unlisted Trading Privileges and of Opportunity for Hearing

DECEMBER 19, 1975.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the common stocks of the following companies, which securities are listed and registered on one or more other national securities exchange:

Combined Communications Corp., File No. 7-4778.
Dean Witter Organization, Inc., File No. 7-4779.
Denny's Inc. (Cal.), File No. 7-4780.
Japan Fund Inc., File No. 7-4781.
National Medical Care, Inc., File No. 7-4782.
Robintech Inc. (Del.), File No. 7-4783.
Southland Corporation, File No. 7-4784.
Wheelabrator-Frye, Inc., File No. 7-4785.

Upon receipt of a request, on or before January 4, 1976 from any interested person, the Commission will determine whether the application with respect to any of the companies named shall be set down for hearing. Any such request should state briefly the title of the security in which he is interested, the nature of the interest of the person making the request, and the position he proposes to take at the hearing, if ordered. In addition, any interested person may submit his views or any additional facts bearing on any of the said applications by means of a letter addressed to the Secretary, Securities and Exchange Commission, Washington, D.C., 20549 not later than the date specified. If no one requests a hearing with respect to any particular application, such application will be determined by order of the Commission on the basis of the facts stated therein and other information contained in the official files of the Commission pertaining thereto.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[License No. 02/02–0314]

LLOYD CAPITAL CORP.

Issuance of a License to Operate as a Small Business Investment Company

On October 16, 1975, a notice was published in the FEDERAL REGISTER (40 FR 48557) stating that Lloyd Capital Corporation, 186 Riverside Drive, New York, New York 10024, had filed an application with the Small Business Administration (SBA), pursuant to § 107.102 of the rules and regulations governing small business investment companies (13 CFR 107.102 (1975)) for a license to operate as a small business investment company (SBIC).

Interested parties were given to the close of business October 25, 1975, to submit their written comments. None were received.

Notice is hereby given that, having considered the application and all other pertinent information, SBA on December 10, 1975, issued License No. 02/02–0314 to Lloyd Capital Corporation, pursuant to section 301(c) of the Small Business Investment Act of 1958, as amended.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: December 18, 1975.

JAMES THOMAS PHELAN,
Deputy Associate Administrator for Investment.

DEPARTMENT OF LABOR

Office of Employee Benefits Security

ADVISORY COUNCIL ON EMPLOYEE WELFARE AND PENSION BENEFIT PLANS

Meeting

Pursuant to Section 512 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1142) a meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 10:00 a.m. on Wednesday, January 14 and at 9:00 a.m. on Thursday, January 15, 1976, in the Federal Ballroom North, Quality Inn—Capitol Hill, 415 New Jersey Avenue, N.W., Washington, D.C.

The meeting will be open to the public. The purpose of the meeting is to discuss the items listed in the following agenda:

1. Administration of Oath to New Members.
2. Reporting Forms and Regulations—Status Report.
3. Advisory Council Operations Work Group Report.
4. Reporting, Disclosure and Recordkeeping Work Group Report.
5. Investment Work Group Report.
6. Prohibited Transactions Work Group Report.
7. Small Business Impact Work Group Report.
8. Minimum Standards Work Group Report.
9. Joint and Survivor's Benefits.
10. Department of Labor Regulation Priorities for 1976.

Any member of the public may file a written statement concerning the topics under this agenda by submiting 30 copies on or before the close of business Monday, January 12, 1976 to Mr. James D. Hutchinson, Administrator of Pension and Welfare Benefit Programs, New Department of Labor Building, Third Street and Constitution Avenue, N.W., Room N4629, Washington, D.C. 20210.

Persons desiring to attend should notify Mr. Edward P. Lyssek, Executive Secretary of the Advisory Council, New Department of Labor Building, Third Street and Constitution Avenue, N.W., Room N4700, Washington, D.C. 20210, or may call Area Code 202/523–8753.

Signed at Washington, D.C., this 23rd day of December, 1975.

JAMES D. HUTCHINSON,
Administrator of Pension and Welfare Benefit Programs.

[FR Doc.75–35040 Filed 12–29–75;8:45 am]

Occupational Safety and Health Administration

NATIONAL ADVISORY COMMITTEE ON OCCUPATIONAL SAFETY AND HEALTH

Subgroup Meetings

Notice is hereby given of subgroup meetings of the National Advisory Committee on Occupational Safety and Health, a committee established under section 7(a) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656). The purpose of this Committee is to advise the Secretary of Labor and the Secretary of Health, Education and Welfare on matters relating to the administration of the Act. Subgroups on budget, compliance, standards, and policies and issues were established by the Committee to assist in carrying out its responsibilities.

All subgroup meetings will be held in the Department of Labor Building, 3rd Street and Constitution Avenue, NW., Washington, D.C. 20210. The meetings will begin at 9:00 a.m. The public is invited to attend.

The Subgroup on Standards will meet on January 16, 1976 in Room N–4437. This group will discuss OSHA's ongoing efforts to revise and modify safety and health standards adopted under section 6(a) of the Act. The subgroup also will examine the total standards development process. A representative from the National Institute for Occupational Safety and Health (NIOSH), the agency in the U.S. Department of Health, Education, and Welfare responsible for occupational safety and health research, will brief the Subgroup on the Institute's activities in the standards development area.

The Subgroup on Budget will meet on January 22 and possibly the morning of January 23 in Room N–4437. The agenda will include the application of OSHA's FY 1976 budget, a consideration of the FY 1977 budget, and plans for the FY 1978 budget. In addition, NIOSH will brief the Subgroup on its FY 1977 and FY 1978 budgets.

The Subgroup on Policies and Issues has scheduled a meeting for January 23, 1976 in Room N–5437. Items to be discussed are OSHA's overall approach to small business and the role of labor-management activity with regard to OSHA's responsibility for standards setting and enforcement. NIOSH will present a series of policy issues with regard to its current activities.

The Subgroup on Compliance will meet on January 28, 1976 in Room N–4437. Topics for discussion will include the penalty system for violations of OSHA standards, the issue of repeated violations, and employer liability with regard to multi-employer worksites. In addition, the Subgroup will review milestones for OSHA's National Emphasis Program which focuses special compliance efforts on foundries and the casting and metal stamping industries. NIOSH will brief the Subgroup on its activities impacting OSHA's enforcement efforts.

Anyone wishing to submit written data or views concerning these agenda items to a subgroup should submit them along with 20 duplicate copies to the Committee's Executive Secretary one week prior to that particular subgroup's meeting date. These documents will be presented to the subgroup and included in the official record of the meeting.

Although it is unlikely that at this time the subgroups will be able to schedule oral presentations from the public, the subgroup chairmen will review all such requests. Anyone wishing to request an oral presentation should contact the Committee's Executive Secretary at least one week prior to the meeting in question. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the content of the presentation.

Please address all communications to the Executive Secretary as follows:

J. Goodell, Executive Secretary, National Advisory Committee on Occupational Safety and Health, Room N–3632, 3rd Street and Constitution Avenue NW., Washington, D.C. 20210.

Official transcripts of the meetings will be available for public inspection at OSHA's Technical Data Center, Room N–3638 at the above address.

Signed at Washington, D.C. this 23rd day of December 1975.

J. GOODELL,
Executive Secretary.

[FR Doc.75–35044 Filed 12–29–75;8:45 am]

Office of the Secretary

[TA–W–819]

BAGANOFF ASSOCIATES, INC.

Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on November 5, 1975, in response to a worker petition received on that date which was filed by workers and former workers producing mechanical strain recorders and data transcribers at Baganoff Associates, Inc., St. Louis, Missouri.

Notice of the investigation was published in the FEDERAL REGISTER on November 21, 1975 (40 FR 54319). No public hearing was requested and none was held.

During the course of the investigation it was established that the most recent involuntary separations at Baganoff Associates, Inc. occurred in June of 1974.

V 40 250 DEC 30 75 XUM

Section 223(b) of the Trade Act of 1974 provides, in substance, that a certification shall not apply to any worker whose last total or partial separation from the firm or an appropriate subdivision of the firm ocurred more than one year before the date of the petition on which such certification is granted.

The date of the petition in this case is October 24, 1975 and, thus, workers laid off prior to October 24, 1974 could not be eligible for program benefits under Title II, Chapter 2, Subchapter B of the Trade Act of 1974. Therefore, this investigation has been terminated.

Signed at Washington, D.C. this 17th day of December 1975.

MARVIN M. FOOKS,
Acting Director, Office of Trade Adjustment Assistance.

[FR Doc.75-35051 Filed 12-29-75;8:45 am]

[TA-W-210, 234]

JOSEPH H. COHEN & SONS, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-210, 234: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on October 2, 1975 in response to a worker petition received on October 2, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers formerly producing men's tailored suits and sportcoats at the New Haven, Indiana plant of Joseph H. Cohen & Sons, Inc., a division of Rapid-American Corporation. The investigation was expanded on October 14, 1975 in response to a worker petition received on October 14, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers formerly producing men's tailored suits and sportcoats at the firm's Philadelphia, Pennsylvania plant.

The notices of investigation were published in the FEDERAL REGISTER (40 FR 48414; 49827) on October 15 and 24, 1975. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Joseph Cohen, its customers, the U.S. Department of Commerce, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant Total or Partial Separations. The average number of workers employed at Cohen's Philadelphia plant declined 6 percent in the first eight months of 1975, compared to the like period in 1974. The average number of production workers employed at the firm's New Haven plant declined 7 percent in the first six months of 1975, compared to the like period in 1974.

Sales or Production, or Both, Have Decreased Absolutely. Production of men's tailored suits and sportcoats at Cohen's Philadelphia and New Haven plants, expressed in terms of shipments which generally follow final production by about two months, declined 16 percent and 14 percent, respectively, in the first eight months of 1975 compared to the like period in 1974. Production at the New Haven plant was terminated in June 1975.

Increased Imports Contributed Importantly. From 1973 to 1974, imports of men's tailored suits decreased absolutely and as a ratio to domestic production and consumption. During the same preiod, imports of men's tailored sportcoats decreased absolutely but increased slightly as a ratio to domestic production and consumption.

In the first seven months of 1975, imports of men's tailored suits increased 131 percent in absolute terms and increased dramatically as a ratio to domestic production when compared with the like period in 1974. Imports of men's tailored sportcoats increased substantially as a ratio to domestic production during the same period.

Some of Cohen's largest customers reduced purchases from Cohen in 1975 and shifted to imports in order to gain a significant price advantage available from foreign-made men's clothing. Because Cohen was unable to successfully compete with imports in terms of price, company sales fell substantially in the first eight months of 1975. Consequently the firm was forced to curtail production and employment at its two plants. Cohen closed its New Haven sewing facility in June 1975 and consolidated all operations in the Philadelphia plant which experienced a significant reduction in employment.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's tailored suits and sportcoats produced at the New Haven, Indiana and Philadelphia, Pennsylvania plants of Joseph H. Cohen & Sons, Inc. contributed importantly to the total or partial separation of the workers at such plants. In accordance with the provisions of the Act, I make the following certification:

"All hourly, piecework and salaried employees of the New Haven, Indiana and Philadelphia, Pennsylvania plants of Joseph H. Cohen & Sons, Inc., who became or will become totally or partially separated on or after January 12, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974."

Signed at Washington, D.C. this 18th day of December 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[FR Doc.75-35050 Filed 12-29-75;8:45 am]

[TA-W-177]

MARYLAND CLOTHING MANUFACTURING CO., INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-177; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on September 26, 1975 in response to a worker petition received on September 26, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing custom made and tailored men's sportcoats, suit coats, overcoats and uniform coats at the 3023 E. Madison Street, Baltimore, Maryland plant.

The notice of investigation was published in the FEDERAL REGISTER on October 7, 1975 (40 FR 46373). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Maryland Clothing Manufacturing Company, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant Total or Partial Separations. The average number of production workers remained constant in the first three quarters of 1975 compared to the like period in 1974. Average weekly hours increased 25.5 percent in the first three quarters of 1975 compared to the like period in 1974.

Sales or Production, or Both, Have Decreased Absolutely. Sales at the Maryland Clothing Manufacturing Company, Baltimore, Maryland plant increased 37.5 percent in the first three quarters of 1975 compared to the first three quarters of 1974. Production equalled sales since no inventories are maintained.

Sales of made-to-measure men's coats represent about 40 percent of total sales compared to 60 percent sales of tailored coats. The plant is still operating.

Increased Imports Contributed Importantly. Imports of made-to-measure tailored suits, sportcoats and trousers are not separately identified in the Tariff Schedules of the United States but are included with the aggregate data on imports of tailored suits, sportcoats and trousers. Imports of made-to-measure men's apparel are not known.

The evidence developed by the Department's investigation indicated that sales/production, average hours worked and average number of workers at the Maryland Clothing Manufacturing Company have either increased or remained stable between comparable periods from 1974 to 1975. Most of the production is of uniform coats more than half of which is of men's military uniform coats. Customers of uniform coats have not shifted to imports.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suit coats, sportcoats, and overcoats (civilian and/or military) produced at the Baltimore, Maryland plant of Maryland Clothing Manufacturing Company did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C., this 17th day of December, 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[FR Doc.75-35045 Filed 12-29-75;8:45 am]

[TA-W-181]

OAKLOOM CLOTHES, INC.

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-181: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on September 26, 1975 in response to a worker petition received on September 26, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers formerly producing suits and sportcoats at the Baltimore, Maryland plant of Oakloom Clothes, Inc.

The notice of investigation was published in the FEDERAL REGISTER on October 7, 1975 (40 FR 46374). No public hearing was requested and none was held.

The information upon which the determination is made was obtained principally from officials of Oakloom Clothes, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant Total or Partial Separations. The average number of production workers decreased by 2.4 percent in 1974 compared to 1973 and by 6.0 percent in the first half of 1975 compared to the like period in 1974. Average weekly hours decreased by 13.3 percent in 1974 from 1973 and by 3.8 percent in the first half of 1975 compared to the like period in 1974.

Sales or Production, or Both, Have Decreased Absolutely. Company sales of men's suits and sportcoats, combined, declined 3.0 percent from 1973 to 1974. For the first nine months of 1975 sales were 13.4 percent below 1974 sales for the same period.

Increased Imports Contributed Importantly. Imports of men's and boy's suits have increased relative to domestic consumption and production each year from 1971 to 1973. While imports fell slightly in 1974 compared to 1973, the ratios of imports to domestic production and consumption in 1974 of 9.0 percent and 9.0 percent, respectively were above the 1971–1973 average of 8.6 percent and 7.8 percent, respectively. In the first seven months of 1975, imports increased sharply and the ratio of imports to domestic production increased from 7.7 percent in the first seven months of 1974 to 22.1 percent in the first seven months of 1975.

Imports of men's and boy's sportcoats increased their share of the domestic market each year from 1972 to 1974. The ratio of imports to domestic production and consumption increased from 17.1 percent and 14.8 percent, respectively in 1972 to 22.3 and 18.2 percent, respectively in 1974. In the first seven months of 1975, the ratio of imports to domestic production increased to 36.7 percent from 24.5 percent in the first seven months of 1974.

The evidence developed during the Department's investigation indicates that major customers decreased purchases from Oakloom because of the effects of the economic recession. Some customers did not purchase imported tailored clothing while others imported tailored clothing for a clientele different from the Oakloom clientele. Oakloom made expensive, conservatively tailored clothing which generally appealed to older clients. Some Oakloom customers carried imports which sold in a different price and style category than the Oakloom line. Such imports did not influence their decisions to reduce orders from Oakloom.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suits and sportcoats produced at the Baltimore plant did not contribute importantly to the total or partial separation of the workers of that plant.

Signed at Washington, D.C. this 17th day of December 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[FR Doc.75-35046 Filed 12-29-75;8:45 am]

[TA-W-205]

QUEEN CASUALS, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-205: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on October 2, 1975 in response to a worker petition received on that date which was filed by the International Ladies' Garment Workers' Union (AFL-CIO) on behalf of workers and former workers producing ladies' sportswear and casual wear at the Philadelphia, Pennsylvania plant of Queen Casuals, Inc.

The notice of investigation was published in the FEDERAL REGISTER (40 FR 42418) on October 15, 1975. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Queen Casuals, Inc., its customers, the U.S. Department of Commerce, the U.S. Inter-

V 40 N 250 DEC 30 75 XUM

national Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant Total or Partial Separations. The average number of production workers at the Philadelphia plant increased three percent in 1974 compared to 1973 and declined three percent in the first ten months of 1975 compared to the same period in 1974. Average weekly hours for production workers declined 12 percent in the first ten months of 1975 compared to the first ten months of 1974.

Sales or Production, or Both, Have Decreased Absolutely. The Philadelphia plant of Queen Casuals produces coordinated sportswear including knit skirts, pants, shorts, pant suits, shirts, and sweaters. The sportswear may be sold at the retail level as coordinated sets or as separate pieces. Sales by Queen Casuals of sportswear produced at the Philadelphia plant increased 25 percent in 1974 from 1973 and then declined six percent in the first ten months of 1975 compared to the first ten months of 1974.

Increased Imports Contributed Importantly. Imports of ladies' knit sweaters and shirts increased absolutely in ladies' knit skirts declined 60 percent from 1972 and 1974. Imports of ladies' knit slacks an dshorts declined 35 percent in 1974 and 1973.

Specific production and import information on ladies' knitted sportswear sold as coordinated sets is not available. Industry analysts indicate that imports of coordinated sets are negligible. Thus, only those articles produced by Queen Casuals and sold as separate pieces are subject to import competition.

The evidence developed in the Department's investigation of Queen Casuals indicates that imports adversely affected the sales of only those knit sweaters and shirts sold at the retail level as individual pieces. In view of the fact that an estimated 25 percent of total sales by Queen Casuals' Philadelphia plant during 1973–1975 were of sweaters and shirts, an indeterminate portion of which were sold as part of coordinated sets not affected by increased imports, it is determined that increased imports of ladies' sportswear did not contribute importantly to the separation of a significant number or proportion of the workers of Queen Casuals, Inc.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ladies' sportswear and causal wear produced at the Philadelphia, Pennsylvania plant of Queen Casuals, Inc. did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C. this 17th day of December 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[TA-W-199]

ROCKWELL INTERNATIONAL

Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-199; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on September 29, 1975 in response to a worker petition received on September 24, 1975 which was filed by three employees on behalf of workers and former workers producing knitting machinery at the Reading, Pennsylvania plant of the Production Equipment Division of Rockwell International (known prior to January 1, 1975 as the Knitting Machinery Division of Rockwell International).

The notice of investigation was published in the FEDERAL REGISTER on October 7, 1975 (40 FR 46574). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Rockwell International, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant Total or Partial Separations. The average number of production workers declined 66 percent in the first three quarters of 1975 compared to the like period in 1974. Average weekly hours declined 15 percent in the first three quarters of 1975 compared to the like period in 1974.

Sales or Production, or Both, Have Decreased Absolutely. Sales of circular knitting machinery for products other than hosiery from the Reading plant declined 85 percent by value in the first nine months of 1975 as compared to the like period in 1974. Production of these machines ceased in January 1975.

Sales of flat knitting machinery from the Reading plant declined 89 percent by value in the first nine months of 1975 as compared to the like period in 1974. Production of these machines ceased in October 1974.

Sales of circular knitting machinery for hosiery from the Reading plant declined 37 percent by value in the first half of 1975 as compared to the first half of 1974. Production of these machines ceased in April 1975.

Increased Imports Contributed Importantly. Imports of circular knitting machinery for products other than hosiery decreased from 3,291 units in 1973 to 1,603 units in 1974.

The ratios of imports to domestic consumption and production decreased from 81.4 percent and 110.3 percent, respectively in 1973 to 66.3 percent and 72.4 percent in 1974.

Imports of flat knitting machinery decreased from 8,720 units in 1973 to 8,616 units in 1974.

Imports of circular knitting machinery for hosiery increased from 769 units in 1971 to over 2,100 units in 1973. After a decline for the year 1974, imports of circular knitting machines for hosiery increased 75 percent in the first third of 1975 compared to the same period in 1974. Such imports represented 78 percent of domestic production in the first third of 1974 and 141 percent of domestic production in the first third of 1975.

Circular knitting machinery for hosiery constituted virtually all plant production of new machinery in the first third of 1975. Production of new machinery ceased entirely in April, 1975.

The evidence developed in the investigation indicates that sales and employment declines associated with circular knitting machines other than for hosiery and for flat knitting machines were due to declining demand for such machines. At the time the plant ceased production of such products imports of like and directly competitive products were declining. The Department's investigation did indicate sharp increases in imports of circular knitting machinery for hosiery during the period that the plant ceased production of such machinery.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increased imports like or directly competitive with knitting machinery other than for hosiery and flat knitting machinery produced at the Reading, Pennsylvania plant of the Production Equipment Division of Rockwell International did not contribute importantly to the total or partial separation of the workers of that plant.

I conclude that increases of imports like or directly competitive with the circular knitting machines for hosiery produced at the Reading, Pennsylvania plant of the Production Equipment Division of Rockwell International did contribute importantly to the total or partial separation of the workers of the plant. In accordance with the provisions of the Act, I make the following certification:

"All hourly and salaried workers engaged in the production of circular knitting machines for hosiery who became totally or partially separated from employment on or after January 1, 1975 and before May 1, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974".

Signed at Washington, D.C. this 17th day of December 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[DR Doc.75-35048 Filed 12-29-75;8:45 am]

[TA-W-214]

ZOHN MANUFACTURING CO., INC.

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-214; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on October 2, 1975 in response to a worker petition received on October 2, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers formerly producing uniforms and western clothing at the Denver, Colorado plant of Zohn Manufacturing Company, Incorporated, Denver, Colorado.

The notice of investigation was published in the FEDERAL REGISTER on October 15, 1975, (40 FR 48419). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Zohn Manufacturing Company, its customers, the U.S. Department of Commerce, and the U.S. International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant Total or Partial Separations. The average number of production workers declined 58 percent in the second quarter of 1975 compared to the like period in 1974. Production employment was terminated in June 1975. Average weekly hours declined 20 percent in the first four months of 1975 compared to the like period in 1974.

Sales or Production, or Both; Have Decreased Absolutely. The dollar value of sales at the Denver plant declined 23.5 percent in the first four months of 1975 compared to the first four months of 1974.

Production of coats and slacks declined 17.8 percent and 9.9 percent, respectively, in the fourth quarter of 1974 compared to the fourth quarter of 1973. No production data were available for 1975. All production was terminated in May 1975.

Increased Imports Contributed Importantly. All uniform imports enter the United States under the same TSUSA numbers as men's and boys' tailored suits. Consequently, the quantity of uniforms entering the United States is indeterminate. However, industry experts indicate that the level of imports of men's uniform suits is negligible. Imports of uniform coats and trousers have been negligible. Customers surveyed did not substitute imports of coats and trousers for those formerly purchased from Zohn. Three main factors caused Zohn's sales to decline: 1) economic conditions; 2) fashion trends shifting away from western styling; 3) increased competition from domestic suppliers of less expensive, knit trousers.

Declining sales, together with greatly increased production costs in recent years, resulted in Zohn's decision to discontinue production.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with western coats and trousers, and uniforms produced at the Denver, Colorado plant of Zohn Manufacturing Company, Incorporated did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C. this 17th day of December 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

INTERSTATE COMMERCE COMMISSION

[AB 6; Sub-No. 14]

BURLINGTON NORTHERN LINE

Abandonment Between Sauk Centre and Long Prairie, in Todd and Stearns Counties, Minnesota

Upon consideration of the record in the above-entitled proceeding, and of a staff-prepared environmental threshold assessment survey which is available to the public upon request; and

It appearing, That no environmental impact statement need be issued in this proceeding because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321, *et seq.*; and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in a newspaper of general circulation in Todd and Stearns Counties, Minn., on or before December 30, 1975, and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this finding shall be given to the general public by depositing a copy of this order and the attached notice in the office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by delivering a copy of the notice to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER as notice to interested persons.

Dated at Washington, D.C., this 8th day of December, 1975.

By the Commission, Commissioner Brown.

[SEAL] ROBERT L. OSWALD,
Secretary.

BURLINGTON NORTHERN LINE ABANDONMENT BETWEEN SAUK CENTRE AND LONG PRAIRIE, IN TODD AND STEARNS COUNTIES, MINNESOTA

The Interstate Commerce Commission hereby gives notice that by order dated December 8, 1975, it has been determined that the proposed abandonment by the Burlington Northern Inc., of its line of railroad between Sauk Centre and Long Prairie, Minn., a distance of 17.78 miles, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, *et seq.*, and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that the environmental impacts of the proposed action are considered insignificant because there has been no local service between these two stations since 1960 and all bridge traffic was rerouted to other lines of the BN on March 26, 1973. As there has been no service on the line in over two years, an abandonment of the line at this time will create no changes in the environment. No historic or archaeological sites listed in the National Register or eligible for inclusion in the Register are found on or adjacent to the subject corridor. Public interest has been expressed for acquisition of the subject right-of-way, upon abandonment, for recreational trail purposes.

V40N250 DEC 30 75 XUM

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-343-7966.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423, on or before January 14, 1976.

This negative environmental determination shall become final unless good and sufficient reason demonstrating why an environmental impact statement should be prepared for this action is submitted to the Commission by the above-specified date.

ROBERT L. OSWALD,
Secretary.

[FR Doc.75-35071 Filed 12-29-75;8:45 am]

[AB 7 (Sub-No. 19); Finance Docket No. 27754]

CHICAGO, MILWAUKEE, ST. PAUL AND PACIFIC RAILROAD CO.

Abandonment of Line; Trackage Rights

In the matter of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company abandonment between Fairmont and Welcome, in Martin County, Minnesota, and trackage rights over a line of the Chicago and North Western Transportation Company between Fairmont and Welcome, Martin County, Minnesota.

Upon consideration of the record in the above-entitled proceedings, and of a staff-prepared environmental threshold assessment survey which is available to the public upon request; and

It appearing, That no environmental impact statement need be issued in these proceedings because these proceedings do not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321, *et seq.*; and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby directed to publish the appended notice in a newspaper of general circulation in Martin County, Minn., on or before January 7, 1976, and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this finding shall be given to the general public by depositing a copy of this order and the attached notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by delivering a copy of the notice to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER as notice to interested persons.

Dated at Washington, D.C., this 12th day of December, 1975.

By the Commission, Commissioner Brown.

[SEAL] ROBERT L. OSWALD,
Secretary.

[AB 7 (Sub-No. 19)]

CHICAGO, MILWAUKEE, ST. PAUL AND PACIFIC RAILROAD COMPANY, ABANDONMENT BETWEEN FAIRMONT AND WELCOME, IN MARTIN COUNTY, MINNESOTA

FINANCE DOCKET NO. 27754

CHICAGO, MILWAUKEE, ST. PAUL AND PACIFIC RAILROAD COMPANY—TRACKAGE RIGHTS—OVER A LINE OF THE CHICAGO AND NORTH WESTERN TRANSPORTATION COMPANY BETWEEN FAIRMONT AND WELCOME, MARTIN COUNTY, MINNESOTA

The Interstate Commerce Commission hereby gives notice that by order dated December 12, 1975, it has been determined that the proposed acquisition of trackage rights by the Chicago, Milwaukee, St. Paul and Pacific Railroad Company over 7.1 miles of track owned and operated by the Chicago and North Western Railroad Company between Fairmont and Welcome, Minn., and the concurrent abandonment by the Chicago, Milwaukee, St. Paul and Pacific Railroad Company of 6.0 miles of track between Fairmont and Welcome, Minn., if approved by the Commission, do not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, *et seq.*, and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that the environmental impacts of the proposed action are considered insignificant because the actions permit the transfer of rail operations from one line to an adjacent, parallel track. All existing local service will be maintained and the applicant will gain the use of a higher capacity track, permitting improved service. In the Commission's Service Order 120, dated December 19, 1974, the authority sought under these applications was granted on a temporary basis due to unserviceable track conditions. No significant adverse impacts have been reported as a result of that action.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-343-7966.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423, on or before January 22, 1976.

This negative environmental determination shall become final unless good and sufficient reason demonstrating why an environmental impact statement should be prepared for this action is submitted to the Commission by the above-specified date.

ROBERT L. OSWALD,
Secretary.

[Notice No. 148]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

DECEMBER 30, 1975.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before January 19, 1976. Pursuant to Section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-76197. By order of December 22, 1975 the Motor Carrier Board approved the transfer to Robert J. Dillon, Woodbridge, N.J., of Certificate No. MC-75194 issued by the Commission February 12, 1964, to Beverly Storage Co., Inc., New York, N.Y., authorizing the transportation of new and used furniture, except household goods as defined by the Commission, between New York, N.Y., on the one hand, and, on the other, points in New York, New Jersey, and Connecticut. Alvin Altman, Esquire, Attorney for Transferor, Brodsky, Linett and Altman, 1776 Broadway, New York, N.Y. 10019. Mr. Robert B. Pepper, ICC Practitioner, Transferee's Representative, 168 Woodbridge Avenue, Highland Park, N.J. 08904.

No. MC-FC-76205. By order of December 22, 1975 Motor Carrier Board approved the transfer to Bell Trucking Company, P.O. Box 148, Youngstown, Ohio 44501, the Certificate in No. MC-72231* issued July 22, 1971, to J. W. Jones & Son Company, Youngstown, Ohio 44501 authorizing the transportation of: varied commodities, from, to or between points in Ohio, Pennsylvania, Illinois, Indiana, Michigan, New York and West Virginia. A. Charles Tell, 100 East Broad Street, Suite 1800, Columbus, Ohio 43215—Attorney for Transferee. Same for Transferor.

No. MC-FC-76219. By order entered December 22, 1975 the Motor Carrier Board approved the transfer to Fred W. Winkler, doing business as Grange Hall, Maiden Rock, Wis., of the operating rights set forth in Certificate No. MC-90208, issued April 21, 1964, to La Moine A. Mountin, Elmwood, Wis., authorizing the transportation of livestock, from specified points in Wisconsin to South St. Minn.; feed and farm machinery, from South St. Paul, Minn., to specified points in Wisconsin, over regular and irregular routes; and livestock and farm products, between points in the Towns of Rock Elm and Spring Lake, Pierce County, and Weston and Eau Galle, Dunn County, Wis., on the one hand, and, on the other, South St. Paul, Newport, Minneapolis, and St. Paul, Minn.; feed and salt, from South St. Paul, Newport, Minneapolis, and St. Paul, Minn., to points in the above-described Wisconsin territory; livestock and agricultural commodities, from points in the Towns of Rock Elm, El Paso, Salem, and Ellsworth, Pierce County, Wis., to Minneapolis, St. Paul, South St. Paul, Lake City, Red Wing and Newport, Minn.; and general commodities, with the usual exceptions, from Minneapolis, St. Paul, South St. Paul, Lake City, Red Wing and Newport, Minn., to points in the Wisconsin Towns specified immediately above; farm products, between Elmwood, Wis., and points except incorporated municipalities other than Elmwood, in the Towns of Union, Spring Lake, El Paso, and Salem, Pierce County, Wis., on the one hand, and, on the other, Minneapolis, St. Paul, South St. Paul, Stillwater and Newport, Minn., general commodities, from Minneapolis, St. Paul, South St. Paul, Stillwater and Newport, Minn., to Elmwood, Wis., and points except incorporated municipalities (other than Elmwood) in the Towns of Union, Spring Lake, El Paso and Salem, Pierce County, Wis.; and livestock, between Elmwood, Wis., and points except incorporated municipalities other than Elmwood, in the Towns of Union, Spring Lake, El Paso, and Salem, Pierce County, Wis., on the one hand, and, on the other, Minneapolis, St. Paul, South St. Paul, Stillwater and Newport, Minn., over irregular routes. F. H. Kroeger, 1745 University Avenue, St. Paul, Minn., 55104, practioner for applicants.

No. MC-FC-76238. By order of December 22, 1975 the Motor Carrier Board approved the transfer to Bill Doody Bus Tours Travel House, Inc., D/B/A Bill Doody Bus Tours, Buffalo, New York, of License No. MC-12872, issued March 19, 1965, to Travel House of Buffalo, Inc., Buffalo, New York, authorizing it to engage in operations as a broker of passengers and their baggage, in special and charter operations, in round-trip, all-expense tours, beginning and ending at Buffalo, N.Y., and extending to points in the United States including Alaska and Hawaii. S. Harrison Kahn, Suite 733 Investment Building, Washington, D.C., 20005, Attorney for Applicants.

No. MC-FC-76261. By order entered December 22, 1975 the Motor Carrier Board approved the transfer to Darrel P. Purdy, doing business as Purdy's Moving & Transfer, Janesville, Wis., of the operating rights set forth in Certificate No. MC-34597, issued January 3, 1968, to Leonard S. Vechinsky, doing business as Alwin Transfer, Janesville, Wis., authorizing the transportation of household goods, as defined by the Commission, between points in Rock County, Wis., on the one hand, and, on the other, points in Illinois. Edward Solle, Executive Building, Suite 100, 4513 Vernon Blvd., Madison, Wis. 53705, attorney for applicants.

[SEAL] ROBERT L. OSWALD,
Secretary.

PART II:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

■

EMERGENCY RELIEF PROGRAM FOR HOMEOWNERS

Final Rule on Standby Program

V40250 DEC 30 75 XUM

Title 24—Housing and Urban Development

CHAPTER XV—MORTGAGE INSURANCE AND LOAN PROGRAMS UNDER THE EMERGENCY HOMEOWNERS' RELIEF ACT, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-75-355]

PART 2700—EMERGENCY HOMEOWNERS' RELIEF PROGRAM

Final Rule on the Standby Program

● The purpose of Chapter XV is to describe and establish a standby program authorized by the Emergency Homeowners' Relief Act to prevent widespread mortgage foreclosures and distress sales of homes resulting from the temporary loss of employment and income. If it becomes necessary to implement the program, HUD would provide emergency relief under the standby program by coinsuring loans made by private lenders or by making direct loans to homeowners to assist them in making their mortgage payments. ●

Notice was given on October 9, 1975, at 40 FR 47694 that the Secretary of Housing and Urban Development was proposing to add a new Chapter XV to Title 24 of the Code of Federal Regulations describing the requirements of the Emergency Homeowners' Relief Program in case it should be determined that economic conditions dictate the implementation of the standby program.

The Department of Housing and Urban Development has received nine responses to the October 9, 1975, publication. In addition, the Department received a number of letters from U.S. Senators, and Representatives and members of the general public which, though not intended to respond specifically to the notice of proposed rulemaking, addressed various aspects of the proposed program. All of these comments have been carefully reviewed and several changes have been incorporated in the final regulations as a result of the review. The principal changes are set forth below.

1. The term "substantial reduction in income" has been redefined in § 2700.5(s) to mean that a homeowner's income during the period of delinquency is less than 80 percent of his average gross monthly income during the 24-month period prior to the beginning of his involuntary unemployment or underemployment. This change, which raises the applicable percentage from 75 to 80 percent and effectively increases the amount of income a homeowner may have and still qualify, was made in order to take greater cognizance of the impact of inflation and to bring HUD's definition into line with the guidelines used by the Department of Labor.

2. The final program regulations require that a homeowner pay only 25 percent of his gross monthly income toward mortgage payments, instead of 35 percent as was specified in the proposed regulations. HUD decided to lower the monthly mortgage payment requirement again in an effort to compensate for the impact of inflation on the homeowner's income and in order to bring the Emergency Homeowners' Relief Program requirements more into line with other HUD-administered programs.

3. The Department decided to revise its definition of involuntary unemployment or underemployment to be consistent with the guidelines used by the Department of Labor. The Department of Labor's guidelines are more specific than those it originally proposed and HUD supports the use of consistent definitions by all Federal agencies whenever possible.

4. The Department has amended its proposed regulations to instruct lending institutions to presume that a homeowner has a reasonable prospect of being able to make the adjustments necessary for a full resumption of mortgage payments given certain factors outlined in § 2700.-110(d). HUD decided to adopt this presumption of program eligibility because it realized a difficult burden would be placed on lending institutions in forcing them to make this determination without specific criteria.

5. The regulations have been modified to clarify that HUD will consider applications by lenders for the allocation of insurance or direct loan authority in excess of the needs of its own mortgagors. This provision accommodates the fact that under certain circumstances lenders may be asked to provide assistance to other delinquent mortgagors if some lenders are unwilling to participate in the program. However, applications for insurance or direct loan authority are expected to be related primarily to the needs of the lending institution.

6. The section which describes the terms of the note in connection with emergency loans has been revised in order to make it clear to all lending institutions that the note may be accelerated at the option of the holder if the underlying first mortgage is in default after the emergency period has expired.

7. The phrase "to the best of his knowledge" has been added to the lending institution's certification on a number of the forms shown in the appendices to the final regulations. This phrase was added because of the extent to which lenders must rely on information supplied by the homeowner in determining eligibility under the Emergency Homeowners' Relief Program.

The revisions cited above incorporate to a significant extent a number of comments on the proposed regulations. Certain suggestions contained in the comments HUD received were incorporated in their entirety, while others were included only in part.

Major program issues which were included in the comments, but did not directly result in revisions to the proposed regulations are set forth below:

1. *Selection of the "trigger" rate.* A number of those who commented on the proposed regulations indicated that they considered that the "trigger" rate (1.20 percent for the composite delinquency index) was set too high. The Department reconsidered its initial decision to set the rate at 1.20 percent, but is still convinced that the rate is appropriate and that "widespread foreclosures and distress sales of homes" are not likely to develop unless the composite index reaches the trigger point. Moreover, HUD continues to believe that voluntary forbearance by lenders for mortgagors who cannot make their payments due to temporary adverse economic circumstances is preferable to the standby program.

2. *Regional versus national implementation.* Several comments received suggested that the Emergency Homeowners' Relief Program should be implemented on a regional rather than a national basis. Those who commented on this issue indicated that consideration should be given to regional and local housing markets with higher delinquency rates than the national average. The Department continues to believe that in view of the equity issues raised by a regional approach and because of severe data limitations, a national approach to the implementation of the Emergency Homeowners' Relief Program is necessary. The Department has just completed another review of the potential sources of regional data and again concluded that the data which are available do not provide satisfactory measures of the levels and trends in delinquencies and foreclosures on a local or regional basis.

3. *Discretionary authority of the Secretary.* Objections were raised to the fact that under the proposed regulations the standby program would not automatically be implemented even if the "trigger" rate is reached. The Department continues to consider it essential that the Secretary retain discretion even under those circumstances in order to determine whether such a rate portends increased foreclosures or, for example, simply indicates a statistical aberration or widespread voluntary forbearance. The Secretary will also consult with other Federal agencies before making a judgment as to implementation.

4. *Request for allocation authority.* A suggestion was made that lenders be allowed to submit an application for insurance or direct loan authority before the program is implemented so that they would be in a position to offer immediate relief to homeowners once the program is implemented. Realizing the need to provide prompt assistance to homeowners, HUD has made a considerable effort to develop a system which will permit lenders prompt access to insurance and direct loan authority if the program is implemented. Given this, and in view of the fact that a lender's request for program authority prior to actual implementation may bear little relationship to their actual needs at the time of implementation, it was decided not to incorporate this suggestion into the final program regulations.

5. *Risk under the direct loan program.* One respondent suggested that since lending institutions would be acting only as HUD's servicer under the direct loan program, HUD should assume 100 percent of the risk under this program. However, there are a number of reasons why HUD thinks that such servicers should bear a portion of the risk under the direct loan program. First, the risk sharing feature of the direct loan program provides the lending institution with an incentive to see to it that appropriate underwriting standards are followed. Second, since the lending institution is a major beneficiary of the program, inasmuch as some of its delinquent loans will be brought current, it should be willing to share a portion of the risk. Finally, HUD feels it is necessary to include a risk provision in the direct loan program so as not to discourage the use of the coinsurance program.

6. *Title search.* Some lenders feel that it is prudent to require a title search as a condition for granting an emergency loan, and they feel that the cost of a title search should be recoverable from the homeowner. HUD, on the other hand, believes that the cost of a title search represents an unnecessary financial burden which a family applying for assistance under this program could ill afford to pay. The Department is willing to accept the added risk by not requiring a title search and instead accept the lender's judgment of the truthfulness of the borrower.

7. *Late charges.* One of those who commented suggested that lenders should be allowed to collect late charges in connection with the emergency loan. HUD has decided not to adopt this recommendation. Based on HUD's considerable experience with the use of late charges under some of the other programs it administers, the Department feels that the problems which might arise as a result of adding a late charge provision would far outweigh the possible benefits.

8. *Servicing fee for direct loans.* Some lending institutions indicated that since they would be acting as HUD's servicer under the direct loan program they should be entitled to a servicing fee. HUD, on the other hand, believes that any actions taken by the lending institutions on behalf of HUD under the Emergency Homeowners' Relief Program should be considered part of their normal servicing activity. In addition, since, as was pointed out earlier, lenders will benefit from the direct loan program, the Department sees no reason to pay the lending institution a fee for its participation in this program.

9. *Special repayment provision for low-income families.* A suggestion was made to allow low-income families to make their emergency loan principal repayments over a longer period of time or to allow these families to wait to begin principal repayments until after the first mortgage has been paid off. While HUD realizes that the repayment of the emergency loan may pose a greater problem to lower income families, eligibility for assistance under the coinsured and direct loans programs is predicated on the fact that the homeowner has a reasonable prospect of being able to repay both the emergency and delinquent loan once the temporary period of unemployment or underemployment has passed.

10. *Problems arising from long redemption periods.* One comment indicated that in Illinois homeowners would face foreclosure about 30 days after the date of a missed payment, because of the 1-year redemption period. However, § 2700.335(d) gives the Secretary authority to extend the time within which a claim must be submitted. Such extensions will be allowed to remedy problems arising in jurisdictions with especially long redemption periods. When the Secretary deems it appropriate, interest during the extension period will be allowed as part of the claim.

11. *Use of direct loan program.* A recommendation was made that use of the direct loan program should not be predicated on the fact that the lending institution cannot make coinsured emergency relief loans. HUD has decided to retain this provision in its final regulations because it believes that it is necessary to encourage lending institutions to use the coinsured loan program. The Department believes that this requirement is particularly appropriate in view of the limited funds available under the Emergency Homeowners' Relief Program and because the Federal Home Loan Bank Board and other Federal agencies have indicated their willingness to consider making advances to financial institutions for the purpose of making coinsured loans if the program is implemented.

After the proposed regulations were published, it was determined, on the basis of an opinion of HUD's General Counsel's Office, that in general all homes in areas having special flood hazards would be ineligible for assistance under the Emergency Homeowners' Relief Act, unless they are covered by flood insurance. Therefore, flood insurance in the amount of the emergency loan has been made a requirement of the program.

In addition, HUD has determined that servicers should handle unimportant litigation relating to the collection of direct loans. A provision to that effect has been included in the final rule, subject to approval of the Department of Justice.

The Department also decided to include an additional form in the final regulations. The income certification form (Appendix 8) was adopted as a guide for use by lenders/servicers, at their option, to document their determination that a homeowner has incurred a substantial reduction in income as defined in § 2700.5(s) and is therefore eligible for assistance under the Emergency Homeowners' Relief Program.

Environmental and inflation impact statements relative to the subject amendments have been prepared and will be available for public inspection during normal business hours at the office of the Rules Docket Clerk, Office of General Counsel, Room 10245, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

In consideration of the foregoing, and pursuant to authority contained in Section 211 of the National Housing Act, 12 U.S.C. 1701 et seq., Chapter XV of Title 24 of the Code of Federal Regulations is added as follows:

Subpart A—General

Sec.
2700.1 Purpose.
2700.5 Definitions.
2700.10 Determination of emergency.

Subpart B—Eligibility

2700.101 Eligible properties.
2700.105 Eligible lending institutions.
2700.110 Eligible homeowners.

Subpart C—Terms of Emergency Loans

2700.201 Eligible notes and mortgages.
2700.205 Loan amount.
2700.210 Finance charges.

Subpart D—Coinsurance

2700.301 Loan applications.
2700.305 Conditions of insurance.
2700.310 Fees.
2700.315 Insurance premiums.
2700.320 Servicing.
2700.325 Termination.
2700.330 Default.
2700.335 Claims.
2700.340 Payment of insurance benefits.
2700.345 Administrative reports and examinations.
2700.350 Sale, assignment, and pledge of insured loan.

Subpart E—Direct Loans

2700.401 Participation by lending institutions.
2700.405 Application for loans.
2700.410 Transmittal of funds.
2700.415 Fees.
2700.420 Servicing.
2700.425 Default.
2700.430 Collection.
2700.435 Payment to Secretary.
2700.440 Administrative reports and examination.

Subpart F—Appendices

Appendix 1—Application for insurance or direct loan authority allocation—application for contract.
Appendix 2—Application for insured loan.
Appendix 3—Premium form.
Appendix 4—Insurance claim form.
Appendix 5—Application for direct loan.
Appendix 6—Monthly accounting of direct loans.
Appendix 7—Direct loan final accounting.
Appendix 8—Income computation form.

AUTHORITY: Sec. 108(a), 12 U.S.C. 2707, 89 Stat. 252, Pub. Law 94-50

Subpart A—General

§ 2700.1 Purpose.

The purpose of this chapter is to describe and establish a standby program, authorized by the Emergency Homeowners' Relief Act, to prevent widespread mortgage foreclosures and distress sales of homes resulting from the temporary loss of employment and income. If it becomes necessary to implement the program, HUD would provide emergency relief under the standby program by coinsuring loans made by private lenders or by making direct loans to homeowners to assist them in making their mortgage payments. In the event that this emergency program is needed, coinsurance under Subpart D is intended to be the primary method of assistance.

§ 2700.5 Definitions.

For purposes of this chapter:

(a) "Act" means the Emergency Homeowners' Relief Act.

V 40 250 DEC 30 75 D XUM

(b) "Delinquent mortgage" means a mortgage which is at least 3 months delinquent at the time of the application for assistance under this chapter and with respect to which such assistance is to be used or has been used to make payments.

(c) "Department" and "HUD" mean the Department of Housing and Urban Development.

(d) "Direct loan" means an emergency loan made pursuant to Subpart E with funds of the United States of America, evidenced by a note payable to the United States of America.

(e) "Emergency loan" means an emergency mortgage relief loan made pursuant to this chapter.

(f) "Family" means one or more persons related by blood, marriage, or operation of law, who occupy the same dwelling unit.

(g) "Finance charge" means the cost of credit as determined in 12 CFR § 226.4, a section in "Regulation Z" of the Federal Reserve System's regulations on Truth in Lending.

(h) "Financially unable to make full mortgage payments" means that a homeowner is unable to make his monthly mortgage payment with 25 percent of his gross monthly income and that his assets (excluding the equity in his principal residence, household furniture, equipment used in his trade, clothing and automobiles) have a current value not in excess of $5,000.

(i) "Gross monthly income" means the total monthly income, before taxes and other deductions, received by all members of the homeowner's family. There shall be included in this total income all wages, social security payments, retirement benefits, military and veteran's disability payments, unemployment benefits, welfare benefits, food stamp benefits, and interest and dividend payments.

(j) "Homeowner" means a mortgagor or mortgagors who are in need of mortgage assistance pursuant to this chapter.

(k) "Investor" means a lending institution which owns a delinquent mortgage. The investor may also be the lender or servicer.

(l) "Involuntary unemployment or underemployment due to adverse economic conditions" means the status of a homeowner who is able to work full-time in work which is suitable for the homeowner on the basis of experience and training, who is available for and actively seeking such suitable work, and who is either totally unemployed or working part-time in any job, suitable or unsuitable, or working full-time in work which is unsuitable, but who has suffered a substantial reduction in income. (Registration with the local office of the state employment service will be considered one form of evidence of active search for work.)

(m) "Lender" means a lending institution which makes an emergency loan pursuant to Subpart D, or its assignee or successor in interest.

(n) "Mortgage" means any mortgage, deed of trust, executory land sales contract, conditional sales contract, or other form of security and the obligation secured thereby on a one- to four-family dwelling which is either real estate or a mobile home. It includes a mortgage on a condominium unit and a security interest in stock in a housing cooperative.

(o) "Monthly mortgage payment" means the monthly amount of principal, interest, taxes, ground rents, hazard insurance and mortgage insurance premiums due to be paid under a homeowner's mortgage(s).

(p) "Secretary" means the Secretary of Housing and Urban Development.

(q) "Servicer" means a lending institution which services an emergency loan made by the Secretary pursuant to Subpart E.

(r) "Servicing institution" means the lending institution that services the delinquent mortgage. The servicing institution may also be the lender or servicer.

(s) "Substantial reduction in income" means that the homeowner's average gross monthly income during the period the homeowner is in arrears on the delinquent mortgage is less than 80 percent of his average gross monthly income during the 24 month period preceding the beginning of his involuntary unemployment or underemployment.

§ 2700.10 Determination of emergency.

(a) The Department has constructed a nationwide composite index of delinquencies of 60 days or more (including loans in the process of foreclosure) for mortgage loans on one- to four-family dwellings. It is a quarterly index which is based on a weighted average of delinquency rates published by: the Veterans Administration, the National Association of Mutual Savings Banks, the Mortgage Bankers Association of America, the American Life Insurance Association, and the U.S. League of Savings Associations. The rates are weighted according to the percentage of the long-term mortgage loans, held by the respective lender group represented by the data in each individual series at the end of each quarter.

(b) If the composite rate of delinquencies should reach 1.20 percent the Secretary will, after consultation with the Federal agencies that regulate institutions which make home mortgage loans, make a finding and determination as to whether the Act should be implemented. If the determination of the Secretary is not to implement the Act, and if the composite rate of delinquencies should continue at a level of 1.20 percent or above, the Secretary shall continue to consult with such agencies and shall issue such a finding and determination at the end of each 30 day period during which the rate is at or above the 1.20 percent level.

(c) If the Emergency Homeowners' Relief Program is activated pursuant to paragraph (b) of this section, the Secretary shall publish a notice thereof in the Federal Register, inviting lending institutions qualified under § 2700.105 that are interested in participating in the program to submit a request for an insurance or direct loan authority allocation in the form specified in Appendix 1. Such request shall also serve as an application for a contract of insurance pursuant to Subpart D, or for a contract to act as the Secretary's servicer pursuant to Subpart E, depending on the type of allocation requested. The allocation request may be based upon anticipated applications with respect to mortgages held by other institutions. In such a case, the requesting institution should indicate the basis for its estimate of the number of such mortgages and the amount of assistance which will be sought pursuant thereto. An allocation of insurance authority shall constitute acceptance by the Secretary of the lending institution's application for a contract of insurance, the terms of which are embodied in this chapter. Similarly, an allocation of direct loan authority shall constitute acceptance by the Secretary of the institution's application for a contract to act as the Secretary's servicer, the terms of which are embodied in this chapter.

(d) If, after the program is activited, the Secretary determines that the emergency conditions which led to the activation of the program have abated, no new emergency loans may be made. Furthermore, if an allocation is not used as the applicant represented that it would be used, all or part of the unused allocation may be rescinded by the Secretary. Moreover, no emergency loans may be made after June 30, 1976.

Subpart B—Eligibility

§ 2700.101 Eligible properties.

In order to qualify for an emergency loan under Subpart D or Subpart E of this part, the mortgaged property must:

(a) be the principal residence of the homeowner;

(b) be subject to a delinquent mortgage, as defined in § 2700.5, but not subject to liens having a total outstanding principal balance at the time of filing of the application for an emergency loan under this chapter in excess of $55,000, or such other amount as approved by the Secretary; and

(c) have flood insurance, pursuant to the National Flood Insurance Program, in an amount equal to at least the initial principal amount of the emergency loan, if the property is located in an area that has been identified by the Secretary at least one year before the origination of the emergency loan as an area having special flood hazards.

§ 2700.105 Eligible lending institutions.

(a) In order to participate in the Emergency Homeowners' Relief Program as a lender or servicer, a lending institution must be approved as a mortgagee pursuant to §§ 203.1 through 203.4 (except § 203.4(e)) of this title.

(b) Approval of a lending institution pursuant to paragraph (a) of this section may be withdrawn at any time by notice from the Secretary by reason of:

(1) the transfer of an insured loan to a nonapproved entity;

(2) the failure of a lending institution to submit the required annual audit report of its financial condition within 75 days of the close of its fiscal year; or

(3) the failure of a lending institution to comply with the regulations of this chapter.

Withdrawal of a lending institution's approval shall not affect the insurance on the loans accepted for insurance.

(c) All approved lending institutions are responsible for servicing of emergency loans in accordance with acceptable mortgage practices of prudent lending institutions.

§ 2700.110 Eligible homeowners.

In order to qualify for an emergency loan under Subpart D or Subpart E the homeowner must:

(a) be at least 3 months in arrears in his payments on the delinquent mortgage;

(b) have incurred a substantial reduction in income as a result of involuntary unemployment or underemployment due to adverse economic conditions;

(c) be financially unable to make full mortgage payments on his principal residence;

(d) have a reasonable prospect of being able to make the adjustments necessary for a full resumption of mortgage payments on the delinquent mortgage the month after the last advance under the emergency loan and for the repayment of the emergency loan pursuant to the terms of the note taken in connection with that loan (a favorable employment and credit history prior to the beginning of his current unemployment or underemployment will be considered one form of evidence of the homeowner having such a prospect);

(e) have not received another emergency loan pursuant to this chapter;

(f) have been notified that the investor intends to foreclose; and

(g) sign the application to be sent to the Secretary, as specified in Appendices 2 and 5 to this Part, which certifies that to the best of his knowledge the information in the application which the homeowner provided is accurate, that circumstances make it probable that there would be a foreclosure if emergency mortgage relief were not given, and that he is in need of such relief.

Subpart C—Terms of Emergency Loans

§ 2700.201 Eligible notes and mortgages.

(a) The note, mortgage and lending agreement, if any, in connection with an emergency loan pursuant to Subpart D or E of this part shall be in a form, approved by the Regional Administrator of the HUD Regional Office, for the state in which the mortgaged property is located.

(b) The note evidencing the emergency loan shall bear the signature of the homeowner as maker, shall be valid and enforceable against him, and shall be complete and regular on its face.

(c) Loans shall be secured by an additional mortgage upon the property which shall be recorded at the time of the closing of the loan.

(d) The note, or a separate lending agreement which may be incorporated by reference in the note, shall provide for the disbursement of the loan proceeds within 12 months. However, the note or lending agreement shall provide that if at any time before the last disbursement under the emergency loan is made, the homeowner's average gross monthly income during the preceding 3 months has increased or decreased by 20 percent or more in relation to the gross monthly income of the homeowner at the time the loan amount was established, the homeowner must notify the lender or servicer within 30 days. In such a case, the emergency loan shall be recast with respect to the amount of principal and interest on the basis of the homeowner's new income in such a way as to satisfy the requirements of § 2700.205(a).

(e) The maximum first disbursement of the loan proceeds may be in an amount equal to the loan amount as determined under § 2700.205 divided by 12, times the number of months, not exceeding 12, that the delinquent mortgage is in arrears.

(f) The note shall provide for payments to principal in equal installments falling due monthly beginning no later than 12 months following the date of the last disbursement of loan proceeds.

(g) The note shall provide for payments of interest earned during the disbursement period and interest earned thereafter beginning no later than 6 months following the date of the last disbursement under the loan.

(h) The note shall contain a provision for acceleration of maturity, at the option of the holder, in the event of default on the emergency loan, as defined in § 2700.330(b) and § 2700.425(b).

(i) The maximum permissible maturity of the note is 10 years from the date of the note.

§ 2700.205 Loan amount.

(a) Subject to the limitation specified in paragraph (b) of this section, the principal amount of the loan, exclusive of finance charges, made under Subparts D and E of this part shall be equal to the lesser of:

(1) 12 times $250; or

(2) the sum of (i) 12 times the homeowner's monthly mortgage payment after 25 percent of his monthly income has been subtracted therefrom, and (ii) the fees allowed under §§ 2700.310(a) and 2700.415(a).

(b) The lender or servicer shall not approve an emergency loan when the outstanding balance, including delinquent interest, of the delinquent mortgage when added to the other liens against the mortgaged property, plus the maximum loan which may be advanced to the homeowner pursuant to this chapter, exceeds the value of the mortgaged property. (In determining the value of the property, the lender or servicer may rely upon previously obtained appraisals or other determinations of value of the property and need not obtain a current appraisal.)

§ 2700.210 Finance charges.

The maximum permissible finance charge, exclusive of fees and charges as provided in §§ 2700.310, and 2700.415, which may directly or indirectly be paid to or collected by the lender or the servicer in connection with an emergency loan transaction shall not exceed simple interest on the outstanding principal balance at the annual interest rate for FHA-insured home mortgages as specified in § 203.20 of this title at the time of the closing of the loan. No points or discounts of any kind may be assessed or collected in connection with an emergency loan transaction.

Subpart D—Coinsurance

§ 2700.301 Loan applications.

(a) Lending institutions which have contracts of insurance pursuant to § 2700.10(c) and this subpart are authorized to accept, process, and approve applications for emergency loans under this subpart. That authority includes making determinations relating to eligibility of the emergency loan, the homeowner, and the property under the provisions of this chapter.

(b) A lender may make an emergency loan on the terms specified in Subpart C if it is satisfied that the application meets all of the relevant requirements of this chapter. The lender shall prepare a note, loan agreement, if any, and mortgage as required by Subpart C of this part which it shall record upon the execution of those documents.

(c) On the last working day of the month during which a loan is closed, the lender shall submit to the Secretary an application for an insured loan in the form specified in Appendix 2 of this part, signed by the lender and homeowner, which certifies that: the lender, homeowner, and property meet the eligibility requirements of Subpart B of this part, that circumstances (such as the volume of delinquent loans in the investor's portfolio likely to remain uncured) make it probable that there would be a foreclosure if emergency mortgage relief were not given; that the homeowner is in need of such relief; that the investor has indicated to the homeowner its intention to foreclose; and that the first disbursement of the principal amount of the emergency loan has been paid or credited to the homeowner's account with the servicing institution.

§ 2700.305 Conditions of insurance.

When the requirements of this subpart have been complied with, the lender's insurance coverage under its insurance contract will apply to a particular loan as of the date of closing, if the lender has not exceeded the insurance authority allocation which the Secretary has given the lender pursuant to § 2700.10(c). When the investor is the lender, the insurance of the emergency loan pursu-

V 401250 DEC 30 75 XUM

ant to Subpart D shall be conditioned upon the investor's agreement, for a period up to the month after the last advance under the emergency loan, to refrain from instituting foreclosure proceedings against the homeowner as long as the amount delinquent at the time of the origination of the emergency loan, excluding interest thereon, does not increase, unless the prior approval of the Secretary is obtained. From the effective date of the loan until the termination of the insurance with respect to that loan, the Secretary and the lender shall be bound by the provisions of this chapter as they relate to the loan.

§ 2700.310 Fees.

(a) The lender may collect from the homeowner during the year following the origination of the emergency loan the following fees or charges in conjunction with providing the emergency loan:

(1) A charge to compensate the lender for expenses incurred in originating and closing the emergency loan, including preparation of a note, loan agreement, if any, and a mortgage in a form satisfactory for recordation, the total charge not to exceed $25;

(2) Actual amounts charged by state or local governments or government officials for recording fees and recording taxes or other charges incident to making the loan;

(3) An amount equal to the annual premium for flood insurance required by § 2700.101(c) (the lender shall pay the homeowner's flood insurance premium for that year to the extent it collects such an amount); and

(4) An amount equal to the annual mortgage insurance premium required under § 2700.315.

(b) Subsequent to the year following the origination of the emergency loan and up to the termination of insurance under § 2700.325, the lender may collect from the homeowner the following fees and charges in connection with the emergency loan: an amount equal to the mortgage insurance premium required under § 2700.315.

§ 2700.315 Insurance premium.

(a) On March 1 of each year the insured shall pay to the Secretary an insurance premium equal to one-half of 1 percent of the average outstanding balance, during the previous calendar year, of all the emergency loans which the lender held during that period pursuant to this part.

(b) With respect to the payment provided for in paragraph (a) of this section, the lender shall submit a breakdown of the premium in the form prescribed in Appendix 3 to this part.

(c) Any adjustments of the insurance premium already paid in connection with an emergency loan the mortgage on which is transferred between insureds, shall be made by the insureds, except that any unpaid installments of the insurance premium shall be paid by the purchasing insured.

(d) There shall be no refund or abatement of any portion of the insurance premium except when the premium relates to a loan found to be ineligible. However, no refund shall be made unless a claim is denied by the Secretary or the ineligibility is reported by the insured promptly upon discovery and an application for refund is made. In no event shall charges be refunded when the application for refund is not made until after the loan is paid in full.

§ 2700.320 Servicing.

Servicing functions during the period that the loan is coinsured shall be performed by the lender or the servicing institution acting for the lender. The lender is responsible to the Secretary for proper servicing, even though the actual servicing is not performed by the lender.

§ 2700.325 Termination.

The insurance coverage and the insured lender's obligation to remit insurance premiums with respect to an emergency loan shall be terminated upon whichever of the following first occurs:

(a) the loan is paid in full;

(b) the lender acquires the property securing the loan and notifies the Secretary that no claim for insurance benefits has been or will be made;

(c) the homeowner and the lender jointly request termination; or

(d) the lender files an insurance claim pursuant to § 2700.335.

§ 2700.330 Default.

(a) If the homeowner fails to make a scheduled payment or to perform any other obligation under the mortgage securing the emergency loan, the homeowner shall be deemed to be delinquent on the loan.

(b) For purposes of this subpart, the date of default shall be the earliest of:

(1) 30 days after the first day the homeowner is delinquent on the emergency loan, if the delinquency remains uncorrected;

(2) The date the mortgaged property is sold before full repayment of the emergency loan; and

(3) The date a lien superior to that securing the emergency loan is foreclosed.

(c) If after default and prior to the foreclosure of the mortgage securing the emergency loan, the homeowner cures the default, the loan shall be treated as if a default had not occurred, provided the homeowner pays the lender for any expenses the lender incurred in connection with the lender's attempt to collect on the loan.

§ 2700.335 Claims.

(a) Claims for reimbursement for loss on an emergency loan shall be made on the form specified in Appendix 4 and executed by a duly qualified officer or agent of the insured. The claim shall be accompanied by the lender's complete credit and collection file, or a copy of such file certified by the lender to be a complete and exact copy of the file retained by the lender pertaining to the transaction.

(b) Claims may be filed upon the homeowner's default on the emergency loan.

(c) When the homeowner defaults on the emergency loan, the lender may elect to (1) proceed against the mortgage on the loan or attempt to collect on the note and then make a claim under its insurance contract if there is any net loss, or (2) make a claim under its insurance contract without proceeding against the security or the note.

(d) Claims shall be filed on the last working day of the month, no later than 90 days after the date of default, unless the lender proceeds against the mortgage securing the emergency loan in which case no later than 1 year after the date of default, or such other time period as the Secretary approves. If at the time of default or at any time subsequent to the default a person primarily or secondarily liable for the repayment of a loan is a "person in military service," as such term is defined in the Soldier's and Sailor's Civil Relief Act of 1940, as amended, the lender shall refrain from instituting foreclosure proceedings during the period which he is in military service and 3 months thereafter and that period shall be excluded in computing the time within which a claim for insurance benefits under this subpart may be made.

(e) An insured lender will be reimbursed for its losses on loans made in accordance with this chapter, in an amount equal to 90 percent of the sum of the following:

(1) The unpaid principal amount of the loan less the amount recovered;

(2) The uncollected interest earned up to the date of claim;

(3) Uncollected court costs, including fees paid for issuing, serving and filing summonses;

(4) Attorney's fees actually paid not exceeding the lesser of (i) 25 percent of the amount collected by the attorney on the defaulted note, or (ii) 15 percent of the balance due on the note; and

(5) Up to $25 for expenses actually incurred in recording assignments of mortgages to the United States of America.

(f) The note and any mortgage held or judgment taken by the claimant must be assigned in its entirety and if any claim has been filed in bankruptcy, insolvency, or probate proceedings, such claim shall be likewise assigned to the United States of America. The assignment shall be in the form, approved by the Regional Administrator of the HUD Regional Office, for the state in which the mortgaged property is located.

§ 2700.340 Payment of insurance benefits.

Upon receipt of a claim for insurance benefits which meets the requirements of § 2700.335 and the other provisions of this chapter, the Secretary shall make a payment of insurance benefits in cash to the claimant in an amount equal to the amount specified in § 2700.335(e), subject to the following limitation: the aggregate amount of insurance benefits payable by the Secretary to any lender shall not exceed 40 percent of the aggregate amount advanced by such lender pursuant to this subpart.

§ 2700.345 Administrative reports and examination.

At any time, the Secretary may call upon an insured lender for such reports as are deemed to be necessary in connection with the regulations of this chapter and may inspect the books or accounts of the lender as they pertain to the loans which are coinsured pursuant to this subpart.

§ 2700.350 Sale, assignment and pledge of insured loan.

(a) No lender may sell or otherwise dispose of any insured loan except pursuant to this section.

(b) An insured loan may be sold to a lending institution eligible under § 2700.105. Upon such sale, both the seller and the buyer shall notify the Secretary within 30 days.

(c) When an insured loan is sold to another lending institution eligible under § 2700.105, the buyer shall thereupon succeed to all the rights and become bound by all the obligations of the seller under the contract of insurance under this part, and the seller shall be released from its obligations under the contract of insurance.

(d) An assignment, pledge, or transfer of an insured loan not constituting an actual transfer of legal title, may be made by the lender to another eligible lending institution, subject to the following conditions:

(1) The assignor, pledgor or transferor shall remain the lender for purposes of the contract of insurance under this part.

(2) The Secretary shall have no obligation to recognize or deal with any party other than that lender with respect to the rights, benefits and obligations of the lender under the contract of insurance.

Notice to or approval of the Secretary is not required in connection with assignments, pledges, or transfers pursuant to this subsection.

Subpart E—Direct Loans

§ 2700.401 Participation by lending institutions.

A lending institution eligible under § 2700.105, which has a contract to act as the Secretary's servicer pursuant to § 2700.10(c) and this subpart, is authorized to accept, process and approve applications for direct loans under this subpart in the form specified in Appendix 5 to this part. That authority includes making determinations relating to the eligibility of the direct loan, homeowner, and property, pursuant to the provisions of this chapter. Direct loans, however, may only be made pursuant to this part when the investor cannot make an emergency loan under Subpart D of this part for one of the following reasons:

(a) the investor has a liquidity problem and cannot obtain advances as authorized by Section 113 of the Emergency Homeowners' Relief Act or by Section 10, 10b and 11 of the Federal Home Loan Bank Act; or

(b) other good reason, as determined by the Secretary.

§ 2700.405 Application for loan.

The agreement to process an application for a direct loan shall constitute an acceptance of the lending institution of the responsibility to act as the servicer of the Secretary with respect to that particular application. The servicer shall make a loan on behalf of the Secretary on the terms specified in Subpart C of this part if it is satisfied that the application meets all of the requirements of this chapter. The servicer shall prepare a note, loan agreement, if any, and mortgage in the form specified in § 2700.201. The servicer shall record the mortgage upon the closing of the loan. The servicer shall make the first advance of the loan, as provided for in § 2700.201(e), using its own funds. On the last working day of the month during which the loan is closed, the servicer shall submit to the Secretary a copy of the application signed by the agent and the homeowner certifying: that the agent, homeowner, and property qualify under Subpart B of this part; that circumstances (such as the volume of delinquent loans in the investor's portfolio likely to remain uncured) make it probable that there would be a foreclosure if emergency mortgage relief were not given; that the homeowner is in need of such relief; that the investor has indicated to the homeowner its intention to foreclose; and that the first advance of the emergency loan has been paid or credited to the homeowner's account with the servicing institution.

§ 2700.410 Transmittal of funds.

When the requirements of this part have been complied with, the Secretary will transmit to the servicer, pursuant to the monthly accounting prescribed in § 2700.420, the emergency loan proceeds as long as the agent has not exceeded the lending authority allocation which the Secretary has given the servicer pursuant to § 2700.10(c). When the investor is the servicer, the transmittal of funds under this section shall be conditioned upon the investor's agreement, for a period up to the month after the last advance under the emergency loan, to refrain from instituting foreclosure proceedings against the homeowner as long as the amount delinquent at the time of the origination of the emergency loan, excluding interest thereon, does not increase, unless the Secretary's prior approval is obtained. From the processing of the application until the satisfaction of the debt or the final accounting pursuant to § 2700.435, the Secretary and the servicer shall be bound by the provisions of this chapter with respect to a particular direct loan.

§ 2700.415 Fees.

(a) The servicer may collect from the homeowner during the year following the origination of the emergency loan the following fees or charges in conjunction with providing the emergency loan:

(1) A charge to compensate the servicer for expenses incurred in originating and closing the emergency loan, including preparation of a note, loan agreement, if any, and a mortgage in a form satisfactory for recordation, the total charge not to exceed $25;

(2) Actual amounts charged by state or local governments or government officials for recording fees and recording taxes or other charges incident to making the loan;

(3) An amount equal to the annual premium for flood insurance required by § 2700.101(c) (the servicer shall pay the homeowner's flood insurance premium for that year to the extent it collects such an amount); and

(4) An amount equal to the annual premium required under § 2700.420(d).

(b) Subsequent to the year following the origination of the emergency loan and up to the final accounting on the loan under § 2700.435, the servicer may collect from the homeowner the following fees and charges: an amount equal to premium required under § 2700.420(d).

§ 2700.420 Servicing.

(a) Servicing functions during the period that the loan is outstanding shall be performed by the servicer.

(b) On the same day each month, while the servicer is servicing direct loans for the Secretary, the servicer shall submit a monthly accounting in the form prescribed in Appendix 6 to this part for all of the direct loans which it services. The accounting shall list the amount of funds which it advanced under direct loans during the previous calendar month. In addition, the accounting shall list the amount paid to the servicer under the direct loans serviced by the servicer during the previous calendar month.

(c) If, pursuant to the monthly accounting, the amount HUD owes the servicer exceeds the amount the servicer owes HUD, the Secretary shall remit the difference to the servicer as long as the Secretary finds the accounting in order. If, pursuant to the monthly accounting, the amount the servicer owes HUD exceeds the amount HUD owes the servicer, the servicer shall remit the difference when he submits the monthly accounting to the Secretary.

(d) In March of each year, the servicer, in addition to making its monthly accounting, shall pay to the Secretary a premium equal to one half of 1 percent of the average outstanding balance during the previous calendar year of all the direct loans it serviced during that period. That payment shall be accompanied by a breakdown of the premium in the form prescribed in Appendix 3 to this part.

§ 2700.425 Default.

(a) If the homeowner fails to make any payment or to perform any other obligation under the mortgage securing the emergency loan, the homeowner shall be deemed to be delinquent on the loan.

(b) For purposes of this subpart, the date of default shall be the earliest of:

(1) 30 days after the first day the homeowner is delinquent on the emergency loan, if the delinquency remains uncorrected;

V 401250 DEC 30 75 XUM

Subpart F—Appendices

(2) The date the mortgaged property is sold before full repayment of the emergency loan; and

(3) The date a lien superior to that securing the emergency loan is foreclosed

(c) If after default and prior to the foreclosure of the mortgage securing the emergency loan, the homeowner cures the default, the loan shall be treated as if the default had not occurred, provided the homeowner pays the servicer for any expenses the servicer incurred in connection with the servicer's attempt to collect on the loan.

§ 2700.430 Collection.

(a) If a homeowner defaults on a direct loan, the servicer shall elect to (1) proceed against the mortgage securing the loan or attempt to collect on the note and then to make an accounting and payment to the Secretary, as provided in § 2700.435, or (2) make an accounting and payment to the Secretary without proceeding against the mortgage or the note. Any collection-related litigation involving novel or important matters, as determined by the Secretary, shall be handled by the United States Attorney. In order to make such determinations, a copy of all documents filed with a court in connection with such litigation shall be sent to the Office of General Counsel, Room 10214, 451 7th Street, SW., Washington, D.C. 20410. The Department will inform the servicer if any litigation it is pursuing with respect to direct loans is deemed to involve novel or important matters.

(b) If at the time of default or at any time subsequent to the default, a person primarily or secondarily liable for the repayment of a loan in a "person in military service," as such term is defined in the Soldier's and Sailor's Civil Relief Act of 1940, as amended, the servicer shall refrain from instituting foreclosure proceedings against the homeowner during the period he is in the military service and 3 months thereafter and that period shall be excluded in computing the time within which an accounting and payment are to be made pursuant to § 2700.435.

§ 2700.435 Payment to the Secretary.

(a) Before the expiration of the period of 90 days after the date of default, unless the servicer proceeds against the mortgage in which case before the expiration of the period of one year after the date of default, or such other time period as the Secretary approves, the servicer shall transmit to the Secretary on the last working day of the month: (1) the complete credit and collection file pertaining to the emergency loan; and (2) the amount recovered less the sum of (i) uncollected court costs, including fees paid for issuing, serving and filing summonses and (ii) attorney's fees actually paid, not exceeding the lesser of (A) 25 percent of the amount collected by the attorney of the defaulted note, or (B) 15 percent of the balance due on the note.

(b) At the same time the servicer makes the transmittal as provided in paragraph (a) of this section, it shall share the loss on the loan by making a payment to the Secretary in an amount equal to 10 percent of the sum of the following:

(1) The unpaid principal amount of the loan less the amount recovered;

(2) The uncollected interest earned up to the date of the final accounting;

(3) Uncollected court costs, including fees paid for issuing, serving and filing summonses; and

(4) Attorney's fees actually paid, not exceeding the lesser of (i) 25 percent of the amount collected by the attorney on the defaulted note or (ii) 15 percent of the balance due on the note.

Accompanying that payment shall be a final accounting of the loan in the form specified in Appendix 7 to this part and the note, mortgage securing the loan, and any judgment taken.

(c) Notwithstanding the provisions of paragraph (b) of this section, in the event that aggregate loss borne by the Secretary reaches 40 percent of the aggregate amount advanced by the servicer on behalf of the Secretary under this subpart, the servicer shall bear the burden of any loss in excess of that 40 percent by making an appropriate payment to the Secretary within the time period specified in paragraph (a) of this section.

§ 2700.440 Administrative reports and examinations.

The Secretary may at any time call for a report from any servicer on the delinquency status of the loans serviced by the servicer on behalf of the Secretary or call for such reports as may be deemed to be necessary in connection with the provisions of this chapter, or the Secretary may inspect the books or accounts of the servicer as they pertain to those loans.

WARNING

Section 1001 of the U. S. Criminal Code (18 U. S. C.) provides in part: . . . "*Whoever, in any matter within the jurisdiction of any department . . . of the United States knowingly and willfully . . . makes any false . . . or fraudulent statements or representations . . . shall be fined not more than $10,000 or imprisoned not more than 5 years, or both.*"

HOMEOWNER'S CERTIFICATION

The undersigned homeowner certifies that to the best of his knowledge all statements in this application and in all supporting documents are true, correct and complete. Furthermore, the homeowner certifies that to the best of his knowledge circumstances make it probable that there will be a foreclosure without an emergency loan pursuant to 24 CFR, Chapter XV and that he is in need of emergency mortgage relief. The undersigned homeowner also certifies that he is financially unable to make full mortgage payments because of a substantial reduction in income resulting from involuntary unemployment or underemployment due to adverse economic conditions.

Signature of Homeowner

Date:

LENDING INSTITUTION'S CERTIFICATION

The undersigned lending institution certifies that to the best of its knowledge all statements in this application and in all supporting documents are true, correct and complete. Furthermore, the undersigned lending institution certifies that to the best of its knowledge the above homeowner is fully qualified for an emergency loan under Chapter XV, 24 CFR, and that the homeowner has a reasonable prospect of being able to make the adjustments necessary for a full resumption of his mortgage payments. The undersigned lending institution also certifies that it has determined on _____ *(date) THAT if the emergency loan were not granted, the investor would foreclose.*

Deletion

Elsewhere in the FEDERAL REGISTER today the Consumer Product Safety Commission has published a notice transferring all sections of 16 CFR Part 302 to Subchapter D of 16 CFR Chapter II. Therefore, Part 302 of Title 16 is deleted.

Dated: December 22, 1975.

SADYE E. DUNN,
Secretary Consumer Product Safety Commission.

[FR Doc.75-34877 Filed 12-24-75;8:45 am]

SUBCHAPTER D—FLAMMABLE FABRICS ACT REGULATIONS

CODIFICATION AND TRANSFER OF REGULATIONS

In this document the Consumer Product Safety Commission codifies flammability standards, policy statements, and interpretations under the Flammable Fabrics Act and transfers rules and regulations under that act from Title 16, Code of Federal Regulations, Part 302 to Title 16, Code of Federal Regulations, Chapter II, Subchapter D.

On May 14, 1973 functions under the Flammable Fabrics Act (15 U.S.C. 1191–1204) were transferred to the Consumer Product Safety Commission pursuant to section 30 of the Consumer Product Safety Act (15 U.S.C. 2079). Previously the Department of Commerce, the Federal Trade Commission, and the Department of Health, Education, and Welfare had responsibilities under the Flammable Fabrics Act.

Under section 30(e) of the Consumer Product Safety Act all determinations, rules, and regulations in effect at the time of transfer of functions to the Consumer Product Safety Commission continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Consumer Product Safety Commission, by any court of competent jurisdiction, or by operation of law.

Therefore, the items codified and transferred in this notice include documents issued by the agencies that previously exercised functions under the act as well as documents issued by the Consumer Product Safety Commission. Various non-substantive corrections and editorial changes, including numbering changes, have been made in the process of this transfer and codification. However, the Consumer Product Safety Commission has made no substantive change in any of the documents that are codified or transferred in this notice.

DESCRIPTION OF DOCUMENT

Part 1602, Statements of Policy or Interpretation, contains a general enforcement policy statement (§ 1602.1), published by the CPSC on September 11, 1973 (38 FR 24923) and a policy on the exportation of non-complying goods (§ 1602.2) that was published by the Commission on December 5, 1975 (40 FR 56885).

Part 1603, which was entitled "Statements of Policy or Interpretation" is deleted. The clarification of the Standard for the Flammability of Clothing Textiles (CS 191–53) which appeared in 16 CFR 1603.1 has been transferred to Subpart C of Part 1610.

Part 1607, Procedures for the Development of Flammability Standards, is reprinted in this document for convenience, since it currently appears at Part 1607.

Part 1608 contains general rules and regulations under the Act, that were originally issued by the Federal Trade Commission and published at 16 CFR 302.1, and 302.9 through 302.13. These rules and regulations apply to all standards in effect under the Flammable Fabrics Act. The CPSC has made minor editorial revisions in these regulations in transferring them.

Other rules and regulations previously found at 16 CFR Part 302 have been transferred to the applicable Parts in Chapter II, Subchapter D, as described below.

Part 1609 is a reprint of the Flammable Fabrics Act of 1953, as amended in 1954 (Ch. 164, 67 Stat. 111, as amended, Ch. 833, 68 Stat. 770 (1954)). The Act was later amended and revised on December 14, 1967. However, the amendment contained a savings clause (Sec. 11, Pub. L. 90–189, 81 Stat. 568) that provided that the two flammability standards in effect under the Flammable Fabrics Act of 1953 as amended in 1954 were to continue in effect. These two flammability standards are Commercial Standard 191–53, Flammability of Clothing Textiles and Commercial Standard 192–53, General Purpose Vinyl Plastic Film. The two standards are printed at Parts 1610 and 1611 of this document.

In Subpart A of Part 1610, the CPSC codifies the Standard for the Flammability of Clothing Textiles (CS 191–53) which has not before been published in the Code of Federal Regulations. Into Subpart B, the CPSC has transferred 16 CFR 302.1–8 and 302.14, rules and regulations applicable to this Standard. In Subpart C, the CPSC transfers the clarification of the Standard, which was previously found at 16 CFR 1603.1.

Part 1611 contains the Standard for the Flammability of Vinyl Plastic Film (CS 192–53) which has not before been published in the Code of Federal Regulations. Subpart B of this Part contains rules and regulations applicable to this Standard, which were previously found at 16 CFR 302.1–8 and 302.14.

The Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (FF 3–71) and the rules, regulations, policies, and interpretations under the Standard are found at Part 1615. The rules and regulations, printed in Subpart B, were previously found at 16 CFR Part 302.19. Subpart C includes interpretations and policies under the standard.

Part 1616 contains, in subpart A, the Standard for the Flammability of Children's Sleepwear: Sizes 7 through 14, as amended (FF 5–74). Subpart B includes rules and regulations under the Standard that were previously published at 16 CFR 302.21. Subpart C includes interpretations and policies under the standard.

The Standard for the Surface Flammability of Carpets and Rugs (FF 1–70) is published at Subpart A of Part 1630. Subpart B includes rules and regulations under the Standard that were previously published at 16 CFR 302.15, and 302.17. Subpart C includes alternative washing procedures under the Standard approved by the Federal Trade Commission for hide rugs and wool flokati rugs. Section 1630.63 provides for the suspension of washing requirements for carpets and rugs with alumina trihydrate in the backing.

Part 1631 contains at Subpart A, the Standard for the Surface Flammability of Small Carpet and Rugs (FF 2–70). Subpart B includes rules and regulations under the Standard previously codified at 16 CFR 302.15 through 302.18. Subpart C contains alternative washing procedures under the Standard for hide rugs and wool flokati rugs.

The Standard for the Flammability of Mattresses (and Mattress Pads) (FF 4–72) is codified at Subpart A of Part 1632. Five alternate sampling plans under the standard are published in Subpart B. Rules and regulations under the standard which were previously published at 16 CFR 302.20 are published in Subpart C of Part 1632. Interpretations and policies under the Standard are published in Subpart D. Since no new requirements are added by this revision and transfer, notice and public procedure are not prerequisite to this issuance.

Therefore, in 16 CFR Chapter II, Subchapter D is revised as follows:

Part
1602 Statements of Policy or Interpretation.
1607 Procedures for the Development of Flammability Standards.
1608 General Rules and Regulations under the Flammable Fabrics Act.
1609 Text of the Flammable Fabrics Act of 1953, as Amended in 1954, Prior to 1967 Amendment and Revision.
1610 Standard for the Flammability of Clothing Textiles.
1611 Standard for the Flammability of Vinyl Plastic Film.
1615 Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (FF 3–71).
1616 Standard for the Flammability of Children's Sleepwear: Sizes 7 through 14 (FF 5–74).
1630 Standard for the Surface Flammability of Carpets and Rugs (FF 1–70).
1631 Standard for the Surface Flammability of Small Carpets and Rugs (FF 2–70).
1632 Standard for the Flammability of Mattresses (and Mattress Pads) (FF 4–72).

PART 1602—STATEMENTS OF POLICY OR INTERPRETATION

Sec.
1602.1 Enforcement policy.
1602.2 Policy on exportation of non-complying goods.

§ 1602.1 Enforcement policy.

(a) On May 14, 1973, the responsibilities of the Federal Trade Commission for enforcement of the Flammable Fabrics Act, as amended (15 U.S.C. 1191–1204), were transferred to the Consumer Product Safety Commission pursuant to section 30(b) of the Consumer Product Safety Act (Pub. L. 92–573), 86 Stat. 1231 (15 U.S.C. 2079(b)).

(b) The Consumer Product Safety Commission intends to discharge its responsibilities under the Flammable Fabrics Act vigorously, expeditiously, and without compromise in order to protect the public from the hazards to life, health, and property caused by dangerously flammable products.

(c) The Consumer Product Safety Commission has determined that its enforcement policy for the Flammable Fabrics Act, will be to have available for use in each case the full range of enforcement procedures under that act without qualification or modification. Accordingly, notice is given that the Consumer Product Safety Commission hereby institutes an enforcement policy of using in each case arising under the Flammable Fabrics Act any and all appropriate enforcement procedures available under that act.

(d) In order to effectuate this policy, the above stated policy has been adopted and substituted for any conflicting determinations and policies of the Federal Trade Commission. The following determinations and policies of the Federal Trade Commission insofar as they apply to this Commission are terminated and set aside pursuant to section 30(e)(2) of the Consumer Product Safety Act (86 Stat. 1232 (15 U.S.C. 2079(e)(2))):

(1) The Federal Trade Commission's "Flammable Fabrics Enforcement Policy" published as a notice in the FEDERAL REGISTER of November 10, 1971 (36 FR 21544), as amended by a notice published April 25, 1973 (38 FR 10184), which was corrected May 8, 1973 (38 FR 11492).

(2) Any Federal Trade Commission policy or directive modifying or interpreting said Enforcement Policy, as amended.

(e) All other rules, regulations, orders, and determinations of the Federal Trade Commission under the Flammable Fabrics Act will continue in effect until modified, terminated, superseded, set aside, or repealed by the Consumer Product Safety Commission, by any court of competent jurisdiction, or by operation of law.

(Sec. 1, et seq., 81 Stat. 568–74 (15 U.S.C. 1191–1204, note under 1191))

EFFECTIVE DATE: This section became effective September 11, 1973. It was originally published as a notice on that date at 38 FR 24923.

§ 1602.2 Policy on exportation of non-complying goods.

(a) On May 14, 1973, the responsibilities of the Federal Trade Commission for enforcement of the Flammable Fabrics Act were transferred to the Consumer Product Safety Commission by section 30(b) of the Consumer Product Safety Act (15 U.S.C. 2079(b)). Since the transfer of the administration of the Flammable Fabrics Act, questions have arisen as to when goods that do not comply with the act and with regulations promulgated thereunder may be exported from the United States. The Commission has therefore decided to articulate its policy as set forth in this section concerning the export of such products in order to eliminate unnecessary uncertainty from market decisions, from administrative proceedings and from other enforcement actions this Commission is taking and will take to implement the act and regulations and standards thereunder.

(b) *Definitions.* As used in this section:

(1) "act" means the Flammable Fabrics Act, as amended and revised (81 Stat. 568, 15 U.S.C. 1191–1204).

(2) "Export" or "exportation" means to carry or send goods out of the United States, Puerto Rico, or any territory or possession of the United States to any foreign nation.

(3) "Import" or "importation" means to carry or bring goods into the United States, Puerto Rico, or any territory or possession of the United States from any foreign nation. For the purposes of this section, goods are considered to have been imported into the United States when they have entered into the United States; that is, when they have moved from Customs custody into the customs territory of the United States.

(4) "Marketing or handling" of goods subject to the act means all actions described in section 3 of the act (15 U.S.C. 1192); that is, the manufacture for sale, sale, offering for sale, in commerce, or importation into the United States, or introduction, delivery for introduction, transportation or causing to be transported, in commerce, or sale or delivery after sale or shipment in commerce of any product, fabric, or related material subject to the act or the manufacture for sale, sale, or offering for sale of any product made of fabric or related material subject to the act and which has been shipped or received in commerce.

(c)(1) Section (3)(a) of the Flammable Fabrics Act (15 U.S.C. 1192) prohibits, among other things, the manufacture for sale, the sale, or offering for sale in commerce or the importation into the United States of any product, fabric, or related material which fails to conform to an applicable standard or regulation issued under the act. Section 3(b) of the act prohibits the manufacture for sale, the sale, or the offering for sale, of any product made of fabric or related material which fails to conform to an applicable standard or regulation issued under the act and which has been shipped or received in commerce.

(2) Section 15(a) of the act (15 U.S.C. 1202) states that the act "does not apply to any fabric, related material, or product which is to be exported from the United States, if such fabric, related material, or product and any container in which it is enclosed bears a stamp or label stating that such fabric, related material, or product is intended for export and such fabric, related material, or product is in fact exported from the United States," with the exception that the act does apply to goods intended to be marketed to any installation of the United States located outside the United States.

(3) Section 15(b) of the act excludes from coverage "any fabric, related material, or product which is imported into the United States for dyeing, finishing, other processing, or storage in bond, and export from the United States," if certain requirements are met, with the exception that the act does apply to any such imported goods manufactured for sale, offered for sale, or intended for shipment to any installation of the United States located outside of the United States.

(d) The Federal Trade Commission did not consider the exemptions found in section 15 to apply to nonconforming goods which were intended for domestic distribution at the time of manufacture or original importation and which were not intended for exportation from the United States at the time they were manufactured or imported into the United States. The enforcement staff of the Consumer Product Safety Commission has been consistently following this policy.

(e) The Consumer Product Safety Commission now affirms the basic policy adopted by the FTC and by this § 1602.2 explicitly interprets section 15 of the act as exempting non-conforming goods for exportation only when the manufacturer or importer intends at the time of original manufacture or importation that such goods are to be exported from the United States, to other than an installation of the United States located outside the United States, and manifests that intent by marketing such goods for export and proceeds to export them. Therefore the exportation exemption found in section 15 cannot be claimed once any nonconforming product, fabric or related material or product made of nonconforming fabric or related material has originally been imported or marketed or handled domestically or shipped to a U.S. installation without bearing the required exportation label.

(f) The Flammable Fabrics Act has the dual objectives of discouraging the introduction of flammable goods into commerce and removing from the domestic marketplace flammable goods which have entered commerce. The act must be interpreted in such a way as to preserve its total deterrent value as well as the integrity of the authorities given to the Commission by Congress to eliminate the risk of injury to the public.

(g) If the act were interpreted as to permit a person subject to the act, who marketed or handled violative goods for domestic use, upon discovery of the violation, to export the nonconforming goods, the deterrent value of the act's prohibitions would be seriously reduced. The incentive the act gives a person to avoid the initial introduction of nonconforming goods into domestic channels of commerce would be reduced. Moreover

V 40 250 DEC 30 75 XUM

such an interpretation would leave the public exposed to a continued risk of injury or property damage from products that did not comply with flammability standards. Such an interpretation would conflict with the Congressional intent to discourage the introduction of nonconforming goods into commerce and is not supported by any language in the act. It must therefore be rejected by this Commission in favor of an interpretation that precludes exportation of any noncomplying goods that were not intended for export at the time of original manufacture or importation, or which entered domestic commerce without the manifest intent of being exported (Section 15 of the Flammable Fabrics Act mandates a labeling requirement if the item was originally intended for export).

(h) In any enforcement action taken by this Commission, the person who markets or handles nonconforming goods shall not be allowed to export domestically made goods unless the intent to export them was previously manifested at the time of manufacture nor shall a person be allowed to export foreign made noncomplying goods which were imported into the United States, unless the intent to export them was previously manifested at the time of the original importation. The Commission may in certain instances allow persons subject to the act the opportunity to re-work the violative goods in order to bring them into conformity with the law and in such instances, as to imported goods, the importer may elect to return the goods to the foreign manufacturer to be reworked to bring them into conformity with the law. Otherwise, nonconforming goods shall be destroyed.

(Secs. 3, 5, 67 Stat. 111–112, 115, as amended 81 Stat. 568–569, 574; 15 U.S.C. 1192, 1202.)

PART 1607—PROCEDURES FOR THE DEVELOPMENT OF FLAMMABILITY STANDARDS

Sec.

1607.1 Purpose.
1607.2 Definitions.
1607.3 Transfer of functions.
1607.4 Records of proceedings.

1607.7 Proceedings for development of a proposed flammability standard.
1607.8 Publication of proposed flammability standard.
1607.9 Participation of interested persons in rulemaking proceedings.
1607.10 Informal public oral hearings.
1607.11 Adoption of a final flammability standard.
1607.12 Effective date.
1607.13 Exemption of items in inventory.
1607.14 Petitions for rulemaking.

AUTHORITY: Secs. 1–17, 67 Stat. 111–115, as amended 81 Stat. 568–574; 15 U.S.C. 1191–1204.

§ 1607.1 Purpose.

The purpose of this Part 1607 is to prescribe procedures relating to the discharge of the responsibilities of the Consumer Product Safety Commission under section 4 of the Flammable Fabrics Act (15 U.S.C. 1193). See § 1607.2(a) for information identifying the act.

§ 1607.2 Definitions.

As used in this Part 1607—

(a) "act" means the Flammable Fabrics Act (15 U.S.C. 1191–1204) enacted June 30, 1953 (Pub. L. 83–88; 67 Stat. 111–115), amended August 23, 1954 (Pub. L. 83–629; 68 Stat. 770), and amended and revised December 14, 1967 (Pub. L. 90–189; 81 Stat. 568–574).

(b) "Commission" means the Consumer Product Safety Commission established by the Consumer Product Safety Act (Pub. L. 92–573, sec. 4, 86 Stat. 1210; 15 U.S.C. 2053).

(c) "Article of wearing apparel" means any costume or article of clothing worn or intended to be worn by individuals.

(d) "Interior furnishing" means any type of furnishing made in whole or in part of fabric or related material and intended for use, or which may reasonably be expected to be used, in homes, offices, or other places of assembly or accomodation.

(e) "Fabric" means any material (except fiber, filament, or yarn for other than retail sale) woven, knitted, felted, or otherwise produced from or in combination with any natural or synthetic fiber, film, or substitute therefor which is intended for use, or which may reasonably be expected to be used, in any product as defined in paragraph (g) of this section.

(f) "Related material" means paper, plastic, rubber, synthetic film, or synthetic foam that is intended for use, or that may reasonably be expected to be used, in any product as defined in paragraph (g) of this section.

(g) "Product" means any article of wearing apparel or interior furnishing.

(h) "Person" means an individual, partnership, corporation, association, or any other form of public or business organization.

(i) "Flammability standard" means any standard (including conditions and manner of testing) or other regulation, including any labeling regulation, or any revision or amendment thereto, relating to the flammability of a fabric, related material, or product.

(j) "Written comments" means legible comments, data, arguments, views, or other information, submitted in writing (preferably in five copies) by interested persons for the public record.

§ 1607.3 Transfer of functions.

Effective May 14, 1973, section 30(b) of the Consumer Product Safety Act (Pub. L. 92–573, 86 Stat. 1231; 15 U.S.C. 2079(b)) transferred functions under the Flammable Fabrics Act from the Federal Trade Commission and the Departments of Commerce and Health, Education, and Welfare to the Consumer Product Safety Commission.

§ 1607.4 Records of proceedings.

Records of the Commission relating to rulemaking proceedings, available for public inspection and copying in accordance with 5 U.S.C. 552 or other applicable laws or regulations, may be obtained at the Office of the Secretary, Consumer Product Safety Commission, 10th floor, 1750 K Street NW., Washington, D.C. 20207. Interested persons may obtain copies upon payment of the prescribed fees.

§ 1607.5 Authority of the Commission to obtain testimony or records by regulation or subpoena.

(a) Section 4(c) of the act authorizes the Commission to obtain from any person by regulation, or subpoena issued pursuant thereto, such information in the form of testimony, books, records, or other writings as is pertinent to any findings or determinations that the Commission is required or authorized to make under the act.

(b) All information reported to or otherwise obtained by the Commission pursuant to section 4(c) of the act that contains or relates to a trade secret or other matter referred to in 18 U.S.C. 1905 shall be considered confidential for the purposes of 18 U.S.C. 1905 and withheld from the public record. Such information, however, may be disclosed to other officers or employees concerned with carrying out the provisions of the act or disclosed when relevant to any proceeding under the act. Any information submitted to the Commission that contains or relates to a trade secret or other matter referred to in 18 U.S.C. 1905 should be so identified clearly and should set forth adequate justification for its inclusion in this category. All such information should be submitted separately from comments for the public record.

§ 1607.6 Advance notice of finding that a flammability standard may be needed.

Whenever the Commission finds on the basis of investigations or research conducted under the authority of section 14 of the act that a flammability standard for a fabric, related material, or product may be needed to protect the public against unreasonable risk of the occurrence of fire leading to death or personal injury, or significant property damage, the Commission shall publish a notice in the FEDERAL REGISTER declaring that such standard may be needed and stating concisely the basis therefor.

§ 1607.7 Proceedings for development of a proposed flammability standard.

(a) Whenever a notice is published under § 1607.6, the Commission shall also publish simultaneously a notice in the FEDERAL REGISTER instituting proceedings for the development of an appropriate flammability standard and inviting interested persons to submit written comments to the Commission relative to:

(1) The finding published under § 1607.6 that a flammability standard may be needed; and

(2) The terms or substance of a flammability standard that might be adopted in the event that a final finding is made by the Commission that such a flammability standard is needed.

(b) Written comments shall be postmarked or delivered within 30 days after

publication of a notice under this section, unless specified otherwise. All materials considered relevant to any statement of fact or argument should be submitted with such written comments.

(c) To obtain additional information for the development of a proposed flammability standard and to protect the public interest, the Commission may invite the views of local, State, and Federal agencies and other interested persons and may provide interested persons an opportunity for oral presentation, as provided in 5 U.S.C. 553(c), which may include an informal oral hearing.

§ 1607.8 Publication of proposed flammability standard.

(a) As soon as practicable following the conclusion of the initial proceedings under § 1607.7, the Commission shall publish in the FEDERAL REGISTER:

(1) A notice withdrawing its finding that a new or amended flammability standard may be needed (in no event, however, shall the withdrawal preclude the conduct of further investigation or research under section 14 of the act or preclude the initiation of another proceeding regarding the same or similar subject matter under the procedures in this part); or

(2) A notice proposing a flammability standard.

(b) The notice of a proposed flammability standard under paragraph (a)(2) of this section shall include:

(1) The provisions of such proposed flammability standard, stated in objective terms; and

(2) The preliminary findings of the Commission, together with a concise statement of the basis therefor, that such a flammability standard:

(i) Is needed to adequately protect the public against unreasonable risk of the occurrence of fire leading to death, injury, or significant property damage;

(ii) Is reasonable, technologically practicable, and appropriate; and

(iii) Is limited to fabrics, related materials, or products that have been determined to present such unreasonable risks.

§ 1607.9 Participation of interested persons in rulemaking proceedings.

(a) Within 30 days (unless specified otherwise) after publication of a notice under § 1607.8 proposing a flammability standard in the FEDERAL REGISTER, interested persons may participate in the rulemaking proceedings in accordance with 5 U.S.C. 553 by submitting written comments relevant to the proposed flammability standard.

(b) The Commission may solicit comments from local, State, and Federal agencies and other interested persons and may give interested persons an opportunity for oral presentation, as provided in 5 U.S.C. 553, to assure development of an appropriate standard and to protect the public interest.

§ 1607.10 Informal public oral hearings.

(a) At its discretion, the Commission may include in the notice of a proposed flammability standard, published in the FEDERAL REGISTER under § 1607.8, an invitation to interested persons to participate in an informal oral hearing under 5 U.S.C. 553. If the published notice does not provide for such hearing, any interested person may request in writing, within 15 days after publication of such notice, an informal oral hearing under 5 U.S.C. 553. Upon receipt by the Commission of such a request, the Commission shall grant the request and publish in the FEDERAL REGISTER a notice of an informal public oral hearing at least twenty (20) days in advance of the hearing.

(b) Sections 556 and 557 of 5 U.S.C. do not apply to hearings held under this section. Unless specified otherwise, such hearings shall be informal, nonadversary proceedings (no formal pleadings or adverse parties). A stenographic transcript of such hearings and any exhibits submitted thereat shall be made a part of the public record.

(c) A hearing held under this section shall be conducted by a presiding officer designated by the Commission and empowered to establish reasonable procedures governing conduct of the hearing.

§ 1607.11 Adoption of a final flammability standard.

(a) The Commission shall consider all oral and written comments and other materials received in accordance with any proceedings under this Part 1607. Comments filed after expiration of the designated time periods may be considered insofar as practicable.

(b) As soon as practicable after considering the comments and other material under paragraph (a) of this section and after consulting with the National Advisory Committee for the Flammable Fabrics Act, the Commission shall publish in the FEDERAL REGISTER either:

(1) A document promulgating a flammability standard, stated in objective terms, and presenting the Commission's findings with respect to the requirements of section 4(b) of the act with a concise statement of the basis for such findings; or

(2) A notice terminating, suspending, or amending the instant proceedings for the adoption of the flammability standard concerned.

(c) In no event shall notice of the termination or suspension of proceedings under this section operate to preclude the conduct of further investigation or research under section 14 of the act or to preclude the initiation of another proceeding regarding the same or similar subject matter under these procedures.

§ 1607.12 Effective date.

Each flammability standard promulgated under this Part 1607 shall become effective 12 months after publication in the FEDERAL REGISTER, unless the Commission finds for good cause shown that an earlier or later effective date is in the public interest. Any such finding by the Commission will be published in the FEDERAL REGISTER with a concise statement of the basis for such finding.

§ 1607.13 Exemption for items in inventory.

Each flammability standard promulgated in accordance with this Part 1607 shall exempt fabrics, related materials, or products in inventory or with the trade as of the date that such standard becomes effective. If the Commission finds, however, that any such fabric, related material, or product is so highly flammable as to be dangerous when used by consumers for the purposes for which intended, the Commission may, under such conditions as it prescribes, withdraw or limit the exemption for such fabric, related material, or product. Any such finding by the Commission will be published in the FEDERAL REGISTER with a concise statement of the facts upon which the finding is based.

§ 1607.14 Petition for rulemaking.

(a) Any interested person may petition the Commission to issue, amend, or revoke a flammability standard or the procedural rules established in this Part 1607.

(b) Each petition filed under this section shall:

(1) Be submitted, preferably in five copies, to the Consumer Product Safety Commission, Office of the Secretary, 1750 K Street NW., Washington, D.C. 20207.

(2) Set forth the text or substance of the proposed flammability standard or procedural rule, or proposed amendment thereto, or specify the flammability standard or procedural rule the petitioner seeks to have revoked, as the case may be;

(3) Explain the interest of the petitioner in the action requested; and

(4) Contain any information and arguments available to the petitioner in support of the action sought.

(c) Unless the Commission specifies otherwise, no public hearing, argument, or other proceeding shall be held on a petition before its disposition. If the Commission determines that a petition does not justify rulemaking, it shall deny the petition. If the Commission determines that a petition contains adequate justification, it shall take appropriate action in accordance with the provisions of the act including, where necessary, the institution of proceedings to consider the issuance, amendment, or repeal of the flammability standard or procedural rule concerned.

(d) The Commission shall notify each petitioner, in writing, of the action taken on his petition.

(e) The filing of a petition under this section does not of itself stay the effective date of any flammability standard or procedural rule concerned.

PART 1608—GENERAL RULES AND REGULATIONS UNDER THE FLAMMABLE FABRICS ACT

Sec.

1608.0 Scope.
1608.1 Terms defined.
1608.2 Form of separate guaranty.
1608.3 Continuing guaranties.
1608.4 Guaranties furnished by non-residents of the U.S. no bar to prosecution.

under section 8 of the act to a buyer

On this ____ day of _____, 19____,

SHORT TITLE

V40250 DEC 30 75 V XUM

Sec.
1608.5 Salvage operations of common carriers and others.
1608.6 Reference to guaranty by Government prohibited.

AUTHORITY: Sec. 5, 67 Stat. 112, as amended, 81 Stat. 570, 15 U.S.C. 1194, unless otherwise noted.

§ 1608.0 Scope.

The rules and regulations in this Part are applicable to all standards issued under the Flammable Fabrics Act.

§ 1608.1 Terms defined.

As used in the rules and regulations in this Subchapter D, unless the context otherwise specifically requires:

(a) The term "act" means the Flammable Fabrics Act, sec. 1 et seq., 67 Stat. 111–115, as amended, 68 Stat. 770, 81 Stat. 568–74 (15 U.S.C. 1191–1204, note under 1191).

(b) The terms "rule", "rules", "regulations", and "rules and regulations", mean the rules and regulations prescribed by the Commission pursuant to section 5(c) of the act.

(c) The term "United States" means, the several States, the District of Columbia, the Commonwealth of Puerto Rico and the Territories and Possessions of the United States.

(d) The terms "marketing or handling" means the transactions referred to in section 3 of the act.

(e) The definition of terms contained in section 2 of the act shall be applicable also to such terms when used in rules promulgated under the act.

§ 1608.2 Form of separate guaranty.

The forms which follow are suggested forms of separate guaranties under section 8 of the act for use by guarantors residing in the United States. Representations contained in these suggested forms of separate guaranties with respect to reasonable and representative tests may be based upon a guaranty received and relied upon in good faith by the guarantor, tests performed by or for a guarantor, or class tests, where permitted under these rules. Where the forms are used as part of an invoice or other paper relating to the marketing or handling of products, fabrics, or related materials subject to the act, wording may be varied to limit the guaranty to specific items in such invoice or other paper. The name, address of the guarantor, and date on the invoice or other paper will suffice to meet the signature, address, and date requirements indicated on the forms.

(a) *General form.*

The undersigned hereby guarantees that reasonable and representative tests, made in accordance with procedures prescribed and applicable standards or regulations issued, amended, or continued in effect under the Flammable Fabrics Act, as amended, show that the product, fabric, or related material covered and identified by, and in the form delivered under this document conforms to the applicable standard or regulation issued, amended, or continued in effect.

Date: _____ _____

_____
Address

(b) *Form for guaranty based on guaranty.*

Based upon a guaranty received, the undersigned hereby guarantees that reasonable and representative tests, made in accordance with procedures prescribed pursuant to the Flammable Fabrics Act, as amended, show that the product, fabric, or related material covered and identified by, and in the form delivered under this document conforms to the applicable standard or regulation issued, amended, or continued in effect.

Date: _____ _____
Name
_____
Address

(Sec. 5 of the Act, 67 Stat. 112, as amended by 81 Stat. 570, 15 U.S.C. sec. 1194; sec. 8 of the Act, 67 Stat. 114, as amended by 81 Stat. 572, 15 U.S.C. sec. 1197)

§ 1608.3 Continuing guaranties.

(a) Any person residing in the United States may file with the Bureau of Compliance of the Consumer Product Safety Commission a continuing guaranty under section 8 of the act applicable to any product, fabric, or related material marketed or handled by such person. When filed with the Commission, a continuing guaranty shall be fully executed in duplicate and execution of each copy shall be acknowledged before a notary public. Forms for use in preparing continuing guaranties to be filed with the Commission will be supplied by the Bureau of Compliance of the Commission upon request. To remain in effect, such guaranties must be renewed every 3 years and at such other times as any change occurs in the legal business status of the person filing the guaranty. It is therefore required that any person who has filed a continuing guaranty with the Commission shall promptly advise the Commission in writing of any change in the legal status of the guarantor or in the address of the guarantor's principal office and place of business. Representations contained in the prescribed form of continuing guaranty with respect to reasonable and representative tests may be based upon (1) a guaranty received and relied upon in good faith by the guarantor, (2) tests performed by or for a guarantor, or (3) class tests, where permitted under these rules.

(b) The following is the prescribed form of continuing guaranty for filing with the Commission:

CONTINUING GUARANTY UNDER THE FLAMMABLE FABRICS ACT FOR FILING WITH CONSUMER PRODUCT SAFETY COMMISSION

The undersigned, _____, a _____ residing in the
(Corporation, partnership, proprietorship)
United States and having principal office and place of business at _____
(Street and number)
_____, _____,
(City) (State or territory, ZIP code)
and being engaged in the marketing or handling of products, fabrics, or related materials subject to the Flammable Fabrics Act, as amended, and regulations thereunder,

Hereby guarantee(s) that with regard to all the products, fabrics, or related materials [described as follows: _____
_____
_____]
(If guaranty is limited to certain products, fabrics, or related materials, list the general categories here. If guaranty is not so limited, leave these lines blank.)

hereafter marketed or handled by the undersigned, and for which flammability standards have been issued, amended, or continued in effect under the Flammable Fabrics Act, as amended, reasonable and representative tests as prescribed by the Consumer Product Safety Commission have been performed, which shows that the products, fabrics, or related materials conform to such of the above-mentioned flammability standards as are applicable thereto.

Dated, signed, and executed this __ day of _____, 19__, at _____,
(City)
_____
(State or Territory)

(Impression of corporate seal, if corporation.) _____ (Name under which business is conducted.)
(If firm is a partnership list partners below.) _____ (Signature of proprietor, partner, or authorized official of corporation.)
_____
_____

State of _____ } ss
County of _____ }

On this __ day of _____, 19__, before me personally appeared the said _____,
(Signer of guaranty)
proprietor, partner (strike nonapplicable words) _____
(If corporation, give title of signing official)
of _____, to me personally known, and
(Firm name)
acknowledged the execution of the foregoing instrument on behalf of the firm, for the uses and purposes therein stated.

(Impression of notary seal required here.) _____
Notary Public in and for
County of _____
State of _____
My commission expires _____

(c) Any person who has a continuing guaranty on file with the Commission may, during the effective period of the guaranty, give notice of such fact by setting forth on the invoice or other paper covering the marketing or handling of the product, fabric, or related material guaranteed the following:

Continuing guaranty under the Flammable Fabrics Act filed with the Consumer Product Safety Commission.

Provided, however, That such statement may not be used where the guaranty is limited and the invoice or other paper covers any product, fabric, or related material, subject to a flammability standard under the act, which is not covered by the guaranty because of its limited nature.

(d) Any person who falsely represents that he has a continuing guaranty on file with the Commission when such is not a fact, or who falsely represents that a limited continuing guaranty he does have on file with the Commission covers any product, fabric, or related material when such is not the case, shall be deemed to have furnished a false guaranty under section 8(b) of the act.

(e) Any seller residing in the United States may give a continuing guaranty

under section 8 of the act to a buyer applicable to any product, fabric, or related material sold or to be sold to said buyer by seller. All such continuing guaranties shall be fully executed in duplicate and execution of each copy shall be acknowledged before a notary public. To remain in effect, such guaranties must be renewed every 3 years and at such other times as any change occurs in the legal business status of the person giving the guaranty. Representations contained in the prescribed form of continuing guaranty from seller to buyer with respect to reasonable and representative tests may be based upon (1) a guaranty received and relied upon in good faith by the guarantor, (2) tests performed by or for a guarantor, or (3) class tests, where permitted under these rules.

(f) The following is the prescribed form of continuing guaranty from seller to buyer:

CONTINUING GUARANTY FROM SELLER TO BUYER UNDER THE FLAMMABLE FABRICS ACT

The undersigned, _____,
a _____
(Corporation, partnership, proprietorship) residing in the United States and having its principal office and place of business at _____
(Street and number)
_____,
(City) (State or Territory and ZIP code) and being engaged in the marketing or handling of products, fabrics, or related materials subject to the Flammable Fabrics Act, as amended, and Regulations thereunder,

Hereby guarantee(s) to _____,
(Name and address)
buyer, that with regard to all the products, fabrics, or related materials [described as follows: _____
_____
(If guaranty is limited to certain products, fabrics, or related materials, list the general categories here. If guaranty is not so limited, leave these lines blank.)

sold or to be sold to buyer by the undersigned, and for which flammability standards have been issued, amended, or continued in effect under the Flammable Fabrics Act, as amended, reasonable and representative tests as prescribed by the Consumer Product Safety Commission have been performed which show that the products, fabrics, or related materials, at the time of their shipment or delivery by the undersigned, conform to such of the above-mentioned flammability standards as are applicable thereto.

Dated, signed, and executed this _____ day of _____, 19____, at _____
(City)
_____
(State or Territory)

(Impression of corporate seal, if corporation.) _____ (Name under which business is conducted.)

My commission expires _____

(Sec. 5 of the Act, 67 Stat. 112, as amended by 81 Stat. 570, 15 U.S.C. sec. 1194: section 8 of the Act, 67 Stat. 114, as amended by 81 Stat. 572, 15 U.S.C. sec. 1197)

§ 1608.4 Guaranties furnished by nonresidents of the U.S. no bar to prosecution.

A guaranty furnished under section 8 of the act by a person who is not a resident of the United States may not be relied upon as a bar to prosecution under section 7 of the act for a violation of section 3 of the act.

§ 1608.5 Salvage operations of common carriers and others.

For the purposes of this act the ordinary course of business of common carriers, contract carriers or freight forwarders, as referred to in section 11 of the act, shall not include the marketing or handling of products, fabrics, or related materials subject to the act in the course of performance of salvage or lien realizing operations.

§ 1608.6 Reference to guaranty by Government prohibited.

No representation nor suggestion shall be made in advertising or otherwise marketing or handling products, fabrics or related materials subject to the act that the act, the Government, or any branch thereof, guarantees, in any manner that such product, fabric, or related material conforms to a flammability standard in effect under the act.

PART 1609—TEXT OF THE FLAMMABLE FABRICS ACT OF 1953, AS AMENDED IN 1954, PRIOR TO 1967 AMENDMENT AND REVISION

§ 1609.1 Text of the Flammable Fabrics Act of 1953, as amended in 1954.

The following is the text of the Flammable Fabrics Act of 1953, ch. 164, 67 Stat. 111, as amended, ch. 833, 68 Stat. 770 (1954):

AN ACT

To prohibit the introduction or movement in interstate commerce of articles of wearing apparel and fabrics which are so highly flammable as to be dangerous when worn by individuals, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Flammable Fabrics Act."

DEFINITIONS

SEC. 2. As used in this Act—

(a) The term "person" means an individual, partnership, corporation, association, or any other form of business enterprise.

(b) The term "commerce" means commerce among the several States or with foreign nations, or in any Territory of the United States or in the District of Columbia, or between any such Territory and another, or between any such Territory and any State or foreign nation, or between the District of Columbia and any State or Territory or foreign nation.

(c) The term "Territory" includes the insular possessions of the United States and also any Territory of the United States.

(d) The term "article of wearing apparel" means any costume or article of clothing worn or intended to be worn by individuals except hats, gloves, and footwear: Provided, however, That such hats do not constitute or form part of a covering for the neck, face, or shoulders when worn by individuals: Provided further, That such gloves are not more than fourteen inches in length and are not affixed to or do not form an integral part of another garment: And provided further, That such footwear does not consist of hosiery in whole or in part and is not affixed to or does not form an integral part of another garment.

(e) The term "fabric" means any material (other than fiber, filament, or yarn) woven, knitted, felted, or otherwise produced from or in combination with any natural or synthetic fiber, film, or substitute therefor which is intended or sold for use in wearing apparel except that interlining fabrics when intended or sold for use in wearing apparel shall not be subject to this Act.

(f) The term "interlining" means any fabric which is intended for incorporation into an article of wearing apparel as a layer between an outer shell and an inner lining.

(g) The term "Commission" means the Federal Trade Commission.

(h) The term "Federal Trade Commission Act" means the Act of Congress entitled "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," approved September 26, 1914, as amended.

PROHIBITED TRANSACTIONS

SEC. 3. (a) The manufacture for sale, the sale, or the offering for sale, in commerce, or the importation into the United States, or the introduction, delivery for introduction, transportation or causing to be transported in commerce or for the purpose of sale or delivery after sale in commerce, of any article of wearing apparel which under the provisions of section 4 of this Act is so highly flammable as to be dangerous when worn by individuals, shall be unlawful and shall be an unfair method of competition and an unfair and deceptive act or practice in commerce under the Federal Trade Commission Act.

(b) The sale or the offering for sale, in commerce, or the importation into the United States, or the introduction, delivery for introduction, transportation or causing to be transported in commerce or for the purpose of sale or delivery after sale in commerce, of any fabric which under the provisions of section 4 of this Act is so highly flammable as to be dangerous when worn by individuals, shall be unlawful and shall be an unfair method of competition and an unfair and deceptive act or practice in commerce under the Federal Trade Commission Act.

V40250 DEC 30 75 XUM

(c) The manufacture for sale, the sale, or the offering for sale, of any article of wearing apparel made of fabric which under section 4 is so highly flammable as to be dangerous when worn by individuals and which has been shipped or received in commerce shall be unlawful and shall be an unfair method of competition and an unfair and deceptive act or practice in commerce under the Federal Trade Commission Act.

STANDARD OF FLAMMABILITY

SEC. 4. (a) Any fabric or article of wearing apparel shall be deemed so highly flammable within the meaning of section 3 of this Act as to be dangerous when worn by individuals if such fabric or any uncovered or exposed part of such article of wearing apparel exhibits rapid and intense burning when tested under the conditions and in the manner prescribed in the Commercial Standard promulgated by the Secretary of Commerce effective January 30, 1953, and identified as "Flammability of Clothing Textiles, Commercial Standard 191–53," or exhibits a rate of burning in excess of that specified in paragraph 3.11 of the Commercial Standard promulgated by the Secretary of Commerce effective May 22, 1953, and identified as "General Purpose Vinyl Plastic Film, Commercial Standard 192–53." For the purposes of this Act, such Commercial Standard 191–53 shall apply with respect to the hats, gloves, and footwear covered by section 2(d) of this Act, notwithstanding any exception contained in such Commercial Standard with respect to hats, gloves, and footwear.

(b) If at any time the Secretary of Commerce finds that the Commercial Standards referred to in subsection (a) of this section are inadequate for the protection of the public interest, he shall submit to the Congress a report setting forth his findings together with such proposals for legislation as he deems appropriate.

(c) Notwithstanding the provisions of paragraph 3.1 Commercial Standard 191–53, textiles free from nap, pile, tufting, flock or other type of raised fiber surface when tested as described in said standard shall be classified as class 1, normal flammability, when the time of flame spread is three and one-half seconds or more, and as class 3, rapid and intense burning when the time of flame spread is less than three and one-half seconds. [Approved August 23, 1954.]

ADMINISTRATION AND ENFORCEMENT

SEC. 5. (a) Except as otherwise specifically provided herein, sections 3, 5, 6, and 8(b) of this Act shall be enforced by the Commission under rules, regulations and procedures provided for in the Federal Trade Commission Act.

(b) The Commission is authorized and directed to prevent any person from violating the provisions of Section 3 of this Act in the same manner, by the same means and with the same jurisdiction, powers and duties as though all applicable terms and provisions of the Federal Trade Commission Act were incorporated into and made a part of this Act; and any such person violating any provision of section 3 of this Act shall be subject to the penalties and entitled to the privileges and immunities provided in said Federal Trade Commission Act as though the applicable terms and provisions of the said Federal Trade Commission Act were incorporated into and made a part of this Act.

(c) The Commission is authorized and directed to prescribe such rules and regulations as may be necessary and proper for purposes of administration and enforcement of this Act.

(d) The Commission is authorized to—

(1) cause inspections, analyses, tests, and examinations to be made of any article of wearing apparel or fabric which it has reason to believe falls within the prohibitions of this Act; and

(2) cooperate on matters related to the purposes of this Act with any department or agency of the Government; with any State, Territory, or possession or with the District of Columbia; or with any department, agency, or political subdivision thereof; or with any person.

INJUCTION AND CONDEMNATION PROCEEDINGS

SEC. 6. (a) Whenever the Commission has reason to believe that any persion is violating or is about to violate section 3 of this Act, and that it would be in the public interest to enjoin such violation until complaint under the Federal Trade Commission Act is issued and dismissed by the Commission or until order to cease and desist made thereon by the Commission has become final within the meaning of the Federal Trade Commission Act or is set aside by the court on review, the Commission may bring suit in the district court of the United States or in the United States court of any Territory for the district or Territory in which such person resides or transacts business, to enjoin such violation and upon proper showing a temporary injunction or restraining order shall be granted without bond.

(b) Whenever the Commission has reason to believe that any article of wearing apparel has been manufactured or introduced into commerce or any fabric has been introduced in commerce in violation of section 3 of this Act, it may institute proceedings by process of libel for the seizure and confiscation of such article of wearing apparel or fabric in any district court of the United States within the jurisdiction of which such article of wearing apparel or fabric is found. Proceedings in cases instituted under the authority of this section shall conform as nearly as may be to proceedings in rem in admiralty, except that on demand of either party and in the discretion of the court, any issue of fact shall be tried by jury. Whenever such proceedings involving identical articles of wearing apparel or fabrics are pending in two or more jurisdictions, they may be consolidated for trial by order of any such court upon application seasonably made by any party in interest upon notice to all other parties in interest. Any court granting an order of consolidation shall cause prompt notification thereof to be given to other courts having jurisdiction in the cases covered thereby and the clerks of such other courts shall transmit all pertinent records and papers to the court designated for the trial of such consolidated proceedings.

(c) In any such action the court upon application seasonably made before trial shall by order allow any party in interest, his attorney or agent, to obtain a repreesentative sample of the article of wearing apparel or fabric seized.

(d) If such articles of wearing apparel or fabrics are condemned by the court they shall be disposed of by destruction, by delivery to the owner or claimant thereof upon payment of court costs and fees and storage and other proper expenses and upon execution of good and sufficient bond to the effect that such articles of wearing apparel or fabrics will not be disposed of for wearing apparel purposes until properly and adequately treated or processed so as to render them lawful for introduction into commerce, or by sale upon execution of good and sufficient bond to the effect that such articles of wearing apparel or fabrics will not be disposed of for wearing apparel purposes until properly and adequately treated or processed so as to render them lawful for introduction into commerce. If such products are disposed of by sale the proceeds, less costs and charges, shall be paid into the Treasury of the United States.

PENALTIES

SEC. 7. Any person who willfully violates section 3 or 8(b) of this Act shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not more than $5,000 or be imprisoned not more than one year or both in the discretion of the court: Provided, That nothing herein shall limit other provisions of this Act.

GUARANTY

SEC. 8. (a) No person shall be subject to prosecution under section 7 of this Act for a violation of section 3 of this Act if such person (1) establishes a guaranty received in good faith signed by and containing the name and address of the person by whom the wearing apparel or fabric guaranteed was manufactured or from whom it was received, to the effect that reasonable and representative tests made under the procedures provided in section 4 of this Act show that the fabric covered by the guaranty, or used in the wearing apparel covered by the guaranty, is not, under the provisions of section 4 of this Act, so highly flammable as to be dangerous when worn by individuals, and (2) has not, by further processing, affected the flammability of the fabric or wearing apparel covered by the guaranty which he received. Such guaranty shall be either (1) a separate guaranty specifically designating the wearing apparel or fabric guaranteed, in which case it may be on the invoice or other paper relating to such wearing apparel or fabric; or (2) a continuing guaranty filed with the Commission applicable to any wearing apparel or fabric handled by a guarantor, in such form as the Commission by rules or regulations may prescribe.

(b) It shall be unlawful for any person to furnish, with respect to any wearing apparel or fabric, a false guaranty (except a person relying upon a guaranty to the same effect received in good faith signed by and containing the name and address of the person by whom the wearing apparel or fabric guaranteed was manufactured or from whom it was received) with reason to believe the wearing apparel or fabric falsely guaranteed may be introduced, sold, or transported in commerce, and any person who violates the provisions of this subsection is guilty of an unfair method of competition, and an unfair or deceptive act or practice, in commerce within the meaning of the Federal Trade Commission Act.

SHIPMENTS FROM FOREIGN COUNTRIES

SEC. 9. Any person who has exported or who has attempted to export from any foreign country into the United States any wearing apparel or fabric which, under the provisions of section 4, is so highly flammable as to be dangerous when worn by individuals may thenceforth be prohibited by the Commission from participating in the exportation from any foreign country into the United States of any wearing apparel or fabric except upon filing bond with the Secretary of the Treasury in a sum double the value of said products and any duty thereon, conditioned upon compliance with the provisions of this Act.

INTERPRETATION AND SEPARABILITY

SEC. 10. The provisions of this Act shall be held to be in addition to, and not in substitution for or limitation of, the provisions of any other law. If any provision of this Act or the application thereof to any person or circumstances is held invalid the remainder of the Act and the application of such provisions to any other person or circumstances shall not be affected thereby.

EXCLUSIONS

SEC. 11. The provisions of this Act shall not apply (a) to any common carrier, contract carrier, or freight forwarder with respect to an article of wearing apparel or fabric shipped or delivered for shipment into commerce in the ordinary course of its business; or (b) to any converter, processor, or finisher in performing a contract or commission service for the account of a person subject to the provisions of this Act: Provided, That said converter, processor, or finisher does not cause any article of wearing apparel or fabric to become subject to this Act contrary to the terms of the contract or commission service; or (c) to any article of wearing apparel or fabric shipped or delivered for shipment into commerce for the purpose of finishing or processing to render such article or fabric not so highly flammable, under the provisions of section 4 of this Act, as to be dangerous when worn by individuals.

EFFECTIVE DATE

SEC. 12. This Act shall take effect one year after the date of its passage.

AUTHORIZATION OF NECESSARY APPROPRIATIONS

SEC. 13. There is hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

PART 1610—STANDARD FOR THE FLAMMABILITY OF CLOTHING TEXTILES

Subpart A—The Standard

Sec.
1610.1 Purpose.
1610.2 Scope.
1610.3 Requirements.
1610.4 Methods of Test.
1610.5 Notes.

Subpart B—Rules and Regulations

1610.31 Terms defined.
1610.32 General requirements.
1610.33 Test procedures for textible fabrics and films.
1610.34 Only uncovered or exposed parts of wearing apparel to be tested.
1610.35 Testing certain classes of fabrics.
1610.36 Application of act to particular types of products.
1610.37 Reasonable and representative test under section 8 of the act.
1610.38 Maintenance of records by those furnishing guaranties.
1610.39 Shipments under 11(c) of the act.

Subpart C—Interpretations and Policies

1610.61 Clarification of the standard.

CODIFICATION NOTE: Part 1610 is a codification of the previously unpublished standard for flammability of clothing textiles, Commercial Standard 191–53, issued by the Department of Commerce, effective on January 30, 1953. This flammability standard became mandatory through section 4(a) of the Flammable Fabrics Act, as amended in 1954, and remains in effect due to the savings clause (section 11) of Pub. L. 90–189. 16 CFR Part 1609 contains the text of the Flammable Fabrics Act of 1953, as amended in 1954.

Subpart A—The Standard

AUTHORITY: Sec. 5, Pub. L. 83–88, 67 Stat. 112, as amended, 68 Stat. 770 (15 U.S.C. 1193); sec. 11, Pub. L. 90–189, 81 Stat. 568.

NOTE: All fabrics of natural or regenerated cellulose, as well as certain types of finished and unfinished fabrics made from other natural or synthetic fibers, are combustible. Some combustible fabrics, when used for clothing, are potentially dangerous to the wearer because of the speed and intensity of flame with which those fabrics burn and their ease of ignition, and because of the design of the garment. Two of these factors, the ease of ignition and the speed of flame spread, can be measured with the instrument described herein.

It is suggested that measurement of these two factors, together with visual observation of flame intensity, will permit the separation of various fabrics into three classes of flammability, thus assisting in a judgment of fabric suitability for clothing.

§ 1610.1 Purpose.

The purpose of this standard is to reduce danger of injury and loss of life by providing, on a national basis, standard methods of testing and rating the flammability of textiles and textile products for clothing use, thereby discouraging the use of any dangerously flammable clothing textiles.

§ 1610.2 Scope.

(a) The standard provides methods of testing the flammability of clothing and textiles intended to be used for clothing,[1] [a] [b] establishes three classes of flammability, sets forth the requirements which textiles shall meet to be so classified, and warns against the use of those textiles which have burning characteristics unsuitable for clothing.

(b) *Specific exceptions.*—This standard shall not apply to—

(1) Hats, gloves, and footwear [c]

(2) Interlining fabrics [2]

§ 1610.3 Requirements.

(a)(1) *Normal flammability, Class 1.*—This class shall include textiles which meet the minimum requirements set forth in paragraph (a)(1)(i) or paragraph (a)(1)(ii) of this section. Textiles meeting these requirements are generally accepted by the trade as having no unusual burning characteristics.

(i) *Textile without nap, pile, tufting, flock, or other type of raised-fiber surface.*—Such textiles in their original state and/or after being dry-cleaned and washed as described in § 1610.4(d) and § 1610.4(e), when tested as described in § 1610.4 shall be classified as Class 1, normal flammability, when the time of flame spread is 4 seconds [4] or more.

(ii) *Napped, pile, tufted, flocked, or other textiles having a raised-fiber surface.*—Such textiles in their original state and/or after being dry-cleaned and washed as described in § 1610.4(d) and § 1610.4(e), when tested as described in § 1610.4, shall be classified as Class 1, normal flammability, when the time of flame spread is less than 4 seconds and/or after being dry-cleaned and washed as described in § 1610.4(d) and § 1610.4(e), when tested as described in § 1610.4, shall be classified as Class 1, normal flammability, when the time of flame spread is more than 7 seconds, or when they burn with a rapid surface flash (from 0 to 7 seconds), provided the intensity of the flame is so low as not to ignite or fuse the base fabric.

(2) *Intermediate flammability, Class 2.*—This class shall include textiles which meet the minimum requirements set forth in paragraph (a)(2)(i) of this section. Textiles meeting these requirements are recognized by the trade as having flammability characteristics between normal and rapid and intense burning.

(i) *Napped, pile, tufted, flocked, or other textiles having a raised-fiber surface.*—Such textiles in their original state and/or after being dry-cleaned and washed as described in § 1610.4(d) and 1610.4(e), when tested as described in § 1610.4, shall be classified as Class 2, intermediate flammability, when the time of flame spread is from 4 to 7 seconds, both inclusive, and the base fabric ignites or fuses.

(3) *Rapid and intense burning, Class 3.*—This class shall include textiles which have burning characteristics as described in paragraphs (a)(3)(i) and (a)(3)(ii) of this section. Such textiles are considered dangerously flammable and recognized by the trade as being unsuitable for clothing because of their rapid and intense burning.

(i) *Textiles free from nap, pile, tufting, flock, or other type of raised-fiber surface.*—Such textiles in their original state and/or after being dry-cleaned and washed as described in § 1610.4(d) and § 1610.4(e), when tested as described in § 1610.4, shall be classified as Class 3, rapid and intense burning, when the time of flame spread is less than 4 seconds.[e]

(ii) *Napped, pile, tufted, flocked, or other textiles having a raised-fiber surface.*—Such textiles in their original state and/or after being dry-cleaned and washed as described in § 1610.4(d) and § 1610.4(e) when tested as described in § 1610.4 shall be classified as Class 3, rapid and intense burning, when the time of flame spread is less than 4 seconds and when the intensity of flame is such as to ignite or fuse the base fabric.

§ 1610.4 Methods of test.

(a)(1) *Number and size of specimens required.*—Five specimens, each measuring 2 by 6 inches, are required for each test.

(2) For textiles without a raised-fiber surface the long dimension shall be that

[1] Hereinafter, "clothing and textiles intended to be used for clothing" shall be referred to as "textiles."

[a] All the numbered footnotes are from the original printing by the Department of Commerce. All the lettered footnotes are new.

[b] Refer to sections 2 and 4 of the Flammable Fabrics Act of 1953, as amended in 1954, set out at 16 CFR Part 1609, for the scope of the Standard.

[c] Refer to sections 2(d) and 4 of the Flammable Fabrics Act of 1953, as amended in 1954, set out at 16 CFR Part 1609 for exceptions to this exception.

[2] Interlining fabrics are not considered dangerously flammable when used as interlinings. When used for other purposes they should be tested and rated the same as any other fabrics.

[4] On August 23, 1954, the Flammable Fabrics Act was amended, changing the test for the time of flame spread for plain-surface fabrics, provided in paragraphs 3.1.1.1 (now § 1610.3(a)(1)(i)) and 3.1.3.1 (now § 1610.(a)(3)(i)), by reducing the burning time from 4 to 2½ seconds. For the purpose of the administration of that act, therefore, the 3½ second burning time for plain-surface fabrics is applicable.

[e] See footnote d.

V 40 250
DEC 30 75
XUM

in which they burn most rapidly, and the more rapidly burning surface shall be tested. To establish the long dimension and the surface, preliminary tests are made as described in paragraph (g) of this section, with specimens cut in different directions.

(3) For textiles having a raised-fiber surface, the direction of the lay of the surface fibers shall be parallel with the long dimension of the specimens. For this type of textiles with varying depths of pile, tufting, etc., the specimens are taken from that part and tested on that surface which has the fastest rate of burning.

(4) If the specimens in the preliminary test, when tested as described in paragraph (g) of this section, do not ignite or are very slow burning, or should have a fire-retarding finish, a swatch large enough to provide the specimens required for the test, with allowance for shrinkage in dry cleaning and washing, is subjected to the dry cleaning and washing procedures described in paragraph (d) and (e) of this section. The specimens for the flammability test are then taken from it.

(5) The specimens required for testing, each 2 by 6 inches, are marked out on the back (or under side) of each sample with the long dimension in the direction in which burning is most rapid, as established in the preliminary trials. The end of the specimen toward which and on the face of which burning is most rapid is identified by attaching a staple to it. The specimens are then cut out.

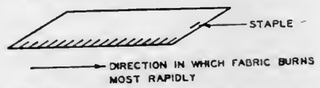

FIGURE 1.—Specimen showing staple.

(b) *Flammability tester.*[3]—The flammability tester consists of a draft-proof ventilated chamber enclosing a standardized ignition medium, sample rack, and automatic timing device.

(1) *Draft-proof chamber with vented top* (*A, fig. 2*).—This metal chamber prevents air circulation around the specimen rack and flame, but permits free ventilation for rapid oxidation. The chamber is 14½ inches wide, 8½ inches deep, and 14 inches high. There are 12 half-inch holes equidistant along the rear of the top closure. A ventilating strip is provided at the base of the sliding glass door in the front of the apparatus.

(2) *Specimen rack* (*B, fig. 2*).—The specimen rack provides supports for the frames in which the specimens are mounted. The angle of inclination is 45°. Two guide pins projecting downward from the center of the base of the rack travel in slots provided in the floor of the chamber so that adjustment can be made for the thickness of the specimen in relation to the flame front. A stop is provided in the base of the chamber to assist in adjusting the position of the rack.

(3) *Specimen holder* (*C, fig. 2*).—The specimen holder consists of two 1/16 inch matched metal plates with clamps mounted along the sides, between which the specimen is fixed. The plates are slotted and loosely pinned for alinement. The two plates of the holder cover all but 1½ inches of the width of the specimen for its full length. The specimen holder is supported in the draft-proof chamber on the rack at an angle of 45°. Five specimen holders are provided.

(4) *Indicating finger* (*D, fig. 2*).—The forepart of this finger touches the specimen when the rack is adjusted. By means of this finger the thickness of the specimen is compensated for in the throw of the gas nozzle.

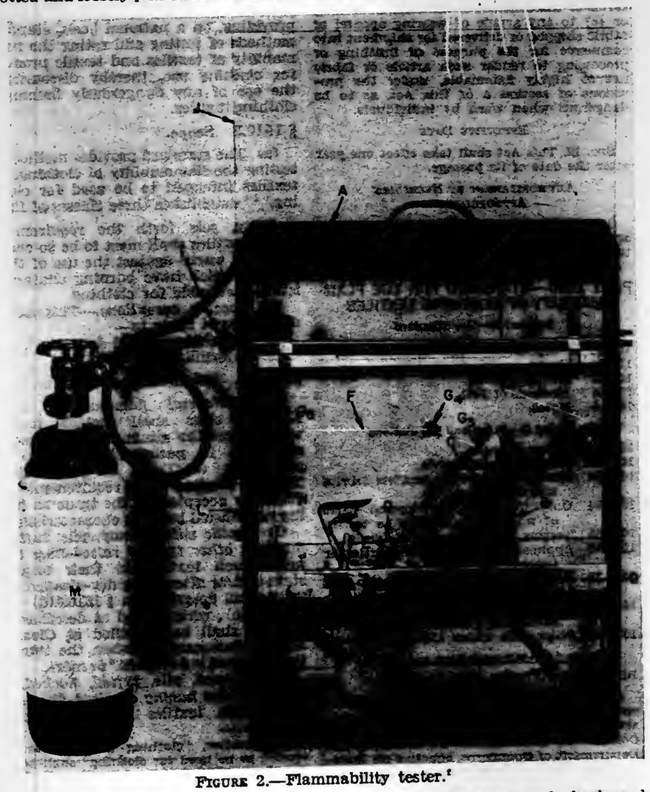

FIGURE 2.—Flammability tester.[4]

(5) *Control knobs* (*not shown*).—There are two of these knobs which hold the rack in test position. The knobs can be reached under the stage of the cabinet and permit forward and backward movements of the rack when loosened.

(6) *Ignition medium* (*E, fig. 2*).—The ignition medium consists of a spring-motor-driven gas jet formed around a 26-gage hypodermic needle. A trigger located in the front of the apparatus serves to wind the spring-motor when the machine is placed in operation. The gas jet is protected by a copper shield.

(7) *Stop cord* (*F, fig. 2*).—This cord, stretched from the spool (*P*, fig. 2) through suitable thread guides provided on the specimen frame and chamber walls, permits the lacing of the cord in the proper position exactly 5 inches from the point where the center of the ignition flame impinges on the test specimen. The stop cord consists of a No. 50 mercerized sewing thread and measures the rise and spread of the flame from the test specimen.

(8) *Pulley or eye* (*G₁, fig. 2*).—The pulley or eye is the support and guide for the stop cord.[5]

(9) *Stop weight* (*H, fig. 2*).—The weight, attached by means of a clip to the stop cord, in dropping actuates the stop motion.

(10) *Slide door control* (*I, fig. 2*).—This knob moves the catch mechanism used to hold the sliding door in an open position for insertion of test specimen racks.

(11) *Slide door* (*J, fig. 2*).—A glass door in its normal position slides in the grooves at the front of the cabinet.

(12) *Fuel-control valve* (*K, fig. 2*).—This valve consists of a sensitive control device for regulating the fuel supply at the tank. The valve ends in a ½-inch male connection for attachment to the standard butane tank of 2 pounds capacity.

(13) *Flow meter.* (*L, fig. 2*).—A flow meter is used to bring the fuel supply to test level by means of the control valve. The flow meter consists of a U-shaped glass tube cut into the gas line in a manner to register the gas pressure delivered to the microburner. Attached to the case wall behind the flow meter is a movable metal plate with two parallel horizontal lines properly spaced for the desired flame length. When the pressure is off, the plate is so regulated that the liquid level in both sides of the U-shaped tube meets the lower line. When the test is made the pressure is so adjusted that the higher liquid level in the U-shaped tube meets the upper line.

(14) *Butane, c.p., container*[6] (*M, fig. 2*).—This fuel supply is a No. 4 cylinder of c.p. butane.

(15) *Stopwatch and timing mechanism* (*N, fig. 2*).—This watch, by means of special attachments, is actuated to a start by connection with the gas jet (E, fig. 2). A driving mechanism on rear of cabinet (*S*, fig. 2) moves the gas jet to its most forward position and automatically starts the timing at the moment of flame impact. The falling weight (H, fig. 2), when caused to move by severance of cord (F, fig. 2), stops the watch. Timing is read directly.

(16) *Starting lever* (*O, fig. 2*).—This lever is operated from left to right in one stroke and is released to operate the gas jet.

(17) *Cord supply* (*P, fig. 2*).—This supply, consisting of a spool of No. 50 mercerized cotton sewing thread, is fastened to the side of the chamber and can be withdrawn by releasing the thumbscrew holding same in position.

(18) *Cord loop* (*G₂, fig. 2*).—At a point behind the stop cord (F, fig. 2), on the rear panel, there is installed another loop to draw the cord away from directly over the flame.

(19) *Draft ventilator strip* (*Q, fig. 2*).—A draft ventilator strip is placed across the front opening, sealing the space between the sliding door when in lowered position and the base on which the grid rack is attached.

[3] This apparatus is manufactured by the United States Testing Co., 1415 Park Avenue, Hoboken, N.J. Blueprints of working plans for the manufacture of this apparatus are available, at a nominal charge, from the above-named company.

[4] This is a new photograph of the flammability tester which reflects the clarification of the stop cord position, set out at § 1610.61(c)(1). References in the text have been changed to correspond with the new photograph, and therefore the letters in the new figure 2 do not entirely correspond to the old figure 2, which appeared in the earlier printings. The letter changes are: (new:old) E:F, F:G, G₂:H, H:I, I:J, J:K, K:L, L:V, G₁:Q, Q:R.

[5] Other guides are specifically identified as the skyhook (G_3), the L-shaped guides (G_4, G_5) and a pigtail guide (G_6). See § 1610.61(c)(1) for a clarification of the stop cord position.

[6] Butane, c.p. No. 4 cylinders containing 2 pounds of butane may be obtained from, among others, the Matheson Co., Inc., East Rutherford, N.J.

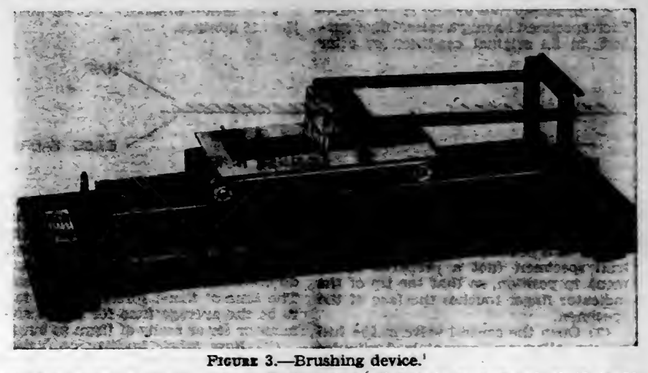

FIGURE 3.—Brushing device.[1]

(c) *Brushing device.*[1][2]

(1) This device consists of a baseboard over which a smaller carriage is drawn. This carriage runs on parallel tracks attached to the edges of the upper surface of the baseboard. The brush is hinged with pin hinges at the rear edge of the baseboard and rests on the carriage vertically with a pressure of 150 grams.
